

**STATE OF MICHIGAN
STATE OFFICE OF ADMINISTRATIVE HEARINGS AND RULES
ADMINISTRATIVE HEARINGS FOR THE
DEPARTMENT OF HUMAN SERVICES**

IN THE MATTER OF THE CLAIM OF:

[REDACTED]

Reg. No.: 2009-35223
Issue No.: 2009/4031
Case No.: [REDACTED]
Load No.: [REDACTED]
Hearing Date: October 29, 2009
Wayne County DHS (17)

ADMINISTRATIVE LAW JUDGE: Colleen M. Mamelka

HEARING DECISION

This matter is before the undersigned Administrative Law Judge pursuant to MCL 400.9 and MCL 400.37 upon the Claimant's request for a hearing. After due notice, a telephone hearing was conducted from Detroit, Michigan on Thursday, October 29, 2009. The Claimant appeared and testified. [REDACTED] appeared on behalf of the Department.

During the hearing, the Claimant waived the time period for the issuance of this decision in order to allow for the submission of additional medical evidence. The new medical evidence was forwarded to the State Hearing Review Team ("SHRT") for consideration. On July 20, 2010, the SHRT found the Claimant not disabled. This matter is now before the undersigned for a final decision.

ISSUE

Whether the Department properly determined that the Claimant was not disabled for purposes of Medical Assistance ("MA-P") and State Disability Assistance ("SDA") benefit programs?

FINDINGS OF FACT

The Administrative Law Judge, based upon the competent, material, and substantial evidence on the whole record, finds as material fact:

1. The Claimant submitted an application for public assistance seeking MA-P and SDA benefits on February 26, 2009.

2. On March 27, 2009, the Medical Review Team (“MRT”) found the Claimant not disabled. (Exhibit 1, pp. 2, 3)
3. The Department sent an Eligibility Notice to the Claimant informing him that he was found not disabled for purposes of the MA-P and SDA programs.
4. On July 30, 2009, the Department received the Claimant’s timely written Request for Hearing. (Exhibit 2)
5. On September 22, 2009, the State Hearing Review Team (“SHRT”) found the Claimant not disabled. (Exhibit 3)
6. The Claimant’s alleged physical disabling impairment(s) are due to chronic left leg pain, back spasms, and hypertension.
7. The Claimant’s alleged mental disabling impairment(s) is due to post-traumatic stress disorder.
8. At the time of hearing, the Claimant was 47 years old with a [REDACTED] birth date; was 5’8” in height; and weighed 234 pounds.
9. The Claimant has a college education with a work history as a substitute teacher and youth group counselor.

CONCLUSIONS OF LAW

The Medical Assistance (“MA”) program is established by Subchapter XIX of Chapter 7 of The Public Health & Welfare Act, 42 USC 1397, and is administered by the Department of Human Services (“DHS”), formerly known as the Family Independence Agency, pursuant to MCL 400.10 *et seq* and MCL 400.105. Department policies are found in the Bridges Administrative Manual (“BAM”), the Bridges Eligibility Manual (“BEM”), and the Bridges Reference Manual (“BRM”).

Disability is defined as the inability to do any substantial gainful activity by reason of any medically determinable physical or mental impairment which can be expected to result in death or which has lasted or can be expected to last for a continuous period of not less than 12 months. 20 CFR 416.905(a) The person claiming a physical or mental disability has the burden to establish it through the use of competent medical evidence from qualified medical sources such as his or her medical history, clinical/laboratory findings, diagnosis/prescribed treatment, prognosis for recovery and/or medical assessment of ability to do work-relate activities or ability to reason and make appropriate mental adjustments, if a mental disability is alleged. 20 CFR 413.913 An

individual's subjective pain complaints are not, in and of themselves, sufficient to establish disability. 20 CFR 416.908; 20 CFR 416.929(a) Similarly, conclusory statements by a physician or mental health professional that an individual is disabled or blind, absent supporting medical evidence, is insufficient to establish disability. 20 CFR 416.927

When determining disability, the federal regulations require several factors to be considered including: (1) the location/duration/frequency/intensity of an applicant's pain; (2) the type/dosage/effectiveness/side effects of any medication the applicants takes to relieve pain; (3) any treatment other than pain medication that the applicant has received to relieve pain; and (4) the effect of the applicant's pain on his or her ability to do basic work activities. 20 CFR 416.929(c)(3) The applicant's pain must be assessed to determine the extent of his or her functional limitation(s) in light of the objective medical evidence presented. 20 CFR 416.929(c)(2)

In order to determine whether or not an individual is disabled, federal regulations require a five-step sequential evaluation process be utilized. 20 CFR 416.920(a)(1) The five-step analysis requires the trier of fact to consider an individual's current work activity; the severity of the impairment(s) both in duration and whether it meets or equals a listed impairment in Appendix 1; residual functional capacity to determine whether an individual can perform past relevant work; and residual functional capacity along with vocational factors (i.e. age, education, and work experience) to determine if an individual can adjust to other work. 20 CFR 416.920(a)(4); 20 CFR 416.945

If an individual is found disabled, or not disabled, at any step, a determination or decision is made with no need evaluate subsequent steps. 20 CFR 416.920(a)(4) If a determination cannot be made that an individual is disabled, or not disabled, at a particular step, the next step is required. 20 CFR 416.920(a)(4) If an impairment does not meet or equal a listed impairment, an individual's residual functional capacity is assessed before moving from step three to step four. 20 CFR 416.920(a)(4); 20 CFR 416.945 Residual functional capacity is the most an individual can do despite the limitations based on all relevant evidence. 20 CFR 945(a)(1) An individual's residual functional capacity assessment is evaluated at both steps four and five. 20 CFR 416.920(a)(4) In determining disability, an individual's functional capacity to perform basic work activities is evaluated and if found that the individual has the ability to perform basic work activities without significant limitation, disability will not be found. 20 CFR 416.994(b)(1)(iv) In general, the individual has the responsibility to prove disability. 20 CFR 416.912(a) An impairment or combination of impairments is not severe if it does not significantly limit an individual's physical or mental ability to do basic work activities. 20 CFR 416.921(a) The individual has the responsibility to provide evidence of prior work experience; efforts to work; and any other factor showing how the impairment affects the ability to work. 20 CFR 416.912(c)(3)(5)(6)

In addition to the above, when evaluating mental impairments, a special technique is utilized. 20 CFR 416.920a(a) First, an individual's pertinent symptoms, signs, and laboratory findings are evaluated to determine whether a medically determinable mental impairment exists. 20 CFR 416.920a(b)(1) When a medically determinable mental impairment is established, the symptoms, signs and laboratory findings that substantiate the impairment are documented to include the individual's significant history, laboratory findings, and functional limitations. 20 CFR 416.920a(e)(2) Functional limitation(s) is assessed based upon the extent to which the impairment(s) interferes with an individual's ability to function independently, appropriately, effectively, and on a sustained basis. *Id.*; 20 CFR 416.920a(c)(2) Chronic mental disorders, structured settings, medication, and other treatment and the effect on the overall degree of functionality is considered. 20 CFR 416.920a(c)(1) In addition, four broad functional areas (activities of daily living; social functioning; concentration, persistence or pace; and episodes of decompensation) are considered when determining an individual's degree of functional limitation. 20 CFR 416.920a(c)(3) The degree of limitation for the first three functional areas is rated by a five point scale: none, mild, moderate, marked, and extreme. 20 CFR 416.920a(c)(4) A four point scale (none, one or two, three, four or more) is used to rate the degree of limitation in the fourth functional area. *Id.* The last point on each scale represents a degree of limitation that is incompatible with the ability to do any gainful activity. *Id.*

After the degree of functional limitation is determined, the severity of the mental impairment is determined. 20 CFR 416.920a(d) If severe, a determination of whether the impairment meets or is the equivalent of a listed mental disorder is made. 20 CFR 416.920a(d)(2) If the severe mental impairment does not meet (or equal) a listed impairment, an individual's residual functional capacity is assessed. 20 CFR 416.920a(d)(3)

As outlined above, the first step looks at the individual's current work activity. In the record presented, the Claimant is not involved in substantial gainful activity therefore is not ineligible for disability benefits under Step 1.

The severity of the Claimant's alleged impairment(s) is considered under Step 2. The Claimant bears the burden to present sufficient objective medical evidence to substantiate the alleged disabling impairments. In order to be considered disabled for MA purposes, the impairment must be severe. 20 CFR 916.920(a)(4)(ii); 20 CFR 916.920(b) An impairment, or combination of impairments, is severe if it significantly limits an individual's physical or mental ability to do basic work activities regardless of age, education and work experience. 20 CFR 916.920(a)(4)(ii); 20 CFR 916.920(c) Basic work activities means the abilities and aptitudes necessary to do most jobs. 20 CFR 916.921(b) Examples include:

1. Physical functions such as walking, standing, sitting, lifting, pushing, pulling, reaching, carrying, or handling;

2. Capacities for seeing, hearing, and speaking;
3. Understanding, carrying out, and remembering simple instructions;
4. Use of judgment;
5. Responding appropriately to supervision, co-workers and usual work situations; and
6. Dealing with changes in a routine work setting.

Id. The second step allows for dismissal of a disability claim obviously lacking in medical merit. *Higgs v Bowen*, 880 F2d 860, 862 (CA 6, 1988). The severity requirement may still be employed as an administrative convenience to screen out claims that are totally groundless solely from a medical standpoint. *Id.* at 863 *citing Farris v Sec of Health and Human Services*, 773 F2d 85, 90 n.1 (CA 6, 1985) An impairment qualifies as non-severe only if, regardless of a claimant's age, education, or work experience, the impairment would not affect the claimant's ability to work. *Salmi v Sec of Health and Human Services*, 774 F2d 685, 692 (CA 6, 1985)

In the present case, the Claimant alleges disability due to chronic left leg pain, back spasms, hypertension, and post-traumatic stress disorder. By way of background, the Claimant was the victim of an assault which reportedly resulted in a closed head injury.

On [REDACTED], the Claimant attended a psychiatric evaluation. The Claimant was slow in psychomotor activities and his speech was slowed but understandable. The diagnoses were post-traumatic stress disorder and dependent personality disorder. The Claimant's Global Assessment Functioning ("GAF") was 61- 70.

On [REDACTED], a Medical Examination Report was completed on behalf of the Claimant. The current diagnoses were hypertension, chronic pain, hyperlipidemia, GERD, and psychosis. The physical examination documented a limp with a limited range of motion of the spine and lower left extremity. The Claimant was able to occasionally lift/carry 10 pounds; unable to stand, walk, or sit for extended periods of time; able to perform repetitive actions with both upper extremities; able to operate foot/leg controls with his right lower extremity; and required a cane for ambulation.

The Claimant submitted treatment records/progress notes which document treatment for hypertension, chronic left leg pain, chronic back pain, and post-traumatic stress disorder.

On [REDACTED], the Claimant presented to the hospital with left Achilles tendon rupture. The tendon was surgically repaired without complication. The Claimant was discharged on [REDACTED] with the diagnoses of left Achilles tendon repair, hypertension, and post-traumatic stress disorder.

On [REDACTED], the Claimant attended a follow-up appointment. The sutures were removed and the healing was progressing well.

On [REDACTED], the Claimant attended a follow-up appointment. The incision was healing and the Claimant was placed in a short-leg fiberglass walking cast with instructions to weight-bear as tolerated.

On [REDACTED], the Claimant attended a post-surgery follow-up appointment where he was placed in a Cam boot and was instructed to weight-bear as tolerated.

On [REDACTED], the Claimant attended a follow-up appointment. The examination of the lower left extremity revealed swelling around the foot and extending to the mid tibia. Pitting edema was noted. The incision was healing. The Claimant was found unable to work since the time of injury (2003) until current.

On [REDACTED], the Claimant attended a consultative evaluation. The physical examination documented mild pain when flexion and extension of the lumbosacral spine. The left ankle had full range of motion with 20 degrees flexion, 40 degrees of dorsiflexion, but with pain. The Claimant wore an ankle boot and used a cane for ambulation with pain noted. The Physician opined that the Claimant would make significant improvement with the left ankle pain over time.

On [REDACTED], the Claimant attended a Psychological Evaluation. The Psychologist opined that it was doubtful that any serious employer would hire him. The Mental Status Examination revealed impairments in attention, concentration, and processing of new information as well as the loss of abstract thinking. The Claimant was diagnosed with post-traumatic stress disorder and depression. The GAF was 50 and his prognosis was poor. The Mental Residual Functional Capacity Assessment found the Claimant markedly limited in his ability to maintain attention and concentrate for extended periods; perform activities within a schedule, maintain regular attendance, and be punctual within customary tolerances; and get along with co-workers or peers without distracting them or exhibiting behavioral extremes. The Claimant was moderately limited in 9-10 of the 20 factors and markedly limited in 2-3 factors.

As previously noted, the Claimant bears the burden to present sufficient objective medical evidence to substantiate the alleged disabling impairment(s). As summarized above, the Claimant has presented some medical evidence establishing that he does have some physical and mental limitations on his ability to perform basic work activities. The medical evidence has established that the Claimant has an impairment, or

combination thereof, that has more than a *de minimis* effect on the Claimant's basic work activities. Further, the impairments have lasted continuously for twelve months, therefore, the Claimant is not disqualified from receipt of MA-P benefits under Step 2.

In the third step of the sequential analysis of a disability claim, the trier of fact must determine if the Claimant's impairment, or combination of impairments, is listed in Appendix 1 of Subpart P of 20 CFR, Part 404. The Claimant has alleged disabling impairments due to recent surgical repair of the Achilles tendon, chronic back pain, hypertension, and post-traumatic stress disorder.

Listing 1.00 defines musculoskeletal system impairments. Disorders of the musculoskeletal system may result from hereditary, congenital, or acquired pathologic processes. 1.00A Impairments may result from infectious, inflammatory, or degenerative processes, traumatic or developmental events, or neoplastic, vascular, or toxic/metabolic diseases. 1.00A Regardless of the cause(s) of a musculoskeletal impairment, functional loss for purposes of these listings is defined as the inability to ambulate effectively on a sustained basis for any reason, including pain associated with the underlying musculoskeletal impairment, or the inability to perform fine and gross movements effectively on a sustained basis for any reason, including pain associated with the underlying musculoskeletal impairment. Inability to ambulate effectively means an extreme limitation of the ability to walk; i.e., an impairment(s) that interferes very seriously with the individual's ability to independently initiate, sustain, or complete activities. 1.00B2b(1) Ineffective ambulation is defined generally as having insufficient lower extremity function to permit independent ambulation without the use of a hand-held assistive device(s) that limits the functioning of both upper extremities. (Listing 1.05C is an exception to this general definition because the individual has the use of only one upper extremity due to amputation of a hand.) *Id.* To ambulate effectively, individuals must be capable of sustaining a reasonable walking pace over a sufficient distance to be able to carry out activities of daily living. 1.00B2b(2) They must have the ability to travel without companion assistance to and from a place of employment or school. . . . *Id.* When an individual's impairment involves a lower extremity uses a hand-held assistive device, such as a cane, crutch or walker, the medical basis for use of the device should be documented. 1.00J4 The requirement to use a hand-held assistive device may also impact an individual's functional capacity by virtue of the fact that one or both upper extremities are not available for such activities as lifting, carrying, pushing, and pulling. *Id.*

Categories of Musculoskeletal include:

- 1.02 Major dysfunction of a joint(s) due to any cause: Characterized by gross anatomical deformity (e.g. subluxation, contracture, bony or fibrous ankylosis, instability) and chronic joint pain and stiffness with signs of limitation of motion or other abnormal motion

of the affected joint(s), and findings on appropriate medically acceptable imaging of joint space narrowing, bony destruction, or ankylosis of the affected joint(s).
With:

- A. Involvement of one major peripheral weight-bearing joint (i.e., hip, knee, or ankle), resulting in inability to ambulate effectively as defined in 1.00B2b; or
- B. Involvement of one major peripheral joint in each upper extremity (i.e., shoulder, elbow, wrist, hand), resulting in inability to perform fine and gross movements effectively as defined in 1.00B2c

1.03 Reconstructive surgery or surgical arthrodesis of a major weight-bearing joint, with inability to ambulate effectively, as defined in 1.00B2b, and return to effective ambulation did not occur, or is not expected to occur, within 12 months of onset.

1.04 Disorders of the spine (e.g., herniated nucleus pulposus, spinal arachnoiditis, spinal stenosis, osteoarthritis, degenerative disc disease, facet arthritis, vertebral fracture), resulting in compromise of a nerve root (including the cauda equine) or spinal cord. With:

- A. Evidence of nerve root compression characterized by neuro-anatomic distribution of pain, limitation of motion of the spine, motor loss (atrophy with associated muscle weakness or muscle weakness) accompanied by sensory or reflex loss and, if there is involvement of the lower back, positive straight-leg raising test (sitting and supine); or
- B. Spinal arachnoiditis, confirmed by an operative note or pathology report of tissue biopsy, or by appropriate medically acceptable imaging, manifested by severe burning or painful dysesthesia, resulting in the need for changes in position or posture more than once every 2 hours; or
- C. Lumbar spinal stenosis resulting in pseudoclaudication, established by findings on appropriate medically acceptable imaging,

manifested by chronic nonradicular pain and weakness, and resulting in inability to ambulate effectively, as defined in 1.00B2b. (see above definition)

In this case, the objective medical evidence establishes left leg/ankle and back pain reported as a result of a 2003 assault. In [REDACTED], the Claimant underwent Achilles tendon repair however as of [REDACTED], the Claimant continued to walk with a limp and required a boot and cane for ambulation. The records also note that the Claimant is expected to medically improve over time as a result of the surgery. In light of the foregoing, it is found that the Claimant's impairment(s) may meet a listed impairment as detailed above, however the record is insufficient to meet the intent and severity requirement.

The Claimant also asserts physical disabling impairment(s) due to hypertension. Listing 4.00 defines cardiovascular impairment in part, as follows:

. . . any disorder that affects the proper functioning of the heart or the circulatory system (that is, arteries, veins, capillaries, and the lymphatic drainage). The disorder can be congenital or acquired. Cardiovascular impairment results from one or more of four consequences of heart disease:

- (i) Chronic heart failure or ventricular dysfunction.
- (ii) Discomfort or pain due to myocardial ischemia, with or without necrosis of heart muscle.
- (iii) Syncope, or near syncope, due to inadequate cerebral perfusion from any cardiac cause, such as obstruction of flow or disturbance in rhythm or conduction resulting in inadequate cardiac output.
- (iv) Central cyanosis due to right-to-left shunt, reduced oxygen concentration in the arterial blood, or pulmonary vascular disease.

An uncontrolled impairment means one that does not adequately respond to the standard prescribed medical treatment. 4.00A3f In a situation where an individual has not received ongoing treatment or have an ongoing relationship with the medical community despite the existence of a severe impairment, the disability evaluation is based on the current objective medical evidence. 4.00B3a If an individual does not receive treatment, an impairment that meets the criteria of a listing cannot be established. *Id.* Hypertension (high blood pressure) generally causes disability through its effect on other body systems and is evaluated by reference to specific body system(s) affected (heart, brain, kidneys, or eyes). 4.00H1 Hypertension, to include malignant hypertension, is not a listed impairment under 4.00 thus the effect on the Claimant's other body systems were evaluated by reference to specific body parts.

Cardiomyopathy is evaluated under 4.02, 4.04, 4.05 or 11.04 depending on its effects on the individual. 4.00H3

In the record presented, the Claimant medical records document hypertension however the record is devoid of any end organ damage. Ultimately, the Claimant's medical record does not support a finding of disabled based on a listed impairment within 4.00. 20 CFR 416.920(a)(4)(iii) According to the medical evidence alone, the Claimant's physical impairment(s) do not meet or equal the requirements within Listing 4.00 thus he cannot be found to be disabled, or not disabled under this listing.

The Claimant asserts mental disabling impairments due to post-traumatic stress disorder. Listing 12.00 encompasses adult mental disorders. The evaluation of disability on the basis of mental disorders requires documentation of a medically determinable impairment(s) and consideration of the degree in which the impairment limits the individual's ability to work, and whether these limitations have lasted or are expected to last for a continuous period of at least 12 months. 12.00A The existence of a medically determinable impairment(s) of the required duration must be established through medical evidence consisting of symptoms, signs, and laboratory findings, to include psychological test findings. 12.00B The evaluation of disability on the basis of a mental disorder requires sufficient evidence to (1) establish the presence of a medically determinable mental impairment(s), (2) assess the degree of functional limitation the impairment(s) imposes, and (3) project the probable duration of the impairment(s). 12.00D The evaluation of disability on the basis of mental disorders requires documentation of a medically determinable impairment(s) and consideration of the degree in which the impairment limits the individual's ability to work consideration, and whether these limitations have lasted or are expected to last for a continuous period of at least 12 months. 12.00A The severity requirement is measured according to the functional limitations imposed by the medically determinable mental impairment. 12.00C Functional limitations are assessed in consideration of an individual's activities of daily living; social functioning; concentration, persistence, or pace; and episodes of decompensation. *Id.*

In this case, the medical evidence establishes diagnoses of post-traumatic stress disorder and dependent personality disorder. Impairments in attention, concentration, and processing new information to include abstract thinking were documented. The Claimant's GAF ranged from 61-70 to 50 which reflects serious symptoms or serious impairment in social, occupational, or school functioning. The Claimant was markedly limited in 2-3 of the 20 factors and moderately limited in 9-10 of the factors. In consideration of the foregoing, it is found that the Claimant's mental impairment(s) do not meet the intent and severity requirement of a Listed impairment thus the Claimant cannot be found disabled, or not disabled, within 12.00. Accordingly, the Claimant's eligibility under Step 4 is considered.

The fourth step in analyzing a disability claim requires an assessment of the Claimant's residual functional capacity ("RFC") and past relevant employment. 20 CFR 416.920(a)(4)(iv) An individual is not disabled if he/she can perform past relevant work. *Id.*; 20 CFR 416.960(b)(3) Past relevant work is work that has been performed within the past 15 years that was a substantial gainful activity and that lasted long enough for the individual to learn the position. 20 CFR 416.960(b)(1) Vocational factors of age, education, and work experience, and whether the past relevant employment exists in significant numbers in the national economy is not considered. 20 CFR 416.960(b)(3) RFC is assessed based on impairment(s), and any related symptoms, such as pain, which may cause physical and mental limitations that affect what can be done in a work setting. RFC is the most that can be done, despite the limitations.

To determine the physical demands (exertional requirements) of work in the national economy, jobs are classified as sedentary, light, medium, heavy, and very heavy. 20 CFR 416.967 Sedentary work involves lifting of no more than 10 pounds at a time and occasionally lifting or carrying articles like docket files, ledgers, and small tools. 20 CFR 416.967(a) Although a sedentary job is defined as one which involves sitting, a certain amount of walking and standing is often necessary in carrying out job duties. *Id.* Jobs are sedentary if walking and standing are required occasionally and other sedentary criteria are met. Light work involves lifting no more than 20 pounds at a time with frequent lifting or carrying objects weighing up to 10 pounds. 20 CFR 416.967(b) Even though weight lifted may be very little, a job is in this category when it requires a good deal of walking or standing, or when it involves sitting most of the time with some pushing and pulling of arm or leg controls. *Id.* To be considered capable of performing a full or wide range of light work, an individual must have the ability to do substantially all of these activities. *Id.* An individual capable of light work is also capable of sedentary work, unless there are additionally limiting factors such as loss of fine dexterity or inability to sit for long periods of time. *Id.* Medium work involves lifting no more than 50 pounds at a time with frequent lifting or carrying of objects weighing up to 25 pounds. 20 CFR 416.967(c) An individual capable of performing medium work is also capable of light and sedentary work. *Id.* Heavy work involves lifting no more than 100 pounds at a time with frequent lifting or carrying of objects weighing up to 50 pounds. 20 CFR 416.967(d) An individual capable of heavy work is also capable of medium, light, and sedentary work. *Id.* Finally, very heavy work involves lifting objects weighing more than 100 pounds at a time with frequent lifting or carrying objects weighing 50 pounds or more. 20 CFR 416.967(e) An individual capable of very heavy work is able to perform work under all categories. *Id.*

Limitations or restrictions which affect the ability to meet the demands of jobs other than strength demands (exertional requirements, i.e. sitting, standing, walking, lifting, carrying, pushing, or pulling) are considered nonexertional. 20 CFR 416.969a(a) In considering whether an individual can perform past relevant work, a comparison of the individual's residual functional capacity with the demands of past relevant work. *Id.* If an individual can no longer do past relevant work the same residual functional capacity

assessment along with an individual's age, education, and work experience is considered to determine whether an individual can adjust to other work which exists in the national economy. *Id.* Examples of non-exertional limitations or restrictions include difficulty function due to nervousness, anxiousness, or depression; difficulty maintaining attention or concentration; difficulty understanding or remembering detailed instructions; difficulty in seeing or hearing; difficulty tolerating some physical feature(s) of certain work settings (i.e. can't tolerate dust or fumes); or difficulty performing the manipulative or postural functions of some work such as reaching, handling, stooping, climbing, crawling, or crouching. 20 CFR 416.969a(c)(1)(i) – (vi) If the impairment(s) and related symptoms, such as pain, only affect the ability to perform the non-exertional aspects of work-related activities, the rules in Appendix 2 do not direct factual conclusions of disabled or not disabled. 20 CFR 416.969a(c)(2) The determination of whether disability exists is based upon the principles in the appropriate sections of the regulations, giving consideration to the rules for specific case situations in Appendix 2. *Id.*

The Claimant's prior work history consists of work as a substitute teacher and youth group counselor whose job duties included extended standing, walking, and sitting. In light of the Claimant's testimony and in consideration of the Occupational Code, the Claimant's prior work is classified as semi-skilled, light work.

The Claimant testified that he experiences difficulty lifting/carrying any weight; is able to walk short distances with his cane and boot; can sit for less than 2 hours; can stand for approximately ½ hour; and is unable to bend and/or squat. The medical evidence restricts the Claimant to occasionally lifting/carrying of 10 pounds; unable to stand, walk, or sit for extended period of time; but is able to perform repetitive actions with his upper extremities. If the impairment or combination of impairments does not limit physical or mental ability to do basic work activities, it is not a severe impairment(s) and disability does not exist. 20 CFR 416.920 In consideration of the Claimant's testimony, medical records, and current limitations, it is found that the Claimant is not able to return to past relevant work thus the fifth step in the sequential evaluation is required.

In Step 5, an assessment of the individual's residual functional capacity and age, education, and work experience is considered to determine whether an adjustment to other work can be made. 20 CFR 416.920(4)(v) At the time of hearing, the Claimant was 47 years old thus considered to be a younger individual for MA-P purposes. The Claimant has a college education. Disability is found if an individual is unable to adjust to other work. *Id.* At this point in the analysis, the burden shifts from the Claimant to the Department to present proof that the Claimant has the residual capacity to substantial gainful employment. 20 CFR 416.960(2); *Richardson v Sec of Health and Human Services*, 735 F2d 962, 964 (CA 6, 1984). While a vocational expert is not required, a finding supported by substantial evidence that the individual has the vocational qualifications to perform specific jobs is needed to meet the burden. *O'Banner v Sec of Health and Human Services*, 587 F2d 321, 323 (CA 6, 1978).

Medical-Vocational guidelines found at 20 CFR Subpart P, Appendix II, may be used to satisfy the burden of proving that the individual can perform specific jobs in the national economy. *Heckler v Campbell*, 461 US 458, 467 (1983); *Kirk v Secretary*, 667 F2d 524, 529 (CA 6, 1981) *cert den* 461 US 957 (1983). Where an individual has an impairment or combination of impairments that results in both strength limitations and non-exertional limitations, the rules in Subpart P are considered in determining whether a finding of disabled may be possible based on the strength limitations alone, and if not, the rule(s) reflecting the individual's maximum residual strength capabilities, age, education, and work experience, provide the framework for consideration of how much an individual's work capability is further diminished in terms of any type of jobs that would contradict the nonexertional limitations. Full consideration must be given to all relevant facts of a case in accordance with the definitions of each factor to provide adjudicative weight for each factor.

In the record presented, the Claimant's residual functional capacity for work activities on a regular and continuing basis does include the ability to meet at least the physical and mental demands required to perform sedentary work as defined in 20 CFR 416.967(a). After review of the entire record finding no contradiction in the Claimant's nonexertional limitations, and using the Medical-Vocational Guidelines [20 CFR 404, Subpart P, Appendix II] as a guide, specifically Rule 201.22, it is found that the Claimant is not disabled for purposes of the MA-P program at Step 5.

The State Disability Assistance ("SDA") program, which provides financial assistance for disabled persons, was established by 2004 PA 344. DHS administers the SDA program pursuant to MCL 400.10 *et seq.* and Michigan Administrative Code ("MAC R") 400.3151 – 400.3180. Department policies are found in BAM, BEM, and BRM. A person is considered disabled for SDA purposes if the person has a physical or mental impairment which meets federal SSI disability standards for at least ninety days. Receipt of SSI or RSDI benefits based on disability or blindness, or the receipt of MA benefits based on disability or blindness automatically qualifies an individual as disabled for purposes of the SDA program.

In this case, the Claimant is found not disabled for purposes of the Medical Assistance program, therefore the Claimant's is found not disabled for purposes of continued SDA benefits.

DECISION AND ORDER

The Administrative Law Judge, based upon the findings of fact and conclusions of law, finds the Claimant not disabled for purposes of the MA-P and SDA benefit programs.

Accordingly, it is ORDERED:

The Department's determination is AFFIRMED.

Colleen M. Mamelka

Colleen M. Mamelka
Administrative Law Judge
For Ismael Ahmed, Director
Department of Human Services

Date Signed: 07/26/2010

Date Mailed: 07/26/2010

NOTICE: Administrative Hearings may order a rehearing or reconsideration on either its own motion or at the request of a party within 30 days of the mailing date of this Decision and Order. Administrative Hearings will not order a rehearing or reconsideration on the Department's motion where the final decision cannot be implemented within 90 days of the filing of the original request.

The Claimant may appeal the Decision and Order to Circuit Court within 30 days of the mailing of the Decision and Order or, if a timely request for rehearing was made, within 30 days of the receipt date of the rehearing decision.
