STATE OF MICHIGAN STATE OFFICE OF ADMINISTRATIVE HEARINGS AND RULES

ADMINISTRATIVE HEARINGS FOR THE DEPARTMENT OF HUMAN SERVICES

IN THE MATTER OF:

Claimant

Reg. No.: 2009-33940 Issue No.: 2009/4031 Case No.: Load No.: Hearing Date: November 4, 2009 Macomb County DHS (12)

ADMINISTRATIVE LAW JUDGE: Colleen M. Mamelka

HEARING DECISION

This matter is before the undersigned Administrative Law Judge pursuant to MCL 400.9 and MCL 400.37 upon the Claimant's request for a hearing. After due notice, a hearing was held in Clinton Township, Michigan on November 4, 2009. The Claimant appeared and testified. The Claimant was represented by of

appeared on behalf of the Department.

ISSUE

Whether the Department properly determined that the Claimant was not disabled for purposes of of the Medical Assistance ("MA-P") and State Disability Assistance ("SDA") programs?

FINDINGS OF FACT

The Administrative Law Judge, based on the competent, material and substantial evidence on the whole record, finds as material fact:

 The Claimant submitted an application for public assistance seeking Medical Assistance ("MA-P") and State Disability Assistance on June 9, 2009.

- 2. On June 9, 2009, the Medical Review Team ("MRT") determined the Claimant was disabled for purposes of the SDA program. (Exhibit 1, pp. 113)
- On July 20, 2009, the MRT determined the Claimant was not disabled for purposes of the MA-P program. (Exhibit 1, pp. 142-43)
- 4. On July 23, 2009, the Department sent an Eligibility Notice to the Claimant informing him that he was found not disabled and that his SDA benefits would cancel. (Exhibit 1, pp. 144-45)
- On July 30, 2009, the Department received the Claimant's written Request for Hearing. (Exhibit 1, p. 145)
- 6. On September 11, 2009, the State Hearing Review Team ("SHRT") determined the Claimant was not disabled. (Exhibit 2)
- 7. The Claimant's alleged physical disabling impairment(s) are due to chronic neck, back, and knee pain, shortness of breath, sleep apnea, chest pain, atrial fibrillation, high blood pressure, and obesity.
- 8. The Claimant has not alleged any mental disabling impairment(s).
- 9. At the time of hearing, the Claimant was 45 years old with an date; was 5'10" in height; and weighed 354 pounds.
- 10. The Claimant is a high school graduate with some vocational training with a work history as a truck driver and as a housekeeper for a hospital.
- 11. The Claimant's impairment(s) have lasted, or expected to last, continuously for a period of 12-months or longer.

CONCLUSIONS OF LAW

The Medical Assistance ("MA") program is established by Subchapter XIX of Chapter 7 of The Public Health & Welfare Act, 42 USC 1397, and is administered by the Department of Human Services ("DHS"), formally known as the Family Independence Agency, pursuant to MCL 400.10 *et seq* and MCL 400.105. Department policies are found in the Program Administrative Manual ("PAM"), the Program Eligibility Manual ("PEM"), and the Program Reference Manual ("PRM").

Disability is defined as the inability to do any substantial gainful activity by reason of any medically determinable physical or mental impairment which can be expected to result in death or which has lasted or can be expected to last for a continuous period of not less than 12 months. 20 CFR 416.905(a) The person claiming a physical or mental disability has the burden to establish it through the use of competent medical evidence from qualified medical sources such as his or her medical history, clinical/laboratory findings, diagnosis/prescribed treatment, prognosis for recovery and/or medical assessment of ability to do work-relate activities or ability to reason and make appropriate mental adjustments, if a mental disability is alleged. 20 CRF 413.913 An individual's subjective pain complaints are not, in and of themselves, sufficient to establish disability. 20 CFR 416.908; 20 CFR 416.929(a) Similarly, conclusory statements by a physician or mental health professional that an individual is disabled or blind, absent supporting medical evidence, is insufficient to establish disability. 20 CFR 416.929(a)

When determining disability, the federal regulations require several factors to be considered including: (1) the location/duration/frequency/intensity of an applicant's pain; (2) the type/dosage/effectiveness/side effects of any medication the applicants takes to relieve pain; (3) any treatment other than pain medication that the applicant has received to relieve pain; and

(4) the effect of the applicant's pain on his or her ability to do basic work activities. 20 CFR 416.929(c)(3) The applicant's pain must be assessed to determine the extent of his or her functional limitation(s) in light of the objective medical evidence presented. 20 CFR 416.929(c)(2)

In order to determine whether or not an individual is disabled, federal regulations require a five-step sequential evaluation process be utilized. 20 CFR 416.920(a)(1) The five-step analysis requires the trier of fact to consider an individual's current work activity; the severity of the impairment(s) both in duration and whether it meets or equals a listed impairment in Appendix 1; residual functional capacity to determine whether an individual can perform past relevant work; and residual functional capacity along with vocational factors (i.e. age, education, and work experience) to determine if an individual can adjust to other work. 20 CFR 416.920(a)(4); 20 CFR 416.945

If an individual is found disabled, or not disabled, at any step, a determination or decision is made with no need evaluate subsequent steps. 20 CFR 416.920(a)(4) If a determination cannot be made that an individual is disabled, or not disabled, at a particular step, the next step is required. 20 CFR 416.920(a)(4) If an impairment does not meet or equal a listed impairment, an individual's residual functional capacity is assessed before moving from step three to step four. 20 CFR 416.920(a)(4); 20 CFR 416.945 Residual functional capacity is the most an individual can do despite the limitations based on all relevant evidence. 20 CFR 945(a)(1) An individual's residual functional capacity assessment is evaluated at both steps four and five. 20 CFR 416.920(a)(4) In determining disability, an individual's functional capacity to perform basic work activities is evaluated and if found that the individual has the ability to perform basic work activities without significant limitation, disability will not be found. 20 CFR 416.994(b)(1)(iv) 2009-33940/CMM

In general, the individual has the responsibility to prove disability. 20 CFR 416.912(a) An impairment or combination of impairments is not severe if it does not significantly limit an individual's physical or mental ability to do basic work activities. 20 CFR 416.921(a) The individual has the responsibility to provide evidence of prior work experience; efforts to work; and any other factor showing how the impairment affects the ability to work. 20 CFR 416.912(c)(3)(5)(6)

As outlined above, the first step looks at the individual's current work activity. An individual is not disabled regardless of the medical condition, age, education, and work experience, if the individual is working and the work is a substantial, gainful activity. 20 CFR 416.920(a)(4)(i) In the record presented, the Claimant is not involved in substantial gainful activity thus is not ineligible for disability under Step 1.

The severity of the Claimant's alleged impairment(s) is considered under Step 2. The Claimant bears the burden to present sufficient objective medical evidence to substantiate the alleged disabling impairments. In order to be considered disabled for MA purposes, the impairment must be severe. 20 CFR 916.920(a)(4)(ii); 20 CFR 916.920(b) An impairment, or combination of impairments, is severe if it significantly limits an individual's physical or mental ability to do basic work activities regardless of age, education and work experience. 20 CFR 916.920(a)(4)(ii); 20 CFR 916.920(c) Basic work activities means the abilities and aptitudes necessary to do most jobs. 20 CFR 916.921(b) Examples include:

- 1. Physical functions such as walking, standing, sitting, lifting, pushing, pulling, reaching, carrying, or handling;
- 2. Capacities for seeing, hearing, and speaking;
- 3. Understanding, carrying out, and remembering simple instructions;
- 4. Use of judgment;

- 5. Responding appropriately to supervision, co-workers and usual work situations; and
- 6. Dealing with changes in a routine work setting.

Id. The second step allows for dismissal of a disability claim obviously lacking in medical merit. *Higgs v Bowen,* 880 F2d 860, 862 (CA 6, 1988). The severity requirement may still be employed as an administrative convenience to screen out claims that are totally groundless solely from a medical standpoint. *Id.* at 863 *citing Farris v Sec of Health and Human Services,* 773 F2d 85, 90 n.1 (CA 6, 1985) An impairment qualifies as non-severe only if, regardless of a claimant's age, education, or work experience, the impairment would not affect the claimant's ability to work. *Salmi v Sec of Health and Human Services,* 774 F2d 685, 692 (CA 6, 1985)

In the present case, the Claimant alleges physical disability due to chronic neck, back, and knee pain, shortness of breath, chest pain, atrial fibrillation, high blood pressure, and obesity.

On **an electrocardiogram** revealed atrial fibrillation with rapid ventricular response. A chest x-ray found mild cardiomegaly and evidence of pulmonary vascular congestion and interstitial edema. On this same date, the Claimant underwent a left heart catheterization, selective right/left coronary angiography, and left ventriculography. The left circumflex artery at its ostium showed 20% stenosis followed by luminal irregularities. The Claimant's chronic back pain was also documented noting multiple prescribed medications such as OxyContin, Vicodin, and Percocet. Further, the Claimant's need for a CPAP for his obstructive sleep apnea was also noted. The Claimant was discharged on **an experimental fibrillation**, with the diagnoses of atrial fibrillation with rapid ventricular response and atypical chest pain. The secondary diagnoses were a history of difficult-to-control paroxysmal atrial fibrillation, morbid obesity, anemia, and hypertension.

On April 17, 2009, a Medical Examination Report was completed on behalf of the Claimant. The current diagnosis was paroxysmal atrial fibrillation and sleep apnea. The Claimant was in stable condition and found able to occasionally lift/carry 25 pounds; stand and/or walk at least 2 hours during an 8 hour workday; and able to perform repetitive actions with all extremities.

On **Claimant**, the Claimant was admitted to the hospital after a syncopal episode. The Claimant's chest pain was controlled with nitroglycerin and morphine. The Claimant was discharged on **controlled** with the primary diagnoses of syncope and GI bleeding with the secondary diagnoses of paroxysmal atrial fibrillation, hypertension, obstructive sleep apnea, coronary artery disease, degenerative joint disease, and morbid obesity.

On **Contract on**, the Claimant was admitted to the hospital with complaints of an elevated INR (international normalized ratio). The Claimant was discharged on **Contract on**, with the principal diagnosis of Coumadin toxicity and supratherapeutic INR.

On **provide and**, the Claimant presented to the hospital with complaints of chest and abdominal pain. The Claimant was discharged on **provide and** with the diagnoses of abdominal pain, nausea, vomiting secondary to symptomatic chololithiasis, symptomatic cholecystis, hemorrhoids, prerenal azotemia, chest pain, paroxysmal atrial fibrillation, hypertension, anemia, asthma, degenerative joint disease, sleep apnea, adjustment disorder, hernia, and GERD.

On **Example**, the Claimant presented to the hospital with an elevated heart rate. Medication compliance was also documented. The Claimant was discharged on **Example** with the diagnoses of syncope, atrial fibrillation with rapid ventricular rate, hypertension, obesity, sleep apnea, and osteoarthritis.

On 2009, a Medical Examination Report was completed on behalf of the Claimant by his treating physician. The current diagnoses were listed as low back and knee pain, palpitations, degenerative disc disease, and paroxysmal atrial fibrillation. The physical examination listed the Claimant's weight at 380 pounds and documented the need for a cane for ambulation. The Claimant's condition was deteriorating finding him able to occasionally lift/carry 10 pounds; stand and/or walk less than 2 hours during an 8-hour workday with sitting at less than 6 hours during this same time period. The Claimant was able to perform repetitive actions with his upper extremities but was unable to operate foot/leg controls with either lower extremity.

As previously noted, the Claimant bears the burden to present sufficient objective medical evidence to substantiate the alleged disabling impairment(s). As summarized above, the Claimant has presented medical evidence establishing that he does have some physical limitations on his ability to perform basic work activities. The medical evidence has established that the Claimant has an impairment, or combination thereof, that has more than a *de minimis* effect on the Claimant's basic work activities. Further, the impairments have lasted, or are expected to last, continuously for twelve months; therefore, the Claimant is not disqualified from receipt of MA-P benefits under Step 2.

In the third step of the sequential analysis of a disability claim, the trier of fact must determine if the Claimant's impairment, or combination of impairments, is listed in Appendix 1 of Subpart P of 20 CFR, Part 404. The Claimant has alleged physical disabling impairments due to chronic neck, back, and knee pain, shortness of breath, sleep apnea, chest pain, atrial fibrillation, hypertension, and obesity.

Listing 1.00 defines musculoskeletal system impairments. Disorders of the musculoskeletal system may result from hereditary, congenital, or acquired pathologic processes. Impairments may result from infectious, inflammatory, or degenerative processes, 1.00A traumatic or developmental events, or neoplastic, vascular, or toxic/metabolic diseases. 1.00A Regardless of the cause(s) of a musculoskeletal impairment, functional loss for purposes of these listings is defined as the inability to ambulate effectively on a sustained basis for any reason, including pain associated with the underlying musculoskeletal impairment, or the inability to perform fine and gross movements effectively on a sustained basis for any reason, including pain associated with the underlying musculoskeletal impairment. Inability to ambulate effectively means an extreme limitation of the ability to walk; i.e., an impairment(s) that interferes very seriously with the individual's ability to independently initiate, sustain, or complete activities. 1.00B2b(1) Ineffective ambulation is defined generally as having insufficient lower extremity function to permit independent ambulation without the use of a hand-held assistive device(s) that limits the functioning of both upper extremities. (Listing 1.05C is an exception to this general definition because the individual has the use of only one upper extremity due to amputation of a hand.) Id. To ambulate effectively, individuals must be capable of sustaining a reasonable walking pace over a sufficient distance to be able to carry out activities of daily living. 1.00B2b(2) They must have the ability to travel without companion assistance to and from a place of employment or school. . . . Id. When an individual's impairment involves a lower extremity uses a hand-held assistive device, such as a cane, crutch or walker, the medical basis for use of the device should be documented. 1.00J4 The requirement to use a hand-held assistive device may also impact an individual's functional capacity by virtue of the fact that one or both upper extremities are not available for such activities as lifting, carrying, pushing, and

pulling. Id.

Categories of Musculoskeletal include:

- 1.02 Major dysfunction of a joint(s) due to any cause: Characterized by gross anatomical deformity (e.g. subluxation, contracture, bony or fibrous ankylosis, instability) and chronic joint pain and stiffness with signs of limitation of motion or other abnormal motion of the affected joint(s), and findings on appropriate medically acceptable imaging of joint space narrowing, bony destruction, or ankylosis of the affected joint(s). With:
 - A. Involvement of one major peripheral weight-bearing joint (i.e., hip, knee, or ankle), resulting in inability to ambulate effectively as defined in 1.00B2b; or
 - B. Involvement of one major peripheral joint in each upper extremity (i.e., shoulder, elbow, wrist, hand), resulting in inability to perform fine and gross movements effectively a defined in 1.00B2c

* * * 1.04

- Disorders of the spine (e.g., herniated nucleus pulposus, spinal arachnoiditis, spinal stenosis, osteoarthritis, degenerative disc disease, facet arthritis, vertebral fracture), resulting in compromise of a nerve root (including the cauda equine) or spinal cord. With:
 - A. Evidence of nerve root compression characterized by neuro-anatomic distribution of pain, limitation of motion of the spine, motor loss (atrophy with associated muscle weakness or muscle weakness) accompanied by sensory or reflex loss and, if there is involvement of the lower back, positive straightleg raising test (sitting and supine); or
 - B. Spinal arachnoiditis, confirmed by an operative note or pathology report of tissue biopsy, or by appropriate medically acceptable imaging, manifested by severe burning or painful dysesthesia, resulting in the need for changes in position or posture more than once every 2 hours; or
 - C. Lumbar spinal stenosis resulting in pseudoclaudication, established by findings on appropriate medically acceptable imaging, manifested by chronic nonradicular pain and weakness, and resulting in inability to ambulate

effectively, as defined in 1.00B2b. (see above definition)

In the record presented, the Claimant's assertion of back and knee pain are noted however these same records are insufficient to meet the intent and severity requirement of a listed impairment within Listing 1.00. Accordingly, the Claimant cannot be found disabled, or not disabled, under this listing.

The Claimant has alleged physical disabling impairments due in part to shortness of breath and sleep apnea. Listing 3.00 defines respiratory system impairments. Respiratory disorders, along with any associated impairment(s), must be established by medical evidence sufficient enough in detail to evaluate the severity of the impairment. 3.00A Evidence must be provided in sufficient detail to permit an independent reviewer to evaluate the severity of the impairment. Id. A major criteria for determining the level of respiratory impairments that are episodic in nature, is the frequency and intensity of episodes that occur despite prescribed treatment. 3.00C Attacks of asthma, episodes of bronchitis or pneumonia or hemoptysis (more than blood-streaked sputum), or respiratory failure as referred to in paragraph B of 3.03, 3.04, and 3.07, are defined as prolonged symptomatic episodes lasting one or more days and requiring intensive treatment, such as intravenous bronchodilator or antibiotic administration or prolonged inhalational bronchodilator therapy in a hospital, emergency room or equivalent setting. 3.00C Hospital admissions are defined as inpatient hospitalizations for longer than 24 hours. Id. Medical evidence must include information documenting adherence to a prescribed regimen of treatment as well as a description of physical signs. Id

In this case there was insufficient medical documentation to support a finding of a listed impairment within Listing 3.00.

The Claimant asserts physical disabling impairments due to chest pain, hypertension, and

atrial fibrillation. Listing 4.00 defines cardiovascular impairment in part, as follows:

... any disorder that affects the proper functioning of the heart or the circulatory system (that is, arteries, veins, capillaries, and the lymphatic drainage). The disorder can be congenital or acquired. Cardiovascular impairment results from one or more of four consequences of heart disease:

- (i) Chronic heart failure or ventricular dysfunction.
- (ii) Discomfort or pain due to myocardial ischemia, with or without necrosis of heart muscle.
- (iii) Syncope, or near syncope, due to inadequate cerebral perfusion from any cardiac cause, such as obstruction of flow or disturbance in rhythm or conduction resulting in inadequate cardiac output.
- (iv) Central cyanosis due to right-to-left shunt, reduced oxygen concentration in the arterial blood, or pulmonary vascular disease.

An uncontrolled impairment means one that does not adequately respond to the standard prescribed medical treatment. 4.00A3f In a situation where an individual has not received ongoing treatment or have an ongoing relationship with the medical community despite the existence of a severe impairment, the disability evaluation is based on the current objective medical evidence. 4.00B3a If an individual does not receive treatment, an impairment that meets the criteria of a listing cannot be established. *Id*.

On August 24, 1999, the Social Security Administration deleted Listing 9.09 regarding obesity from the Listing of Impairments. SSR 02-1p In conjunction, the final rule in the Federal Register deleting 9.09, added paragraphs to the prefaces of the musculoskeletal, respiratory, and cardiovascular body system listings that provide guidance regarding the potential effects obesity has in causing or contributing to impairments in those body systems. *Id.* Obesity is a medically determinable impairment that is often associated with disturbance of the musculoskeletal system, and disturbance of this system can be a major cause of disability in individuals with obesity. 1.00Q The combined effects of obesity with musculoskeletal impairments may be greater than

2009-33940/CMM

the effects of each of the impairments considered separately. *Id.* Therefore, when determining whether an individual with obesity has a listing-level impairment or combination of impairments (and when assessing a claim at other steps of the sequential evaluation process, including when assessing an individual's residual functional capacity) any additional and cumulative effects of obesity is considered. *Id.* The National Institute of Health (NIH) established medical criteria for the diagnosis of obesity in its *Clinical Guidelines on the Identification, Evaluation, and Treatment of Overweight and Obesity in Adults* (NIH Publication No. 98-4083, September 1998). SSR 02-1p These guidelines classify overweight and obesity in adults according to Body Mass Index ("BMI") which is the ratio of an individual's weight in kilograms to the square of his/her height in meters. *Id.* For adults, the *Clinical Guidelines* describe a BMI of 25-29.9 as "overweight" with obesity being 30.0 or above. *Id.* The guidelines recognize three levels of obesity. Level I includes BMIs of 30.0-34.9; Level 2 includes BMIs of 35.0-39.9; and Level 3 (termed "extreme" obesity) includes BMIs of 40.0 or above. *Id.*

In this case, the Claimant's obesity is a medically determinable impairment that undoubtedly has a major impact, or at least is a contributing factor, on the Claimant's musculoskeletal, respiratory, and cardiovascular system. That being stated, and in consideration of the objective medical records, it is found that the Claimant's impairment may meet a listing within 4.00 however the records are insufficient to find the Claimant disabled under this listing.

Ultimately, the Claimant's medical record does not support a finding that the Claimant's physical impairment(s) are "listed impairments" or equivalent to a listed impairment detailed above. 20 CFR 416.920(a)(4)(iii) According to the medical evidence alone, the Claimant's physical impairment(s) do not meet or equal the requirements of the above cited listings

therefore he cannot be found to be disabled for purposes of the Medical Assistance program. Accordingly, the Claimant's eligibility under Step 4 is considered. 20 CFR 416.905(a)

The fourth step in analyzing a disability claim requires an assessment of the Claimant's residual functional capacity ("RFC") and past relevant employment. 20 CFR 416.920(a)(4)(iv) An individual is not disabled if he/she can perform past relevant work. *Id.*; 20 CFR 416.960(b)(3) Past relevant work is work that has been performed within the past 15 years that was a substantial gainful activity and that lasted long enough for the individual to learn the position. 20 CFR 416.960(b)(1) Vocational factors of age, education, and work experience, and whether the past relevant employment exists in significant numbers in the national economy is not considered. 20 CFR 416.960(b)(3) RFC is assessed based on impairment(s), and any related symptoms, such as pain, which may cause physical and mental limitations that affect what can be done in a work setting. RFC is the most that can be done, despite the limitations.

To determine the physical demands (exertional requirements) of work in the national economy, jobs are classified as sedentary, light, medium, heavy, and very heavy. 20 CFR 416.967 Sedentary work involves lifting of no more than 10 pounds at a time and occasionally lifting or carrying articles like docket files, ledgers, and small tools. 20 CFR 416.967(a) Although a sedentary job is defined as one which involves sitting, a certain amount of walking and standing is often necessary in carrying out job duties. *Id.* Jobs are sedentary if walking and standing are required occasionally and other sedentary criteria are met. Light work involves lifting no more than 20 pounds at a time with frequent lifting or carrying objects weighing up to 10 pounds. 20 CFR 416.967(b) Even though weight lifted may be very little, a job is in this category when it requires a good deal of walking or standing, or when it involves sitting most of the time with some pushing and pulling of arm or leg controls. *Id.* To be considered capable of

performing a full or wide range of light work, an individual must have the ability to do substantially all of these activities. *Id.* An individual capable of light work is also capable of sedentary work, unless there are additionally limiting factors such as loss of fine dexterity or inability to sit for long periods of time. *Id.* Medium work involves lifting no more than 50 pounds at a time with frequent lifting or carrying of objects weighing up to 25 pounds. 20 CFR 416.967(c) An individual capable of performing medium work is also capable of light and sedentary work. *Id.* Heavy work involves lifting no more than 100 pounds at a time with frequent lifting or carrying of objects weighing up to 50 pounds. 20 CFR 416.967(d) An individual capable of heavy work is also capable of medium, light, and sedentary work. *Id.* Finally, very heavy work involves lifting objects weighing more than 100 pounds at a time with frequent lifting or carrying objects weighing 50 pounds or more. 20 CFR 416.967(e) An individual capable of very heavy work is able to perform work under all categories. *Id.*

Limitations or restrictions which affect the ability to meet the demands of jobs other than strength demands (exertional requirements, i.e. sitting, standing, walking, lifting, carrying, pushing, or pulling) are considered nonexertional. 20 CFR 416.969a(a) In considering whether an individual can perform past relevant work, a comparison of the individual's residual functional capacity with the demands of past relevant work. *Id.* If an individual can no longer do past relevant work the same residual functional capacity assessment along with an individual's age, education, and work experience is considered to determine whether an individual can adjust to other work which exists in the national economy. *Id.* Examples of non-exertional limitations or restrictions include difficulty function due to nervousness, anxiousness, or depression; difficulty maintaining attention or concentration; difficulty understanding or remembering detailed instructions; difficulty in seeing or hearing; difficulty tolerating some

physical feature(s) of certain work settings (i.e. can't tolerate dust or fumes); or difficulty performing the manipulative or postural functions of some work such as reaching, handling, stooping, climbing, crawling, or crouching. 20 CFR 416.969a(c)(1)(i) - (vi) If the impairment(s) and related symptoms, such as pain, only affect the ability to perform the non-exertional aspects of work-related activities, the rules in Appendix 2 do not direct factual conclusions of disabled or not disabled. 20 CFR 416.969a(c)(2) The determination of whether disability exists is based upon the principles in the appropriate sections of the regulations, giving consideration to the rules for specific case situations in Appendix 2. *Id.*

The Claimant's prior work history consists of employment as a truck driver whose primary duty was driving over-the-road. The Claimant's position as a housekeeper at a hospital required him to lift/carry/push/pull between 70-80 pounds, supervising approximately 20 individuals, and other cleaning/sanitizing. In light of the Claimant's testimony and in consideration of the Occupational Code, the Claimant's truck driving position is considered semi-skilled, sedentary work while his employment as a housekeeper is considered semi-skilled, medium/heavy work.

The Claimant testified that he can lift/carry approximately 5-10 pounds; can walk approximately 25 feet with assistance; can sit for approximately 15 minutes before his back hurts and knees/ankles swell; can stand for about 10 minutes; and experiences difficulty bending and squatting. The medical records document similar restrictions as well as his need for a cane for ambulation. If the impairment or combination of impairments does not limit physical or mental ability to do basic work activities, it is not a severe impairment(s) and disability does not exist. 20 CFR 416.920 In consideration of the Claimant's testimony, medical records, and current limitations, it is found that the Claimant is not able to return to past relevant work therefore the fifth step in the sequential evaluation will be addressed.

In Step 5, an assessment of the individual's residual functional capacity and age, education, and work experience is considered to determine whether an adjustment to other work can be made. 20 CFR 416.920(4)(v) At the time of hearing, the Claimant, a high school graduate was 45 years old thus considered to be a younger individual for MA-P purposes. Disability is found disabled if an individual is unable to adjust to other work. Id. At this point in the analysis, the burden shifts from the Claimant to the Department to present proof that the Claimant has the residual capacity to substantial gainful employment. 20 CFR 416.960(2); Richardson v Sec of Health and Human Services, 735 F2d 962, 964 (CA 6, 1984). While a vocational expert is not required, a finding supported by substantial evidence that the individual has the vocational qualifications to perform specific jobs is needed to meet the burden. O'Banner v Sec of Health and Human Services, 587 F2d 321, 323 (CA 6, 1978). Medical-Vocational guidelines found at 20 CFR Subpart P, Appendix II, may be used to satisfy the burden of proving that the individual can perform specific jobs in the national economy. Heckler v Campbell, 461 US 458, 467 (1983); Kirk v Secretary, 667 F2d 524, 529 (CA 6, 1981) cert den 461 US 957 (1983).

In the record presented, the total impact caused by the combination of medical problems suffered by the Claimant must be considered. In doing so, it is found that the combination of the Claimant's physical impairments, to include his obesity, have a major effect on his ability to perform basic work activities. The Claimant is unable to perform the full range of activities necessary for sedentary work as defined in 20 CFR 416.967(a) due to the nature of the combined

limitations. After review of the entire record, it is found that the Claimant is disabled for purposes of the MA-P program at Step 5

The State Disability Assistance ("SDA") program, which provides financial assistance for disabled persons, was established by 2004 PA 344. DHS administers the SDA program purusant to MCL 400.10 *et seq.* and Michigan Administrative Code ("MAC R") 400.3151 – 400.3180. Department policies are found in PAM, PEM, and PRM. A person is considered disabled for SDA purposes if the person has a physical or mental impariment which meets federal SSI disability standards for at least ninety days. Receipt of SSI or RSDI benefits based on disability or blindness, or the receipt of MA benefits based on disability or blindness (MA-P) automatically qualifies an individual as disabled for purposes of the SDA program.

In this case, the Claimant is found disabled for purposes of the Medical Assistance ("MA-P") program therefore the Claimant's is found disabled for purposes of SDA benefits.

DECISION AND ORDER

The Administrative Law Judge, based upon the findings of fact and conclusions of law, finds the Claimant disabled for purposes of the Medical Assistance program and the State Disability Assistance program.

It is ORDERED:

- 1. The Department's determination is REVERSED.
- 2. The Department shall initiate review of the June 9, 2009 application to determine if all other non-medical criteria are met and inform the Claimant and his representative of the determination.
- 3. The Department shall supplement for any lost benefits the Claimant was entitled to receive if otherwise eligible and qualified in accordance with department policy.

4. The Department shall review the Claimant's continued eligibility in December 2010 in accordance with department policy.
