

STATE OF MICHIGAN
STATE OFFICE OF ADMINISTRATIVE HEARINGS AND RULES
ADMINISTRATIVE HEARINGS FOR THE
DEPARTMENT OF HUMAN SERVICES

IN THE MATTER OF:

Reg No. 200922178
Issue No. 2009; 4031
Case No. [REDACTED]
Load No. [REDACTED]
Hearing Date: July 8, 2009
Berrien County DHS

ADMINISTRATIVE LAW JUDGE: Carmen G. Fahie

HEARING DECISION

This matter is before the undersigned Administrative Law Judge pursuant to MCL 400.9 and MCL 400.37 upon the claimant's request for a hearing. After due notice, a telephone hearing was held on Wednesday, July 8, 2009. The claimant personally appeared and testified on his own behalf.

ISSUE

Did the department properly deny the claimant's application for Medical Assistance (MA-P), retroactive Medical Assistance, and State Disability Assistance (SDA)?

FINDINGS OF FACT

The Administrative Law Judge, based upon the competent, material, and substantial evidence on the whole record, finds a material fact:

1. On November 13, 2008, the claimant applied for MA-P and SDA with retroactive MA-P to August 2008.
2. On January 23, 2009, the Medical Review Team (MRT) denied the claimant's application for MA-P and retroactive MA-P stating that the claimant was capable of performing other work under Medical Vocational Grid Rule 201.21 per 20 CFR 416.920(f) and SDA that the claimant's physical and mental impairment does not prevent employment for 90 days or more.
3. On January 27, 2009, the department caseworker sent the claimant a notice that his application was denied.

4. On March 26, 2009, the department received a hearing request from the claimant, contesting the department's negative action.
5. On May 27, 2009, the State Hearing Review Team (SHRT) considered the submitted objective medical evidence in making its determination of MA-P, retroactive MA-P, and SDA eligibility for the claimant. The SHRT report reads in part:

The claimant is alleging disability due to asthma, left ankle and low back problems. He is 49 years old with 13 years of education and a semi-skilled/unskilled work history. The claimant did not meet applicable Social Security Listings 3.01 and 1.01. The claimant is capable of performing other work that is light work per 20 CFR 416.967(b) and unskilled work per 20 CFR 416.968(a) under Vocational Rule 202.20. This may be consistent with past relevant work. However, there is no detailed description of past work to determine this. In lieu of denying benefits as capable of performing past work, a denial to other work will be given.

6. During the hearing on July 8, 2009, the claimant requested permission to submit additional medical information that needed to be reviewed by SHRT. Additional medical information was received from the local office on October 28, 2009 and forwarded to SHRT for review on November 13, 2009.
7. On November 18, 2009, the SHRT considered the newly submitted objective medical evidence in making its determination of MA-P, retroactive MA-P, and SDA. The SHRT report reads in part:

The claimant is alleging disability due to asthma, degenerative arthritis of the left ankle, and low back problems. He is 49 years old and has a high school equivalent education with a history of semi-skilled/unskilled work. The claimant did not meet applicable Social Security Listings found in CFR 404, Subpart F. The claimant is capable of performing other work that is light work per 20 CFR 416.967(b) and unskilled work per 20 CFR 416.968(a) under Vocational Rule 202.20.

8. The claimant is a 50 year-old man whose date of birth is [REDACTED]. The claimant is 6' 1" tall and weighs 280 pounds. The claimant has lost 20 pounds in the past year riding a bike. The claimant has a GED and one year of college. The claimant can read or write and do basic math. The claimant was last employed as a cab driver in 2004.
9. The claimant's alleged impairments are asthma, low back problems, and left ankle shattered.

CONCLUSIONS OF LAW

The State Disability Assistance (SDA) program which provides financial assistance for disabled persons is established by 2004 PA 344. The Department of Human Services (DHS or department) administers the SDA program pursuant to MCL 400.10, *et seq.*, and MAC R 400.3151-400.3180. Department policies are found in the Program Administrative Manual (PAM), the Program Eligibility Manual (PEM) and the Program Reference Manual (PRM).

The Medical Assistance (MA) program is established by the Title XIX of the Social Security Act and is implemented by Title 42 of the Code of Federal Regulations (CFR). The Department of Human Services (formerly known as the Family Independence Agency) administers the MA program pursuant to MCL 400.10, *et seq.*, and MCL 400.105. Department policies are found in the Program Administrative Manual (PAM), the Program Eligibility Manual (PEM) and the Program Reference Manual (PRM).

"Disability" is:

...the inability to do any substantial gainful activity by reason of any medically determinable physical or mental impairment which can be expected to result in death or which has lasted or can be expected to last for a continuous period of not less than 12 months.... 20 CFR 416.905.

...We follow a set order to determine whether you are disabled. We review any current work activity, the severity of your impairment(s), your residual functional capacity, your past work, and your age, education and work experience. If we can find that you are disabled or not disabled at any point in the review, we do not review your claim further.... 20 CFR 416.920.

...If you are working and the work you are doing is substantial gainful activity, we will find that you are not disabled regardless of your medical condition or your age, education, and work experience. 20 CFR 416.920(b).

...[The impairment]...must have lasted or must be expected to last for a continuous period of at least 12 months. We call this the duration requirement. 20 CFR 416.909.

...If you do not have any impairment or combination of impairments which significantly limits your physical or mental ability to do basic work activities, we will find that you do not have a severe impairment and are, therefore, not disabled.

We will not consider your age, education, and work experience. 20 CFR 416.920(c).

[In reviewing your impairment]...We need reports about your impairments from acceptable medical sources.... 20 CFR 416.913(a).

...Statements about your pain or other symptoms will not alone establish that you are disabled; there must be medical signs and laboratory findings which show that you have a medical impairment.... 20 CFR 416.929(a).

...You must provide medical evidence showing that you have an impairment(s) and how severe it is during the time you say that you are disabled. 20 CFR 416.912(c).

... [The record must show a severe impairment] which significantly limits your physical or mental ability to do basic work activities.... 20 CFR 416.920(c).

...Medical reports should include --

- (1) Medical history.
- (2) Clinical findings (such as the results of physical or mental status examinations);
- (3) Laboratory findings (such as blood pressure, X-rays);
- (4) Diagnosis (statement of disease or injury based on its signs and symptoms).... 20 CFR 416.913(b).

...The medical evidence...must be complete and detailed enough to allow us to make a determination about whether you are disabled or blind. 20 CFR 416.913(d).

Medical findings consist of symptoms, signs, and laboratory findings:

- (a) **Symptoms** are your own description of your physical or mental impairment. Your statements alone are not enough to establish that there is a physical or mental impairment.
- (b) **Signs** are anatomical, physiological, or psychological abnormalities which can be observed, apart from your statements (symptoms). Signs must be shown by medically acceptable clinical diagnostic techniques. Psychiatric signs are medically demonstrable phenomena which indicate specific psychological abnormalities e.g., abnormalities of behavior, mood, thought, memory, orientation, development, or perception. They must also be shown by observable facts that can be medically described and evaluated.
- (c) **Laboratory findings** are anatomical, physiological, or psychological phenomena which can be shown by the use of medically acceptable laboratory diagnostic techniques. Some of these diagnostic techniques include chemical tests, electrophysiological studies (electrocardiogram, electroencephalogram, etc.), roentgenological studies (X-rays), and psychological tests. 20 CFR 416.928.

It must allow us to determine --

- (1) The nature and limiting effects of your impairment(s) for any period in question;
- (2) The probable duration of your impairment; and
- (3) Your residual functional capacity to do work-related physical and mental activities. 20 CFR 416.913(d).

Information from other sources may also help us to understand how your impairment(s) affects your ability to work. 20 CFR 416.913(e).

...You can only be found disabled if you are unable to do any substantial gainful activity by reason of any medically determinable physical or mental impairment which can be expected to result in death, or which has lasted or can be expected to last for a continuous period of not less than 12 months. See 20 CFR 416.905. Your impairment must result from anatomical, physiological, or psychological

abnormalities which are demonstrable by medically acceptable clinical and laboratory diagnostic techniques.... 20 CFR 416.927(a)(1).

...Evidence that you submit or that we obtain may contain medical opinions. Medical opinions are statements from physicians and psychologists or other acceptable medical sources that reflect judgments about the nature and severity of your impairment(s), including your symptoms, diagnosis and prognosis, what you can still do despite impairment(s), and your physical or mental restrictions. 20 CFR 416.927(a)(2).

...In deciding whether you are disabled, we will always consider the medical opinions in your case record together with the rest of the relevant evidence we receive. 20 CFR 416.927(b).

After we review all of the evidence relevant to your claim, including medical opinions, we make findings about what the evidence shows. 20 CFR 416.927(c).

...If all of the evidence we receive, including all medical opinion(s), is consistent, and there is sufficient evidence for us to decide whether you are disabled, we will make our determination or decision based on that evidence. 20 CFR 416.927(c)(1).

...If any of the evidence in your case record, including any medical opinion(s), is inconsistent with other evidence or is internally inconsistent, we will weigh all of the evidence and see whether we can decide whether you are disabled based on the evidence we have. 20 CFR 416.927(c)(2).

[As Judge]...We are responsible for making the determination or decision about whether you meet the statutory definition of disability. In so doing, we review all of the medical findings and other evidence that support a medical source's statement that you are disabled.... 20 CFR 416.927(e).

...A statement by a medical source that you are "disabled" or "unable to work" does not mean that we will determine that you are disabled. 20 CFR 416.927(e).

...If you have an impairment(s) which meets the duration requirement and is listed in Appendix 1 or is equal to a listed impairment(s), we will find you disabled without considering your age, education, and work experience. 20 CFR 416.920(d).

...If we cannot make a decision on your current work activities or medical facts alone and you have a severe impairment, we will then review your residual functional capacity and the physical and mental demands of the work you have done in the past. If you can still do this kind of work, we will find that you are not disabled. 20 CFR 416.920(e).

If you cannot do any work you have done in the past because you have a severe impairment(s), we will consider your residual functional capacity and your age, education, and past work experience to see if you can do other work. If you cannot, we will find you disabled. 20 CFR 416.920(f)(1).

...Your residual functional capacity is what you can still do despite limitations. If you have more than one impairment, we will consider all of your impairment(s) of which we are aware. We will consider your ability to meet certain demands of jobs, such as physical demands, mental demands, sensory requirements, and other functions, as described in paragraphs (b), (c) and (d) of this section. Residual functional capacity is an assessment based on all of the relevant evidence.... 20 CFR 416.945(a).

...This assessment of your remaining capacity for work is not a decision on whether you are disabled, but is used as the basis for determining the particular types of work you may be able to do despite your impairment(s).... 20 CFR 416.945(a).

...In determining whether you are disabled, we will consider all of your symptoms, including pain, and the extent to which your symptoms can reasonably be accepted as consistent with objective medical evidence, and other evidence.... 20 CFR 416.929(a).

...In evaluating the intensity and persistence of your symptoms, including pain, we will consider all of the available evidence, including your medical history, the medical signs and laboratory findings and statements about

how your symptoms affect you... We will then determine the extent to which your alleged functional limitations or restrictions due to pain or other symptoms can reasonably be accepted as consistent with the medical signs and laboratory findings and other evidence to decide how your symptoms affect your ability to work.... 20 CFR 416.929(a).

If you have more than one impairment, we will consider all of your impairments of which we are aware. We will consider your ability to meet certain demands of jobs, such as physical demands, mental demands, sensory requirements, and other functions as described in paragraphs (b), (c) and (d) of this section. Residual functional capacity is an assessment based upon all of the relevant evidence. This assessment of your capacity for work is not a decision on whether you are disabled but is used as a basis for determining the particular types of work you may be able to do despite your impairment. 20 CFR 416.945.

...When we assess your physical abilities, we first assess the nature and extent of your physical limitations and then determine your residual functional capacity for work activity on a regular and continuing basis. A limited ability to perform certain physical demands of work activity, such as sitting, standing, walking, lifting, carrying, pushing, pulling, or other physical functions (including manipulative or postural functions, such as reaching, handling, stooping or crouching), may reduce your ability to do past work and other work. 20 CFR 416.945(b).

Federal regulations require that the department use the same operative definition for “disabled” as used for Supplemental Security Income (SSI) under Title XVI of the Social Security Act. 42 CFR 435.540(a).

“Disability” is:

...the inability to do any substantial gainful activity by reason of any medically determinable physical or mental impairment which can be expected to result in death or which has lasted or can be expected to last for a continuous period of not less than 12 months ... 20 CFR 416.905

In determining whether an individual is disabled, 20 CFR 416.920 requires the trier of fact to follow a sequential evaluation process by which current work activity, the severity of the impairment(s), residual functional capacity, and vocational factors (i.e., age, education, and work experience) are assessed in that order. When a determination

that an individual is or is not disabled can be made at any step in the sequential evaluation, evaluation under a subsequent step is not necessary.

First, the trier of fact must determine if the individual is working and if the work is substantial gainful activity. 20 CFR 416.920(b). At Step 1, the claimant is not engaged in substantial gainful activity and has not worked since 2004. Therefore, the claimant is not disqualified from receiving disability at Step 1.

Secondly, in order to be considered disabled for purposes of MA, a person must have a severe impairment. 20 CFR 416.920(c). A severe impairment is an impairment which significantly limits an individual's physical or mental ability to perform basic work activities. Basic work activities means, the abilities and aptitudes necessary to do most jobs. Examples of these include:

- (1) Physical functions such as walking, standing, sitting, lifting, pushing, pulling, reaching, carrying or handling;
- (2) Capacities for seeing, hearing, and speaking;
- (3) Understanding, carrying out, and remembering simple instructions;
- (4) Use of judgment;
- (5) Responding appropriately to supervision, co-workers and usual work situations; and
- (6) Dealing with changes in a routine work setting. 20 CFR 416.921(b).

The purpose of the second step in the sequential evaluation process is to screen out claims lacking in medical merit. *Higgs v. Bowen* 880 F2d 860, 862 (6th Cir, 1988). As a result, the department may only screen out claims at this level which are "totally groundless" solely from a medical standpoint. The *Higgs* court used the severity requirement as a "*de minimus* hurdle" in the disability determination. The *de minimus* standard is a provision of a law that allows the court to disregard trifling matters.

The objective medical evidence on the record further substantiates the following:

On [REDACTED], the claimant had an independent consultative physical exam with [REDACTED]. The independent medical consultant's conclusions were that the claimant had a history of left ankle injury, low back pain, and a supposed left hip fracture in [REDACTED] that went untreated. During the exam, the claimant had decreased dorsi-flexion and plantar flexion of the left ankle only. The remainder of the examination was unremarkable. As stated above, the claimant is able to pedal his bicycle for 20 miles a day for exercise. The claimant had a normal physical examination

except he was morbidly obese at 6'1" tall and 250 pounds. The claimant's gait was normal and he does not use an assistive device for ambulation. The claimant's AP diameter was grossly normal with lungs being clear to auscultation without any adventitious sounds. There was no tenderness, erythema, or effusion of any joint. Straight leg raising was negative with no paravertebral muscle spasm. Peripheral pulses were easily palpated and symmetrical with no edema. Grip strength was intact and the claimant's hands had full dexterity. The claimant had no difficulty getting on and off the examination table. The claimant was able to bend over and touch the floor with both hands without difficulty. The claimant's motor strength was 5/5. Sensation remains intact. Reflexes were present and symmetrical. Cranial nerves II through XII were grossly intact. The claimant was alert and oriented x3. Department Exhibit F-H.

On [REDACTED], the claimant underwent an independent medical psychiatrist evaluation at [REDACTED]. The independent medical licensed psychologist's diagnosis was no Axis I diagnosis, but Axis II personal disorder NOS. The claimant was given a GAF of 53 which showed moderate symptoms or moderate difficulty in social, occupational, or school functioning. His prognosis was guarded, but he was able to manage his own benefit funds. The claimant had adequate contact with reality during the interview with no evidence of psycho motor agitation or retardation. The claimant was pleasant and appeared relaxed. The claimant did not appear to be attempting to exaggerate or minimize his symptoms. The claimant was spontaneous and adequately organized. The claimant denied hallucinations, persecutions, obsessions, thoughts controlled by others, unusual powers, suicide ideation or attempt, sleep disturbance, and weight lose/gain. The claimant denied depression, anxiety, suspicion, anger, and fear. The claimant demonstrated appropriate affect throughout the interview. The claimant was oriented x3. The claimant is capable of understanding, remembering, and carrying out instructions and making decisions regarding work-related matters. However, he is likely to have marked difficulty interacting appropriately with others, succeeding in the workplace, and conforming to societal norms due to factors related to his personality disorder. In addition, he has chronic health problems which may compromise his ability to work. Department Exhibit I-O.

On [REDACTED], the claimant's treating physician submitted a Medical Examination Report, DHS-49, on behalf of the claimant. The claimant was first examined on [REDACTED] and last examined on [REDACTED]. The claimant had a history of impairment and chief complaint of left ankle multiple fractures with plates and screws placed, stiffness and pain everyday, low back pain secondary to injury over 6 years, low back spurs, and other impairments. The claimant's current diagnosis was COPD, asthma, hypertension, atypical chest pain, osteoarthritis in the neck and left ankle, left hip, bilateral knees, degenerative disc disease, obesity, and other impairments. The claimant had a normal physical examination except for the claimant's left ankle and hip. The claimant respiratorally had positive bilateral scattered wheezes and coarse breath sounds, upper bilateral. Musculoskeletally, the claimant had left-sided hip, left-sided ankle decreased range of motion and pain. The claimant's treating physician's clinical impression was the claimant was deteriorating with physical limitations that were expected to last more than 90 days. The claimant could stand and/or walk 2 hours in an

8-hour workday. He could use both hands/arms for repetitive actions and only the right foot/leg for operating foot/leg controls. The medical findings that support the above physical limitations are degenerative disc disease, sclerosis, osteophytes, bone spurs, left hip, with left ankle screws still in ankle. The claimant had no mental limitations. Claimant Exhibit P.

On July 9, 2009, the claimant underwent x-rays at [REDACTED]

- Lumbosacral spine. The radiologist's impression was diffuse spondylarthrosis most pronounced at the thoracolumbar junctions with facet joint degenerative changes at L5-S1. Department Exhibit R.
- Left hip. Normal x-ray of left hip. Department Exhibit S.

On January 11, 2002, the claimant underwent x-rays at [REDACTED] Center:

- Chest. Showed PA and lateral views demonstrate chronic lung changes of an interstitial nature. There were cardiovascular degenerative changes and the hila suggestive of pulmonary hypertension.
- Bilateral hips. AP and frogleg laterals show no abnormality.
- Left ankle. Demonstrates severe erosive arthritic change involving the tibiotalar articulation. There was a screw hole through the tibia and fibula that suggests trauma in the past and this is probably posttraumatic osteoarthritis.

On [REDACTED], the claimant's treating physician submitted a Medical Examination Report, DHS-49, on behalf of the claimant. The claimant was first examined on [REDACTED] and last examined on [REDACTED]. The claimant had muscular multiple complaints as cited in the previous Medical Examination Report. The claimant was positive for dental caries, decreased breath sounds bilaterally and scattered wheezing. The claimant was stable with limitations that were expected to last more than 90 days. The claimant could frequently lift up to 10 pounds, occasionally 25 pounds, but never 50 pounds or more. There were no assistive devices medically required or needed for ambulation. The claimant could use both hands/arms for repetitive action and the right foot/leg for operating foot/leg controls. The medical findings that support the above physical limitations were severe osteoarthritis of the left ankle and chronic low back pain. The claimant had no mental limitations. Department Exhibit 57-58.

At Step 2, the objective medical evidence in the record indicates that the claimant has established that he has a severe impairment. The claimant has had his left ankle shattered and repaired, but does have some range of motion issues. The claimant has osteoarthritis in his back and asthma. Therefore, the claimant is not disqualified from receiving disability at Step 2. However, this Administrative Law Judge will proceed

through the sequential evaluation process to determine disability because Step 2 is a *de minimus* standard.

In the third step of the sequential consideration of a disability claim, the trier of fact must determine if the claimant's impairment (or combination of impairments) is listed in Appendix 1 of Subpart P of 20 CFR, Part 404. This Administrative Law Judge finds that the claimant's medical record will not support a finding that claimant's impairment(s) is a "listed impairment" or equal to a listed impairment. See Appendix 1 of Subpart P of 20 CFR, Part 404, Part A. Accordingly, claimant cannot be found to be disabled based upon medical evidence alone. 20 CFR 416.920(d). This Administrative Law Judge finds that the claimant's impairments do not rise to the level necessary to be listed as disabling by law. Therefore, the claimant is disqualified from receiving disability at Step 3.

In the fourth step of the sequential consideration of a disability claim, the trier of fact must determine if the claimant's impairment(s) prevents claimant from doing past relevant work. 20 CFR 416.920(e). It is the finding of this Administrative Law Judge, based upon the medical evidence and objective, physical and psychological findings that the claimant has a driver's license, but does not drive because his car was towed. The claimant cooks once a day, but it takes longer and he sits on a stool. The claimant grocery shops once a week. The claimant cleans his own home with help. He does laundry, cooking, and cleaning. The claimant doesn't do any outside work or have any hobbies. The claimant felt that his condition has worsened in the past year because of his back and ankle pain where he has an increase in pain. The claimant stated he has no mental impairments.

The claimant stated he wakes up at 4:00 a.m. He goes to his friend's and helps with domestic stuff. He gets a ride back. He goes to bed between 9:00 and 10:00 p.m.

The claimant felt that he could walk 100 yards. The longest he felt he could stand was 5 minutes. The longest he felt he could sit was 2 hours. The heaviest weight he felt could carry was 25 pounds. The claimant stated he is right-handed. His level of pain on a scale from 1 to 10 without medication is a 7 and the claimant is currently taking no pain medication.

The claimant smokes a pack of cigarettes a day. He drinks alcohol once every 3 months, a beer or two. The claimant does not or has ever taken illegal or illicit drugs. The claimant stated that here was no work he felt he could do.

This Administrative Law Judge finds that the claimant has established that he cannot perform any of his prior work. Although he claimant could drive with his right foot because his left ankle has decreased range of motion. The claimant may not be able to get out of the car and help his customers with their luggage and anything else they may be carrying because of his ankle issues and low back problems. Therefore, the claimant is not disqualified from receiving disability at Step 4. However, the Administrative Law Judge will still proceed through the sequential evaluation process to determine whether

or not the claimant has the residual functional capacity to perform some other less strenuous tasks than in his prior jobs.

In the fifth step of the sequential consideration of a disability claim, the trier of fact must determine if the claimant's impairment(s) prevents claimant from doing other work. 20 CFR 416.920(f). This determination is based upon the claimant's:

- (1) residual functional capacity defined simply as "what can you still do despite your limitations?" 20 CFR 416.945;
- (2) age, education, and work experience, 20 CFR 416.963-.965; and
- (3) the kinds of work which exist in significant numbers in the national economy which the claimant could perform despite his/her limitations. 20 CFR 416.966.

...To determine the physical exertion requirements of work in the national economy, we classify jobs as sedentary, light, medium, heavy, and very heavy. These terms have the same meaning as they have in the Dictionary of Occupational Titles, published by the Department of Labor.... 20 CFR 416.967.

Sedentary work. Sedentary work involves lifting no more than 10 pounds at a time and occasionally lifting or carrying articles like docket files, ledgers, and small tools. Although a sedentary job is defined as one which involves sitting, a certain amount of walking and standing is often necessary in carrying out job duties. Jobs are sedentary if walking and standing are required occasionally and other sedentary criteria are met. 20 CFR 416.967(a).

Light work. Light work involves lifting no more than 20 pounds at a time with frequent lifting or carrying of objects weighing up to 10 pounds. Even though the weight lifted may be very little, a job is in this category when it requires a good deal of walking or standing, or when it involves sitting most of the time with some pushing and pulling of arm or leg controls.... 20 CFR 416.967(b).

...To be considered capable of performing a full or wide range of light work, you must have the ability to do substantially all of these activities. If someone can do light work, we determine that he or she can also do sedentary

work, unless there are additional limiting factors such as loss of fine dexterity or inability to sit for long periods of time. 20 CFR 416.967(b).

The objective medical evidence on the record is insufficient that the claimant lacks the residual functional capacity to perform some other less strenuous tasks than in his previous employment or that he is physically unable to do any tasks demanded of him. The claimant's testimony as to his limitation indicates his limitations are exertional and non-exertional.

For mental disorders, severity is assessed in terms of the functional limitations imposed by the impairment. Functional limitations are assessed using the criteria in paragraph (B) of the listings for mental disorders (descriptions of restrictions of activities of daily living, social functioning; concentration, persistence, or pace; and ability to tolerate increased mental demands associated with competitive work).... 20 CFR, Part 404, Subpart P, App. 1, 12.00(C).

In the instant case, the claimant stated that he does not have any mental limitations. The claimant underwent a psychiatric evaluation consultative exam on [REDACTED]. See MA analysis, Step 2. The claimant didn't have an Axis I diagnosis, but an Axis II diagnosis of personality disorder NOS with a GAF of 53. As a result, there is insufficient medical evidence of a mental impairment that is so severe that it would prevent the claimant from working at any job.

At Step 5, the claimant should be able to meet the physical requirements of light work, based upon the claimant's physical abilities. Under the Medical-Vocational guidelines, a closely approaching advance age individual with a high school equivalent education, and an unskilled work history, who is limited to light work, is not considered disabled. 20 CFR 404, Subpart P, Appendix 2, Rule 202.20. The Medical-Vocational guidelines are not strictly applied with non-exertional impairments such as personality disorder. 20 CFR 404, Subpart P, Appendix 2, Section 200.00. Using the Medical-Vocational guidelines as a framework for making this decision and after giving full consideration to the claimant's physical and mental impairments, the Administrative Law Judge finds that the claimant can still perform a wide range of light activities and that the claimant does not meet the definition of disabled under the MA program.

The department's Program Eligibility Manual provides the following policy statements and instructions for caseworkers regarding the SDA program.

DISABILITY – SDA

DEPARTMENT POLICY

SDA

To receive SDA, a person must be disabled, caring for a disabled person, or age 65 or older.

Note: There is no disability requirement for AMP. PEM 261, p. 1.

DISABILITY

A person is disabled for SDA purposes if he:

- . receives other specified disability-related benefits or services, or
- . resides in a qualified Special Living Arrangement facility, or
- . is certified as unable to work due to mental or physical disability for at least 90 days from the onset of the disability.
- . is diagnosed as having Acquired Immunodeficiency Syndrome (AIDS).

If the client's circumstances change so that the basis of his/her disability is no longer valid, determine if he/she meets any of the other disability criteria. Do NOT simply initiate case closure. PEM, Item 261, p. 1.

Other Benefits or Services

Persons receiving one of the following benefits or services meet the SDA disability criteria:

- . Retirement, Survivors and Disability Insurance (RSDI), due to disability or blindness.
- . Supplemental Security Income (SSI), due to disability or blindness.
- . Medicaid (including spend-down) as blind or disabled if the disability/blindness is based on:
 - .. a DE/MRT/SRT determination, or
 - .. a hearing decision, or
 - .. having SSI based on blindness or disability recently terminated (within the past 12 months) for financial reasons.

Medicaid received by former SSI recipients based on policies in PEM 150 under "**SSI TERMINATIONS,**" INCLUDING "**MA While Appealing Disability Termination,**" does not qualify a person as disabled for SDA. Such persons must be certified as disabled or meet one of the other SDA qualifying criteria. See "**Medical Certification of Disability**" below.

- . Michigan Rehabilitation Services (MRS). A person is receiving services if he has been determined eligible for MRS and has an active MRS case. Do not refer or advise applicants to apply for MRS for the purpose of qualifying for SDA.
- . Special education services from the local intermediate school district. To qualify, the person may be:
 - .. attending school under a special education plan approved by the local Individual Educational Planning Committee (IEPC); **or**
 - .. not attending under an IEPC approved plan but has been certified as a special education student **and** is attending a school program leading to a high school diploma or its equivalent, **and** is under age 26. The program does not have to be designated as "special education" as long as the person has been certified as a special education student. Eligibility on this basis continues until the person completes the high school program or reaches age 26, whichever is earlier.
- . Refugee or asylee who lost eligibility for Social Security Income (SSI) due to exceeding the maximum time limit PEM, Item 261, pp. 1-2.

Because the claimant does not meet the definition of disabled under the MA program and because the evidence in the record does not establish that the claimant is unable to work for a period exceeding 90 days, the claimant does not meet the disability criteria for SDA.

DECISION AND ORDER

The Administrative Law Judge, based upon the above findings of fact and conclusions of law decides that the department has appropriately established that it was acting in

compliance with department policy when it denied the claimant's application for MA-P, retroactive MA-P, and SDA. The claimant should be able to perform any level of light work. The department has established its case by a preponderance of the evidence.

Accordingly, the department's decision is **AFFIRMED**.

Carmen G. Fahie
Administrative Law Judge
For Ismael Ahmed, Director
Department of Human Services

Date Signed: October 19, 2010

Date Mailed: October 19, 2010

NOTICE: Administrative Hearings may order a rehearing or reconsideration on either its own motion or at the request of a party within 30 days of the mailing date of this Decision and Order. Administrative Hearings will not order a rehearing or reconsideration on the Department's motion where the final decision cannot be implemented within 90 days of the filing of the original request.

The Claimant may appeal the Decision and Order to Circuit Court within 30 days of the mailing of the Decision and Order or, if a timely request for rehearing was made, within 30 days of the receipt date of the rehearing decision.
