

STATE OF MICHIGAN  
STATE OFFICE OF ADMINISTRATIVE HEARINGS AND RULES

ADMINISTRATIVE HEARINGS FOR THE  
DEPARTMENT OF HUMAN SERVICES

IN THE MATTER OF:

[REDACTED]

Claimant

Reg. No.: 2009-16826

Issue No.: 2009/4031

Case No.: [REDACTED]

Load No.: [REDACTED]

Hearing Date:

July 1, 2009

Macomb County DHS (36)

ADMINISTRATIVE LAW JUDGE: Colleen M. Mamelka

HEARING DECISION

This matter is before the undersigned Administrative Law Judge pursuant to MCL 400.9 and MCL 400.37 upon the Claimant's request for a hearing. After due notice, a hearing was held in Sterling Heights, Michigan on Wednesday, July 1, 2009. The Claimant appeared and testified. The Claimant was represented by [REDACTED] of [REDACTED]. [REDACTED] appeared on behalf of the Department. At the Claimant's request, the record was extended to allow for the submission of additional medical records.

The additional records were received, reviewed, and forwarded to the State Hearing Review Team ("SHRT") for consideration. On December 21, 2009, the SHRT found the Claimant not disabled. This matter is now before the undersigned for a final decision.

ISSUE

Whether the Department properly determined that the Claimant was not disabled for purposes of of the Medical Assistance ("MA-P") and State Disability Assistance ("SDA") programs?

FINDINGS OF FACT

The Administrative Law Judge, based on the competent, material and substantial evidence on the whole record, finds as material fact:

1. The Claimant submitted an application for public assistance seeking Medical Assistance (“MA-P”) and State Disability Assistance on November 12, 2008.
2. On December 11, 2008, the Medical Review Team (“MRT”) deferred the disability determination requesting an orthopedic consultative examination. (Exhibit 1, p. 1)
3. On January 15, 2009, the Claimant attended the independent examination. (Exhibit 1, pp. 4 – 7)
4. On February 4, 2009, the MRT determined the Claimant was not disabled for purposes of the MA-P and SDA benefit programs. (Exhibit 1, pp. 1, 2)
5. On February 9, 2009, the Department sent an Eligibility Notice to the Claimant informing her that she was found not disabled for purposes of the MA-P and SDA programs.
6. On February 26, 2009, the Department received the Claimant’s written Request for Hearing.
7. On April 15, 2009 and December 21, 2009, the State Hearing Review Team (“SHRT”) determined the Claimant was not disabled. (Exhibit 2)
8. The Claimant’s alleged physical and mental disabling impairment(s) are due to left foot fracture, hernia, asthma, acid reflux, irritable bowel syndrome, Morton’s neuroma, depression, and learning disability.
9. At the time of hearing, the Claimant was 37 years old with a [REDACTED] birth date; was 5’4” in height; and weighed 237 pounds.

10. The Claimant is a high school graduate with a work history as a housekeeper at a hospital, telemarketer, sales associate, and day care provider.

#### CONCLUSIONS OF LAW

The Medical Assistance (“MA”) program is established by Subchapter XIX of Chapter 7 of The Public Health & Welfare Act, 42 USC 1397, and is administered by the Department of Human Services (“DHS”), formally known as the Family Independence Agency, pursuant to MCL 400.10 *et seq* and MCL 400.105. Department policies are found in the Program Administrative Manual (“PAM”), the Program Eligibility Manual (“PEM”), and the Program Reference Manual (“PRM”).

Disability is defined as the inability to do any substantial gainful activity by reason of any medically determinable physical or mental impairment which can be expected to result in death or which has lasted or can be expected to last for a continuous period of not less than 12 months. 20 CFR 416.905(a) The person claiming a physical or mental disability has the burden to establish it through the use of competent medical evidence from qualified medical sources such as his or her medical history, clinical/laboratory findings, diagnosis/prescribed treatment, prognosis for recovery and/or medical assessment of ability to do work-related activities or ability to reason and make appropriate mental adjustments, if a mental disability is alleged. 20 CFR 413.913 An individual’s subjective pain complaints are not, in and of themselves, sufficient to establish disability. 20 CFR 416.908; 20 CFR 416.929(a) Similarly, conclusory statements by a physician or mental health professional that an individual is disabled or blind, absent supporting medical evidence, is insufficient to establish disability. 20 CFR 416.927

When determining disability, the federal regulations require several factors to be considered including: (1) the location/duration/frequency/intensity of an applicant’s pain; (2)

the type/dosage/effectiveness/side effects of any medication the applicants takes to relieve pain; (3) any treatment other than pain medication that the applicant has received to relieve pain; and (4) the effect of the applicant's pain on his or her ability to do basic work activities. 20 CFR 416.929(c)(3) The applicant's pain must be assessed to determine the extent of his or her functional limitation(s) in light of the objective medical evidence presented. 20 CFR 416.929(c)(2)

In order to determine whether or not an individual is disabled, federal regulations require a five-step sequential evaluation process be utilized. 20 CFR 416.920(a)(1) The five-step analysis requires the trier of fact to consider an individual's current work activity; the severity of the impairment(s) both in duration and whether it meets or equals a listed impairment in Appendix 1; residual functional capacity to determine whether an individual can perform past relevant work; and residual functional capacity along with vocational factors (i.e. age, education, and work experience) to determine if an individual can adjust to other work. 20 CFR 416.920(a)(4); 20 CFR 416.945

If an individual is found disabled, or not disabled, at any step, a determination or decision is made with no need evaluate subsequent steps. 20 CFR 416.920(a)(4) If a determination cannot be made that an individual is disabled, or not disabled, at a particular step, the next step is required. 20 CFR 416.920(a)(4) If an impairment does not meet or equal a listed impairment, an individual's residual functional capacity is assessed before moving from step three to step four. 20 CFR 416.920(a)(4); 20 CFR 416.945 Residual functional capacity is the most an individual can do despite the limitations based on all relevant evidence. 20 CFR 945(a)(1) An individual's residual functional capacity assessment is evaluated at both steps four and five. 20 CFR 416.920(a)(4) In determining disability, an individual's functional capacity to perform basic

work activities is evaluated and if found that the individual has the ability to perform basic work activities without significant limitation, disability will not be found. 20 CFR 416.994(b)(1)(iv) In general, the individual has the responsibility to prove disability. 20 CFR 416.912(a) An impairment or combination of impairments is not severe if it does not significantly limit an individual's physical or mental ability to do basic work activities. 20 CFR 416.921(a) The individual has the responsibility to provide evidence of prior work experience; efforts to work; and any other factor showing how the impairment affects the ability to work. 20 CFR 416.912(c)(3)(5)(6)

As outlined above, the first step looks at the individual's current work activity. An individual is not disabled regardless of the medical condition, age, education, and work experience, if the individual is working and the work is a substantial, gainful activity. 20 CFR 416.920(a)(4)(i) In the record presented, the Claimant is not involved in substantial gainful activity thus is not ineligible for disability under Step 1.

The severity of the Claimant's alleged impairment(s) is considered under Step 2. The Claimant bears the burden to present sufficient objective medical evidence to substantiate the alleged disabling impairments. In order to be considered disabled for MA purposes, the impairment must be severe. 20 CFR 916.920(a)(4)(ii); 20 CFR 916.920(b) An impairment, or combination of impairments, is severe if it significantly limits an individual's physical or mental ability to do basic work activities regardless of age, education and work experience. 20 CFR 916.920(a)(4)(ii); 20 CFR 916.920(c) Basic work activities means the abilities and aptitudes necessary to do most jobs. 20 CFR 916.921(b) Examples include:

1. Physical functions such as walking, standing, sitting, lifting, pushing, pulling, reaching, carrying, or handling;
2. Capacities for seeing, hearing, and speaking;

3. Understanding, carrying out, and remembering simple instructions;
4. Use of judgment;
5. Responding appropriately to supervision, co-workers and usual work situations; and
6. Dealing with changes in a routine work setting.

*Id.* The second step allows for dismissal of a disability claim obviously lacking in medical merit. *Higgs v Bowen*, 880 F2d 860, 862 (CA 6, 1988). The severity requirement may still be employed as an administrative convenience to screen out claims that are totally groundless solely from a medical standpoint. *Id.* at 863 citing *Farris v Sec of Health and Human Services*, 773 F2d 85, 90 n.1 (CA 6, 1985) An impairment qualifies as non-severe only if, regardless of a claimant's age, education, or work experience, the impairment would not affect the claimant's ability to work. *Salmi v Sec of Health and Human Services*, 774 F2d 685, 692 (CA 6, 1985)

In the present case, the Claimant alleges physical and mental disability due to left foot fracture, hernia, asthma, acid reflux, irritable bowel syndrome, Morton's neuroma, depression, and learning disability. In support of her claim, some older medical records from 2006 and 2007 were submitted that show treatment for Morton's neuroma (left foot) requiring excision and hardware, stress fracture, bursitis, and infection.

On [REDACTED], the podiatrist opined that the Claimant's disability due to foot surgery would last until approximately [REDACTED].

On [REDACTED], the Claimant attended a psychiatric evaluation which diagnosed her with dysthymia with a Global Assessment Functioning ("GAF") of 46(?- not legible)

The Claimant's medication was reviewed monthly noting medication compliance with regular adjustments in treatment.

On [REDACTED], the county mental health completed an initial intake evaluation.

The Claimant was diagnosed with dysthymic disorder, ADHD with a GAF of 58.

On [REDACTED], a bone scan revealed a stress fracture of the left foot.

On [REDACTED], the Claimant attended a therapy session.

On [REDACTED], a Psychiatric/Psychological Examination Report was completed on behalf of the Claimant. The current diagnosis was dysthymia with a GAF of 60. A Mental Residual Functional Capacity Assessment was completed on behalf of the Claimant. The Claimant was markedly limited in her ability to understand and remember detailed instructions.

On [REDACTED], a Medical Needs form was completed on behalf of the Claimant which listed the diagnoses as necrosis with prior surgery. The Claimant was ambulatory; did not need special transportation; did not need someone to accompany her on appointments; and was able to meet her needs for daily living. The Claimant was found able to perform "sitting only" work. On this same date, a Medical Examination Report was completed on behalf of the Claimant. The current diagnosis was a left (foot) fracture. The Claimant was in stable condition but was unable to lift/carry any weight and unable to perform repetitive actions with her hands/arms but was able to operate a foot/leg control with her right foot/leg. The Claimant had no mental limitations.

On [REDACTED], the Claimant attended an orthopedic consultative examination. Examination of the left foot revealed scar marks on the dorsum of the foot distally which were well healed. Tenderness on palpation was documented. Muscle strength on the left was 4+/5 with poor effort noted. The Claimant's gait was normal and there was not a need for an assistive device for ambulation. The left foot examination found no evidence of acute osseous abnormality. Ultimately, the Claimant was found to have a case of Morton's neuroma which

required surgical intervention which resulted in hammertoes. The Claimant developed osteomyelitis which was treated and now has chronic non-radicular pain in the foot distally however there was no definite objective findings to account for evidence of hammertoes or pain in her foot. The Claimant's history of severe depression was also noted.

In an undated letter from the Macomb Family Services, Inc., the Claimant was noted as suffering from severe and chronic depression (dysthymia), which compounded by her health issue, the LMSW opined that the Claimant was unable to work.

On [REDACTED], a Disability Certificate was completed on behalf of the Claimant providing that the Claimant is totally incapacitated due to her inability to walk, stand, and ambulate for long periods, due to her painful left foot.

On [REDACTED], a Wechsler Adult Intelligence Test was performed to determine the Claimant's level of intellectual functioning. The verbal IQ was 65; the performance IQ was 67; and the full scale IQ was 63.

On [REDACTED], an LMSW authored a letter stating that the Claimant participates in individual therapy and sees a psychiatrist for medication reviews. The diagnoses were severe depression and attention deficit hyperactive disorder ("ADHD").

As previously noted, the Claimant bears the burden to present sufficient objective medical evidence to substantiate the alleged disabling impairment(s). As summarized above, the Claimant has presented medical evidence establishing that she does have some physical limitations on her ability to perform basic work activities. The medical evidence has established that the Claimant has an impairment, or combination thereof, that has more than a *de minimis* effect on the Claimant's basic work activities. Further, the impairments have lasted, or are

expected to last, continuously for twelve months; therefore, the Claimant is not disqualified from receipt of MA-P benefits under Step 2.

In the third step of the sequential analysis of a disability claim, the trier of fact must determine if the Claimant's impairment, or combination of impairments, is listed in Appendix 1 of Subpart P of 20 CFR, Part 404. The Claimant has alleged physical and mental disabling impairments due to left foot fracture, hernia, asthma, acid reflux, irritable bowel syndrome, Morton's neuroma, depression, ADHD, and learning disability

Listing 1.00 defines musculoskeletal system impairments. Disorders of the musculoskeletal system may result from hereditary, congenital, or acquired pathologic processes. 1.00A Impairments may result from infectious, inflammatory, or degenerative processes, traumatic or developmental events, or neoplastic, vascular, or toxic/metabolic diseases. 1.00A Regardless of the cause(s) of a musculoskeletal impairment, functional loss for purposes of these listings is defined as the inability to ambulate effectively on a sustained basis for any reason, including pain associated with the underlying musculoskeletal impairment, or the inability to perform fine and gross movements effectively on a sustained basis for any reason, including pain associated with the underlying musculoskeletal impairment. Inability to ambulate effectively means an extreme limitation of the ability to walk; i.e., an impairment(s) that interferes very seriously with the individual's ability to independently initiate, sustain, or complete activities. 1.00B2b(1) Ineffective ambulation is defined generally as having insufficient lower extremity function to permit independent ambulation without the use of a hand-held assistive device(s) that limits the functioning of both upper extremities. (Listing 1.05C is an exception to this general definition because the individual has the use of only one upper extremity due to amputation of a hand.) *Id.* To ambulate effectively, individuals must be capable of sustaining a reasonable

walking pace over a sufficient distance to be able to carry out activities of daily living.

1.00B2b(2) They must have the ability to travel without companion assistance to and from a place of employment or school. . . . *Id.* When an individual's impairment involves a lower extremity uses a hand-held assistive device, such as a cane, crutch or walker, the medical basis for use of the device should be documented. 1.00J4 The requirement to use a hand-held assistive device may also impact an individual's functional capacity by virtue of the fact that one or both upper extremities are not available for such activities as lifting, carrying, pushing, and pulling. *Id.*

Categories of Musculoskeletal include:

- 1.02 Major dysfunction of a joint(s) due to any cause: Characterized by gross anatomical deformity (e.g. subluxation, contracture, bony or fibrous ankylosis, instability) and chronic joint pain and stiffness with signs of limitation of motion or other abnormal motion of the affected joint(s), and findings on appropriate medically acceptable imaging of joint space narrowing, bony destruction, or ankylosis of the affected joint(s). With:
- A. Involvement of one major peripheral weight-bearing joint (i.e., hip, knee, or ankle), resulting in inability to ambulate effectively as defined in 1.00B2b; or
  - B. Involvement of one major peripheral joint in each upper extremity (i.e., shoulder, elbow, wrist, hand), resulting in inability to perform fine and gross movements effectively a defined in 1.00B2c
- 1.03 Reconstructive surgery or surgical arthrodesis of a major weight-bearing joint, with inability to ambulate effectively, as defined in 1.00B2b, and return to effective ambulation did not occur, or is not expected to occur, within 12 months of onset.
- \* \* \*
- 1.06 Fracture of the femur, tibia, pelvis, or one or more of the tarsal bones. With:
- A. Solid union not evident on appropriate medically acceptable imaging and not clinically solid;

and

- B. Inability to ambulate effectively, as defined in 1.00B2b, and return to effective ambulation did not occur or is not expected to occur within 12 months of onset.

In this case, the objective findings reveal that the Claimant required surgery due to a swollen nerve (Morton's neuroma) in her foot in 2007. More recent records documents a left foot stress fracture and pain however in [REDACTED], the Claimant's gait was normal with no need for an assistive device. Ultimately, the objective findings are insufficient to meet the necessary intent and severity requirement to meet a listed impairment within 1.00 as detailed above. Accordingly, the Claimant cannot be found disabled, or not disabled, under this listing.

The Claimant has alleged physical disabling impairments due in part to a hernia, asthma, acid reflux, and irritable bowel syndrome. There was no (or very little) treatment for these alleged impairments. Listings 3.00 (respiratory system) and 5.00 (digestive disorders) were considered. The objective findings fail to meet the intent and severity requirements to meet a listed impairment within 3.00 and/or 5.00.

The Claimant asserts mental disabling impairments due to depression/anxiety, dysthymic disorder, learning disability, and ADHD. Listing 12.00 encompasses adult mental disorders. The evaluation of disability on the basis of mental disorders requires documentation of a medically determinable impairment(s) and consideration of the degree in which the impairment limits the individual's ability to work, and whether these limitations have lasted or are expected to last for a continuous period of at least 12 months. 12.00A The existence of a medically determinable impairment(s) of the required duration must be established through medical evidence consisting of symptoms, signs, and laboratory findings, to include psychological test findings. 12.00B The evaluation of disability on the basis of a mental disorder requires

sufficient evidence to (1) establish the presence of a medically determinable mental impairment(s), (2) assess the degree of functional limitation the impairment(s) imposes, and (3) project the probable duration of the impairment(s). 12.00D The evaluation of disability on the basis of mental disorders requires documentation of a medically determinable impairment(s) and consideration of the degree in which the impairment limits the individual's ability to work consideration, and whether these limitations have lasted or are expected to last for a continuous period of at least 12 months. 12.00A The severity requirement is measured according to the functional limitations imposed by the medically determinable mental impairment. 12.00C Functional limitations are assessed in consideration of an individual's activities of daily living; social functioning; concentration, persistence, or pace; and episodes of decompensation. *Id.*

Listing 12.04 defines affective disorders as being characterized by a disturbance of mood, accompanied by a full or partial manic or depressive syndrome. Generally, affective disorders involve either depression or elation. The required level of severity for these disorders is met when the requirements of both A and B are satisfied, or when the requirements in C are satisfied.

- A. Medically documented persistence, either continuous or intermittent, of one of the following:
  - 1. Depressive syndrome characterized by at least four of the following:
    - a. Anhedonia or pervasive loss of interest in almost all activities; or
    - b. Appetite disturbance with change in weight; or
    - c. Sleep disturbance; or
    - d. Psychomotor agitation or retardation; or
    - e. Decreased energy; or
    - f. Feelings of guilt or worthlessness; or
    - g. Difficulty concentrating or thinking; or
    - h. Thoughts of suicide; or

- i. Hallucinations, delusions, or paranoid thinking; or
2. Manic syndrome characterized by at least three of the following:
  - a. Hyperactivity; or
  - b. Pressure of speech; or
  - c. Flight of ideas; or
  - d. Inflated self-esteem; or
  - e. Decreased need for sleep; or
  - f. Easy distractability; or
  - g. Involvement in activities that have a high probability of painful consequences which are not recognized; or
  - h. Hallucinations, delusions, or paranoid thinking; or
3. Bipolar syndrome with a history of episodic periods manifested by the full symptomatic picture of both manic and depressive syndromes (and currently characterized by either or both syndromes)

AND

- B. Resulting in at least two of the following:
1. Marked restriction on activities of daily living; or
  2. Marked difficulties in maintaining social functioning; or
  3. Marked difficulties in maintaining concentration, persistence, or pace; or
  4. Repeated episodes of decompensation, each of extended duration;

OR

- C. Medically documented history of chronic affective disorder of at least 2 years' duration that has caused more than a minimal limitation of ability to do basic work activities, with symptoms or signs currently attenuated by medication or psychosocial support, and one of the following:
1. Repeated episodes of decompensation, each of extended duration; or
  2. A residual disease process that has resulted in such marginal adjustment that even minimal increase in mental demands or change in the environment would be predicted to cause the individual to decompensate; or

3. Current history of 1 or more years' inability to function outside a highly supportive living arrangement, with an indication of continued need for such an arrangement.

Listing 12.05 discusses mental retardation which refers to significantly subaverage general intellectual functioning with deficits in adaptive functioning initially manifested during the developmental period; i.e., the evidence demonstrates or supports onset of the impairment before age 22. The required level of severity for this disorder is met when the requirements of A, B, C, or D are satisfied.

- A. Mental incapacity evidenced by dependence upon others for personal needs (e.g., toileting, eating, dressing, or bathing) and inability to follow directions, such that the use of standardized measures of intellectual functioning is precluded;

OR

- B. A valid verbal, performance, or full scale IQ of 59 or less;

OR

- C. A valid verbal, performance, or full scale IQ of 60 through 70 and a physical or other mental impairment imposing an additional and significant work-related limitation of function;

OR

- D. A valid verbal, performance, or full scale IQ of 60 through 70, resulting in at least two of the following:

1. Marked restriction of activities of daily living; or
2. Marked difficulties in maintaining social functioning; or
3. Marked difficulties in maintaining concentration, persistence, or pace; or
4. Repeated episodes of decompensation, each of extended duration.

Listing 12.06 defines anxiety-related disorders whether anxiety is either the predominant disturbance or it is experienced if the individual attempts to master symptoms. The required level of severity for these disorders are met when the requirements in both A and B are satisfied, or when the requirements in both A and C are satisfied.

A. Medically documented findings of at least one of the following:

1. Generalized persistent anxiety accompanied by three out of four of the following signs or symptoms:
  - a. Motor tension; or
  - b. Autonomic hyperactivity; or
  - c. Apprehensive expectation; or
  - d. Vigilance and scanning; or
2. A persistent irrational fear of a specific object, activity, or situation which results in a compelling desire to avoid the dreaded object, activity, or situation; or
3. Recurrent severe panic attacks manifested by a sudden unpredictable onset of intense apprehension, fear, terror and sense of impending doom occurring on the average of at least once a week; or
4. Recurrent obsessions or compulsions which are a source of marked distress; or
5. Recurrent and intrusive recollections of a traumatic experience, which are a source of marked distress;

AND

B. Resulting in at least two of the following:

1. Marked restriction of activities of daily living; or
2. Marked difficulties in maintaining social functioning; or
3. Marked difficulties in maintaining concentration, persistence, or pace; or

4. Repeated episodes of decompensation, each of extended duration.

OR

C. Resulting in complete inability to function independently outside the area of one's home.

In this case, the objective findings establish that the Claimant was diagnosed with depression, dysthymic disorder, and ADHD. The records also document the Claimant's participation in therapy as well as her compliance with her medication regime. The only markedly limited restriction documented related to the Claimant's ability to understand and remember detailed instructions. The Claimant's most recent GAF was 58. The Claimant's verbal and performance IQ were 65 and 67 respectively, with the full scale IQ of 63. Although these scores reflect an extremely low range of intellectual functioning, it does not meet the criteria to establish mental retardation (12.05). Ultimately, the Claimant's medical record does not support a finding that the Claimant's physical impairment(s) are "listed impairments" or equivalent to a listed impairment within 12.00 as detailed above.

According to the medical evidence alone, the Claimant's physical impairment(s) do not meet or equal the requirements of the above cited listings therefore she cannot be found to be disabled for purposes of the Medical Assistance program. Accordingly, the Claimant's eligibility under Step 4 is considered. 20 CFR 416.905(a)

The fourth step in analyzing a disability claim requires an assessment of the Claimant's residual functional capacity ("RFC") and past relevant employment. 20 CFR 416.920(a)(4)(iv) An individual is not disabled if he/she can perform past relevant work. *Id.*; 20 CFR 416.960(b)(3) Past relevant work is work that has been performed within the past 15 years that was a substantial gainful activity and that lasted long enough for the individual to learn the position. 20 CFR 416.960(b)(1) Vocational factors of age, education, and work experience, and

whether the past relevant employment exists in significant numbers in the national economy is not considered. 20 CFR 416.960(b)(3) RFC is assessed based on impairment(s), and any related symptoms, such as pain, which may cause physical and mental limitations that affect what can be done in a work setting. RFC is the most that can be done, despite the limitations.

To determine the physical demands (exertional requirements) of work in the national economy, jobs are classified as sedentary, light, medium, heavy, and very heavy. 20 CFR 416.967 Sedentary work involves lifting of no more than 10 pounds at a time and occasionally lifting or carrying articles like docket files, ledgers, and small tools. 20 CFR 416.967(a) Although a sedentary job is defined as one which involves sitting, a certain amount of walking and standing is often necessary in carrying out job duties. *Id.* Jobs are sedentary if walking and standing are required occasionally and other sedentary criteria are met. Light work involves lifting no more than 20 pounds at a time with frequent lifting or carrying objects weighing up to 10 pounds. 20 CFR 416.967(b) Even though weight lifted may be very little, a job is in this category when it requires a good deal of walking or standing, or when it involves sitting most of the time with some pushing and pulling of arm or leg controls. *Id.* To be considered capable of performing a full or wide range of light work, an individual must have the ability to do substantially all of these activities. *Id.* An individual capable of light work is also capable of sedentary work, unless there are additionally limiting factors such as loss of fine dexterity or inability to sit for long periods of time. *Id.* Medium work involves lifting no more than 50 pounds at a time with frequent lifting or carrying of objects weighing up to 25 pounds. 20 CFR 416.967(c) An individual capable of performing medium work is also capable of light and sedentary work. *Id.* Heavy work involves lifting no more than 100 pounds at a time with frequent lifting or carrying of objects weighing up to 50 pounds. 20 CFR 416.967(d) An

individual capable of heavy work is also capable of medium, light, and sedentary work. *Id.* Finally, very heavy work involves lifting objects weighing more than 100 pounds at a time with frequent lifting or carrying objects weighing 50 pounds or more. 20 CFR 416.967(e) An individual capable of very heavy work is able to perform work under all categories. *Id.*

Limitations or restrictions which affect the ability to meet the demands of jobs other than strength demands (exertional requirements, i.e. sitting, standing, walking, lifting, carrying, pushing, or pulling) are considered nonexertional. 20 CFR 416.969a(a) In considering whether an individual can perform past relevant work, a comparison of the individual's residual functional capacity with the demands of past relevant work. *Id.* If an individual can no longer do past relevant work the same residual functional capacity assessment along with an individual's age, education, and work experience is considered to determine whether an individual can adjust to other work which exists in the national economy. *Id.* Examples of non-exertional limitations or restrictions include difficulty function due to nervousness, anxiousness, or depression; difficulty maintaining attention or concentration; difficulty understanding or remembering detailed instructions; difficulty in seeing or hearing; difficulty tolerating some physical feature(s) of certain work settings (i.e. can't tolerate dust or fumes); or difficulty performing the manipulative or postural functions of some work such as reaching, handling, stooping, climbing, crawling, or crouching. 20 CFR 416.969a(c)(1)(i) – (vi) If the impairment(s) and related symptoms, such as pain, only affect the ability to perform the non-exertional aspects of work-related activities, the rules in Appendix 2 do not direct factual conclusions of disabled or not disabled. 20 CFR 416.969a(c)(2) The determination of whether disability exists is based upon the principles in the appropriate sections of the regulations, giving consideration to the rules for specific case situations in Appendix 2. *Id.*

The Claimant's prior work history consists of employment as a housekeeper at a hospital, telemarketer, sales associate, and day care provider. In light of the Claimant's testimony and in consideration of the Occupational Code, the Claimant's housekeeping employment, sales position, and day care provider is considered unskilled, light work while the Claimant's telemarketing position is considered unskilled, sedentary work.

The Claimant testified that she can lift/carry approximately 10 pounds; can walk short distances; can sit for long periods provided she can elevate her foot; can stand for 5 to 10 minutes; and experiences difficulty bending and squatting. The medical records indicate the Claimant is able to work a "sitting only" job however she was unable to lift/carry any weight and was unable to perform repetitive actions with her extremities with the exception of her right foot/leg. Although the [REDACTED] disability certificate provides that the Claimant is unable to work due to her left foot pain, this certificate does not provide for an approval of disability based on the federal criteria as detailed above. As stated above, conclusory statements by a physician or mental health professional that an individual is disabled or blind, absent supporting medical evidence, is insufficient to establish disability. 20 CFR 416.927 If the impairment or combination of impairments does not limit physical or mental ability to do basic work activities, it is not a severe impairment(s) and disability does not exist. 20 CFR 416.920 In consideration of the Claimant's testimony, medical records, and current limitations, it is found that the Claimant is not able to return to past relevant work as a sales associate, day care provider, or housekeeper however, the Claimant is able to perform her past relevant work as a telemarketer (unskilled, sedentary) therefore the Claimant is found not disabled at Step 4 with no further analysis required.

Assuming arguendo that the 5<sup>th</sup> Step was necessary: In Step 5, an assessment of the individual's residual functional capacity and age, education, and work experience is considered to determine whether an adjustment to other work can be made. 20 CFR 416.920(4)(v) At the time of hearing, the Claimant, a high school graduate, was 37 years old thus considered to be a younger individual for MA-P purposes. Disability is found disabled if an individual is unable to adjust to other work. *Id.* At this point in the analysis, the burden shifts from the Claimant to the Department to present proof that the Claimant has the residual capacity to substantial gainful employment. 20 CFR 416.960(2); *Richardson v Sec of Health and Human Services*, 735 F2d 962, 964 (CA 6, 1984). While a vocational expert is not required, a finding supported by substantial evidence that the individual has the vocational qualifications to perform specific jobs is needed to meet the burden. *O'Banner v Sec of Health and Human Services*, 587 F2d 321, 323 (CA 6, 1978). Medical-Vocational guidelines found at 20 CFR Subpart P, Appendix II, may be used to satisfy the burden of proving that the individual can perform specific jobs in the national economy. *Heckler v Campbell*, 461 US 458, 467 (1983); *Kirk v Secretary*, 667 F2d 524, 529 (CA 6, 1981) *cert den* 461 US 957 (1983).

In the record presented, the total impact caused by the combination of medical problems suffered by the Claimant would be considered. In doing so, the Claimant would be found able to perform the full range of activities necessary for sedentary work as defined in 20 CFR 416.967(a). After review of the entire record and in consideration of the Medical-Vocational Guidelines [20 CFR 404, Subpart P, Appendix II], specifically 201.27, and finding no contradiction with the Claimant's mental impairment(s), it would be held that the Claimant is not disabled for purposes of the MA-P program at Step 5.

The State Disability Assistance (“SDA”) program, which provides financial assistance for disabled persons, was established by 2004 PA 344. DHS administers the SDA program pursuant to MCL 400.10 *et seq.* and Michigan Administrative Code (“MAC R”) 400.3151 – 400.3180. Department policies are found in PAM, PEM, and PRM. A person is considered disabled for SDA purposes if the person has a physical or mental impairment which meets federal SSI disability standards for at least ninety days. Receipt of SSI or RSDI benefits based on disability or blindness, or the receipt of MA benefits based on disability or blindness (MA-P) automatically qualifies an individual as disabled for purposes of the SDA program.

In this case, the Claimant is found not disabled for purposes of the Medical Assistance (“MA-P”) program therefore the Claimant’s is found not disabled for purposes of SDA benefits.

DECISION AND ORDER

The Administrative Law Judge, based upon the findings of fact and conclusions of law, finds the Claimant not disabled for purposes of the Medical Assistance program and the State Disability Assistance program.

It is ORDERED:

The Department’s determination is AFFIRMED.

*Colleen M. Mamelka*

---

Colleen M. Mamelka  
Administrative Law Judge  
For Ishmael Ahmed, Director  
Department of Human Services

Date Signed: 1/19/2010

Date Mailed: 1/19/2010

**NOTICE:** Administrative Hearings may order a rehearing or reconsideration on either its own motion or at the request of a party within 30 days of the mailing date of this Decision and Order. Administrative hearings will not order a rehearing or reconsideration on the Department’s

motion where the final decision cannot be implemented within 90 days of the filing of the original request.

The Claimant may appeal the Decision and Order to the Circuit within 30 days of the receipt of the Decision and Order or, if a timely request for rehearing was made, within 30 days of the receipt date of the rehearing decision.
