

STATE OF MICHIGAN
STATE OFFICE OF ADMINISTRATIVE HEARINGS AND RULES

ADMINISTRATIVE HEARINGS FOR THE
DEPARTMENT OF HUMAN SERVICES

IN THE MATTER OF: [REDACTED],
Claimant

Reg. No: 2009-29124
Issue No: 2009; 4031
Case No: [REDACTED]
Load No: [REDACTED]
Hearing Date:
August 27, 2009
Wayne County DHS

ADMINISTRATIVE LAW JUDGE: Landis Y. Lain

HEARING DECISION

This matter is before the undersigned Administrative Law Judge pursuant to MCL 400.9 and MCL 400.37 upon claimant's request for a hearing. After due notice, a telephone hearing was held on August 27, 2009. Claimant personally appeared and testified.

ISSUE

Did the Department of Human Services (the department) properly deny claimant's application for Medical Assistance (MA-P) and State Disability Assistance (SDA)?

FINDINGS OF FACT

The Administrative Law Judge, based upon the competent, material and substantial evidence on the whole record, finds as material fact:

(1) On March 17, 2009, claimant filed an application for Medical Assistance and State Disability Assistance benefits alleging disability.

(2) On June 2, 2009, the Medical Review Team denied claimant's application stating that claimant could perform other work.

(3) On June 5, 2009, the department caseworker sent claimant notice that his application was denied.

(4) On June 9, 2009, claimant filed a request for a hearing to contest the department's negative action.

(5) On July 21, 2009, the State Hearing Review Team again denied claimant's application stating that claimant is capable of performing other work in the form of light work per 20 CFR 416.967(b) and unskilled work per 20 CFR 416.968(a) pursuant to Medical-Vocational Rule 202.17. The claimant's impairments do not meet/equal the intent or severity of a Social Security listing. The medical evidence of record indicates that the claimant retains the capacity to perform a wide range of light work. Therefore, based on the claimant's vocational profile of a younger individual with a limited (less than high school) education, MA-P is denied using Vocational Rule 202.17 as a guide. Retroactive MA-P was considered in this case and is also denied. SDA is denied per PEM 261 because the nature and severity of the claimant's impairments would not preclude work activity at the above stated level for 90 days.

(6) Claimant is a 47-year-old man whose birth date is [REDACTED]. Claimant is 6' tall and weighs 240 pounds. Claimant attended the 9th grade and has no GED. Claimant is able to read and write and does have basic math skills but was in special education because he's a slow learner.

(7) Claimant last worked in 2007 doing roofing. Claimant has also worked as a car driver/porter and for temporary services working on machinery and moving jobs.

(8) Claimant alleges as disabling impairments: arthritis, back pain, left knee pain, a back injury, and pain from being shot in the back in the [REDACTED].

CONCLUSIONS OF LAW

The State Disability Assistance (SDA) program which provides financial assistance for disabled persons is established by 2004 PA 344. The Department of Human Services (DHS or department) administers the SDA program pursuant to MCL 400.10, *et seq.*, and MAC R 400.3151-400.3180. Department policies are found in the Program Administrative Manual (PAM), the Program Eligibility Manual (PEM) and the Program Reference Manual (PRM).

The Medical Assistance (MA) program is established by Title XIX of the Social Security Act and is implemented by Title 42 of the Code of Federal Regulations (CFR). The Department of Human Services (DHS or department) administers the MA program pursuant to MCL 400.10, *et seq.*, and MCL 400.105. Department policies are found in the Program Administrative Manual (PAM), the Program Eligibility Manual (PEM) and the Program Reference Manual (PRM).

Pursuant to Federal Rule 42 CFR 435.540, the Department of Human Services uses the federal Supplemental Security Income (SSI) policy in determining eligibility for disability under the Medical Assistance program. Under SSI, disability is defined as:

...the inability to do any substantial gainful activity by reason of any medically determinable physical or mental impairment which can be expected to result in death or which has lasted or can be expected to last for a continuous period of not less than 12 months.... 20 CFR 416.905

A set order is used to determine disability. Current work activity, severity of impairments, residual functional capacity, past work, age, or education and work experience is reviewed. If there is a finding that an individual is disabled or not disabled at any point in the review, there will be no further evaluation. 20 CFR 416.920.

If an individual is working and the work is substantial gainful activity, the individual is not disabled regardless of the medical condition, education and work experience. 20 CFR 416.920(c).

If the impairment or combination of impairments do not significantly limit physical or mental ability to do basic work activities, it is not a severe impairment(s) and disability does not exist. Age, education and work experience will not be considered. 20 CFR 416.920.

Statements about pain or other symptoms do not alone establish disability. There must be medical signs and laboratory findings which demonstrate a medical impairment.... 20 CFR 416.929(a).

...Medical reports should include –

- (1) Medical history.
- (2) Clinical findings (such as the results of physical or mental status examinations);
- (3) Laboratory findings (such as blood pressure, X-rays);
- (4) Diagnosis (statement of disease or injury based on its signs and symptoms).... 20 CFR 416.913(b).

In determining disability under the law, the ability to work is measured. An individual's functional capacity for doing basic work activities is evaluated. If an individual has the ability to perform basic work activities without significant limitations, he or she is not considered disabled. 20 CFR 416.994(b)(1)(iv).

Basic work activities are the abilities and aptitudes necessary to do most jobs. Examples of these include --

- (1) Physical functions such as walking, standing, sitting, lifting, pushing, pulling, reaching, carrying, or handling;
- (2) Capacities for seeing, hearing, and speaking;

- (3) Understanding, carrying out, and remembering simple instructions;
- (4) Use of judgment;
- (5) Responding appropriately to supervision, co-workers and usual work situations; and
- (6) Dealing with changes in a routine work setting. 20 CFR 416.921(b).

Medical findings must allow a determination of (1) the nature and limiting effects of your impairment(s) for any period in question; (2) the probable duration of the impairment; and (3) the residual functional capacity to do work-related physical and mental activities. 20 CFR 416.913(d).

Medical evidence may contain medical opinions. Medical opinions are statements from physicians and psychologists or other acceptable medical sources that reflect judgments about the nature and severity of the impairment(s), including your symptoms, diagnosis and prognosis, what an individual can do despite impairment(s), and the physical or mental restrictions. 20 CFR 416.927(a)(2).

All of the evidence relevant to the claim, including medical opinions, is reviewed and findings are made. 20 CFR 416.927(c).

The Administrative Law Judge is responsible for making the determination or decision about whether the statutory definition of disability is met. The Administrative Law Judge reviews all medical findings and other evidence that support a medical source's statement of disability.... 20 CFR 416.927(e).

A statement by a medical source finding that an individual is "disabled" or "unable to work" does not mean that disability exists for the purposes of the program. 20 CFR 416.927(e).

When determining disability, the federal regulations require that several considerations be analyzed in sequential order. If disability can be ruled out at any step, analysis of the next step is not required. These steps are:

1. Does the client perform Substantial Gainful Activity (SGA)? If yes, the client is ineligible for MA. If no, the analysis continues to Step 2. 20 CFR 416.920(b).
2. Does the client have a severe impairment that has lasted or is expected to last 12 months or more or result in death? If no, the client is ineligible for MA. If yes, the analysis continues to Step 3. 20 CFR 416.920(c).
3. Does the impairment appear on a special listing of impairments or are the client's symptoms, signs, and laboratory findings at least equivalent in severity to the set of medical findings specified for the listed impairment? If no, the analysis continues to Step 4. If yes, MA is approved. 20 CFR 416.290(d).
4. Can the client do the former work that he/she performed within the last 15 years? If yes, the client is ineligible for MA. If no, the analysis continues to Step 5. 20 CFR 416.920(e).
5. Does the client have the Residual Functional Capacity (RFC) to perform other work according to the guidelines set forth at 20 CFR 404, Subpart P, Appendix 2, Sections 200.00-204.00? If yes, the analysis ends and the client is ineligible for MA. If no, MA is approved. 20 CFR 416.920(f).

At Step 1, claimant is not engaged in substantial gainful activity and has not worked since 2007. Claimant is not disqualified from receiving disability at Step 1.

It should be noted for the record that claimant was denied Social Security eligibility on

████████████████████

The objective medical evidence on the record indicates that a Medical Examination Report of ██████████ indicates that claimant was normal in all areas of examination except that he had hypertension, had a gunshot wound to the left knee in the past, pain in the left knee, and nicotine addiction. Claimant's doctor stated that claimant could occasionally carry less than

10 pounds and could stand or walk less than two hours in an eight-hour day and could sit less than six hours in an eight-hour day. The claimant could use his upper extremities for simple grasping, reaching, pushing/pulling, and fine manipulating and could operate foot and leg controls with the right foot. Claimant had no mental limitations. (pp. 9-10)

A physical examination of [REDACTED] indicates that the claimant was alert and oriented x3. Height was 6' tall and weight was 264 pounds. Blood pressure was 140/90. Visual acuity was 20/25 in the right eye and 20/20 in the left eye. Both eyes were 20/20 without glasses. HEENT: pupils were equal, round, and reactive to light. Extraocular movements were full. No icterus. No conjunctival pallor. The fundi were benign. No exudates or papilledema noted. There was no JVD. No carotid bruits. No cervical lymphadenopathy. No thyromegaly. The throat was clear. There was no thrush noted. The tongue was central. The neck was supple with full range of motion. No lesions noted on the tongue. In the chest the lungs were clear to auscultation bilaterally. In the cardiovascular area S1 and S2 were regular. No murmur or gallop was noted. PMI was not displaced. The abdomen was soft and non-tender. No masses felt. Bowel sounds were normal. There was no organomegaly. In the musculoskeletal area the range of motion of the C-spine was full. Range of motion of the thoracolumbar spine was full. Entry wound was noted at T7-T8 level just lateral to T7-T8 on the right side. No muscle spasms. No SI joint tenderness. There was no midline spine tenderness. Straight leg raises was negative bilaterally at 60 degrees in supine position. Bilateral knees, hips, and ankles had full range of motion. There was mild crepitus in the left knee. No effusion noted. No swelling or redness noted in the knees. Bilateral shoulders, elbows, and wrists had full range of motion. The dorsalis pedis was bilaterally 2+. No pedal edema. No clubbing or cyanosis. Capillary refill was intact and normal. Gait was normal. The claimant held a cane in the right hand when he left the room. He was able to walk in the

room without the cane. No limp noted. Neurologically, the claimant was alert and oriented to time, person, and place. Speech was normal. Cranial nerves II-XII were intact. Memory: he was able to tell his birth date and current president's name. Babinski's was negative. Romberg test was negative. Finger-to-nose test was normal. DTR's were bilaterally symmetrical and 2+. The muscle power was 5/5 in all extremities. Pain and touch were intact bilaterally symmetrical and equal. The claimant could get off of the table and chair without any assistance. The impression was mild back pain after gunshot wound injury at age 21 and left knee degenerative disc disease. (pp. 25-26)

At Step 2, the claimant has the burden of proof of establishing that he has a severely restrictive physical or mental impairment that has lasted or is expected to last for the duration of at least 12 months. There is insufficient objective clinical medical evidence in the record that claimant suffers a severely restrictive physical or mental impairment. Claimant has reports of pain in multiple areas of his body; however, there are no corresponding clinical findings that support the reports of symptoms and limitations made by the claimant. This Administrative Law Judge finds that there is no medical finding that claimant has any muscle atrophy or trauma, abnormality or injury that is consistent with a deteriorating condition. In short, the claimant has restricted himself from tasks associated with occupational functioning based upon his reports of pain (symptoms) rather than medical findings. Reported symptoms are an insufficient basis upon which a finding that claimant has met the evidentiary burden of proof can be made. This Administrative Law Judge finds that the medical record is insufficient to establish that claimant has a severely restrictive physical impairment.

Claimant testified on the record that he does not have any mental impairment. The evidentiary record is insufficient to find claimant suffers a severely restrictive mental

impairment. For these reasons, this Administrative Law Judge finds that claimant has failed to meet his burden of proof at Step 2. Claimant must be denied benefits at this step based upon his failure to meet the evidentiary burden.

If claimant had not been denied at Step 2, the analysis would proceed to Step 3 where the medical evidence of claimant's condition does not give rise to a finding that he would meet a statutory listing in the code of federal regulations.

If claimant had not already been denied at Step 2, this Administrative Law Judge would have to deny him again at Step 4 based upon his ability to perform his past relevant work. Claimant's past relevant work was driving cars as a porter. There is insufficient objective medical evidence in the file which establishes that claimant is unable to perform work which he has engaged in, in the past. Therefore, if claimant had not already been denied at Step 2, he would again be denied at Step 4.

The Administrative Law Judge will continue to proceed through the sequential evaluation process to determine whether or not claimant has the residual functional capacity to perform some other less strenuous tasks than in his prior jobs.

At Step 5, the burden of proof shifts to the department to establish that claimant does not have residual functional capacity.

The residual functional capacity is what an individual can do despite limitations. All impairments will be considered in addition to ability to meet certain demands of jobs in the national economy. Physical demands, mental demands, sensory requirements and other functions will be evaluated.... 20 CFR 416.945(a).

To determine the physical demands (exertional requirements) of work in the national economy, we classify jobs as sedentary, light, medium and heavy. These terms have the same

meaning as they have in the *Dictionary of Occupational Titles*, published by the Department of Labor... 20 CFR 416.967.

Sedentary work. Sedentary work involves lifting no more than 10 pounds at a time and occasionally lifting or carrying articles like docket files, ledgers, and small tools. Although a sedentary job is defined as one which involves sitting, a certain amount of walking and standing is often necessary in carrying out job duties. Jobs are sedentary if walking and standing are required occasionally and other sedentary criteria are met. 20 CFR 416.967(a).

Light work. Light work involves lifting no more than 20 pounds at a time with frequent lifting or carrying of objects weighing up to 10 pounds. Even though the weight lifted may be very little, a job is in this category when it requires a good deal of walking or standing, or when it involves sitting most of the time with some pushing and pulling of arm or leg controls.... 20 CFR 416.967(b).

Claimant has submitted insufficient objective medical evidence that he lacks the residual functional capacity to perform some other less strenuous tasks than in his prior employment or that he is physically unable to do light or sedentary tasks if demanded of him. Claimant's activities of daily living do not appear to be very limited and he should be able to perform light or sedentary work even with his impairments. Claimant has failed to provide the necessary objective medical evidence to establish that he has a severe impairment or combination of impairments which prevent him from performing any level of work for a period of 12 months. The claimant's testimony as to his limitations indicates that he should be able to perform light or sedentary work.

Claimant testified on the record that he does cook by boiling hotdogs one time per week and that he does grocery shop one time per week with help. Claimant testified that he fixes his bed and can walk one block, stand for 30 minutes, and can sit for 30 minutes at a time. Claimant is able to shower and dress himself if he takes his time and stated that he couldn't squat because his back hurts and he couldn't tie his shoes because his back hurts. Claimant testified that the heaviest weight he can carry is 10 pounds and that he is right-handed and that his hands and arms are fine and that he just has some arthritis in them. Claimant's level of pain on a scale from 1 to 10 without medication is a 10 and with medication is a 7/8. The claimant does continue to smoke despite the fact that his doctor has told him to quit.

If an individual fails to follow prescribed treatment which would be expected to restore their ability to engage in substantial activity without good cause, there will not be a finding of disability.... 20 CFR 416.994(b)(4)(iv). Claimant is not in compliance with his treatment program.

Claimant's complaints of pain, while profound and credible, are out of proportion to the objective medical evidence contained in the file as it relates to claimant's ability to perform work. Therefore, this Administrative Law Judge finds that the objective medical evidence on the record does not establish that claimant has no residual functional capacity. Claimant is disqualified from receiving disability at Step 5 based upon the fact that he has not established by objective medical evidence that he cannot perform light or sedentary work even with his impairments. Under the Medical-Vocational guidelines, a younger individual with a limited education and an unskilled work history who is limited to light work is not considered disabled pursuant to Medical-Vocational Rule 202.17.

The department's Program Eligibility Manual contains the following policy statements and instructions for caseworkers regarding the State Disability Assistance program: to receive State Disability Assistance, a person must be disabled, caring for a disabled person or age 65 or older. PEM, Item 261, page 1. Because the claimant does not meet the definition of disabled under the MA-P program and because the evidence of record does not establish that claimant is unable to work for a period exceeding 90 days, the claimant does not meet the disability criteria for State Disability Assistance benefits either.

DECISION AND ORDER

The Administrative Law Judge, based upon the above findings of fact and conclusions of law, decides that the department has appropriately established on the record that it was acting in compliance with department policy when it denied claimant's application for Medical Assistance, retroactive Medical Assistance and State Disability Assistance benefits. The claimant should be able to perform a wide range of light or sedentary work even with his impairments. The department has established its case by a preponderance of the evidence.

Accordingly, the department's decision is AFFIRMED.
