

[REDACTED]

STATE OF MICHIGAN
STATE OFFICE OF ADMINISTRATIVE HEARINGS AND RULES

ADMINISTRATIVE HEARINGS FOR THE
DEPARTMENT OF HUMAN SERVICES

IN THE MATTER OF: [REDACTED]

Claimant

Reg. No.: 2009-6242

Issue No.: 2009, 4031

Case No.: [REDACTED]

Load No.: [REDACTED]

Hearing Date:

March 19, 2009

Wayne County DHS [REDACTED]

ADMINISTRATIVE LAW JUDGE: Colleen M. Mamelka

HEARING DECISION

This matter is before the undersigned Administrative Law Judge pursuant to MCL 400.9 and MCL 400.37 upon the Claimant's request for a hearing. After due notice, a hearing was conducted from Detroit, Michigan on March 19, 2009. The Claimant appeared and testified. [REDACTED] appeared on behalf of the Department.

ISSUE

Whether the Department properly determined that the Claimant was not disabled for purposes of Medical Assistance ("MA-P") and State Disability Assistance ("SDA") programs.

FINDINGS OF FACT

The Administrative Law Judge, based on the competent, material and substantial evidence on the whole record, finds as material fact:

1. The Claimant submitted a public assistance application seeking MA-P and SDA benefits on September 8, 2008.
2. On November 5, 2008, the Medical Review Team ("MRT") determined the Claimant was not disabled finding the Claimant's impairment(s) did not prevent employment of 90 days

- or more for SDA purposes, and finding the Claimant capable of performing other work for MA-P purposes. (Exhibit 1, pp. 3, 4)
3. On November 7, 2008, the Department sent the Claimant an eligibility notice informing the Claimant he was not eligible for MA-P and SDA benefits. (Exhibit 1, p. 1)
 4. On November 12, 2008, the Department received the Claimant's Request for Hearing protesting the determination that the Claimant was not disabled. (Exhibit 2)
 5. On December 17, 2008, the State Hearing Review Team ("SHRT") found the Claimant not disabled. (Exhibit 3)
 6. The Claimant's alleged physical disabling impairments are due to asthma, bronchitis, back and neck pain, closed head injury, and blurred vision.
 7. The Claimant has alleged mental disabling impairment(s) due to depression.
 8. At the time of hearing, the Claimant was 52 years old with a [REDACTED] birth date; was 5' 6" and weighed 140 pounds.
 9. The Claimant graduated from high school with some college and has a work history as a general laborer.
 10. *The Claimant's impairment has lasted or is expected to last for a period of 12 months or longer.*

CONCLUSIONS OF LAW

The Medical Assistance ("MA") program is established by Subchapter XIX of Chapter 7 of The Public Health & Welfare Act, 42 USC 1397, and is administered by the Department of Human Services ("DHS"), formally known as the Family Independence Agency, pursuant to MCL 400.10 *et seq* and MCL 400.105. Department policies are found in the Program

Administrative Manual (“PAM”), the Program Eligibility Manual (“PEM”), and the Program Reference Manual (“PRM”).

Disability is defined as the inability to do any substantial gainful activity by reason of any medically determinable physical or mental impairment which can be expected to result in death or which has lasted or can be expected to last for a continuous period of not less than 12 months. 20 CFR 416.905(a) The person claiming a physical or mental disability has the burden to establish it through the use of competent medical evidence from qualified medical sources such as his or her medical history, clinical/laboratory findings, diagnosis/prescribed treatment, prognosis for recovery and/or medical assessment of ability to do work-related activities or ability to reason and make appropriate mental adjustments, if a mental disability is alleged. 20 CFR 413.913 An individual’s subjective pain complaints are not, in and of themselves, sufficient to establish disability. 20 CFR 416.908; 20 CFR 416.929(a) Similarly, conclusory statements by a physician or mental health professional that an individual is disabled or blind, absent supporting medical evidence, is insufficient to establish disability. 20 CFR 416.929(a)

When determining disability, the federal regulations require several factors to be considered including: (1) the location/duration/frequency/intensity of an applicant’s pain; (2) the type/dosage/effectiveness/side effects of any medication the applicants takes to relieve pain; (3) any treatment other than pain medication that the applicant has received to relieve pain; and (4) the effect of the applicant’s pain on his or her ability to do basic work activities. 20 CFR 416.929(c)(3) The applicant’s pain must be assessed to determine the extent of his or her functional limitation(s) in light of the objective medical evidence presented. 20 CFR 416.929(c)(2)

In order to determine whether or not an individual is disabled, federal regulations require a five-step sequential evaluation process be utilized. 20 CFR 416.920(a)(1) The five-step analysis requires the trier of fact to consider an individual's current work activity; the severity of the impairment(s) both in duration and whether it meets or equals a listed impairment in Appendix 1; residual functional capacity to determine whether an individual can perform past relevant work; and residual functional capacity along with vocational factors (i.e. age, education, and work experience) to determine if an individual can adjust to other work. 20 CFR 416.920(a)(4); 20 CFR 416.945

If an individual is found disabled, or not disabled, at any step, a determination or decision is made with no need evaluate subsequent steps. 20 CFR 416.920(a)(4) If a determination cannot be made that an individual is disabled, or not disabled, at a particular step, the next step is required. 20 CFR 416.920(a)(4) If an impairment does not meet or equal a listed impairment, an individual's residual functional capacity is assessed before moving from step three to step four. 20 CFR 416.920(a)(4); 20 CFR 416.945 Residual functional capacity is the most an individual can do despite the limitations based on all relevant evidence. 20 CFR 945(a)(1) An individual's residual functional capacity assessment is evaluated at both steps four and five. 20 CFR 416.920(a)(4) In determining disability, an individual's functional capacity to perform basic work activities is evaluated and if found that the individual has the ability to perform basic work activities without significant limitation, disability will not be found. 20 CFR 416.994(b)(1)(iv)

In general, the individual has the responsibility to prove disability. 20 CFR 416.912(a) An impairment or combination of impairments is not severe if it does not significantly limit an individual's physical or mental ability to do basic work activities. 20 CFR 416.921(a) The individual has the responsibility to provide evidence of prior work experience; efforts to work;

and any other factor showing how the impairment affects the ability to work. 20 CFR 416.912(c)(3)(5)(6)

As previously stated, the first step looks at the individual's current work activity. An individual is not disabled regardless of the medical condition, age, education, and work experience, if the individual is working and the work is a substantial, gainful activity. 20 CFR 416.920(a) (4) (i) In the record presented, the Claimant is not involved in substantial gainful activity. The Claimant is not disqualified from receipt of disability benefits under Step 1.

The severity of the Claimant's alleged impairment(s) is considered under Step 2. The Claimant bears the burden to present sufficient objective medical evidence to substantiate the alleged disabling impairments. In order to be considered disabled for MA purposes, the impairment must be severe. 20 CFR 916.920(a)(4)(ii); 20 CFR 916.920(b) An impairment, or combination of impairments, is severe if it significantly limits an individual's physical or mental ability to do basic work activities regardless of age, education and work experience. 20 CFR 916.920(a)(4)(ii); 20 CFR 916.920(c) Basic work activities means the abilities and aptitudes necessary to do most jobs. 20 CFR 916.921(b) Examples include:

1. Physical functions such as walking, standing, sitting, lifting, pushing, pulling, reaching, carrying, or handling;
2. Capacities for seeing, hearing, and speaking;
3. Understanding, carrying out, and remembering simple instructions;
4. Use of judgment;
5. Responding appropriately to supervision, co-workers and usual work situations; and
6. Dealing with changes in a routine work setting.

Id. The second step allows for dismissal of a disability claim obviously lacking in medical merit. *Higgs v Bowen*, 880 F2d 860, 862 (CA 6, 1988) The severity requirement may still be employed as an administrative convenience to screen out claims that are totally groundless solely from a medical standpoint. *Id.* at 863 citing *Farris v Sec of Health and Human Services*, 773 F2d 85, 90 n.1 (CA 6, 1985) An impairment qualifies as severe only if, regardless of a claimant's age, education, or work experience, the impairment would not affect the claimant's ability to work. *Salmi v Sec of Health and Human Services*, 774 F2d 685, 692 (CA 6, 1985)

In the present case, the Claimant alleges disability based on asthma, bronchitis, back and neck pain, closed head injury, blurred vision, and depression.

On [REDACTED], in response to a prior application, the Claimant was referred to the [REDACTED] for an examination. The Claimant was diagnosed with Major depressive disorder, recurrent with psychotic features. His Global Assessment Functioning was 45 and his prognosis was fair. The Claimant was found unable to manage his benefit funds.

On this same date, [REDACTED], the Claimant's physical impairments were also evaluated. The Claimant's was found to have normal gait and stance and able to walk unassisted with no limping or difficulties. Squatting was painful and his straight leg raise from a sitting position was 40 degrees bilaterally. The Claimant was found to have osteoarthritis and spinal disorder, noting some extension and right/left lateral flexion limitations, however he was able to ambulate well without a cane.

The [REDACTED] Medical Examination Report found the Claimant's to be in stable condition and able to frequently lift/carry 20 pounds and able to stand and/or walk at least 2

hours of an 8-hour workday. The Claimant could sit for less than 6 hours in an 8-hour workday and had no limitations on his ability to perform repetitive actions with his hands/arms/feet/legs.

On [REDACTED], the Claimant presented to [REDACTED] [REDACTED] due to an exacerbation of his asthma, bronchitis, and muscle pain. The Claimant was prescribed Albuterol and Atrovent inhalers, prednisone to treat his asthma and bronchitis, and naprosyn, doycodine, and flexeril for his muscle pain. The Claimant was not admitted to the hospital.

On [REDACTED], the Claimant presented to the [REDACTED] for a Department ordered examination. Examination of the cervical spine was not performed due to the Claimant's muscles being "very taut posteriorly including the posterior spinous and paraspinal muscles." Straight leg raise was 0-30 degrees bilaterally however, the Claimant's effort was noted as "poor." In addition, the the Claimant's gait evaluation revealed no stumbling, lurching, falling, pain, atrophy, or instability, noting the Claimant barely put any weight on his cane. The physiatrist opined that the cane was not necessary. The Claimant was able to do heel, toe, and tandem walking as well as squatting. Ultimately, as a result of the [REDACTED] [REDACTED] motor vehicle accident, the Claimant was found to have a closed head injury with headaches and vision impairment (20/40) in his left eye. The Claimant's short-term memory was also affected. The Claimant's neck pain was treated conservately and his history of asthma and COPD was documented.

On this same date, [REDACTED] [REDACTED], the Claimant's mental status was also evaluated. The Claimant was found to have depression secondary to his general medical conditions. Polysubstance abuse (heorin and cocaine) was noted. The Claimant's Global Assessment

Functioning (“GAF”) was 47 however his prognosis was fair although he was determined to be unable to manage his own benefit funds.

On [REDACTED], the Claimant’s treating physician completed a Medical Examination Report on the Claimant’s behalf. The impairments were listed as closed head injury, eczema, neck and back pain, and chronic obstructive pulmonary disease (“COPD”). The Claimant’s condition was listed as stable and he was found able to occasionally lift/carry 10 pounds; able to stand and/or walk at least 2 hours in an 8-hour workday; and unable to sit for 6 hours in an 8 hour workday. No restrictions on the Claimant’s ability to perform repetitive actions were noted. In addition, the Claimant was found able to meet his household needs, with no mental limitations documented.

As previously noted, the Claimant bears the burden to present sufficient objective medical evidence to substantiate the alleged disabling impairment(s). As summarized above, the Claimant has presented objective medical evidence establishing that he does have some physical limitations on his ability to perform basic work activities. Accordingly, the Claimant has an impairment, or combination thereof, that has more than a *de minimis* effect on the Claimant’s basic work activities. Further, the impairments have lasted continuously for twelve months; therefore, the Claimant is not disqualified from receipt of MA-P benefits under Step 2.

In the third step of the sequential analysis of a disability claim, the trier of fact must determine if the Claimant’s impairment, or combination of impairments, is listed in Appendix 1 of Subpart P of 20 CFR, Part 404. The Claimant asserts physical disabling impairment(s) due in part to neck and back pain and arthritis. Listing 1.00 defines musculoskeletal system impairments. Disorders of the musculoskeletal system may result from hereditary, congenital, or acquired pathologic processes. 1.00A Impairments may result from infectious, inflammatory, or

degenerative processes, traumatic or developmental events, or neoplastic, vascular, or toxic/metabolic diseases. 1.00A Regardless of the cause(s) of a musculoskeletal impairment, functional loss for purposes of these listings is defined as the inability to ambulate effectively on a sustained basis for any reason, including pain associated with the underlying musculoskeletal impairment, or the inability to perform fine and gross movements effectively on a sustained basis for any reason, including pain associated with the underlying musculoskeletal impairment. Inability to ambulate effectively means an extreme limitation of the ability to walk; i.e., an impairment(s) that interferes very seriously with the individual's ability to independently initiate, sustain, or complete activities. 1.00B2b (1) Ineffective ambulation is defined generally as having insufficient lower extremity function to permit independent ambulation without the use of a hand-held assistive device(s) that limits the functioning of both upper extremities. (Listing 1.05C is an exception to this general definition because the individual has the use of only one upper extremity due to amputation of a hand.) *Id.* To ambulate effectively, individuals must be capable of sustaining a reasonable walking pace over a sufficient distance to be able to carry out activities of daily living. 1.00B2b (2) They must have the ability to travel without companion assistance to and from a place of employment or school. . . . *Id.* When an individual's impairment involves a lower extremity uses a hand-held assistive device, such as a cane, crutch or walker, the medical basis for use of the device should be documented. 1.00J4 The requirement to use a hand-held assistive device may also impact an individual's functional capacity by virtue of the fact that one or both upper extremities are not available for such activities as lifting, carrying, pushing, and pulling. *Id.*

Categories of Musculoskeletal include:

- 1.02 Major dysfunction of a joint(s) due to any cause: Characterized by gross anatomical deformity (e.g. subluxation, contracture, bony or

fibrous ankylosis, instability) and chronic joint pain and stiffness with signs of limitation of motion or other abnormal motion of the affected joint(s), and findings on appropriate medically acceptable imaging of joint space narrowing, bony destruction, or ankylosis of the affected joint(s). With:

- A. Involvement of one major peripheral weight-bearing joint (i.e., hip, knee, or ankle), resulting in inability to ambulate effectively as defined in 1.00B2b; or
- B. Involvement of one major peripheral joint in each upper extremity (i.e., shoulder, elbow, wrist, hand), resulting in inability to perform fine and gross movements effectively as defined in 1.00B2c

* * *

1.04

Disorders of the spine (e.g., herniated nucleus pulposus, spinal arachnoiditis, spinal stenosis, osteoarthritis, degenerative disc disease, facet arthritis, and vertebral fracture), resulting in compromise of a nerve root (including the cauda equine) or spinal cord. With:

- A. Evidence of nerve root compression characterized by neuro-anatomic distribution of pain, limitation of motion of the spine, motor loss (atrophy with associated muscle weakness or muscle weakness) accompanied by sensory or reflex loss and, if there is involvement of the lower back, positive straight-leg raising test (sitting and supine); or
- B. Spinal arachnoiditis, confirmed by an operative note or pathology report of tissue biopsy, or by appropriate medically acceptable imaging, manifested by severe burning or painful dysesthesia, resulting in the need for changes in position or posture more than once every 2 hours; or
- C. Lumbar spinal stenosis resulting in pseudoclaudication, established by findings on appropriate medically acceptable imaging, manifested by chronic nonradicular pain and weakness, and resulting in inability to ambulate effectively, as defined in 1.00B2b. (see above definition)

* * *

1.06

Fracture of the femur, tibia, pelvis, or one or more of the tarsal bones with:

- A. Solid union not evident on appropriate medically acceptable imaging and not clinically solid;

And

- B. Inability to ambulate effectively as defined in 1.00B2b, and return to effective ambulation did not occur or is not expected to occur within 12 months of onset.

* * *

- 1.08 Soft tissue injury (e.g., burns) of an upper or lower extremity, trunk or face and head, under continuing surgical management, as defined in 1.00M, directed toward the salvage or restoration of major function, and such major function was not restored or expected to be restored within 12 months of onset. Major function of the face and head is described in 1.00.

Based upon the submitted medical documentation, there was insufficient evidence presented to supporting a finding of a Listed impairment within 1.00, specifically 1.02, 1.04, 1.06 and/or 1.08 therefore the Claimant is not disabled under this Listing.

The Claimant has alleged physical disabling impairments due in part to shortness of breath, asthma, and chronic obstructive pulmonary disease. Listing 3.00 defines respiratory system impairments. Respiratory disorders, along with any associated impairment(s), must be established by medical evidence sufficient enough in detail to evaluate the severity of the impairment. 3.00A Evidence must be provided in sufficient detail to permit an independent reviewer to evaluate the severity of the impairment. *Id.* A major criteria for determining the level of respiratory impairments that are episodic in nature, is the frequency and intensity of episodes that occur despite prescribed treatment. 3.00C Attacks of asthma, episodes of bronchitis or pneumonia or hemoptysis (more than blood-streaked sputum), or respiratory failure as referred to in paragraph B of 3.03, 3.04, and 3.07, are defined as prolonged symptomatic episodes lasting one or more days and requiring intensive treatment, such as intravenous bronchodilator or antibiotic administration or prolonged inhalational bronchodilator therapy in a hospital, emergency room or equivalent setting. 3.00C Hospital admissions are defined as inpatient hospitalizations for longer than 24 hours. *Id.* Medical evidence must include

information documenting adherence to a prescribed regimen of treatment as well as a description of physical signs. *Id.* For asthma, medical evidence should include spirometric results obtained between attacks that document the presence of baseline airflow obstruction. *Id.*

Chronic asthmatic bronchitis (Listing 3.03A) is evaluated under Listing 3.02. Chronic obstructive pulmonary disease, due to any cause, meets Listing 3.02 if medical evidence establishes that the Claimant's forced expiratory volume (in one second) is equal to or less than 1.45 (based on the Claimant's 5' 8'' height). Attacks of asthma and/or episodes of bronchitis as referred to in 3.03 and 3.07, in spite of prescribed treatment, that occur at least once every 2 months or at least six times a year are considered. Each in-patient hospitalization for longer than 24 hours counts as two attacks/episodes and an evaluation of at least 12 consecutive months must be used to determine the frequency of attacks/episodes. 3.03B; 3.07B For asthma, the medical evidence *should* include spirometric results obtained between attacks that document the presence of baseline airflow obstruction. 3.00C

In this case there was insufficient medical documentation to support a finding of a listed impairment within Listing 3.00.

The Claimant's also asserts mental disabling impairments due to depression. Listing 12.00 encompasses adult mental disorders. The evaluation of disability on the basis of mental disorders requires documentation of a medically determinable impairment(s) and consideration of the degree in which the impairment limits the individual's ability to work, and whether these limitations have lasted or are expected to last for a continuous period of at least 12 months. 12.00A The existence of a medically determinable impairment(s) of the required duration must be established through medical evidence consisting of symptoms, signs, and laboratory findings, to include psychological test findings. 12.00B The evaluation of disability on the basis of a

mental disorder requires sufficient evidence to (1) establish the presence of a medically determinable mental impairment(s), (2) assess the degree of functional limitation the impairment(s) imposes, and (3) project the probable duration of the impairment(s). 12.00D The evaluation of disability on the basis of mental disorders requires documentation of a medically determinable impairment(s) and consideration of the degree in which the impairment limits the individual's ability to work consideration, and whether these limitations have lasted or are expected to last for a continuous period of at least 12 months. 12.00A

Listing 12.04 defines affective disorders as being characterized by a disturbance of mood, accompanied by a full or partial manic or depressive syndrome. Generally, affective disorders involve either depression or elation. The required level of severity for these disorders are met when the requirements of both A and B are satisfied, or when the requirements in C are satisfied.

- A. Medically documented persistence, either continuous or intermittent, of one of the following:
 - 1. Depressive syndrome characterized by at least four of the following:
 - a. Anhedonia or pervasive loss of interest in almost all activities; or
 - b. Appetite disturbance with change in weight; or
 - c. Sleep disturbance; or
 - d. Psychomotor agitation or retardation; or
 - e. Decreased energy; or
 - f. Feelings of guilt or worthlessness; or
 - g. Difficulty concentrating or thinking; or
 - h. Thoughts of suicide; or
 - i. Hallucinations, delusions, or paranoid thinking; or
 - 2. Manic syndrome characterized by at least three of the following:
 - a. Hyperactivity; or
 - b. Pressure of speech; or
 - c. Flight of ideas; or

- d. Inflated self-esteem; or
 - e. Decreased need for sleep; or
 - f. Easy distractibility; or
 - g. Involvement in activities that have a high probability of painful consequences which are not recognized; or
 - h. Hallucinations, delusions, or paranoid thinking; or
3. Bipolar syndrome with a history of episodic periods manifested by the full symptomatic picture of both manic and depressive syndromes (and currently characterized by either or both syndromes)'

AND

B. Resulting in at least two of the following:

- 1. Marked restriction on activities of daily living; or
- 2. Marked difficulties in maintaining social functioning; or
- 3. Marked difficulties in maintaining concentration, persistence, or pace; or
- 4. Repeated episodes of decompensation, each of extended duration;

OR

C. Medically documented history of chronic affective disorder of at least 2 years' duration that has caused more than a minimal limitation of ability to do basic work activities, with symptoms or signs currently attenuated by medication or psychosocial support, and one of the following:

- 1. Repeated episodes of decompensation, each of extended duration; or
- 2. A residual disease process that has resulted in such marginal adjustment that even minimal increase in mental demands or change in the environment would be predicted to cause the individual to decompensate; or
- 3. Current history of 1 or more years' inability to function outside a highly supportive living arrangement, with an indication of continued need for such an arrangement.

In the record presented, there was insufficient evidence to meet the intent and/or severity of a Listed impairment within 12.00 thus the Claimant cannot be found disabled under this listing.

The Claimant also asserted disability based upon skin allergies/lesions and a stomach ulcer. No objective medical records were presented to substantiate these impairments. Ultimately, based upon the submitted record, the Claimant cannot be found disabled, or not disabled, under an Adult Listing therefore the Claimant's eligibility under Step 4 is considered. 20 CFR 416.905(a)

The fourth step in analyzing a disability claim requires an assessment of the Claimant's residual functional capacity ("RFC") and past relevant employment. 20 CFR 416.920(a) (4) (iv) An individual is not disabled if he/she can perform past relevant work. *Id.*; 20 CFR 416.960(b)(3) Past relevant work is work that has been performed within the past 15 years that was a substantial gainful activity and that lasted long enough for the individual to learn the position. 20 CFR 416.960(b) (1) Vocational factors of age, education, and work experience, and whether the past relevant employment exists in significant numbers in the national economy is not considered. 20 CFR 416.960(b)(3) RFC is assessed based on impairment(s), and any related symptoms, such as pain, which may cause physical and mental limitations that affect what can be done in a work setting. RFC is the most that can be done, despite the limitations.

To determine the physical demands (exertional requirements) of work in the national economy, jobs are classified as sedentary, light, medium, heavy, and very heavy. 20 CFR 416.967 Sedentary work involves lifting of no more than 10 pounds at a time and occasionally lifting or carrying articles like docket files, ledgers, and small tools. 20 CFR 416.967(a) Although a sedentary job is defined as one which involves sitting, a certain amount of walking and standing is often necessary in carrying out job duties. *Id.* Jobs are sedentary if walking and standing are required occasionally and other sedentary criteria are met. Light work involves lifting no more than 20 pounds at a time with frequent lifting or carrying objects weighing up to

10 pounds. 20 CFR 416.967(b) Even though weight lifted may be very little, a job is in this category when it requires a good deal of walking or standing, or when it involves sitting most of the time with some pushing and pulling of arm or leg controls. *Id.* To be considered capable of performing a full or wide range of light work, an individual must have the ability to do substantially all of these activities. *Id.* An individual capable of light work is also capable of sedentary work, unless there are additionally limiting factors such as loss of fine dexterity or inability to sit for long periods of time. *Id.* Medium work involves lifting no more than 50 pounds at a time with frequent lifting or carrying of objects weighing up to 25 pounds. 20 CFR 416.967(c) An individual capable of performing medium work is also capable of light and sedentary work. *Id.* Heavy work involves lifting no more than 100 pounds at a time with frequent lifting or carrying of objects weighing up to 50 pounds. 20 CFR 416.967(d) An individual capable of heavy work is also capable of medium, light, and sedentary work. *Id.* Finally, very heavy work involves lifting objects weighing more than 100 pounds at a time with frequent lifting or carrying objects weighing 50 pounds or more. 20 CFR 416.967(e) An individual capable of very heavy work is able to perform work under all categories. *Id.*

Over the past 15 years, the Claimant worked as a general laborer whose primary responsibilities include standing, walking, bending, squatting, and lifting over 70 pounds. Given these facts, the Claimant's past work history is classified as unskilled, medium work.

The Claimant testified that he can lift/carry approximately 20-25 pounds; sit for 10 – 15 minutes; stand for approximately 5 – 10 minutes; and cannot bend, squat, grip and grasp due to pain. The Claimant's treating physician's restrictions are less limited noting the Claimant's condition as stable. If the impairment or combination of impairments does not limit physical or mental ability to do basic work activities, it is not a severe impairment(s) and disability does not

exist. 20 CFR 416.920 In consideration of the Claimant's testimony, medical records, and current limitations, it is found that the Claimant is not able to return to past relevant work as a general laborer therefore the fifth-step in the sequential evaluation process is required.

In Step 5, an assessment of the individual's residual functional capacity and age, education, and work experience is considered to determine whether an adjustment to other work can be made. 20 CFR 416.920(4)(v) At the time of hearing, the Claimant was 52 years old thus considered to be closely approaching advanced age for MA-P purposes. The Claimant is a high school graduate with some college with an employment history of unskilled work. Disability is found disabled if an individual is unable to adjust to other work. *Id.* At this point in the analysis, the burden shifts from the Claimant to the Department to present proof that the Claimant has the residual capacity to substantial gainful employment. 20 CFR 416.960(2); *Richardson v Sec of Health and Human Services*, 735 F2d 962, 964 (CA 6, 1984). While a vocational expert is not required, a finding supported by substantial evidence that the individual has the vocational qualifications to perform specific jobs is needed to meet the burden. *O'Banner v Sec of Health and Human Services*, 587 F2d 321, 323 (CA 6, 1978). Medical-Vocational guidelines found at 20 CFR Subpart P, Appendix II, may be used to satisfy the burden of proving that the individual can perform specific jobs in the national economy. *Heckler v Campbell*, 461 US 458, 467 (1983); *Kirk v Secretary*, 667 F2d 524, 529 (CA 6, 1981) *cert den* 461 US 957 (1983).

Individuals approaching advanced age (age 50-54) may be significantly limited in vocational adaptability if they are restricted to sedentary work. When such individuals have no past work experience or can no longer perform vocationally relevant past work and have no transferable skills, a finding of disabled ordinarily obtains.

In the record presented, the Claimant's residual functional capacity for work activities on a regular and continuing basis does include the ability to meet at least the physical and mental demands required to perform sedentary work. As noted above, Sedentary work involves lifting of no more than 10 pounds at a time and occasionally lifting or carrying articles like docket files, ledgers, and small tools. 20 CFR 416.967(a) Although a sedentary job is defined as one which involves sitting, a certain amount of walking and standing is often necessary in carrying out job duties. *Id.* Jobs are sedentary if walking and standing are required occasionally and other sedentary criteria are met. The Claimant, a high school graduate with some college, is approaching advanced age with an employment history of unskilled work. After review of the entire record and using the Medical-Vocational Guidelines [20 CFR 404, Subpart P, Appendix II) as a guide, specifically Rule 201.12, it is found that the Claimant is disabled for purposes of the MA-P program at Step 5.

The State Disability Assistance ("SDA") program, which provides financial assistance for disabled persons, was established by 2004 PA 344. DHS administers the SDA program pursuant to MCL 400.10 *et seq.* and Michigan Administrative Code ("MAC R") 400.3151 – 400.3180. Department policies are found in PAM, PEM, and PRM. A person is considered disabled for SDA purposes if the person has a physical or mental impairment which meets federal SSI disability standards for at least ninety days. Receipt of SSI or RSDI benefits based on disability or blindness, or the receipt of MA benefits based on disability or blindness (MA-P) automatically qualifies an individual as disabled for purposes of the SDA program.

In this case, the Claimant is found disabled for purposes of the Medical Assistance ("MA-P") program, therefore the Claimant's is found disabled for purposes of continued SDA benefits.

DECISION AND ORDER

The Administrative Law Judge, based upon the findings of fact and conclusions of law, finds the Claimant disabled for purposes of continued Medical Assistance program and the State Disability Assistance program.

It is ORDERED:

1. The Department's determination is REVERSED.
2. The Department shall initiate review of the September 8, 2008 application to determine if all other non-medical criteria are met and inform the Claimant of the determination.
3. The Department shall supplement the Claimant any lost benefits he was entitled to receive if otherwise eligible and qualified in accordance with department policy.
4. The Department shall review the Claimant's continued eligibility in April of 2010 in accordance with department policy.

/s/
Colleen M. Mamelka
Administrative Law Judge
For Ishmael Ahmed, Director
Department of Human Services

Date Signed: 04/06/09

Date Mailed: 04/07/09

NOTICE: Administrative Hearings may order a rehearing or reconsideration on either its own motion or at the request of a party within 30 days of the mailing date of this Decision and Order. Administrative hearings will not order a rehearing or reconsideration on the Department's motion where the final decision cannot be implemented within 90 days of the filing of the original request.

The Claimant may appeal the Decision and Order to the Circuit within 30 days of the receipt of the Decision and Order or, if a timely request for rehearing was made, within 30 days of the receipt date of the rehearing decision.
