CONCLUSIONS OF LAW

The Medical Assistance Program is established pursuant to Title XIX of the Social Security Act and is implemented by Title 42 of the Code of Federal Regulations (CFR). It is administered in accordance with state statute, the Social Welfare Act, the Administrative Code, and the State Plan under Title XIX of the Social Security Act Medical Assistance Program.

On May 30, 1997, the Department was notified of the Health Care Financing Administration's approval of its request for a waiver of certain portions of the Social Security Act to restrict Medicaid beneficiaries' choice to obtain medical services only from specified Qualified Health Plans.

Michigan Public Act 246 of 2008 states, in relevant part:

Sec. 1650 (3) The criteria for medical exceptions to HMO enrollment shall be based on submitted documentation that indicates a recipient has a serious medical condition, and is undergoing active treatment for that condition with a physician who does not participate in 1 of the HMOs. If the person meets the criteria established by this subsection, the department shall grant an exception to managed care enrollment at least through the current prescribed course of treatment, subject to periodic review of continued eligibility.

MDCH Medicaid Provider Manual, Beneficiary Eligibility Section, April 1, 2009, page 23, 24, states in relevant part:

The intent of a medical exception is to preserve continuity of medical care for a beneficiary who is receiving active treatment for a serious medical condition from an attending physician (MD or DO) who would not be available to the beneficiary if the beneficiary was enrolled in a MHP. The medical exception may be granted on a time-limited basis necessary to complete treatment for the serious condition. The medical exception process is available only to a beneficiary who is not yet enrolled in a MHP, or who has been enrolled for less than two months. MHP enrollment would be delayed until one of the following occurs:

- the attending physician completes the current ongoing plan of medical treatment for the patient's serious medical condition, or
- the condition stabilizes and becomes chronic in nature, or
- the physician becomes available to the beneficiary through enrollment in a MHP.

If the treating physician can provide service through a MHP that the beneficiary can be enrolled in, then there is no basis for a medical exception to managed care enrollment.

If a beneficiary is enrolled in a MHP, and develops a serious medical condition after enrollment, the medical exception does not apply. The beneficiary should establish relationships with providers within the plan network who can appropriately treat the serious medical condition.

Serious Medical Condition

Grave, complex, or life threatening

Manifests symptoms needing timely intervention to prevent complications or permanent impairment.

An acute exacerbation of a chronic condition may be considered serious for the purpose of medical exception.

Chronic Medical Condition

Relatively stable

Requires long term management

Carries little immediate risk to health

Fluctuate over time, but responds to well-known standard medical treatment protocols.

Active treatment

Active treatment is reviewed in regards to intensity of services.

The beneficiary is seen regularly, (e.g., monthly or more frequently,) and

The condition requires timely and ongoing assessment because of the severity of symptoms, and/or the treatment.

Attending/Treating Physician

The physician (MD or DO) may be either a primary care doctor or a specialist whose scope of practice enables the interventions necessary to treat the serious condition.

MHP Participating Physician

A physician is considered participating in a MHP if he is in the MHP provider network or is available on an out-of-network basis with one of the MHPs for which the beneficiary can be enrolled. The physician may not have a contract with the MHP but may have a referral arrangement to treat the plan's enrollees. If the physician can treat the beneficiary and receive payment from the plan, then the beneficiary would be enrolled in that plan and no medical exception would be allowed.

The Department's witness, ██████████ testified that in order to receive an exception from managed care the Appellant must satisfy all three statutory criteria; seriousness, active treatment and a non-participating physician. *Supra*.

Today, she explained, that an MSA physician reviewer agreed with her analysis which found that the Appellant's condition was no longer serious, but rather that the Appellant now suffered from a chronic condition. This status required standard medical treatment and monitoring available through an MHP. She also explained that out of network specialists were available through an open access agreement with several MHPs available to the Appellant.
