IN THE MATTER OF

██████████,

Appellant

_____ /

Docket No. 2009-24281 CMH
Case No. ██████████

DECISION AND ORDER

This matter is before the undersigned Administrative Law Judge (ALJ) pursuant to MCL 400.9 upon the Appellant's request for a hearing.

After due notice, a hearing was held ██████████. ██████████ represented herself. ██████████ was present and testified on her behalf. ██████████ was present and did testify at hearing.

Certified Deaf Interpreters, ██████████ were present and interpreted for the benefit of the Appellant.

██████████ represented ██████████, the contracted Mental Health Services provider for the Department of Community Health. ██████████, was also present for ██████████. ██████████, was present and did testify on behalf of the Department.

ISSUE

Did ██████████ properly terminate Case Management Services for the Appellant?

FINDINGS OF FACT

The Administrative Law Judge, based upon the competent, material and substantial evidence on the whole record, finds as material fact:

1. The Appellant is a Medicaid beneficiary diagnosed with a serious mental illness.

Docket No. – 2009-24281 CMH
Decision and Order

2. The Appellant resides in the community in her own home, with her husband and daughter.
3. [REDACTED] is a pre-paid Inpatient Health Plan (PIHP) and contractor of the Michigan Department of Community Health (MDCH).
4. The Appellant is diagnosed with borderline personality disorder and bi-polar disorder.
5. The Appellant has received case management services through [REDACTED] in the past.
6. The Appellant's most recent psychiatric evaluation was in [REDACTED]. The evaluation indicates an Axis I diagnosis of Major Depression disorder, recurrent, Dysthymia; Axis II: mixed personality disorder with dependent personality disorder and borderline personality disorder; Axis III Deaf; Obesity, seizure disorder; Axis IV: psychosocial secondary to the patient having poor coping skills and feeling overwhelmed by everyday living. GAF of 40.
7. The most recent psychiatric evaluation recommends she undertake Dialectical Behavior Therapy (DBT therapy).
8. The Appellant had a second psychiatric evaluation which resulted in the same Axis II diagnosis of borderline personality disorder and recommendation for DBT. It is recommended the therapy be conducted at the [REDACTED] due to the Appellant's status as a deaf person. That facility is able to deliver services suited to her needs.
9. The Appellant does not prefer to undergo treatment at the [REDACTED], citing among other things, transportation costs and issues.
10. The Appellant is not currently authorized to receive any services from [REDACTED].
11. The Appellant sought case management services from [REDACTED].
12. [REDACTED] denied the sought case management services [REDACTED].
13. The Appellant has financial resources through her husband's employment.
14. The Appellant knows how to access services through the Department of Human Services.
15. The Appellant requested a hearing on [REDACTED].

CONCLUSIONS OF LAW

The Medical Assistance Program is established pursuant to Title XIX of the Social Security Act and is implemented by Title 42 of the Code of Federal Regulations (CFR). It is

Docket No. – 2009-24281 CMH
Decision and Order

administered in accordance with state statute, the Social Welfare Act, the Administrative Code, and the State Plan under Title XIX of the Social Security Act Medical Assistance Program.

Title XIX of the Social Security Act, enacted in 1965, authorizes Federal grants to States for medical assistance to low-income persons who are age 65 or over, blind, disabled, or members of families with dependent children or qualified pregnant women or children. The program is jointly financed by the Federal and State governments and administered by States. Within broad Federal rules, each State decides eligible groups, types and range of services, payment levels for services, and administrative and operating procedures. Payments for services are made directly by the State to the individuals or entities that furnish the services.

42 CFR 430.0

The State plan is a comprehensive written statement submitted by the agency describing the nature and scope of its Medicaid program and giving assurance that it will be administered in conformity with the specific requirements of title XIX, the regulations in this Chapter IV, and other applicable official issuances of the Department. The State plan contains all information necessary for CMS to determine whether the plan can be approved to serve as a basis for Federal financial participation (FFP) in the State program.

42 CFR 430.10

Section 1915(b) of the Social Security Act provides:

The Secretary, to the extent he finds it to be cost-effective and efficient and not inconsistent with the purposes of this subchapter, may waive such requirements of section 1396a of this title (other than subsection (s) of this section) (other than sections 1396a(a)(15), 1396a(bb), and 1396a(a)(10)(A) of this title insofar as it requires provision of the care and services described in section 1396d(a)(2)(C) of this title) as may be necessary for a State...

The State of Michigan has opted to simultaneously utilize the authorities of the 1915(b) and 1915(c) programs to provide a continuum of services to disabled and/or elderly populations. Under approval from the Centers for Medicare and Medicaid Services (CMS) the Department of Community Health (MDCH) operates a section 1915(b) Medicaid Managed Specialty Services and Support program waiver in conjunction with a section 1915(c) HSW. [REDACTED] contracts with the Michigan Department of Community Health to provide services under the HSW.

Docket No. – 2009-24281 CMH
Decision and Order

The Appellant is entitled to Medicaid funded services through CMHS if the following conditions are met:

1. They meet the service eligibility requirements per the MDCH/CMHSP Managed Specialty Supports and Services Contact: Attachment 3.3.1 and/or 3.3.2.
2. The service in issue is a Medicaid covered service, i.e. State Medicaid Plan or waiver program service, and
3. The service is medically necessary.

Medicaid beneficiaries are only entitled to medically necessary Medicaid covered services. Services must be provided in the appropriate scope, duration, and intensity to reasonably achieve the purpose of the covered service. See 42 CFR 440.230. Case management is a Medicaid covered service. (See Medicaid Provider Manual, Mental Health and Substance Abuse Section, Section 13) The issue in this case is whether continued authorization of case management services are medically necessary for Appellant.

The contract between CMH and the Department defines medical necessity:

3.2 Medical Necessity

The PIHP will use, for Medicaid beneficiaries, the medical necessity criteria specified by MDCH and reflected in P 3.2.1. **Medical necessity is commonly defined as a determination that a specific service is medically (clinically) appropriate, necessary to meet needs, consistent with the person's diagnosis, symptomatology and functional impairments, is the most cost-effective option in the least restrictive environment, and is consistent with clinical standards of care.** (Emphasis added by ALJ). In addition, the PIHP must also consider social services and community supports that are crucial for full participation in community life, must apply person-centered planning for individuals with mental health needs, and must consider environmental factors and other available resources that might address the situation. The criteria are intended to ensure appropriate access to care, to protect the rights of individuals and to facilitate an appropriate matching of supports and services to individual needs. (Emphasis added).

Medicaid Managed Specialty Supports and Services Concurrent 1915(b)/(c) Waiver Program FY 03-04, Section 3.2, page 27.

SECTION 13 – TARGETED CASE MANAGEMENT

Targeted case management is a covered service that assists beneficiaries to design and implement strategies for obtaining

services and supports that are goal-oriented and individualized. Services include assessment, planning, linkage, advocacy, coordination and monitoring to assist beneficiaries in gaining access to needed health and dental services, financial assistance, housing, employment, education, social services, and other services and natural supports developed through the person-centered planning process. Targeted case management is provided in a responsive, coordinated, effective and efficient manner focusing on process and outcomes.

Targeted case management services must be available for all children with serious emotional disturbance, adults with serious mental illness, persons with a developmental disability, and those with co-occurring substance use disorders who have multiple service needs, have a high level of vulnerability, require access to a continuum of mental health services from the PIHP, and/or are unable to independently access and sustain involvement with needed services.

Beneficiaries must be provided choice of available, qualified case management staff upon initial assignment and on an ongoing basis.

13.1 PROVIDER QUALIFICATIONS

Providers must demonstrate the capacity to provide all core requirements specified below and have a sufficient number of staff to meet the needs of the target population.

Providers must document initial and ongoing training for case managers related to the core requirements and applicable to the target population served.

Caseload size and composition must be realistic for the case manager to complete the core requirements as identified in the individual plan of service developed through the person-centered planning process.

13.2 DETERMINATION OF NEED

The determination of the need for case management must occur at the completion of the intake process and through the person-centered planning process for beneficiaries receiving services and supports. Justification as to whether case management is needed or not must be documented in the beneficiary's record.

13.3 CORE REQUIREMENTS

- Assuring that the person-centered planning process takes place and that it results in the individual plan of service.

- Assuring that the plan of service identifies what services and supports will be provided, who will provide them, and how the case manager will monitor (i.e., interval of face-to-face contacts) the services and supports identified under each goal and objective.
- Overseeing implementation of the individual plan of service, including supporting the beneficiary's dreams, goals, and desires for optimizing independence; promoting recovery; and assisting in the development and maintenance of natural supports.
- Assuring the participation of the beneficiary on an ongoing basis in discussions of his plans, goals, and status.
- Identifying and addressing gaps in service provision.
- Coordinating the beneficiary's services and supports with all providers, making referrals, and advocating for the beneficiary.
- Assisting the beneficiary to access programs that provide financial, medical, and other assistance such as Home Help and Transportation services.
- Assuring coordination with the beneficiary's primary and other health care providers to assure continuity of care.
- Coordinating and assisting the beneficiary in crisis intervention and discharge planning, including community supports after hospitalization.
- Facilitating the transition (e.g., from inpatient to community services, school to work, dependent to independent living) process, including arrangements for follow-up services.
- Assisting beneficiaries with crisis planning.
- Identifying the process for after-hours contact.

Assessment The provider must have the capacity to perform an initial written comprehensive assessment addressing the beneficiary's needs/wants, barriers to needs/wants, supports to address barriers, and health and welfare issues. Assessments must be updated when there is significant change in the condition or circumstances of the beneficiary. The individual plan of services must also reflect such changes.

Documentation The beneficiary's record must contain sufficient information to document the provision of case management, including the nature of the service, the date, and the location of contacts between the case manager and the beneficiary, including whether the contacts were face-to-face. The frequency of face-to-face contacts must be dependent on the intensity of the beneficiary's needs.

The case manager must review services at intervals defined in the individual plan of service. The plan shall be kept current and modified when indicated (reflecting the intensity of the beneficiary's health and welfare needs). A beneficiary or his/her guardian or authorized representative may request and review the plan at any time. A formal review of the plan shall not occur less often than annually to review progress toward goals and objectives and to assess beneficiary satisfaction.

Monitoring The case manager must determine, on an ongoing basis, if the services and supports have been delivered, and if they are adequate to meet the needs/wants of the beneficiary. Frequency and scope (face-to-face and telephone) of case management monitoring activities must reflect the intensity of the beneficiary's health and welfare needs identified in the individual plan of services. Targeted case management may not include direct delivery of ongoing day-to-day supports and/or training, or provision of other Medicaid services.

Medicaid Provider Manual
Mental Health/Substance Abuse
Version Date: July 1, 2009 Pages 67-68
Michigan Department of Community Health

In this case the Appellant sought case management services. The Department's agent determined they are not medically necessary after review of her most recent psychiatric evaluations and the Medicaid Provider Manual criteria set forth above.

The Department's witnesses testified their actions came after the most recent psychiatric evaluation recommended DBT. The Appellant had case management authorized when her circumstances were different, specifically, she was not residing with her husband and needed assistance accessing resources in the community. She is now residing with her husband in their family home. He is employed. She has financial resources, including health insurance. She can access health care, food, has housing and family supports. It was the determination of the ██████████ utilization management staff that case management is not medically necessary for this Appellant any longer. The recommended treatment for her serious mental illness is DBT.

The Appellant testified she does not prefer to access her care through the ██████████ system. She said transportation is an issue. Additionally, she wants additional financial assistance. She did not present any testimony evidencing a need for case management services such as those identified in the Medicaid Provider Manual.

This ALJ finds the Department provided sufficient credible evidence that Appellant has no need for case management services. The Appellant did not establish case management services are medically necessary for her at this time.

Docket No. – 2009-24281 CMH
Decision and Order

DECISION AND ORDER

The Administrative Law Judge, based on the above findings of fact and conclusions of law, finds that the Department's action in terminating the services authorized for the Appellant was proper as not medically necessary.

IT IS THEREFORE ORDERED that:

The Department's decision is AFFIRMED.

Jennifer Isiogu
Administrative Law Judge
for Janet Olszewski, Director
Michigan Department of Community Health
