

STATE OF MICHIGAN
STATE OFFICE OF ADMINISTRATIVE HEARINGS AND RULES

ADMINISTRATIVE HEARINGS FOR THE
DEPARTMENT OF HUMAN SERVICES

IN THE MATTER OF: [REDACTED]

Claimant

Reg. No: 2007-19714

Issue No: 4031; 2009

Case No: [REDACTED]

Load No: [REDACTED]

Hearing Date:

October 3, 2007

Genesee County DHS

ADMINISTRATIVE LAW JUDGE: Jana A. Bachman

HEARING DECISION

This matter is before the undersigned Administrative Law Judge pursuant to MCL 400.9; and MCL 400.37 upon claimant's request for a hearing. After due notice, a telephone hearing was held October 3, 2007.

ISSUE

Whether the Department of Human Services (department) properly determined that claimant has not established disability for purposes of Medical Assistance (MA) and State Disability Assistance (SDA).

FINDINGS OF FACT

The Administrative Law Judge, based upon the competent, material and substantial evidence on the whole record, finds as material fact:

(1) During February 2007, claimant was a recipient of SDA. Claimant's assistance was due for medical review. Claimant submitted updated medical records for department consideration. At the same time, claimant applied for MA.

(2) May 9, 2007, the Medical Review Team denied claimant's SDA medical review and MA application. Department Exhibit (department) A.

(3) May 21, 2007, the department sent claimant written notice that MA was denied and SDA would terminate.

(4) May 30, 2007, the department received claimant's timely request for hearing. Department's negative action to terminate SDA was deleted pending hearing. The MA denial went into effect.

(5) August 17, 2007, the State Hearing Review Team (SHRT) denied claimant's SDA medical review and MA application. Department B.

(6) October 3, 2007, the telephone hearing was held. Prior to the close of the record, claimant submitted additional medical evidence. He waived his right to a timely hearing decision. November 6, 2007, the SHRT again denied claimant's SDA medical review and MA application. SHRT Decision, 11/6/07.

(7) Claimant asserts disability based on impairments caused by spinal arthritis and colostomy.

(8) Claimant testified at hearing. Claimant is 45 years old, 5'11" tall, and weighs 201 pounds. Claimant completed high school and optical technician training. Claimant is able to read, write and perform basic math. Claimant is able to care for his needs at home. Claimant's driver's license is suspended.

(9) Claimant's past relevant employment has been as a cook, optical technician, and security guard.

(10) At last positive SDA decision in November 2006, claimant was post colostomy on or about September 2006. Department A, pages 19-24.

(11) At SDA review and MA application, claimant's physician completed a Medical Examination Report (DHS-54) following physical exam that took place on March 9, 2007. Doctor indicates claimant has temporary colostomy that needs reversal. Claimant is currently functioning well. Doctor lists restrictions that claimant will have post surgery, if surgery is completed. Doctor does not list current restrictions. Department A, pages 9-10.

(12) At SDA review and MA application, claimant underwent a psychological assessment. A narrative report was prepared that states an AXIS I diagnosis of malingering. Report states claimant is in contact with reality and has normal gait, posture, and motor activity. Speech was not impaired and stream of mental activity was spontaneous and organized. There was no significant evidence of hallucinations, delusions, persecutions, obsessions, thoughts controlled by others, or unusual powers. Affect was appropriate to mood. He was oriented X3. Department A, Psychological Report, 1/24/07.

(13) At SDA review and MA application, claimant was examined by a neurologist on September 6, 2007. A report was prepared that states that claimant has a history of neck and back pain. Cervical spine has no masses, no thyromegaly, no skin lesions, symmetrical, no scars, and no lymphadenopathy. There is tenderness to palpation at C5-6, C6-7, on left side, right trapezius, and left trapezius. There is muscle spasm in the posterior muscles with decreased range of motion. Right upper extremity has sensory deficit. Right upper deep tendon reflexes are normal, as are left upper deep tendon reflexes. There is no clonus or muscle atrophy bilaterally. Hoffman's and Tronner's are positive on right. MRI revealed findings consistent with herniated nucleus

pulpous at C5-6 and C6-7. Neuroforaminal stenosis is noted at C5-6 and C6-7. Doctor indicates claimant has idiopathic back pain in the lumbar spine as well as degenerative disc disease and radiculopathy. Claimant A.

(14) At SDA review, claimant has medically improved or was not disabled at the time of last positive decision. At SDA review, he is functioning well with his colostomy. He has no apparent cognitive limitations or impairments. Claimant has a herniated nucleus pulposus with neuroforaminal stenosis at C5-6 and C6-7. Claimant has reduced sensation in his upper right arm and tenderness in his trapezius bilaterally. Right upper deep tendon reflexes are normal and there is no clonus or muscle atrophy. He has muscle spasm in the posterior muscles with decreased range of motion. He reports lumbar pain.

(15) Claimant's medical improvement is related to his ability to work.

(16) Claimant is capable of performing at least sedentary work activities.

CONCLUSIONS OF LAW

The State Disability Assistance (SDA) program which provides financial assistance for disabled persons is established by 2001 PA 82. The Family Independence Agency (FIA or agency) administers the SDA program pursuant to MCL 400.10, et seq., and MAC R 400.3151-400.3180. Agency policies are found in the Program Administrative Manual (PAM), the Program Eligibility Manual (PEM) and the Program Reference Manual (PRM).

2004 PA 344, Sec. 604, establishes the State Disability Assistance program. It reads in part:

Sec. 604 (1) The department shall operate a state disability assistance program. Except as provided in subsection (3), persons eligible for this program shall include needy

citizens of the United States or aliens exempted from the Supplemental Security Income citizenship requirement who are at least 18 years of age or emancipated minors meeting 1 or more of the following requirements:

- (a) A recipient of supplemental security income, social security or medical assistance due to disability or 65 years of age or older.
 - (b) A person with a physical or mental impairment which meets federal SSI disability standards, except that the minimum duration of the disability shall be 90 days. Substance abuse alone is not defined as a basis for eligibility.
 - (c) A resident of an adult foster care facility, a home for the aged, a county infirmary, or a substance abuse treatment center.
 - (d) A person receiving 30-day post-residential substance abuse treatment.
 - (e) A person diagnosed as having acquired immunodeficiency syndrome.
 - (f) A person receiving special education services through the local intermediate school district.
 - (g) A caretaker of a disabled person as defined in subdivision (a), (b), (e), or (f) above.
- (2) Applicants for and recipients of the state disability assistance program shall be considered needy if they:
- (a) Meet the same asset test as is applied to applicants for the family independence program.
 - (b) Have a monthly budgetable income that is less than the payment standard.
- (3) Except for a person described in subsection (1)(c) or (d), a person is not disabled for purposes of this section if his or her drug addiction or alcoholism is a contributing factor material to the determination of disability. Material to the determination of

disability' means that, if the person stopped using drugs or alcohol, his or her remaining physical or mental limitations would not be disabling. If his or her remaining physical or mental limitations would be disabling, then the drug addiction or alcoholism is not material to the determination of disability and the person may receive state disability assistance. Such a person must actively participate in a substance abuse treatment program, and the assistance must be paid to a third party or through vendor payments. For purposes of this section, substance abuse treatment includes receipt of inpatient or outpatient services or participation in alcoholics anonymous or a similar program. 1995 PA 156, Sec. 605.

- (4) A refugee or asylee who loses his or her eligibility for the federal supplemental security income program by virtue of exceeding the maximum time limit for eligibility as delineated in Section 402 of Title IV of the Personal Responsibility and Work Opportunity Reconciliation Act of 1996, Public Law 104-193, 8 U.S.C. 1612, and who otherwise meets the eligibility criteria under this section shall be eligible to receive benefits under the state disability assistance program.

Pursuant to Federal Rule 42 CFR 435.540, the Department of Human Services uses the federal Supplemental Security Income (SSI) policy in determining eligibility for disability under the Medical Assistance program. Under SSI, disability is defined as:

...the inability to do any substantial gainful activity by reason of any medically determinable physical or mental impairment which can be expected to result in death or which has lasted or can be expected to last for a continuous period of not less than 12 months.... 20 CFR 416.905

A set order is used to determine disability. Current work activity, severity of impairments, residual functional capacity, past work, age, or education and work experience is reviewed. If there is a finding that an individual is disabled or not disabled at any point in the review, there will be no further evaluation. 20 CFR 416.920.

If an individual is working and the work is substantial gainful activity, the individual is not disabled regardless of the medical condition, education and work experience. 20 CFR 416.920(c).

If the impairment or combination of impairments do not significantly limit physical or mental ability to do basic work activities, it is not a severe impairment(s) and disability does not exist. Age, education and work experience will not be considered. 20 CFR 416.920.

Statements about pain or other symptoms do not alone establish disability. There must be medical signs and laboratory findings which demonstrate a medical impairment.... 20 CFR 416.929(a).

...Medical reports should include--

- (1) Medical history.
- (2) Clinical findings (such as the results of physical or mental status examinations);
- (3) Laboratory findings (such as blood pressure, X-rays);
- (4) Diagnosis (statement of disease or injury based on its signs and symptoms).... 20 CFR 416.913(b).

In determining disability under the law, the ability to work is measured. An individual's functional capacity for doing basic work activities is evaluated. If an individual has the ability to perform basic work activities without significant limitations, he or she is not considered disabled. 20 CFR 416.994(b)(1)(iv).

Basic work activities are the abilities and aptitudes necessary to do most jobs. Examples of these include --

- (1) Physical functions such as walking, standing, sitting, lifting, pushing, pulling, reaching, carrying, or handling;
- (2) Capacities for seeing, hearing, and speaking;
- (3) Understanding, carrying out, and remembering simple instructions;
- (4) Use of judgment;
- (5) Responding appropriately to supervision, co-workers and usual work situations; and
- (6) Dealing with changes in a routine work setting. 20 CFR 416.921(b).

Medical findings must allow a determination of (1) the nature and limiting effects of your impairment(s) for any period in question; (2) the probable duration of the impairment; and (3) the residual functional capacity to do work-related physical and mental activities. 20 CFR 416.913(d).

Medical evidence may contain medical opinions. Medical opinions are statements from physicians and psychologists or other acceptable medical sources that reflect judgments about the nature and severity of the impairment(s), including your symptoms, diagnosis and prognosis, what an individual can do despite impairment(s), and the physical or mental restrictions. 20 CFR 416.927(a)(2).

All of the evidence relevant to the claim, including medical opinions, is reviewed and findings are made. 20 CFR 416.927(c).

For mental disorders, severity is assessed in terms of the functional limitations imposed by the impairment. Functional limitations are assessed using the criteria in paragraph (B) of the listings for mental disorders (descriptions of restrictions of activities of daily living, social functioning; concentration, persistence, or pace; and ability to

tolerate increased mental demands associated with competitive work).... 20 CFR, Part 404, Subpart P, App. 1, 12.00(C).

If an individual fails to cooperate by appearing for a physical or mental examination by a certain date without good cause, there will not be a finding of disability. 20 CFR 416.994(b)(4)(ii).

When determining disability, the federal regulations require that several considerations be analyzed in sequential order. If disability can be ruled out at any step, analysis of the next step is not required. These steps are:

1. Does the client perform Substantial Gainful Activity (SGA)? If yes, the client is ineligible for MA. If no, the analysis continues to Step 2. 20 CFR 416.920(b).
2. Does the client have a severe impairment that has lasted or is expected to last 12 months or more or result in death? If no, the client is ineligible for MA. If yes, the analysis continues to Step 3. 20 CFR 416.920(c).
3. Does the impairment appear on a special listing of impairments or are the client's symptoms, signs, and laboratory findings at least equivalent in severity to the set of medical findings specified for the listed impairment? If no, the analysis continues to Step 4. If yes, MA is approved. 20 CFR 416.290(d).
4. Can the client do the former work that he/she performed within the last 15 years? If yes, the client is ineligible for MA. If no, the analysis continues to Step 5. 20 CFR 416.920(e).
5. Does the client have the Residual Functional Capacity (RFC) to perform other work according to the guidelines set forth at 20 CFR 404, Subpart P, Appendix 2, Sections 200.00-204.00? If yes, the analysis ends and the client is ineligible for MA. If no, MA is approved. 20 CFR 416.920(f).

Medical improvement. Medical improvement is any decrease in the medical severity of your impairment(s) which was present at the time of the most recent favorable

medical decision that you were disabled or continued to be disabled. A determination that there has been a decrease in medical severity must be based on changes (improvement) in the symptoms, signs and/or laboratory findings associated with your impairment(s).... 20 CFR 416.994(b)(1)(i).

Medical improvement not related to ability to do work. Medical improvement is not related to your ability to work if there has been a decrease in the severity of the impairment(s) as defined in paragraph (b)(1)(i) of this section, present at the time of the most recent favorable medical decision, but no increase in your functional capacity to do basic work activities as defined in paragraph (b)(1)(iv) of this section. If there has been any medical improvement in your impairment(s), but it is not related to your ability to do work and none of the exceptions applies, your benefits will be continued.... 20 CFR 416.994(b)(1)(ii).

Medical improvement that is related to ability to do work. Medical improvement is related to your ability to work if there has been a decrease in the severity, as defined in paragraph (b)(1)(i) of this section, of the impairment(s) present at the time of the most recent favorable medical decision **and** an increase in your functional capacity to do basic work activities as discussed in paragraph (b)(1)(iv) of this section. A determination that medical improvement related to your ability to do work has occurred does not, necessarily, mean that your disability will be found to have ended unless it is also shown that you are currently able to engage in substantial gainful activity as discussed in paragraph (b)(1)(v) of this section.... 20 CFR 416.994(b)(1)(iii).

Functional capacity to do basic work activities. Under the law, disability is defined, in part, as the inability to do any substantial gainful activity by reason of any medically determinable physical or mental impairment(s).... 20 CFR 416.994(b)(1)(iv).

...A decrease in the severity of an impairment as measured by changes (improvement) in symptoms, signs or laboratory findings can, if great enough, result in an increase in the functional capacity to do work activities.... 20 CFR 416.994(b)(1)(iv)(A).

When new evidence showing a change in signs, symptoms and laboratory findings establishes that both medical improvement has occurred and your functional capacity to perform basic work activities, or residual functional capacity, has increased, we say that medical improvement which is related to your ability to do work has occurred. A residual functional capacity assessment is also used to determine whether you can engage in substantial gainful activity and, thus, whether you continue to be disabled.... 20 CFR 416.994(b)(1)(iv)(A).

...Point of comparison. For purposes of determining whether medical improvement has occurred, we will compare the current medical severity of that impairment(s) which was present at the time of the most recent favorable medical decision that you were disabled or continued to be disabled to the medical severity of that impairment(s) at that time.... 20 CFR 416.994(b)(1)(vii).

...If medical improvement has occurred, we will compare your current functional capacity to do basic work activities (i.e., your residual functional capacity) based on the previously existing impairments with your prior residual functional capacity in order to determine whether the medical improvement is related to your ability to do work. The most recent favorable medical decision is the latest decision involving a consideration of the medical evidence and the issue of whether you were disabled or continued to be disabled which became final. 20 CFR 416.994(b)(1)(vi).

At Step 1 medical improvement/SDA review, claimant's impairments do not meet or equal any Social Security Listing.

At Step 2, medical improvement/SDA review, at last positive SDA decision, claimant was 2 months post colostomy. At SDA review, claimant is functioning well with colostomy. Finding of Fact 10-11.

At Step 3, claimant has medical improvement. Claimant was two months post colostomy surgery. At SDA review, claimant is functioning well with his colostomy. Finding of Fact 14. The record does not indicate claimant has severe restrictions due to

the colostomy. Lack of severe restrictions and well-functioning colostomy enhances claimant's ability to perform work activities. Accordingly, claimant's medical improvement is related to his ability to perform work. Finding of Fact 15.

At Step 4, claimant's medical improvement is related to his ability to perform work. Finding of Fact 14. See Step 3, above.

At Step 5, claimant has herniated nucleus pulposus at C5-6 and C6-7. He has diminished sensation in his right upper extremity, tenderness to palpation in trapezius bilaterally, and muscle spasm in posterior muscles with reduced range of motion. Right upper deep tendon reflexes are normal and there is no clonus or muscle atrophy. Finding of Fact 13-14. Claimant has a functioning colostomy. Finding of Fact 11. Accordingly, the medical evidence of record is sufficient to establish that claimant's combination of impairments do not prevent all employment for 90 days or more.

At Step 6, claimant's past relevant employment has been as a cook, optical technician, and security guard. Finding of Fact 9. The record does not indicate claimant has specific physical limitations or impairments due to physical or mental limitations or impairments. However, claimant's past employment as a cook generally would require lifting heavy pans and foodstuffs. Claimant's jobs as an optical technician and security guard normally do not require lifting or strenuous physical activity. Therefore, the medical evidence of record is sufficient to establish that claimant has impairments that are so severe as to likely prevent him from performing the tasks required by past relevant employment as a cook. However, the medical evidence is sufficient to establish that claimant is able to perform the tasks of a security guard and optical technician.

At Step 7, the medical evidence of record establishes that claimant has herniated nucleus pulposus at C5-6 and C6-7. He has some restricted range of motion and tenderness in his trapezius. He has diminished sensation in his right upper extremity. He has a functioning colostomy. Finding of Fact 11-14. Accordingly, the objective medical evidence of record is sufficient to establish that claimant is able to perform at least sedentary work activities. Considering claimant's vocational profile (younger individual, high school or more education, and history of unskilled and skilled work) and relying on Vocation Rule 201.28, claimant is not disabled. Finding of Fact 16.

After careful examination of the record and for the reasons discussed at Steps 1 through 7 above, the Administrative Law Judge decides that claimant does not meet the federal statutory requirements for disability. Therefore, claimant does not meet the disability requirement for SDA based on disability.

The Medical Assistance (MA) program is established by Title XIX of the Social Security Act and is implemented by Title 42 of the Code of Federal Regulations (CFR). The Department of Human Services (DHS or department) administers the MA program pursuant to MCL 400.10, et seq., and MCL 400.105; MSA 16.490(15). Department policies are found in the Program Administrative Manual (PAM), the Program Eligibility Manual (PEM) and the Program Reference Manual (PRM).

Pursuant to Federal Rule 42 CFR 435.540, the Department of Human Services uses the federal Supplemental Security Income (SSI) policy in determining eligibility for disability under the Medical Assistance program. Under SSI, disability is defined as:

...the inability to do any substantial gainful activity by reason of any medically determinable physical or mental impairment which can be expected to result in death or

which has lasted or can be expected to last for a continuous period of not less than 12 months.... 20 CFR 416.905

A set order is used to determine disability. Current work activity, severity of impairments, residual functional capacity, past work, age, or education and work experience is reviewed. If there is a finding that an individual is disabled or not disabled at any point in the review, there will be no further evaluation. 20 CFR 416.920.

If an individual is working and the work is substantial gainful activity, the individual is not disabled regardless of the medical condition, education and work experience. 20 CFR 416.920(c).

If the impairment or combination of impairments do not significantly limit physical or mental ability to do basic work activities, it is not a severe impairment(s) and disability does not exist. Age, education and work experience will not be considered. 20 CFR 416.920.

Statements about pain or other symptoms do not alone establish disability. There must be medical signs and laboratory findings which demonstrate a medical impairment.... 20 CFR 416.929(a).

...Medical reports should include–

- (1) Medical history.
- (2) Clinical findings (such as the results of physical or mental status examinations);
- (3) Laboratory findings (such as blood pressure, X-rays);
- (4) Diagnosis (statement of disease or injury based on its signs and symptoms).... 20 CFR 416.913(b).

In determining disability under the law, the ability to work is measured. An individual's functional capacity for doing basic work activities is evaluated. If an

individual has the ability to perform basic work activities without significant limitations, he or she is not considered disabled. 20 CFR 416.994(b)(1)(iv).

Basic work activities are the abilities and aptitudes necessary to do most jobs.

Examples of these include --

- (1) Physical functions such as walking, standing, sitting, lifting, pushing, pulling, reaching, carrying, or handling;
- (2) Capacities for seeing, hearing, and speaking;
- (3) Understanding, carrying out, and remembering simple instructions;
- (4) Use of judgment;
- (5) Responding appropriately to supervision, co-workers and usual work situations; and
- (6) Dealing with changes in a routine work setting. 20 CFR 416.921(b).

Medical findings must allow a determination of (1) the nature and limiting effects of your impairment(s) for any period in question; (2) the probable duration of the impairment; and (3) the residual functional capacity to do work-related physical and mental activities. 20 CFR 416.913(d).

Medical evidence may contain medical opinions. Medical opinions are statements from physicians and psychologists or other acceptable medical sources that reflect judgments about the nature and severity of the impairment(s), including your symptoms, diagnosis and prognosis, what an individual can do despite impairment(s), and the physical or mental restrictions. 20 CFR 416.927(a)(2).

All of the evidence relevant to the claim, including medical opinions, is reviewed and findings are made. 20 CFR 416.927(c).

For mental disorders, severity is assessed in terms of the functional limitations imposed by the impairment. Functional limitations are assessed using the criteria in paragraph (B) of the listings for mental disorders (descriptions of restrictions of activities of daily living, social functioning; concentration, persistence, or pace; and ability to tolerate increased mental demands associated with competitive work)... 20 CFR, Part 404, Subpart P, App. 1, 12.00(C).

If an individual fails to cooperate by appearing for a physical or mental examination by a certain date without good cause, there will not be a finding of disability. 20 CFR 416.994(b)(4)(ii).

At Step 1, claimant is not engaged in substantial gainful activity and so is not disqualified from receiving disability at Step 1.

At Step 2, the objective medical evidence of record indicates that claimant has a functioning colostomy. He has herniated nucleus pulposus at C5-6 and C6-7. He has some diminished sensation in his upper right extremity. He has tenderness and restricted range of motion in his trapezius. The record does not indicate loss of fine and/or gross dexterity. Finding of Fact 11, 13.

At Step 2, the objective medical evidence of record is not sufficient to establish that claimant has severe impairments that have lasted or are expected to last 12 months or more and prevent employment at any job for 12 months or more. Therefore, claimant is disqualified from receiving disability at Step 2.

At Step 3, claimant's impairments do not rise to the level necessary to be specifically disabling by law.

At Step 4, claimant's past relevant employment has been as a cook, security guard and optical technician. Claimant has some impairment in his upper back and some loss of sensation in his right upper extremity due to herniated pulposus at C5-6 and C6-7. Finding of Fact 13. See discussion at Step 2, above.

At Step 4, the objective medical evidence of record is not sufficient to establish that claimant has functional impairments that prevent claimant, for a period of 12 months or more, from engaging in a full range of duties required by claimant's past relevant employment as a security guard or optical technician. Therefore, claimant is disqualified from receiving disability at Step 4.

The residual functional capacity is what an individual can do despite limitations. All impairments will be considered in addition to ability to meet certain demands of jobs in the national economy. Physical demands, mental demands, sensory requirements and other functions will be evaluated.... 20 CFR 416.945(a).

To determine the physical demands (exertional requirements) of work in the national economy, we classify jobs as sedentary, light, medium and heavy. These terms have the same meaning as they have in the Dictionary of Occupational Titles, published by the Department of Labor.... 20 CFR 416.967.

Sedentary work. Sedentary work involves lifting no more than 10 pounds at a time and occasionally lifting or carrying articles like docket files, ledgers, and small tools. Although a sedentary job is defined as one which involves sitting, a certain amount of walking and standing is often necessary in carrying out job duties. Jobs are sedentary if walking and standing are required occasionally and other sedentary criteria are met. 20 CFR 416.967(a).

Light work. Light work involves lifting no more than 20 pounds at a time with frequent lifting or carrying of objects weighing up to 10 pounds. Even though the weight lifted may be very little, a job is in this category when it requires a good deal of walking or standing, or when it involves sitting most of the time with some pushing and pulling of arm or leg controls.... 20 CFR 416.967(b).

Medium work. Medium work involves lifting no more than 50 pounds at a time with frequent lifting or carrying of objects weighing up to 25 pounds. If someone can do medium work, we determine that he or she can also do sedentary and light work. 20 CFR 416.967(c).

Heavy work. Heavy work involves lifting no more than 100 pounds at a time with frequent lifting or carrying of objects weighing up to 50 pounds. If someone can do heavy work, we determine that he or she can also do medium, light, and sedentary work. 20 CFR 416.967(d).

At Step 5, the objective medical evidence of record indicates that claimant has a herniated nucleus pulposus at C5-6 and C6-7. He has some pain, limited range of motion and loss of sensation in his upper back and right upper extremity. The record does not indicate loss of strength or dexterity in the upper extremities. Finding of Fact 13; Department A. See discussion at Step 2, above.

At Step 5, the objective medical evidence of record is sufficient to establish that claimant retains the residual functional capacity to perform at least sedentary work activities. Considering claimant's Vocational Profile (younger individual, high school or more education, and history of skilled and unskilled work) and relying on Vocational

Rule 201.28, claimant is not disabled. Therefore, claimant is disqualified from receiving disability at Step 5.

Claimant does not meet the federal statutory requirements to qualify for disability. Therefore, claimant does not qualify for Medical Assistance based on disability and the department properly denied claimant's application.

DECISION AND ORDER

The Administrative Law Judge, based upon the above findings of fact and conclusions of law, decides that claimant has not established disability for purposes of Medical Assistance and State Disability Assistance.

Accordingly, the department's action is **HEREBY UPHELD**.

_____/s/_____
Jana A. Bachman
Administrative Law Judge
for Ismael Ahmed, Director
Department of Human Services

Date Signed: June 24, 2009

Date Mailed: June 25, 2009

NOTICE: Administrative Hearings may order a rehearing or reconsideration on either its own motion or at the request of a party within 30 days of the mailing date of this Decision and Order. Administrative Hearings will not order a rehearing or reconsideration on the Department's motion where the final decision cannot be implemented within 90 days of the filing of the original request.

The Claimant may appeal the Decision and Order to Circuit Court within 30 days of the receipt of the Decision and Order or, if a timely request for rehearing was made, within 30 days of the receipt date of the rehearing decision.
