

STATE OF MICHIGAN
STATE OFFICE OF ADMINISTRATIVE HEARINGS AND RULES

ADMINISTRATIVE HEARINGS FOR THE
DEPARTMENT OF HUMAN SERVICES

IN THE MATTER OF:

██████████

Claimant

Reg. No.: 2008-30350

Issue No.: 2009, 4031

Case No.: ██████████

Load No.: ██████████

Hearing Date:

February 5, 2009

Berrien County DHS (22)

ADMINISTRATIVE LAW JUDGE: Colleen M. Mamelka

HEARING DECISION

This matter is before the undersigned Administrative Law Judge pursuant to MCL 400.9 and MCL 400.37 upon the Claimant's request for a hearing. After due notice, a telephone hearing was conducted from Detroit, Michigan on February 5, 2009. The Claimant appeared and testified. The Claimant was represented by ██████████. ██████████ appeared on behalf of the Department. At the Claimant's request, the record was extended to allow for the submission of additional medical records.

The additional records were received and forwarded to the State Hearing Review Team ("SHRT") for consideration. On March 20, 2009, the SHRT found the Claimant not disabled and capable of performing past work. This matter is now before the undersigned for a final decision.

ISSUE

Whether the Department properly determined that the Claimant was not disabled for purposes of Medical Assistance ("MA-P") program.

FINDINGS OF FACT

The Administrative Law Judge, based on the competent, material and substantial evidence on the whole record, finds as material fact:

1. The Claimant submitted a public assistance application seeking MA-P benefits on July 28, 2008.
2. On August 20, 2008, the Medical Review Team (“MRT”) determined the Claimant was not disabled finding the Claimant capable of performing past relevant work. (Exhibit 1, pp. 2, 3)
3. On August 25, 2008, the Department sent the Claimant an Eligibility Notice informing the Claimant that she was found not disabled. (Exhibit 1, p. 1)
4. On August 29, 2008, the Department received the Claimant’s Request for Hearing protesting the Department’s determination. (Exhibit 3)
5. On September 16, 2008, the State Hearing Review Team (“SHRT”) found the Claimant not disabled. (Exhibit 2, pp. 1, 2)
6. The Claimant’s alleged disabling impairments are due to knee pain, rheumatoid arthritis, chest pain (high blood pressure) and a stone in her saliva gland.
7. At the time of hearing, the Claimant was 58 years old with a [REDACTED] birth date; was 5’ 6” and weighed 325 pounds.
8. The Claimant completed through the 11th grade and has a work history as a pharmacy technician, clerk and receptionist.

CONCLUSIONS OF LAW

The Medical Assistance (“MA”) program is established by Subchapter XIX of Chapter 7 of The Public Health & Welfare Act, 42 USC 1397, and is administered by the Department of Human Services (“DHS”), formally known as the Family Independence Agency, pursuant to MCL 400.10 *et seq* and MCL 400.105. Department policies are found in the Program Administrative Manual (“PAM”), the Program Eligibility Manual (“PEM”), and the Program Reference Manual (“PRM”).

Disability is defined as the inability to do any substantial gainful activity by reason of any medically determinable physical or mental impairment which can be expected to result in death or which has lasted or can be expected to last for a continuous period of not less than 12 months. 20 CFR 416.905(a) The person claiming a physical or mental disability has the burden to establish it through the use of competent medical evidence from qualified medical sources such as his or her medical history, clinical/laboratory findings, diagnosis/prescribed treatment, prognosis for recovery and/or medical assessment of ability to do work-related activities or ability to reason and make appropriate mental adjustments, if a mental disability is alleged. 20 CFR 413.913 An individual’s subjective pain complaints are not, in and of themselves, sufficient to establish disability. 20 CFR 416.908; 20 CFR 416.929(a) Similarly, conclusory statements by a physician or mental health professional that an individual is disabled or blind, absent supporting medical evidence, is insufficient to establish disability. 20 CFR 416.929(a)

When determining disability, the federal regulations require several factors to be considered including: (1) the location/duration/frequency/intensity of an applicant’s pain; (2) the type/dosage/effectiveness/side effects of any medication the applicants takes to relieve pain; (3) any treatment other than pain medication that the applicant has received to relieve pain; and

(4) the effect of the applicant's pain on his or her ability to do basic work activities. 20 CFR 416.929(c)(3) The applicant's pain must be assessed to determine the extent of his or her functional limitation(s) in light of the objective medical evidence presented. 20 CFR 416.929(c)(2)

In order to determine whether or not an individual is disabled, federal regulations require a five-step sequential evaluation process be utilized. 20 CFR 416.920(a)(1) The five-step analysis requires the trier of fact to consider an individual's current work activity; the severity of the impairment(s) both in duration and whether it meets or equals a listed impairment in Appendix 1; residual functional capacity to determine whether an individual can perform past relevant work; and residual functional capacity along with vocational factors (i.e. age, education, and work experience) to determine if an individual can adjust to other work. 20 CFR 416.920(a)(4); 20 CFR 416.945

If an individual is found disabled, or not disabled, at any step, a determination or decision is made with no need evaluate subsequent steps. 20 CFR 416.920(a)(4) If a determination cannot be made that an individual is disabled, or not disabled, at a particular step, the next step is required. 20 CFR 416.920(a)(4) If an impairment does not meet or equal a listed impairment, an individual's residual functional capacity is assessed before moving from step three to step four. 20 CFR 416.920(a)(4); 20 CFR 416.945 Residual functional capacity is the most an individual can do despite the limitations based on all relevant evidence. 20 CFR 945(a)(1) An individual's residual functional capacity assessment is evaluated at both steps four and five. 20 CFR 416.920(a)(4) In determining disability, an individual's functional capacity to perform basic work activities is evaluated and if found that the individual has the ability to perform basic work activities without significant limitation, disability will not be found. 20 CFR 416.994(b)(1)(iv)

In general, the individual has the responsibility to prove disability. 20 CFR 416.912(a) An impairment or combination of impairments is not severe if it does not significantly limit an individual's physical or mental ability to do basic work activities. 20 CFR 416.921(a) As outlined above, the first step looks at the individual's current work activity. An individual is not disabled regardless of the medical condition, age, education, and work experience, if the individual is working and the work is a substantial, gainful activity. 20 CFR 416.920(a)(4)(i) The individual has the responsibility to provide evidence of prior work experience; efforts to work; and any other factor showing how the impairment affects the ability to work. 20 CFR 416.912(c)(3)(5)(6)

As previously stated, the first step looks at the individual's current work activity. In the record presented, the Claimant is not involved in substantial gainful activity. The Claimant is not disqualified from receipt of disability benefits under Step 1.

The severity of the Claimant's alleged impairment(s) is considered under Step 2. The Claimant bears the burden to present sufficient objective medical evidence to substantiate the alleged disabling impairments. In order to be considered disabled for MA purposes, the impairment must be severe. 20 CFR 916.920(a)(4)(ii); 20 CFR 916.920(b) An impairment, or combination of impairments, is severe if it significantly limits an individual's physical or mental ability to do basic work activities regardless of age, education and work experience. 20 CFR 916.920(a)(4)(ii); 20 CFR 916.920(c) Basic work activities means the abilities and aptitudes necessary to do most jobs. 20 CFR 916.921(b) Examples include:

1. Physical functions such as walking, standing, sitting, lifting, pushing, pulling, reaching, carrying, or handling;
2. Capacities for seeing, hearing, and speaking;
3. Understanding, carrying out, and remembering simple instructions;

4. Use of judgment;
5. Responding appropriately to supervision, co-workers and usual work situations; and
6. Dealing with changes in a routine work setting.

Id. The second step allows for dismissal of a disability claim obviously lacking in medical merit. *Higgs v Bowen*, 880 F2d 860, 862 (CA 6, 1988). The severity requirement may still be employed as an administrative convenience to screen out claims that are totally groundless solely from a medical standpoint. *Id.* at 863 citing *Farris v Sec of Health and Human Services*, 773 F2d 85, 90 n.1 (CA 6, 1985) An impairment qualifies as severe only if, regardless of a claimant's age, education, or work experience, the impairment would not affect the claimant's ability to work. *Salmi v Sec of Health and Human Services*, 774 F2d 685, 692 (CA 6, 1985)

In the present case, the Claimant alleges disability on the basis of knee pain, rheumatoid arthritis, chest pain, and a stone in her saliva gland. In support of the Claimant's claims of disability, older medical records were submitted from [REDACTED] [REDACTED]. On [REDACTED], the Claimant presented to [REDACTED] with complaints of chest pain and possible upper respiratory infection. The cardiovascular examination for normal rate and rhythm without murmurs, no edema but was tender to palpate over the upper sternum. An x-ray revealed an acute upper respiratory infection. The Claimant was provided antibiotics. On [REDACTED], the Claimant was tested for the possible onset of diabetes. The Claimant was instructed in use of home glucose checks, adherence to a diabetic diet, weight loss and exercise program. A follow-up visit was scheduled for 3 months. On [REDACTED], the Claimant presented to [REDACTED] due to a rash. The Claimant was prescribed cephalexin and given warm compresses.

The Claimant was instructed to follow up in 2 days. Two days later, on June 7th, the Claimant presented for the follow-up of cellulitis. The cellulitis (rash) was resolved. On [REDACTED], the Claimant presented to [REDACTED] with complaints of chest pain. The chest x-ray found the lungs clear and the heart within normal limits. The Claimant was released home in stable condition.

On [REDACTED], the Claimant presented to [REDACTED] department with complaints of left knee pain. X-rays of the knee found no acute fracture or dislocation. A physician's assistant provided the Claimant's care and suspected an internal injury to the cartilage or internal ligaments. The Claimant was recommended to follow through with an orthopedic specialist. The Claimant was provided crutches and prescribed pain medication.

There was no objective medical evidence presented to support the Claimant's assertion of rheumatoid arthritis.

The record was extended to allow the Claimant an opportunity to submit additional medical records for consideration. The additional records were received on March 9, 2009 and forwarded to SHRT for consideration. The "newly" submitted records were from treatment/tests

[REDACTED]

As previously noted, the Claimant bears the burden to present sufficient objective medical evidence to substantiate the alleged disabling impairment(s). As summarized above, the Claimant has presented some objective medical evidence establishing that she does have some physical limitations on her ability to perform basic work activities. Accordingly, the Claimant has impairment, or combination thereof, which has more than a *de minimis* effect on the Claimant's basic work activities thus Step 3 of the sequential evaluation process, is considered.

In the third step of the sequential analysis of a disability claim, the trier of fact must determine if the Claimant's impairment, or combination of impairments, is listed in Appendix 1 of Subpart P of 20 CFR, Part 404. The Claimant has alleged physical disabling impairments due, in part, knee pain. Appendix I, Listing of Impairments, discusses the analysis and criteria necessary to support a finding of a listed impairment. Listing 1.00 defines musculoskeletal system impairments. Disorders of the musculoskeletal system may result from hereditary, congenital, or acquired pathologic processes. 1.00A Impairments may result from infectious, inflammatory, or degenerative processes, traumatic or developmental events, or neoplastic, vascular, or toxic/metabolic diseases. 1.00A Regardless of the cause(s) of a musculoskeletal impairment, functional loss for purposes of these listings is defined as the inability to ambulate effectively on a sustained basis for any reason, including pain associated with the underlying musculoskeletal impairment, or the inability to perform fine and gross movements effectively on a sustained basis for any reason, including pain associated with the underlying musculoskeletal impairment. Inability to ambulate effectively means an extreme limitation of the ability to walk; i.e., an impairment(s) that interferes very seriously with the individual's ability to independently initiate, sustain, or complete activities. 1.00B2b (1) Ineffective ambulation is defined generally as having insufficient lower extremity function to permit independent ambulation without the use of a hand-held assistive device(s) that limits the functioning of both upper extremities. (Listing 1.05C is an exception to this general definition because the individual has the use of only one upper extremity due to amputation of a hand.) *Id.* To ambulate effectively, individuals must be capable of sustaining a reasonable walking pace over a sufficient distance to be able to carry out activities of daily living. 1.00B2b (2) They must have the ability to travel without companion assistance to and from a place of employment or school. . . . *Id.* When an individual's

impairment involves a lower extremity uses a hand-held assistive device, such as a cane, crutch or walker, the medical basis for use of the device should be documented. 1.00J4 The requirement to use a hand-held assistive device may also impact an individual's functional capacity by virtue of the fact that one or both upper extremities are not available for such activities as lifting, carrying, pushing, and pulling. *Id.*

Categories of Musculoskeletal include:

- 1.02 Major dysfunction of a joint(s) due to any cause: Characterized by gross anatomical deformity (e.g. subluxation, contracture, bony or fibrous ankylosis, instability) and chronic joint pain and stiffness with signs of limitation of motion or other abnormal motion of the affected joint(s), and findings on appropriate medically acceptable imaging of joint space narrowing, bony destruction, or ankylosis of the affected joint(s). With:
- A. Involvement of one major peripheral weight-bearing joint (i.e., hip, knee, or ankle), resulting in inability to ambulate effectively as defined in 1.00B2b; or
 - B. Involvement of one major peripheral joint in each upper extremity (i.e., shoulder, elbow, wrist, hand), resulting in inability to perform fine and gross movements effectively as defined in 1.00B2c

The inability to perform fine and gross movements effectively means that the impairment(s) interferes very seriously with the individual's ability to independently initiate, sustain, or complete activities. 1.00B2c To use upper extremities effectively, an individual must be capable of sustaining functions such as reaching, pushing, pulling, grasping, and fingering to be able to carry out activities of daily living. *Id.*

In July 2008, the Claimant was treated for left knee pain however there was no objective medical tests or procedures that established the left knee pain meets the severity requirement of a listing within 1.00. Although the Claimant's height and weight as measured by Body Mass Index ("BMI") falls above the "obesity" requirement, the submitted medical documentation was

insufficient to support a finding of a listed impairment within Listing 1.00, specifically 1.02 therefore the Claimant is not disabled under this Listing.

The Claimant has alleged disabling physical impairments due to chest pain and high blood pressure. Listing 4.00 defines cardiovascular impairment in part, as follows:

. . . any disorder that affects the proper functioning of the heart or the circulatory system (that is, arteries, veins, capillaries, and the lymphatic drainage). The disorder can be congenital or acquired. Cardiovascular impairment results from one or more of four consequences of heart disease:

- (i) Chronic heart failure or ventricular dysfunction.
- (ii) Discomfort or pain due to myocardial ischemia, with or without necrosis of heart muscle.
- (iii) Syncope, or near syncope, due to inadequate cerebral perfusion from any cardiac cause, such as obstruction of flow or disturbance in rhythm or conduction resulting in inadequate cardiac output.
- (iv) Central cyanosis due to right-to-left shunt, reduced oxygen concentration in the arterial blood, or pulmonary vascular disease.

An uncontrolled impairment means one that does not adequately respond to the standard prescribed medical treatment. 4.00A3f In a situation where an individual has not received ongoing treatment or have an ongoing relationship with the medical community despite the existence of a severe impairment, the disability evaluation is based on the current objective medical evidence. 4.00B3a If an individual does not receive treatment, an impairment that meets the criteria of a listing cannot be established. *Id.* Hypertension (high blood pressure) generally causes disability through its effect on other body systems and is evaluated by reference to specific body system(s) affected (heart, brain, kidneys, or eyes). 4.00H1 Hypertension, to include malignant hypertension, is not a listed impairment under 4.00 thus the effect on the Claimant's other body systems were evaluated by reference to specific body parts.

In the record presented, the Claimant was treated in treated in 2006 after complaints of chest pain. Possible onset of diabetes was noted. No further recent records were presented. The

record is devoid of any evidence of end organ damage. The Claimant's medical record is insufficient to meet the severity requirements of a listing within Listing 4.00. The record does not support a finding that the Claimant's physical impairment(s) are "listed impairments" or equivalent to a listed impairment detailed above. 20 CFR 416.920(a)(4)(iii) According to the medical evidence alone, and in consideration of the Claimant's obesity, the Claimant's physical impairment(s) do not meet or equal the requirements within Listing 4.00 thus she cannot be found to be disabled for purposes of the Medical Assistance program. The Claimant's eligibility under Step 4 is considered. 20 CFR 416.905(a)

The fourth step in analyzing a disability claim requires an assessment of the Claimant's residual functional capacity ("RFC") and past relevant employment. 20 CFR 416.920(a)(4)(iv) An individual is not disabled if he/she can perform past relevant work. *Id.*; 20 CFR 416.960(b)(3) Past relevant work is work that has been performed within the past 15 years that was a substantial gainful activity and that lasted long enough for the individual to learn the position. 20 CFR 416.960(b)(1) Vocational factors of age, education, and work experience, and whether the past relevant employment exists in significant numbers in the national economy is not considered. 20 CFR 416.960(b)(3) RFC is assessed based on impairment(s), and any related symptoms, such as pain, which may cause physical and mental limitations that affect what can be done in a work setting. RFC is the most that can be done, despite the limitations.

To determine the physical demands (exertional requirements) of work in the national economy, jobs are classified as sedentary, light, medium, heavy, and very heavy. 20 CFR 416.967 Sedentary work involves lifting of no more than 10 pounds at a time and occasionally lifting or carrying articles like docket files, ledgers, and small tools. 20 CFR 416.967(a) Although a sedentary job is defined as one which involves sitting, a certain amount of walking

and standing is often necessary in carrying out job duties. *Id.* Jobs are sedentary if walking and standing are required occasionally and other sedentary criteria are met. Light work involves lifting no more than 20 pounds at a time with frequent lifting or carrying objects weighing up to 10 pounds. 20 CFR 416.967(b) Even though weight lifted may be very little, a job is in this category when it requires a good deal of walking or standing, or when it involves sitting most of the time with some pushing and pulling of arm or leg controls. *Id.* To be considered capable of performing a full or wide range of light work, an individual must have the ability to do substantially all of these activities. *Id.* An individual capable of light work is also capable of sedentary work, unless there are additionally limiting factors such as loss of fine dexterity or inability to sit for long periods of time. *Id.* Medium work involves lifting no more than 50 pounds at a time with frequent lifting or carrying of objects weighing up to 25 pounds. 20 CFR 416.967(c) An individual capable of performing medium work is also capable of light and sedentary work. *Id.* Heavy work involves lifting no more than 100 pounds at a time with frequent lifting or carrying of objects weighing up to 50 pounds. 20 CFR 416.967(d) An individual capable of heavy work is also capable of medium, light, and sedentary work. *Id.* Finally, very heavy work involves lifting objects weighing more than 100 pounds at a time with frequent lifting or carrying objects weighing 50 pounds or more. 20 CFR 416.967(e) An individual capable of very heavy work is able to perform work under all categories. *Id.*

Over the past 15 years, the Claimant worked as a pharmacy technician, billing clerk and receptionist. The Claimant received some training and learned the position “on-the-job.” Given these facts, the Claimant’s past work history is classified as semi-skilled sedentary work.

The Claimant testified that she can lift/carry approximately 10 pounds; can sit for an hour; can walk approximately 2 blocks and can stand for about 10 minutes. The Claimant is

unable to squat due to left knee pain and must slowly climb/descend stairs. The Claimant is able to perform her household chores and tend to her personal hygiene without assistance.

If the impairment or combination of impairments does not limit physical or mental ability to do basic work activities, it is not a severe impairment(s) and disability does not exist. 20 CFR 416.920 In consideration of the Claimant's testimony, medical records, and current limitations, it is found that the Claimant is able to return to past relevant work as a billing clerk and/or receptionist, therefore the fifth-step in the sequential evaluation process is not required.

The State Disability Assistance ("SDA") program, which provides financial assistance for disabled persons, was established by 2004 PA 344. DHS administers the SDA program pursuant to MCL 400.10 *et seq.* and Michigan Administrative Code ("MAC R") 400.3151 – 400.3180. Department policies are found in PAM, PEM, and PRM. A person is considered disabled for SDA purposes if the person has a physical or mental impairment which meets federal SSI disability standards for at least ninety days. PEM 261, p. 1 Receipt of SSI or RSDI benefits based on disability or blindness, or the receipt of MA benefits based on disability or blindness (MA-P) automatically qualifies an individual as disabled for purposes of the SDA program. PEM 261, pp 1 – 2

In this case, there is insufficient evidence to support a finding that the Claimant's impairment has disabled her under the SSI disability standards. Accordingly, it is found that the Claimant is not disabled for purposes of the SDA program.

DECISION AND ORDER

The Administrative Law Judge, based upon the above finds of facts and conclusions of law, finds the Claimant not disabled for purposes of the Medical Assistance program and the State Disability Assistance program.

Accordingly, it is ORDERED:

The Department's determination is AFFIRMED.

_____/s/_____
Colleen M. Mamelka
Administrative Law Judge
For Ishmael Ahmed, Director
Department of Human Services

Date Signed: 03/31/09

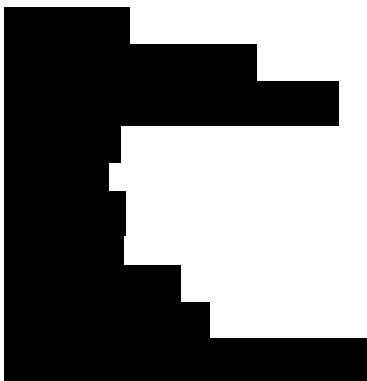

Date Mailed: 04/03/09

NOTICE: Administrative Hearings may order a rehearing or reconsideration on either its own motion or at the request of a party within 30 days of the mailing date of this Decision and Order. Administrative hearings will not order a rehearing or reconsideration on the Department's motion where the final decision cannot be implemented within 90 days of the filing of the original request.

The Claimant may appeal the Decision and Order to the Circuit within 30 days of the receipt of the Decision and Order or, if a timely request for rehearing was made, within 30 days of the receipt date of the rehearing decision.
