

STATE OF MICHIGAN
STATE OFFICE OF ADMINISTRATIVE HEARINGS AND RULES

ADMINISTRATIVE HEARINGS FOR THE
DEPARTMENT OF HUMAN SERVICES

IN THE MATTER OF: [REDACTED]
Claimant

Reg. No.: 2008-18068
Issue No.: 2009
Case No.: [REDACTED]
Load No.: [REDACTED]
Hearing Date:
November 12, 2009
Oakland County DHS (4)

ADMINISTRATIVE LAW JUDGE: Colleen M. Mamelka

HEARING DECISION

This matter is before the undersigned Administrative Law Judge pursuant to MCL 400.9 and MCL 400.37 upon the Claimant's request for a hearing. After due notice, a hearing was conducted from Pontiac, Michigan on November 12, 2009. The Claimant appeared and testified, along with [REDACTED]. The Claimant was represented by [REDACTED] of [REDACTED]. [REDACTED] appeared on behalf of the Department.

ISSUE

Whether the Department properly determined that the Claimant was not disabled for purposes of Medical Assistance ("MA-P") benefit program?

FINDINGS OF FACT

The Administrative Law Judge, based on the competent, material and substantial evidence on the whole record, finds as material fact:

1. The Claimant submitted a public assistance application seeking MA-P on September 27, 2007.

2. On October 15, 2007, the Medical Review Team (“MRT”) deferred the disability determination requesting the department schedule a psychiatric and physical examination. (Exhibit 1, pp. 13, 15)
3. On November 12, 2007, the Claimant attended the department ordered consultative examinations. (Exhibit 1, pp. 3 – 12)
4. On December 21, 2007, the Medical Review Team (“MRT”) found the Claimant not disabled for MA-P purposes. (Exhibit 1, pp. 1, 2)
5. On January 14, 2008, the Department sent the Claimant an eligibility notice informing the Claimant that his MA-P benefits were denied. (Exhibit 1, p. 144)
6. On April 8, 2008, the Department received the Claimant’s Request for Hearing protesting the determination that he was not disabled. (Exhibit 3)
7. On June 16, 2008, the State Hearing Review Team (“SHRT”) found the Claimant not disabled. (Exhibit 2)
8. The Claimant’s alleged physical disabling impairments due to back and leg pain, disc herniation, radiculopathy, and extremity weakness.
9. The Claimant’s alleged mental disabling impairments are due to bipolar and depressive disorders.
10. The Claimant’s impairments have lasted, or are expected to last, for a period of 12-months or more.
11. At the time of hearing, the Claimant was 31 years old with an [REDACTED] birth date; was 6’ 2” in height; and weighed 142 pounds.
12. The Claimant is a college graduate with a work history in sales and marketing.

CONCLUSIONS OF LAW

The Medical Assistance (“MA”) program is established by Subchapter XIX of Chapter 7 of The Public Health & Welfare Act, 42 USC 1397, and is administered by the Department of Human Services (“DHS”), formally known as the Family Independence Agency, pursuant to MCL 400.10 *et seq* and MCL 400.105. Department policies are found in the Program Administrative Manual (“PAM”), the Program Eligibility Manual (“PEM”), and the Program Reference Manual (“PRM”).

Disability is defined as the inability to do any substantial gainful activity by reason of any medically determinable physical or mental impairment which can be expected to result in death or which has lasted or can be expected to last for a continuous period of not less than 12 months. 20 CFR 416.905(a) The person claiming a physical or mental disability has the burden to establish it through the use of competent medical evidence from qualified medical sources such as his or her medical history, clinical/laboratory findings, diagnosis/prescribed treatment, prognosis for recovery and/or medical assessment of ability to do work-related activities or ability to reason and make appropriate mental adjustments, if a mental disability is alleged. 20 CFR 413.913 An individual’s subjective pain complaints are not, in and of themselves, sufficient to establish disability. 20 CFR 416.908; 20 CFR 416.929(a) Similarly, conclusory statements by a physician or mental health professional that an individual is disabled or blind, absent supporting medical evidence, is insufficient to establish disability. 20 CFR 416.927 Unless an impairment(s) is expected to result in death, the impairment(s) must have lasted, or must be expected to last, for a continuous period of at least twelve months. 20 CFR 416.909

When determining disability, the federal regulations require several factors to be considered including: (1) the location/duration/frequency/intensity of an applicant’s pain; (2)

the type/dosage/effectiveness/side effects of any medication the applicants takes to relieve pain; (3) any treatment other than pain medication that the applicant has received to relieve pain; and (4) the effect of the applicant's pain on his or her ability to do basic work activities. 20 CFR 416.929(c)(3) The applicant's pain must be assessed to determine the extent of his or her functional limitation(s) in light of the objective medical evidence presented. 20 CFR 416.929(c)(2)

In order to determine whether or not an individual is disabled, federal regulations require a five-step sequential evaluation process be utilized. 20 CFR 416.920(a)(1) The five-step analysis requires the trier of fact to consider an individual's current work activity; the severity of the impairment(s) both in duration and whether it meets or equals a listed impairment in Appendix 1; residual functional capacity to determine whether an individual can perform past relevant work; and residual functional capacity along with vocational factors (i.e. age, education, and work experience) to determine if an individual can adjust to other work. 20 CFR 416.920(a)(4); 20 CFR 416.945

If an individual is found disabled, or not disabled, at any step, a determination or decision is made with no need evaluate subsequent steps. 20 CFR 416.920(a)(4) If a determination cannot be made that an individual is disabled, or not disabled, at a particular step, the next step is required. 20 CFR 416.920(a)(4) If an impairment does not meet or equal a listed impairment, an individual's residual functional capacity is assessed before moving from step three to step four. 20 CFR 416.920(a)(4); 20 CFR 416.945 Residual functional capacity is the most an individual can do despite the limitations based on all relevant evidence. 20 CFR 945(a)(1) An individual's residual functional capacity assessment is evaluated at both steps four and five. 20 CFR 416.920(a)(4) In determining disability, an individual's functional capacity to perform basic

work activities is evaluated and if found that the individual has the ability to perform basic work activities without significant limitation, disability will not be found. 20 CFR 416.994(b)(1)(iv)

In general, the individual has the responsibility to prove disability. 20 CFR 416.912(a) An impairment or combination of impairments is not severe if it does not significantly limit an individual's physical or mental ability to do basic work activities. 20 CFR 416.921(a) An individual is not disabled regardless of the medical condition, age, education, and work experience, if the individual is working and the work is a substantial, gainful activity. 20 CFR 416.920(a)(4)(i) The individual has the responsibility to provide evidence of prior work experience; efforts to work; and any other factor showing how the impairment affects the ability to work. 20 CFR 416.912(c)(3)(5)(6)

In addition to the above, when evaluating mental impairments, a special technique is utilized. 20 CFR 416.920a(a) First, an individual's pertinent symptoms, signs, and laboratory findings are evaluated to determine whether a medically determinable mental impairment exists. 20 CFR 416.920a(b)(1) When a medically determinable mental impairment is established, the symptoms, signs and laboratory findings that substantiate the impairment are documented to include the individual's significant history, laboratory findings, and functional limitations. 20 CFR 416.920a(e)(2) Functional limitation(s) is assessed based upon the extent to which the impairment(s) interferes with an individual's ability to function independently, appropriately, effectively, and on a sustained basis. *Id.*; 20 CFR 416.920a(c)(2) Chronic mental disorders, structured settings, medication, and other treatment and the effect on the overall degree of functionality is considered. 20 CFR 416.920a(c)(1) In addition, four broad functional areas (activities of daily living; social functioning; concentration, persistence or pace; and episodes of decompensation) are considered when determining an individual's degree of functional

limitation. 20 CFR 416.920a(c)(3) The degree of limitation for the first three functional areas is rated by a five point scale: none, mild, moderate, marked, and extreme. 20 CFR 416.920a(c)(4) A four point scale (none, one or two, three, four or more) is used to rate the degree of limitation in the fourth functional area. *Id.* The last point on each scale represents a degree of limitation that is incompatible with the ability to do any gainful activity. *Id.*

After the degree of functional limitation is determined, the severity of the mental impairment is determined. 20 CFR 416.920a(d) If severe, a determination of whether the impairment meets or is the equivalent of a listed mental disorder. 20 CFR 416.920a(d)(2) If the severe mental impairment does not meet (or equal) a listed impairment, an individual's residual functional capacity is assessed. 20 CFR 416.920a(d)(3)

As outlined above, the first step looks at the individual's current work activity. In the record presented, the Claimant is not involved in substantial gainful activity therefore is not disqualified from receipt of disability benefits under Step 1.

The severity of the Claimant's alleged impairment(s) is considered under Step 2. The Claimant bears the burden to present sufficient objective medical evidence to substantiate the alleged disabling impairments. In order to be considered disabled for MA purposes, the impairment must be severe. 20 CFR 916.920(a)(4)(ii); 20 CFR 916.920(b) An impairment, or combination of impairments, is severe if it significantly limits an individual's physical or mental ability to do basic work activities regardless of age, education and work experience. 20 CFR 916.920(a)(4)(ii); 20 CFR 916.920(c) Basic work activities means the abilities and aptitudes necessary to do most jobs. 20 CFR 916.921(b) Examples include:

1. Physical functions such as walking, standing, sitting, lifting, pushing, pulling, reaching, carrying, or handling;
2. Capacities for seeing, hearing, and speaking;

3. Understanding, carrying out, and remembering simple instructions;
4. Use of judgment;
5. Responding appropriately to supervision, co-workers and usual work situations; and
6. Dealing with changes in a routine work setting.

Id. The second step allows for dismissal of a disability claim obviously lacking in medical merit. *Higgs v Bowen*, 880 F2d 860, 862 (CA 6, 1988). The severity requirement may still be employed as an administrative convenience to screen out claims that are totally groundless solely from a medical standpoint. *Id.* at 863 citing *Farris v Sec of Health and Human Services*, 773 F2d 85, 90 n.1 (CA 6, 1985) An impairment qualifies as non-severe only if, regardless of a claimant's age, education, or work experience, the impairment would not affect the claimant's ability to work. *Salmi v Sec of Health and Human Services*, 774 F2d 685, 692 (CA 6, 1985)

In the present case, the Claimant asserts physical and mental disabling impairments due to back and leg pain, disc herniation, radiculopathy, extremity weakness, depression, and bipolar disorder.

On [REDACTED], an EMG revealed paresthesias of the lower extremities.

On this same date, a MRI of the cervical spine revealed a thin broad-based disc herniation with mild narrowing at the C5-6 level. The MRI of the lumbar spine documented a mild diffuse posterior disc bulge with herniation at the L4-5 and L5-S1 levels.

On [REDACTED], the Claimant presented to the hospital after having a psychotic break. The Claimant had recently stopped prescribed treatment and was uncooperative. The Claimant was admitted via petition with a Global Assessment Functioning ("GAF") of 20. On [REDACTED]

the Claimant was discharged with the diagnosis of bipolar disorder with the most recent episode of manic, severe with psychotic behavior.

On [REDACTED], the Claimant attended the department ordered evaluation. The physical examination found tenderness over the spine, mainly at the L5-S1 area with bilateral muscle spasms. Ultimately, the Claimant was diagnosed with low back pain, disc syndrome with radiculopathy and right rotator cuff injury. A Medical Examination Report was completed which listed the Claimant's condition as deteriorating. The Claimant was able to occasionally lift/carry 20 pounds; stand and/or walk less than 2 hours during an 8-hour workday; sit less than 6 hours during this same time span; perform simple grasping with both upper extremities; fine manipulation and reaching with his left arm/hand; and he was unable to operate foot/leg controls. The limitations were due to radiculopathy and reflex changes. The Claimant's sustained concentration was also limited.

On this same date, [REDACTED] [REDACTED] a psychiatric evaluation was performed. The Claimant was diagnosed with bipolar disease with depression.

As previously noted, the Claimant bears the burden to present sufficient objective medical evidence to substantiate the alleged disabling impairment(s). As summarized above, the Claimant has presented some medical evidence establishing that he does have some physical and mental limitations on his ability to perform basic work activities. The medical evidence has established that the Claimant has an impairment, or combination thereof, that has more than a *de minimis* effect on the Claimant's basic work activities. Further, the impairments have lasted, or expected to last, continuously for twelve months; therefore, the Claimant is not disqualified from receipt of MA-P benefits under Step 2.

In the third step of the sequential analysis of a disability claim, the trier of fact must determine if the Claimant's impairment, or combination of impairments, is listed in Appendix 1 of Subpart P of 20 CFR, Part 404. Appendix I, Listing of Impairments, discusses the analysis and criteria necessary to support a finding of a listed impairment.

The Claimant has alleged physical disabling physical impairments due to back and leg pain, disc herniation with radiculopathy and extremity weakness. Listing 1.00 defines musculoskeletal system impairments. Disorders of the musculoskeletal system may result from hereditary, congenital, or acquired pathologic processes. 1.00A Impairments may result from infectious, inflammatory, or degenerative processes, traumatic or developmental events, or neoplastic, vascular, or toxic/metabolic diseases. 1.00A Regardless of the cause(s) of a musculoskeletal impairment, functional loss for purposes of these listings is defined as the inability to ambulate effectively on a sustained basis for any reason, including pain associated with the underlying musculoskeletal impairment, or the inability to perform fine and gross movements effectively on a sustained basis for any reason, including pain associated with the underlying musculoskeletal impairment. Inability to ambulate effectively means an extreme limitation of the ability to walk; i.e., an impairment(s) that interferes very seriously with the individual's ability to independently initiate, sustain, or complete activities. 1.00B2b(1) Ineffective ambulation is defined generally as having insufficient lower extremity function to permit independent ambulation without the use of a hand-held assistive device(s) that limits the functioning of both upper extremities. (Listing 1.05C is an exception to this general definition because the individual has the use of only one upper extremity due to amputation of a hand.) *Id.* To ambulate effectively, individuals must be capable of sustaining a reasonable walking pace over a sufficient distance to be able to carry out activities of daily living. 1.00B2b(2) They must

have the ability to travel without companion assistance to and from a place of employment or school. . . . *Id.*

Categories of Musculoskeletal include:

- 1.02 Major dysfunction of a joint(s) due to any cause: Characterized by gross anatomical deformity (e.g. subluxation, contracture, bony or fibrous ankylosis, instability) and chronic joint pain and stiffness with signs of limitation of motion or other abnormal motion of the affected joint(s), and findings on appropriate medically acceptable imaging of joint space narrowing, bony destruction, or ankylosis of the affected joint(s). With:
- A. Involvement of one major peripheral weight-bearing joint (i.e., hip, knee, or ankle), resulting in inability to ambulate effectively as defined in 1.00B2b; or
 - B. Involvement of one major peripheral joint in each upper extremity (i.e., shoulder, elbow, wrist, hand), resulting in inability to perform fine and gross movements effectively a defined in 1.00B2c

* * *

- 1.04 Disorders of the spine (e.g., herniated nucleus pulposus, spinal arachnoiditis, spinal stenosis, osteoarthritis, degenerative disc disease, facet arthritis, vertebral fracture), resulting in compromise of a nerve root (including the cauda equine) or spinal cord. With:
- A. Evidence of nerve root compression characterized by neuro-anatomic distribution of pain, limitation of motion of the spine, motor loss (atrophy with associated muscle weakness or muscle weakness) accompanied by sensory or reflex loss and, if there is involvement of the lower back, positive straight-leg raising test (sitting and supine); or
 - B. Spinal arachnoiditis, confirmed by an operative note or pathology report of tissue biopsy, or by appropriate medically acceptable imaging, manifested by severe burning or painful dysesthesia, resulting in the need for changes in position or posture more than once every 2 hours; or
 - C. Lumbar spinal stenosis resulting in pseudoclaudication, established by findings on appropriate medically acceptable imaging, manifested by chronic nonradicular pain and weakness, and resulting in inability to ambulate

effectively, as defined in 1.00B2b. (see above definition)

The Claimant asserts mental disabling impairments due to depression and anxiety. Listing 12.00 encompasses adult mental disorders. The evaluation of disability on the basis of mental disorders requires documentation of a medically determinable impairment(s) and consideration of the degree in which the impairment limits the individual's ability to work, and whether these limitations have lasted or are expected to last for a continuous period of at least 12 months. 12.00A The existence of a medically determinable impairment(s) of the required duration must be established through medical evidence consisting of symptoms, signs, and laboratory findings, to include psychological test findings. 12.00B The evaluation of disability on the basis of a mental disorder requires sufficient evidence to (1) establish the presence of a medically determinable mental impairment(s), (2) assess the degree of functional limitation the impairment(s) imposes, and (3) project the probable duration of the impairment(s). 12.00D The evaluation of disability on the basis of mental disorders requires documentation of a medically determinable impairment(s) and consideration of the degree in which the impairment limits the individual's ability to work consideration, and whether these limitations have lasted or are expected to last for a continuous period of at least 12 months. 12.00A The severity requirement is measured according to the functional limitations imposed by the medically determinable mental impairment. 12.00C Functional limitations are assessed in consideration of an individual's activities of daily living; social functioning; concentration, persistence, or pace; and episodes of decompensation. *Id.*

Listing 12.04 defines affective disorders as being characterized by a disturbance of mood, accompanied by a full or partial manic or depressive syndrome. Generally, affective disorders

involve either depression or elation. The required level of severity for these disorders are met when the requirements of both A and B are satisfied, or when the requirements in C are satisfied.

A. Medically documented persistence, either continuous or intermittent, of one of the following:

1. Depressive syndrome characterized by at least four of the following:
 - a. Anhedonia or pervasive loss of interest in almost all activities; or
 - b. Appetite disturbance with change in weight; or
 - c. Sleep disturbance; or
 - d. Psychomotor agitation or retardation; or
 - e. Decreased energy; or
 - f. Feelings of guilt or worthlessness; or
 - g. Difficulty concentrating or thinking; or
 - h. Thoughts of suicide; or
 - i. Hallucinations, delusions, or paranoid thinking; or
2. Manic syndrome characterized by at least three of the following:
 - a. Hyperactivity; or
 - b. Pressure of speech; or
 - c. Flight of ideas; or
 - d. Inflated self-esteem; or
 - e. Decreased need for sleep; or
 - f. Easy distractibility; or
 - g. Involvement in activities that have a high probability of painful consequences which are not recognized; or
 - h. Hallucinations, delusions, or paranoid thinking; or
3. Bipolar syndrome with a history of episodic periods manifested by the full symptomatic picture of both manic and depressive syndromes (and currently characterized by either or both syndromes)

AND

B. Resulting in at least two of the following:

1. Marked restriction on activities of daily living; or
2. Marked difficulties in maintaining social functioning; or
3. Marked difficulties in maintaining concentration, persistence, or pace; or
4. Repeated episodes of decompensation, each of extended duration;

OR

- C. Medically documented history of chronic affective disorder of at least 2 years' duration that has caused more than a minimal limitation of ability to do basic work activities, with symptoms or signs currently attenuated by medication or psychosocial support, and one of the following:
1. Repeated episodes of decompensation, each of extended duration; or
 2. A residual disease process that has resulted in such marginal adjustment that even minimal increase in mental demands or change in the environment would be predicted to cause the individual to decompensate; or
 3. Current history of 1 or more years' inability to function outside a highly supportive living arrangement, with an indication of continued need for such an arrangement.

Listing 12.06 discusses anxiety-related disorders where anxiety is either the predominant disturbance or it is experienced if the individual attempts to master symptoms. The required level of severity for these disorders are met when the requirements of both A and B are satisfied, or when the requirements in both A and C are satisfied.

- A. Medically documented findings of at least one of the following:
1. Generalized persistent anxiety accompanied by three out of four of the following signs or symptoms:
 - a. Motor tension; or
 - b. Autonomic hyperactivity; or
 - c. Apprehensive expectation; or
 - d. Vigilance and scanning; or

2. A persistent irrational fear of a specific object, activity, or situation which results in a compelling desire to avoid the dreaded object, activity, or situation; or
3. Recurrent severe panic attacks manifested by a sudden unpredictable onset of intense apprehension, fear, terror and sense of impending doom occurring on the average of at least once a week; or
4. Recurrent obsessions or compulsions which are a source of marked distress; or
5. Recurrent and intrusive recollections of a traumatic experience, which are a source of marked distress;

AND

B. Resulting in at least two of the following:

1. Marked restriction of activities of daily living; or
2. Marked difficulties in maintaining social functioning; or
3. Marked difficulties in maintaining concentration, persistence, or pace; or
4. Repeated episodes of decompensation, each of extended duration.

OR

C. Resulting in complete inability to function independently outside the area of one's home.

When an individual has a medically determinable impairment that is not listed consideration of whether the impairment is the medical equivalent to a listing is required. 20 CFR 416.926 When one or more findings specified in a listing is not as severe as specified in a listing, the impairment is medically equivalent if other findings related to the impairment are at least of equal medical significance. 20 CFR 416.926(b)(1) Further, the combination of impairments may be considered in determining medical equivalence. 20 CFR 416.926(b)(3)

In this case, the objective medical evidence presented document paresthesias of the lower extremities, broad-based disc herniation with narrowing at the C5-6 level, diffuse posterior disc bulge with herniation at the L4-5 and L5-S1 levels, radiculopathy, rotator cuff injury, spasms, bipolar and depressive disorder, severe, with psychotic behavior. The department ordered consultative examination listed the Claimant's condition as deteriorating. In consideration of the combination of the Claimant's physical and mental impairments, it is found that the Claimant's impairments meet, or are the medical equivalent thereof, a listed impairment within 1.00 and 12.00, specifically 1.04 and 12.04. Accordingly, the Claimant is found disabled at Step 3 with no further analysis required.

DECISION AND ORDER

The Administrative Law Judge, based upon the above finds of facts and conclusions of law, finds the Claimant disabled for purposes of the Medical Assistance program.

Accordingly, it is ORDERED:

1. Department's determination is REVERSED.
2. The Department shall initiate review of the September 2007 application to determine if all other non-medical criteria are met and inform the Claimant and his authorized representative of the determination.
3. The Department shall supplement the Claimant any lost benefits he was entitled to receive if otherwise eligible and qualified in accordance with department policy.
4. The Department shall review the Claimant's continued eligibility in January of 2011 in accordance with department policy.
