

STATE OF MICHIGAN
STATE OFFICE OF ADMINISTRATIVE HEARINGS AND RULES

ADMINISTRATIVE HEARINGS FOR THE
DEPARTMENT OF HUMAN SERVICES

IN THE MATTER OF: [REDACTED],
Claimant

Reg. No: 2007-17563
Issue No: 2009; 4031
Case No: [REDACTED]
Load No: [REDACTED]
Hearing Date:
November 28, 2007
Livingston County DHS

ADMINISTRATIVE LAW JUDGE: Jana A. Bachman

HEARING DECISION

This matter is before the undersigned Administrative Law Judge pursuant to MCL 400.9; and MCL 400.37 upon claimant's request for a hearing. After due notice, an in-person hearing was held on November 28, 2007.

ISSUE

Whether the Department of Human Services (department) properly determined that claimant has not established disability for purposes of Medical Assistance (MA) and State Disability Assistance (SDA).

FINDINGS OF FACT

The Administrative Law Judge, based upon the competent, material and substantial evidence on the whole record, finds as material fact:

(1) May 11, 2007, claimant applied for MA and SDA. Claimant submitted medical records for department consideration.

- (2) June 20, 2007, the Medical Review Team denied claimant's application.

Department Exhibit (Department) A.

- (3) June 22, 2007, the department sent claimant written notice that the application was denied.

- (4) July 2, 2007, the department received claimant's timely request for hearing.

- (5) October 1, 2007, the State Hearing Review Team (SHRT) denied claimant's application. Department B.

- (6) November 28, 2007, the in-person hearing was held. Prior to the close of the record, claimant submitted additional medical evidence to the record. Claimant waived the right to a timely hearing decision. January 17, 2008, after review of all medical evidence, the SHRT again denied claimant's application. SHRT Decision, 1/17/08.

- (7) Claimant asserts disability based on impairments caused by a bad back, post traumatic stress disorder (ptsd), and depression.

- (8) Claimant testified at hearing. Claimant is 51 years old, 5'5" tall, and weighs 119 pounds. Claimant completed 10th grade and a GED. Claimant is able to read, write, and perform basic math. Claimant's driver's license is revoked. She cares for her needs at home.

- (9) Claimant's past relevant employment has been as a cook, cashier, restaurant hostess, and doing factory work, house cleaning, and construction. Claimant currently works 32 hours per week doing office work.

- (10) May 13, 2006, claimant underwent an MRI of the thoracic spine that revealed a normal thoracic spine. MRI of the lumbar spine revealed L4-5 disc protrusions with neural foraminal narrowing and no compromise of the exiting nerve roots and no spinal stenosis. Department A, page 24. February 10, 2007 MRI of the cervical spine revealed central disc

herniations of the protrusion type at C4-5 and C5-6 resulting in mild central canal stenosis; multilevel spondylosis resulting in neural foramina narrowing at the C3-4, C5-6, and C6-7 levels; degenerative disc disease at C5-6 and C6-7; reversal of normal lordotic curve.

Department A, page 61. April 6, 2007 x-rays of the cervical spine revealed spondylosis without fracture. Department A, page 42.

(11) February 16, 2007, claimant was examined by a neurologist. Treatment notes state that claimant's cranial nerves are intact; motor did not show any drift; strength is 5/5 proximally and distally; no sign of discomfort in tailbone; decreased pinprick at level of elbow both medial and lateral side without dermatomal pattern; gait and station are normal; claimant is able to walk on heel, toes, and tandem normally; deep tenderness at C4-T1. Neurologist recommends no lifting more than 10-15 pounds, soft collar and back brace while driving/doing heavy-duty job, and referral to neurosurgeon. Department A, pages 58-59. July 17, 2007, claimant was examined by a neurologist and underwent nerve conduction testing. The prepared report states that claimant has early cervical radiculopathy and no sign of CTS, ulnar neuropathy or myopathy. Clinical motor testing was grossly 5/5 but decreased effort due to transmitted pain; no drift; decreased sensation to pinprick in the bilateral distal median and medial aspect of the right forearm. August 20, 2007, claimant was examined by a neurologist. Treatment notes state that claimant's vitals are stable and her neurologic exam is unchanged from last exam. Claimant has deep tenderness at C6-7. Claimant A.

(12) April 25, 2007, claimant underwent an initial intake interview at [REDACTED]. [REDACTED] A report was prepared that states a tentative diagnosis of post traumatic stress disorder, dysthymic disorder, bulimia nervosa, alcohol dependence, and cocaine abuse. Claimant was referred for treatment. Department A,

pages 25-40. May 30, 2007, claimant underwent a mental assessment. A report was prepared that states claimant has spontaneous speech, a cooperative manner, and normal kinetics. Her affect was full, appropriate to mood, and sad. Thought processes were logical. She was alert and oriented x3 with fair insight and judgment. Claimant describes high levels of anxiety, anger/irritability and depression with dysfunctional coping mechanisms such as excessive alcohol use, self-harm, and binge/purge behaviors. Department A, pages 13-20.

CONCLUSIONS OF LAW

The Medical Assistance (MA) program is established by Title XIX of the Social Security Act and is implemented by Title 42 of the Code of Federal Regulations (CFR). The Department of Human Services (DHS or department) administers the MA program pursuant to MCL 400.10, *et seq.*, and MCL 400.105. Department policies are found in the Program Administrative Manual (PAM), the Program Eligibility Manual (PEM) and the Program Reference Manual (PRM).

Pursuant to Federal Rule 42 CFR 435.540, the Department of Human Services uses the federal Supplemental Security Income (SSI) policy in determining eligibility for disability under the Medical Assistance program. Under SSI, disability is defined as:

...the inability to do any substantial gainful activity by reason of any medically determinable physical or mental impairment which can be expected to result in death or which has lasted or can be expected to last for a continuous period of not less than 12 months.... 20 CFR 416.905

A set order is used to determine disability. Current work activity, severity of impairments, residual functional capacity, past work, age, or education and work experience is reviewed. If there is a finding that an individual is disabled or not disabled at any point in the review, there will be no further evaluation. 20 CFR 416.920.

If an individual is working and the work is substantial gainful activity, the individual is not disabled regardless of the medical condition, education and work experience. 20 CFR 416.920(c).

If the impairment or combination of impairments do not significantly limit physical or mental ability to do basic work activities, it is not a severe impairment(s) and disability does not exist. Age, education and work experience will not be considered. 20 CFR 416.920.

Statements about pain or other symptoms do not alone establish disability. There must be medical signs and laboratory findings which demonstrate a medical impairment.... 20 CFR 416.929(a).

...Medical reports should include –

- (1) Medical history.
- (2) Clinical findings (such as the results of physical or mental status examinations);
- (3) Laboratory findings (such as blood pressure, X-rays);
- (4) Diagnosis (statement of disease or injury based on its signs and symptoms).... 20 CFR 416.913(b).

In determining disability under the law, the ability to work is measured. An individual's functional capacity for doing basic work activities is evaluated. If an individual has the ability to perform basic work activities without significant limitations, he or she is not considered disabled. 20 CFR 416.994(b)(1)(iv).

Basic work activities are the abilities and aptitudes necessary to do most jobs. Examples of these include --

- (1) Physical functions such as walking, standing, sitting, lifting, pushing, pulling, reaching, carrying, or handling;
- (2) Capacities for seeing, hearing, and speaking;

- (3) Understanding, carrying out, and remembering simple instructions;
- (4) Use of judgment;
- (5) Responding appropriately to supervision, co-workers and usual work situations; and
- (6) Dealing with changes in a routine work setting. 20 CFR 416.921(b).

Medical findings must allow a determination of (1) the nature and limiting effects of your impairment(s) for any period in question; (2) the probable duration of the impairment; and (3) the residual functional capacity to do work-related physical and mental activities. 20 CFR 416.913(d).

Medical evidence may contain medical opinions. Medical opinions are statements from physicians and psychologists or other acceptable medical sources that reflect judgments about the nature and severity of the impairment(s), including your symptoms, diagnosis and prognosis, what an individual can do despite impairment(s), and the physical or mental restrictions. 20 CFR 416.927(a)(2).

All of the evidence relevant to the claim, including medical opinions, is reviewed and findings are made. 20 CFR 416.927(c).

For mental disorders, severity is assessed in terms of the functional limitations imposed by the impairment. Functional limitations are assessed using the criteria in paragraph (B) of the listings for mental disorders (descriptions of restrictions of activities of daily living, social functioning; concentration, persistence, or pace; and ability to tolerate increased mental demands associated with competitive work).... 20 CFR, Part 404, Subpart P, App. 1, 12.00(C).

If an individual fails to cooperate by appearing for a physical or mental examination by a certain date without good cause, there will not be a finding of disability. 20 CFR 416.994(b)(4)(ii).

When determining disability, the federal regulations require that several considerations be analyzed in sequential order. If disability can be ruled out at any step, analysis of the next step is not required. These steps are:

1. Does the client perform Substantial Gainful Activity (SGA)? If yes, the client is ineligible for MA. If no, the analysis continues to Step 2. 20 CFR 416.920(b).
2. Does the client have a severe impairment that has lasted or is expected to last 12 months or more or result in death? If no, the client is ineligible for MA. If yes, the analysis continues to Step 3. 20 CFR 416.920(c).
3. Does the impairment appear on a special listing of impairments or are the client's symptoms, signs, and laboratory findings at least equivalent in severity to the set of medical findings specified for the listed impairment? If no, the analysis continues to Step 4. If yes, MA is approved. 20 CFR 416.290(d).
4. Can the client do the former work that he/she performed within the last 15 years? If yes, the client is ineligible for MA. If no, the analysis continues to Step 5. 20 CFR 416.920(e).
5. Does the client have the Residual Functional Capacity (RFC) to perform other work according to the guidelines set forth at 20 CFR 404, Subpart P, Appendix 2, Sections 200.00-204.00? If yes, the analysis ends and the client is ineligible for MA. If no, MA is approved. 20 CFR 416.920(f).

At Step 1, claimant works 32 hours per week doing office work. Finding of Fact 9. Her rate of pay is unclear. Accordingly, a Step 1 analysis can not be completed.

At Step 2, the objective medical evidence of record indicates that claimant has multiple bulging discs and degenerative changes in her lumbar and cervical spine. She has some reduced sensation to pinprick in her medial, median distal, and lateral forearm at the elbow. Motor strength is 5/5 grossly. Gait and station are normal. She is able to walk on heels, toes, and tandem walk normally. Neurologist recommends limiting lifting to 10-15 pounds and wearing a back brace and collar when performing heavy-duty work. Claimant's internist/cardiologist

recommends far more severe limitations due to back problems than does claimant's neurologist. Neurologist's opinions shall be given the greater weight as neurologist is a specialist in nerve problems of the back and internist/cardiologist is not. Finding of Fact 10-11; Department A, pages 3-4.

At Step 2, claimant has post traumatic stress disorder, dysthymia, anxiety, alcohol and cocaine abuse, bulimia nervosa. She is oriented X3 with spontaneous speech, a cooperative manner, and normal kinetics. Affect is full and appropriate to mood. Thought processes are logical with fair insight and judgment. Claimant relies on dysfunctional coping mechanisms such as excessive alcohol use, bulimia, and self harm. Finding of Fact 12.

At Step 2, the objective medical evidence of record is not sufficient to establish that claimant has severe impairments that have lasted or are expected to last 12 months or more and prevent employment at any job for 12 months or more. Therefore, claimant is disqualified from receiving disability at Step 2.

At Step 3, claimant's impairments do not rise to the level necessary to be specifically disabling by law.

At Step 4, claimant's past relevant employment has been as a cook, cashier, restaurant hostess, and doing factory work, house cleaning, and construction. Claimant currently works 32 hours per week doing office work. Claimant has bulging discs and degenerative changes in her back that result in lifting restriction to 15 pounds or less. Gait and station are normal. She is able to heel walk, tandem walk, and tiptoe. Claimant has dysthymia, anxiety, ptsd, and alcohol and cocaine abuse. She is oriented X3 with mental functions that are within normal limits. See discussion at Step 2, above.

At Step 4, the objective medical evidence of record is not sufficient to establish that claimant has functional impairments that prevent claimant, for a period of 12 months or more, from engaging in a full range of duties required by claimant's current relevant employment doing office work. Therefore, claimant is disqualified from receiving disability at Step 4.

The residual functional capacity is what an individual can do despite limitations. All impairments will be considered in addition to ability to meet certain demands of jobs in the national economy. Physical demands, mental demands, sensory requirements and other functions will be evaluated.... 20 CFR 416.945(a).

To determine the physical demands (exertional requirements) of work in the national economy, we classify jobs as sedentary, light, medium and heavy. These terms have the same meaning as they have in the Dictionary of Occupational Titles, published by the Department of Labor.... 20 CFR 416.967.

Sedentary work. Sedentary work involves lifting no more than 10 pounds at a time and occasionally lifting or carrying articles like docket files, ledgers, and small tools. Although a sedentary job is defined as one which involves sitting, a certain amount of walking and standing is often necessary in carrying out job duties. Jobs are sedentary if walking and standing are required occasionally and other sedentary criteria are met. 20 CFR 416.967(a).

Light work. Light work involves lifting no more than 20 pounds at a time with frequent lifting or carrying of objects weighing up to 10 pounds. Even though the weight lifted may be very little, a job is in this category when it requires a good deal of walking or standing, or when it involves sitting most of the time with some pushing and pulling of arm or leg controls.... 20 CFR 416.967(b).

Medium work. Medium work involves lifting no more than 50 pounds at a time with frequent lifting or carrying of objects weighing up to 25 pounds. If someone can do medium work, we determine that he or she can also do sedentary and light work. 20 CFR 416.967(c).

Heavy work. Heavy work involves lifting no more than 100 pounds at a time with frequent lifting or carrying of objects weighing up to 50 pounds. If someone can do heavy work, we determine that he or she can also do medium, light, and sedentary work. 20 CFR 416.967(d).

At Step 5, the objective medical evidence of record indicates that claimant has degenerative changes in her spine, anxiety, ptsd, and dysthymia. See discussion at Step 2, above. Finding of Fact 10-12.

At Step 5, the objective medical evidence of record is sufficient to establish that claimant retains the residual functional capacity to perform at least simple light work activities. Considering claimant's Vocational Profile (limited education, history of semi-skilled work, and closely approaching advanced age) and relying on Vocational Rule 202.12, claimant is not disabled. Therefore, claimant is disqualified from receiving disability at Step 5.

Claimant does not meet the federal statutory requirements to qualify for disability. Therefore, claimant does not qualify for Medical Assistance based on disability and the department properly denied claimant's application.

The State Disability Assistance (SDA) program which provides financial assistance for disabled persons is established by 2004 PA 344. The Department of Human Services (DHS or department) administers the SDA program pursuant to MCL 400.10, *et seq.*, and MAC R 400.3151-400.3180. Department policies are found in the Program Administrative Manual (PAM), the Program Eligibility Manual (PEM) and the Program Reference Manual (PRM).

2004 PA 344, Sec. 604, establishes the State Disability Assistance program. It reads in part:

Sec. 604 (1) The department shall operate a state disability assistance program. Except as provided in subsection (3), persons eligible for this program shall include needy citizens of the United States or aliens exempt from the Supplemental Security Income citizenship requirement who are at least 18 years of age or emancipated minors meeting one or more of the following requirements:

- (a) Recipient of Supplemental Security Income, Social Security or Medical Assistance due to disability or 65 years of age or older.
 - (b) A person with a physical or mental impairment which meets federal SSI disability standards, except that the minimum duration of the disability shall be 90 days. Substance abuse alone is not defined as a basis for eligibility.
 - (c) A resident of an adult foster care facility, a home for the aged, a county infirmary, or a substance abuse treatment center.
 - (d) A person receiving 30-day post-residential substance abuse treatment.
 - (e) A person diagnosed as having Acquired Immunodeficiency syndrome (AIDs).
 - (f) A person receiving special education services through the local intermediate school district.
 - (g) A caretaker of a disabled person as defined in subdivision (a), (b), (e), or (f) above.
- (2) Applicants for and recipients of the State Disability Assistance program shall be considered needy if they:
- (a) Meet the same asset test as is applied to applicants for the Family Independence Program.
 - (b) Have a monthly budgetable income that is less than the payment standard.

- (3) Except for a person described in subsection (1)(c) or (d), a person is not disabled for purposes of this section if his or her drug addiction or alcoholism is a contributing factor material to the determination of disability. 'Material to the determination of disability' means that, if the person stopped using drugs or alcohol, his or her remaining physical or mental limitations would not be disabling. If his or her remaining physical or mental limitations would be disabling, then the drug addiction or alcoholism is not material to the determination of disability and the person may receive State Disability Assistance. Such a person must actively participate in a substance abuse treatment program, and the assistance must be paid to a third party or through vendor payments. For purposes of this section, substance abuse treatment includes receipt of inpatient or outpatient services or participation in Alcoholics Anonymous or a similar program. 1995 PA 156, Sec. 605.
- (4) A refugee or asylee who loses his or her eligibility for the federal Supplemental Security Income program by virtue of exceeding the maximum time limit for eligibility as delineated in Section 402 of Title IV of the Personal Responsibility and Work Opportunity Reconciliation Act of 1996, Public Law 104-193, 8 U.S.C. 1612, and who otherwise meets the eligibility criteria under this section shall be eligible to receive benefits under the State Disability Assistance program.

After careful examination of the record and for reasons discussed at Steps 2-5, above, the Administrative Law Judge decides that claimant does not have severe impairments that prevent work for 90 days or more. Therefore, claimant does not qualify for SDA based on disability and the department properly denied his application.

DECISION AND ORDER

The Administrative Law Judge, based upon the above findings of fact and conclusions of law, decides that claimant has not established disability for Medical Assistance and State Disability Assistance.

Accordingly, the department's action is **HEREBY UPHELD**.

Jana A. Bachman
Administrative Law Judge
for Ismael Ahmed, Director
Department of Human Services

Date Signed: _____

Date Mailed: _____

NOTICE: Administrative Hearings may order a rehearing or reconsideration on either its own motion or at the request of a party within 30 days of the mailing date of this Decision and Order. Administrative Hearings will not order a rehearing or reconsideration on the Department's motion where the final decision cannot be implemented within 90 days of the filing of the original request.

The Claimant may appeal the Decision and Order to Circuit Court within 30 days of the receipt of the Decision and Order or, if a timely request for rehearing was made, within 30 days of the receipt date of the rehearing decision.
