

STATE OF MICHIGAN
STATE OFFICE OF ADMINISTRATIVE HEARINGS AND RULES

ADMINISTRATIVE HEARINGS FOR THE
DEPARTMENT OF HUMAN SERVICES

IN THE MATTER OF: [REDACTED],
Claimant

Reg. No.: 2009-14956
Issue No.: 2009
Case No.: [REDACTED]
Load No.: [REDACTED]
Hearing Date:
June 8, 2009
Wayne County DHS (15)

ADMINISTRATIVE LAW JUDGE: Michael J. Bennane

HEARING DECISION

This matter is before the undersigned Administrative Law Judge pursuant to MCL 400.9; MSA 16409 and MCL 40037; MSA 16.437 upon the Claimants request for a hearing. After due notice, a telephone hearing was held on June 8, 2009. The Claimant personally appeared and testified.

ISSUE

Whether the Department properly determined that the Claimant was not disabled for purposes of Medical Assistance (MA-P)?

FINDINGS OF FACT

The Administrative Law Judge, based on the competent, material and substantial evidence on the whole record, finds as material fact:

1. On August 21, 2008, the Claimant submitted an application seeking MA-P and Retro MA-P.
2. On January 16, 2009, MRT denied the Claimant's MA-P based upon a lack of disability as defined in those programs.

3. On December 12, 2006, the Department sent the Claimant an eligibility notice informing the Claimant that his MA-P benefits were denied.
4. On January 26, 2009, the department sent the claimant an eligibility notice denying her MA application. (Department exhibit 35).
5. On February 2, 2009, the Claimant submitted a request for a hearing.
6. On March 27, 2009, the State Hearing Review Team (SHRT) determined the Claimant was not disabled based upon based upon the claimant's ability to perform past work as a respiratory technician.
7. The Claimant's alleged physical disabling impairments are due to back pain with four (4) herniated discs.
8. The Claimant's impairment(s) have lasted or are expected to last, for a period of more than 12 months.
9. At the time of hearing, the Claimant was 57 years old with a [REDACTED] birth date; was 4' 11" and weighed 172 pounds.
10. The Claimant completed fourteen (14) years of schooling/training and has completed schooling as a nursing assistant and a respiratory technician.

CONCLUSIONS OF LAW

The Medical Assistance ("MA") program is established by Subchapter XIX of Chapter 7 of The Public Health & Welfare Act, 42 USC 1397, and is administered by the Department of Human Services ("DHS"), formally known as the Family Independence Agency, pursuant to MCL 400.10 *et seq* and MCL 400.105. Department policies are found in the Program Administrative Manual ("PAM"), the Program Eligibility Manual ("PEM"), and the Program Reference Manual ("PRM").

Disability is defined as the inability to do any substantial gainful activity by reason of any medically determinable physical or mental impairment which can be expected to result in death or which has lasted or can be expected to last for a continuous period of not less than 12 months. 20 CFR 416.905(a) The person claiming a physical or mental disability has the burden to establish it through the use of competent medical evidence from qualified medical sources such as his or her medical history, clinical/laboratory findings, diagnosis/prescribed treatment, prognosis for recovery and/or medical assessment of ability to do work-related activities or ability to reason and make appropriate mental adjustments, if a mental disability is alleged. 20 CFR 413.913 An individual's subjective pain complaints are not, in and of themselves, sufficient to establish disability. 20 CFR 416.908; 20 CFR 416.929(a) Similarly, conclusory statements by a physician or mental health professional that an individual is disabled or blind, absent supporting medical evidence, is insufficient to establish disability. 20 CFR 416.929(a)

When determining disability, the federal regulations require several factors to be considered including: (1) the location/duration/frequency/intensity of an applicant's pain; (2) the type/dosage/effectiveness/side effects of any medication the applicant takes to relieve pain; (3) any treatment other than pain medication that the applicant has received to relieve pain; and (4) the effect of the applicant's pain on his or her ability to do basic work activities. 20 CFR 416.929(c)(3) The applicant's pain must be assessed to determine the extent of his or her functional limitation(s) in light of the objective medical evidence presented. 20 CFR 416.929(c)(2)

In order to determine whether or not an individual is disabled, federal regulations require a five-step sequential evaluation process be utilized. 20 CFR 416.920(a)(1) The five-step analysis requires the trier of fact to consider an individual's current work activity; the severity of

the impairment(s) both in duration and whether it meets or equals a listed impairment in Appendix 1; residual functional capacity to determine whether an individual can perform past relevant work; and residual functional capacity along with vocational factors (i.e. age, education, and work experience) to determine if an individual can adjust to other work. 20 CFR 416.920(a)(4); 20 CFR 416.945

If an individual is found disabled, or not disabled, at any step, a determination or decision is made with no need evaluate subsequent steps. 20 CFR 416.920(a)(4) If a determination cannot be made that an individual is disabled, or not disabled, at a particular step, the next step is required. 20 CFR 416.920(a)(4) If an impairment does not meet or equal a listed impairment, an individual's residual functional capacity is assessed before moving from step three to step four. 20 CFR 416.920(a)(4); 20 CFR 416.945 Residual functional capacity is the most an individual can do despite the limitations based on all relevant evidence. 20 CFR 945(a)(1) An individual's residual functional capacity assessment is evaluated at both steps four and five. 20 CFR 416.920(a)(4) In determining disability, an individual's functional capacity to perform basic work activities is evaluated and if found that the individual has the ability to perform basic work activities without significant limitation, disability will not be found. 20 CFR 416.994(b)(1)(iv)

As outlined above, the first step looks at the individual's current work activity. An individual is not disabled regardless of the medical condition, age, education, and work experience, if the individual is working and the work is a substantial, gainful activity. 20 CFR 416.920(a)(4)(i) In the record presented, the Claimant is not involved in substantial gainful activity and last worked in approximately 2007. The Claimant is not ineligible for disability under Step 1.

The severity of the Claimant's alleged impairment(s) is considered under Step 2. In order to be considered disabled for MA purposes, the impairment must be severe. 20 CFR 916.920(a)(4)(ii); 20 CFR 916.920(b) An impairment, or combination of impairments, is severe if it significantly limits an individual's physical or mental ability to do basic work activities regardless of age, education and work experience. 20 CFR 916.920(a)(4)(ii); 20 CFR 916.920(c) Basic work activities means the abilities and aptitudes necessary to do most jobs. 20 CFR 916.921(b) Examples include:

1. Physical functions such as walking, standing, sitting, lifting, pushing, pulling, reaching, carrying, or handling;
2. Capacities for seeing, hearing, and speaking;
3. Understanding, carrying out, and remembering simple instructions;
4. Use of judgment;
5. Responding appropriately to supervision, co-workers and usual work situations; and
6. Dealing with changes in a routine work setting.

Id. The second step allows for dismissal of a disability claim obviously lacking in medical merit. *Higgs v Bowen*, 880 F2d 860, 862 (CA 6, 1988). The severity requirement may still be employed as an administrative convenience to screen out claims that are totally groundless solely from a medical standpoint. *Id.* at 863 citing *Farris v Sec of Health and Human Services*, 773 F2d 85, 90 n.1 (CA 6, 1985) An impairment qualifies as severe only if, regardless of a claimant's age, education, or work experience, the impairment would not affect the claimant's ability to work. *Salmi v Sec of Health and Human Services*, 774 F2d 685, 692 (CA 6, 1985)

On [REDACTED], the Claimant was injured on the job while attempting to restrain a patient. The claimant was not hospitalized but faithfully partook in rehabilitation activities while paid for by workmen's compensation.

On [REDACTED], a Medical Examination Report on the Claimant's condition documents the Claimant's inability to lift weights less than 10 lbs and to perform simple grasping, reaching, pushing/pulling, or fine manipulating. This report also documents the claimant's prescription for Vicodin, which the claimant reports she still takes. The claimant was also found to be limited in her ability to stand more than two (2) hours a day or walk more than a block.

In this case, the Claimant has presented medical evidence establishing that she does have physical limitations affecting her ability to perform basic work activities such as standing, walking, sitting, lifting, carrying, pushing and pulling.

Ultimately, the medical evidence has established that the Claimant has an impairment, or combination thereof, that has more than a *de minimis* effect on the Claimant's basic work activities. Therefore, the Claimant is not disqualified from receipt of MA-P benefits under Step 2.

In the third step of the sequential analysis of a disability claim, the trier of fact must determine if the Claimant's impairment, or combination of impairments, is listed in Appendix 1 of Subpart P of 20 CFR, Part 404. The Claimant has alleged physical disabling impairments due in part, to lumbar and cervical disc disease and a pinched nerve. Appendix I, Listing of Impairments discusses the analysis and criteria necessary to support a finding of a listed impairment.

Listing 1.00 defines musculoskeletal system impairments. Disorders of the musculoskeletal system may result from hereditary, congenital, or acquired pathologic processes.

1.00A Impairments may result from infectious, inflammatory, or degenerative processes, traumatic or developmental events, or neoplastic, vascular, or toxic/metabolic diseases. 1.00A Regardless of the cause(s) of a musculoskeletal impairment, functional loss for purposes of these listings is defined as the inability to ambulate effectively on a sustained basis for any reason, including pain associated with the underlying musculoskeletal impairment, or the inability to perform fine and gross movements effectively on a sustained basis for any reason, including pain associated with the underlying musculoskeletal impairment. Inability to ambulate effectively means an extreme limitation of the ability to walk; i.e., an impairment(s) that interferes very seriously with the individual's ability to independently initiate, sustain, or complete activities.

1.00B2b(1) Ineffective ambulation is defined generally as having insufficient lower extremity function to permit independent ambulation without the use of a hand-held assistive device(s) that limits the functioning of both upper extremities. (Listing 1.05C is an exception to this general definition because the individual has the use of only one upper extremity due to amputation of a hand.) *Id.* To ambulate effectively, individuals must be capable of sustaining a reasonable walking pace over a sufficient distance to be able to carry out activities of daily living.

1.00B2b(2) They must have the ability to travel without companion assistance to and from a place of employment or school. . . . *Id.*

Categories of Musculoskeletal include:

- 1.02 Major dysfunction of a joint(s) due to any cause: Characterized by gross anatomical deformity (e.g. subluxation, contracture, bony or fibrous ankylosis, instability) and chronic joint pain and stiffness with signs of limitation of motion or other abnormal motion of the affected joint(s), and findings on appropriate medically

acceptable imaging of joint space narrowing, bony destruction, or ankylosis of the affected joint(s). With:

- A. Involvement of one major peripheral weight-bearing joint (i.e., hip, knee, or ankle), resulting in inability to ambulate effectively as defined in 1.00B2b; or
- B. Involvement of one major peripheral joint in each upper extremity (i.e., shoulder, elbow, wrist, hand), resulting in inability to perform fine and gross movements effectively a defined in 1.00B2c

- 1.03 Reconstructive surgery or surgical arthrodesis of a major weight-bearing joint, with inability to ambulate effectively, as defined in 1.00B2b, and return to effective ambulation did not occur, or is not expected to occur, within 12 months of onset.

The Claimant asserts physical disabling impairments due to left hip, lower back, thigh and right shoulder pain. The medical evidence does establish that the Claimant is unable to ambulate effectively. Further, submitted DHS-49s places limitations on the Claimant's ability to perform repetitive actions with either arm/hand. The objective medical records do not support a finding of disabled under this Listing.

The fourth step in analyzing a disability claim requires an assessment of the Claimant's residual functional capacity ("RFC") and past relevant employment. 20 CFR 416.920(a)(4)(iv) An individual is not disabled if he/she can perform past relevant work. *Id.*; 20 CFR 416.960(b)(3) Past relevant work is work that has been performed within the past 15 years that was a substantial gainful activity and that lasted long enough for the individual to learn the position. 20 CFR 416.960(b)(1) Vocational factors of age, education, and work experience, and whether the past relevant employment exists in significant numbers in the national economy is not considered. 20 CFR 416.960(b)(3) RFC is assessed based on impairment(s), and any related symptoms, such as pain, which may cause physical and mental limitations that affect what can be done in a work setting. RFC is the most that can be done, despite the limitations.

To determine the physical demands (exertional requirements) of work in the national economy, jobs are classified as sedentary, light, medium, heavy, and very heavy. 20 CFR 416.967. Sedentary work involves lifting of no more than 10 pounds at a time and occasionally lifting or carrying articles like docket files, ledgers, and small tools. 20 CFR 416.967(a). Although a sedentary job is defined as one which involves sitting, a certain amount of walking and standing is often necessary in carrying out job duties. *Id.* Jobs are sedentary if walking and standing are required occasionally and other sedentary criteria are met. Light work involves lifting no more than 20 pounds at a time with frequent lifting or carrying objects weighing up to 10 pounds. 20 CFR 416.967(b) Even though weight lifted may be very little, a job is in this category when it requires a good deal of walking or standing, or when it involves sitting most of the time with some pushing and pulling of arm or leg controls. *Id.* To be considered capable of performing a full or wide range of light work, an individual must have the ability to do substantially all of these activities. *Id.* An individual capable of light work is also capable of sedentary work, unless there are additionally limiting factors such as loss of fine dexterity or inability to sit for long periods of time. *Id.* Medium work involves lifting no more than 50 pounds at a time with frequent lifting or carrying of objects weighing up to 25 pounds. 20 CFR 416.967(c) An individual capable of performing medium work is also capable of light and sedentary work. *Id.* Heavy work involves lifting no more than 100 pounds at a time with frequent lifting or carrying of objects weighing up to 50 pounds. 20 CFR 416.967(d) An individual capable of heavy work is also capable of medium, light, and sedentary work. *Id.* Finally, very heavy work involves lifting objects weighing more than 100 pounds at a time with frequent lifting or carrying objects weighing 50 pounds or more. 20 CFR 416.967(e) An individual capable of very heavy work is able to perform work under all categories. *Id.*

Over the past 15 years, the Claimant worked as a nursing assistant and as a repertory technician whose responsibilities included fine and gross movements. Given these facts, the Claimant's past employment as a nursing assistant is considered skilled, heavy work while her past employment as a repertory technician would be considered skilled work.

In consideration of the Claimant's testimony, medical records, and current limitations, it is found that the Claimant is not able to return to past relevant work as a nursing assistant or a repertory technician, the fifth-step in the sequential evaluation process is required.

In Step 5, an assessment of the individual's residual functional capacity and age, education, and work experience is considered to determine whether an adjustment to other work can be made. 20 CFR 416.920(4)(v) At the time of hearing, the Claimant was 57 years old thus considered a person of advanced age for MA-P purposes.

Disability is found disabled if an individual is unable to adjust to other work. *Id.* At this point in the analysis, the burden shifts from the Claimant to the Department to present proof that the Claimant has the residual capacity to substantial gainful employment. 20 CFR 416.960(2); *Richardson v Sec of Health and Human Services*, 735 F2d 962, 964 (CA 6, 1984). While a vocational expert is not required, a finding supported by substantial evidence that the individual has the vocational qualifications to perform specific jobs is needed to meet the burden. *O'Banner v Sec of Health and Human Services*, 587 F2d 321, 323 (CA 6, 1978). Medical-Vocational guidelines found at 20 CFR Subpart P, Appendix II, may be used to satisfy the burden of proving that the individual can perform specific jobs in the national economy. *Heckler v Campbell*, 461 US 458, 467 (1983); *Kirk v Secretary*, 667 F2d 524, 529 (CA 6, 1981) *cert den* 461 US 957 (1983). Where an individual has an impairment or combination of impairments that results in both strength limitations and non-exertional limitations, the rules in Subpart P are

considered in determining whether a finding of disabled may be possible based on the strength limitations alone, and if not, the rule(s) reflecting the individual's maximum residual strength capabilities, age, education, and work experience, provide the framework for consideration of how much an individual's work capability is further diminished in terms of any type of jobs that would contradict the nonexertional limitations. Full consideration must be given to all relevant facts of a case in accordance with the definitions of each factor to provide adjudicative weight for each factor. For individuals over the age of 55, age is a less advantageous factor for making an adjustment to other work.

In the record presented, the Claimant's residual functional capacity for work activities on a regular and continuing basis does include the ability to meet at least the physical and mental demands required to perform sedentary work. As noted above, sedentary work involves sitting and lifting no more than 10 pounds at time with occasional walking and standing to carry out the job duties. The Claimant is an individual of advanced age. After review of the entire record finding no contradiction in the Claimant's nonexertional limitations, and using the Medical-Vocational Guidelines [20 CFR 404, Subpart P, Appendix II) as a guide, specifically Rule 201.06, it is found that the Claimant is disabled for purposes of the MA-P program.

DECISION AND ORDER

The Administrative Law Judge, based upon the above finds of facts and conclusions of law, finds the Claimant disabled for purposes of the Medical Assistance program and the State Disability Assistance program as of May 21, 2008. Therefore, the department is to review the application of August 21, 2008, if not done previously, to determine claimant's non-medical eligibility.
