

**STATE OF MICHIGAN**  
**STATE OFFICE OF ADMINISTRATIVE HEARINGS AND RULES**  
**ADMINISTRATIVE HEARINGS FOR THE**  
**DEPARTMENT OF HUMAN SERVICES**

**IN THE MATTER OF:**

[REDACTED]

Reg. No.: 2009-33459  
Issue No.: 2009/4031  
Case No.: [REDACTED]  
Load No.: [REDACTED]  
Hearing Date: October 19, 2009  
Macomb County DHS (12)

**ADMINISTRATIVE LAW JUDGE:** Colleen M. Mamelka

**HEARING DECISION**

This matter is before the undersigned Administrative Law Judge pursuant to MCL 400.9 and MCL 400.37 upon the Claimant's request for a hearing. After due notice, a telephone hearing was conducted from Detroit, Michigan on Monday, October 19, 2009. The Claimant appeared, along with [REDACTED], and testified. [REDACTED] appeared on behalf of the Department.

During the hearing, the Claimant waived the time frame for the issuance of this decision in order to allow for the submission of additional medical evidence. The new evidence was received, reviewed, and entered as Exhibits 3 and 4. This matter is now before the undersigned for a final decision.

**ISSUE**

Whether the Department properly determined that the Claimant was not disabled for purposes of the Medical Assistance ("MA-P") and State Disability Assistance ("SDA") benefit programs?

**FINDINGS OF FACT**

The Administrative Law Judge, based upon the competent, material, and substantial evidence on the whole record, finds as material fact:

1. The Claimant submitted an application for public assistance seeking MA-P and SDA benefits on April 16, 2009.
2. On June 3, 2009, the Medical Review Team ("MRT") determined that the Claimant was not disabled. (Exhibit 1, pp. 43, 44)

3. On June 6, 2009, the Department sent the Claimant an Eligibility Notice notifying the Claimant of the MRT determination. (Exhibit 1, p. 47)
4. On June 24, 2009, the Department received the Claimant's timely written request for hearing. (Exhibit 1, p. 46)
5. On September 1, 2009, the State Hearing Review Team ("SHRT") found the Claimant not disabled. (Exhibit 2)
6. The Claimant has alleged physical disabling impairments due to torn rotator cuff, back pain with herniation and impingement.
7. At the time of hearing, the Claimant was 45 years old with a [REDACTED] date of birth; was 5'3" in height; and weighed 90 pounds.
8. The Claimant has a limited education and work history as a general laborer.
9. The Claimant impairments have lasted, or are expected to last, continuously for a period of 12 months or longer.

### **CONCLUSIONS OF LAW**

The Medical Assistance ("MA") program is established by Subchapter XIX of Chapter 7 of The Public Health & Welfare Act, 42 USC 1397, and is administered by the Department of Human Services ("DHS"), formerly known as the Family Independence Agency, pursuant to MCL 400.10 *et seq* and MCL 400.105. Department policies are found in the Bridges Administrative Manual ("BAM"), the Bridges Eligibility Manual ("BEM"), and the Bridges Reference Manual ("BRM").

Disability is defined as the inability to do any substantial gainful activity by reason of any medically determinable physical or mental impairment which can be expected to result in death or which has lasted or can be expected to last for a continuous period of not less than 12 months. 20 CFR 416.905(a) The person claiming a physical or mental disability has the burden to establish it through the use of competent medical evidence from qualified medical sources such as his or her medical history, clinical/laboratory findings, diagnosis/prescribed treatment, prognosis for recovery and/or medical assessment of ability to do work-related activities or ability to reason and make appropriate mental adjustments, if a mental disability is alleged. 20 CFR 413.913 An individual's subjective pain complaints are not, in and of themselves, sufficient to establish disability. 20 CFR 416.908; 20 CFR 416.929(a) Similarly, conclusory statements by a physician or mental health professional that an individual is disabled or

200933459/CMM

blind, absent supporting medical evidence, is insufficient to establish disability. 20 CFR 416.927

When determining disability, the federal regulations require several factors to be considered including: (1) the location/duration/frequency/intensity of an applicant's pain; (2) the type/dosage/effectiveness/side effects of any medication the applicants takes to relieve pain; (3) any treatment other than pain medication that the applicant has received to relieve pain; and (4) the effect of the applicant's pain on his or her ability to do basic work activities. 20 CFR 416.929(c)(3) The applicant's pain must be assessed to determine the extent of his or her functional limitation(s) in light of the objective medical evidence presented. 20 CFR 416.929(c)(2)

In order to determine whether or not an individual is disabled, federal regulations require a five-step sequential evaluation process be utilized. 20 CFR 416.920(a)(1) The five-step analysis requires the trier of fact to consider an individual's current work activity; the severity of the impairment(s) both in duration and whether it meets or equals a listed impairment in Appendix 1; residual functional capacity to determine whether an individual can perform past relevant work; and residual functional capacity along with vocational factors (i.e. age, education, and work experience) to determine if an individual can adjust to other work. 20 CFR 416.920(a)(4); 20 CFR 416.945

If an individual is found disabled, or not disabled, at any step, a determination or decision is made with no need evaluate subsequent steps. 20 CFR 416.920(a)(4) If a determination cannot be made that an individual is disabled, or not disabled, at a particular step, the next step is required. 20 CFR 416.920(a)(4) If an impairment does not meet or equal a listed impairment, an individual's residual functional capacity is assessed before moving from step three to step four. 20 CFR 416.920(a)(4); 20 CFR 416.945 Residual functional capacity is the most an individual can do despite the limitations based on all relevant evidence. 20 CFR 945(a)(1) An individual's residual functional capacity assessment is evaluated at both steps four and five. 20 CFR 416.920(a)(4) In determining disability, an individual's functional capacity to perform basic work activities is evaluated and if found that the individual has the ability to perform basic work activities without significant limitation, disability will not be found. 20 CFR 416.994(b)(1)(iv)

In general, the individual has the responsibility to prove disability. 20 CFR 416.912(a) An impairment or combination of impairments is not severe if it does not significantly limit an individual's physical or mental ability to do basic work activities. 20 CFR 416.921(a) An individual is not disabled regardless of the medical condition, age, education, and work experience, if the individual is working and the work is a substantial, gainful activity. 20 CFR 416.920(a)(4)(i) Substantial gainful activity means work that involves doing significant and productive physical or mental duties and is done (or intended) for pay or profit. 20 CFR 416.910(a)(b) Substantial gainful activity is work

activity that is both substantial and gainful. 20 CFR 416.972 Work may be substantial even if it is done on a part-time basis or if an individual does less, with less responsibility, and gets paid less than prior employment. 20 CFR 416.972(a) Gainful work activity is work activity that is done for pay or profit. 20 CFR 416.972(b)

As outlined above, the first step looks at the individual's current work activity. In the record presented, the Claimant is not involved in substantial gainful activity therefore is not ineligible for disability benefits under Step 1.

The severity of the Claimant's alleged impairment(s) is considered under Step 2. The Claimant bears the burden to present sufficient objective medical evidence to substantiate the alleged disabling impairments. In order to be considered disabled for MA purposes, the impairment must be severe. 20 CFR 916.920(a)(4)(ii); 20 CFR 916.920(b) An impairment, or combination of impairments, is severe if it significantly limits an individual's physical or mental ability to do basic work activities regardless of age, education and work experience. 20 CFR 916.920(a)(4)(ii); 20 CFR 916.920(c) Basic work activities means the abilities and aptitudes necessary to do most jobs. 20 CFR 916.921(b) Examples include:

1. Physical functions such as walking, standing, sitting, lifting, pushing, pulling, reaching, carrying, or handling;
2. Capacities for seeing, hearing, and speaking;
3. Understanding, carrying out, and remembering simple instructions;
4. Use of judgment;
5. Responding appropriately to supervision, co-workers and usual work situations; and
6. Dealing with changes in a routine work setting.

*Id.* The second step allows for dismissal of a disability claim obviously lacking in medical merit. *Higgs v Bowen*, 880 F2d 860, 862 (CA 6, 1988). The severity requirement may still be employed as an administrative convenience to screen out claims that are totally groundless solely from a medical standpoint. *Id.* at 863 *citing Farris v Sec of Health and Human Services*, 773 F2d 85, 90 n.1 (CA 6, 1985) An impairment qualifies as severe only if, regardless of a claimant's age, education, or work experience, the impairment would not affect the claimant's ability to work. *Salmi v Sec of Health and Human Services*, 774 F2d 685, 692 (CA 6, 1985)

In the present case, the Claimant alleges disability based on torn rotator cuff, back pain with herniation and impingement.

On [REDACTED] a Medical Examination Report was completed on behalf of the Claimant. The diagnoses were severe cervical sprain with radiculopathy, herniated disc, severe pain, and severe lumbar spur. The Claimant was limited to the occasional lift/carry of less than 5 pounds; stand and/or walk less than 2 hours in an 8 hour workday; sit less than 6 hours during the same time frame; and unable reach/push/pull or operate foot/leg controls. The Claimant was able to do simple grasping and fine manipulation. The Claimant was unable to meet her needs in the home.

On [REDACTED], the Claimant attended a psychiatric evaluation. The Claimant was diagnosed with post-traumatic stress disorder and pain disorder. The Global Assessment Functioning ("GAF") was 45 and her prognosis was fair to guarded.

On this same date, the Claimant attended a consultative evaluation. The physical examination revealed painful left shoulder joint movement. The diagnoses were post-traumatic neck pain and herniated disc in the cervical spine. Further, the Claimant was found to have osteoarthritis of the left shoulder joint with functional limitations such that she was unable to perform household chores and was unable to lift anything from the floor.

On [REDACTED], the Claimant underwent a left shoulder internal derangement without complication.

On [REDACTED], the Claimant underwent anterior cervical fusions and decompressions at C4-5 and C6-7 without complication due to cervical radiculopathy and cervical discogenic pain.

On [REDACTED], an MRI of the lumbar spine was performed which revealed diffuse disc displacement at L2-3 and L3-4.

On or about [REDACTED], the Claimant's treating physician completed a Medical Examination Report on behalf of the Claimant. The current diagnoses were low back pain and cervical and lumbar radiulopathy with discogenic pain. The Claimant was found unable to work and unable to lift/carry any weight or perform repetitive actions with any extremity.

On [REDACTED], the Claimant's treating physician (orthopedic surgeon) completed a Medical Examination Report on behalf of the Claimant. The current diagnoses were cervical radiculopathy, discogenic syndrome/anterior tear, and low back pain. An MRI (September 20, 2009) showed large disc displacement at C5-6. The Claimant's

condition was deteriorating and she was found disabled for an undetermined amount of time.

On [REDACTED], the Claimant's treating physician completed a medical/progress report for the Claimant. The MRI of the cervical spine revealed herniations at C4-5 on the left and at level C6-7. C5-6 showed a small central herniation without canal stenosis or disc narrowing. The discography confirmed the Claimant's low back pain and the need for surgery. The Claimant's neck surgery went initially well however subsequent x-rays have shown C5-6 almost completely collapsed with stenosis foraminaly affecting the nerve roots. The Claimant needs a three-level cervical fusion and at least one-level lumbar fusion. The Physician opined that after surgery and rehabilitation, the Claimant may not be able to return to some meaningful employment.

As previously noted, the Claimant bears the burden to present sufficient objective medical evidence to substantiate the alleged disabling impairment(s). As summarized above, the Claimant has presented some objective medical evidence establishing that she does have physical limitations on her ability to perform basic work activities. Accordingly, the Claimant has an impairment, or combination thereof, that has more than a *de minimis* effect on the Claimant's basic work activities. Further, the impairments have lasted continuously for twelve months therefore, the Claimant is not disqualified from receipt of MA-P benefits under Step 2.

In the third step of the sequential analysis of a disability claim, the trier of fact must determine if the Claimant's impairment, or combination of impairments, is listed in Appendix 1 of Subpart P of 20 CFR, Part 404. The Claimant asserts disabling impairments due to torn rotator cuff, back pain with herniation and impingement.

Listing 1.00 defines musculoskeletal system impairments. Disorders of the musculoskeletal system may result from hereditary, congenital, or acquired pathologic processes. 1.00A Impairments may result from infectious, inflammatory, or degenerative processes, traumatic or developmental events, or neoplastic, vascular, or toxic/metabolic diseases. 1.00A Regardless of the cause(s) of a musculoskeletal impairment, functional loss for purposes of these listings is defined as the inability to ambulate effectively on a sustained basis for any reason, including pain associated with the underlying musculoskeletal impairment, or the inability to perform fine and gross movements effectively on a sustained basis for any reason, including pain associated with the underlying musculoskeletal impairment. Inability to ambulate effectively means an extreme limitation of the ability to walk; i.e., an impairment(s) that interferes very seriously with the individual's ability to independently initiate, sustain, or complete activities. 1.00B2b(1) Ineffective ambulation is defined generally as having insufficient lower extremity function to permit independent ambulation without the use of a hand-held assistive device(s) that limits the functioning of both upper extremities. (Listing 1.05C is an exception to this general definition because the individual has the use of

only one upper extremity due to amputation of a hand.) *Id.* To ambulate effectively, individuals must be capable of sustaining a reasonable walking pace over a sufficient distance to be able to carry out activities of daily living. 1.00B2b(2) They must have the ability to travel without companion assistance to and from a place of employment or school. . . . *Id.* When an individual's impairment involves a lower extremity uses a hand-held assistive device, such as a cane, crutch or walker, the medical basis for use of the device should be documented. 1.00J4 The requirement to use a hand-held assistive device may also impact an individual's functional capacity by virtue of the fact that one or both upper extremities are not available for such activities as lifting, carrying, pushing, and pulling. *Id.*

Categories of Musculoskeletal include:

- 1.02 Major dysfunction of a joint(s) due to any cause: Characterized by gross anatomical deformity (e.g. subluxation, contracture, bony or fibrous ankylosis, instability) and chronic joint pain and stiffness with signs of limitation of motion or other abnormal motion of the affected joint(s), and findings on appropriate medically acceptable imaging of joint space narrowing, bony destruction, or ankylosis of the affected joint(s). With:
- A. Involvement of one major peripheral weight-bearing joint (i.e., hip, knee, or ankle), resulting in inability to ambulate effectively as defined in 1.00B2b; or
  - B. Involvement of one major peripheral joint in each upper extremity (i.e., shoulder, elbow, wrist, hand), resulting in inability to perform fine and gross movements effectively as defined in 1.00B2c

\* \* \*

- 1.04 Disorders of the spine (e.g., herniated nucleus pulposus, spinal arachnoiditis, spinal stenosis, osteoarthritis, degenerative disc disease, facet arthritis, vertebral fracture), resulting in compromise of a nerve root (including the cauda equine) or spinal cord. With:
- A. Evidence of nerve root compression characterized by neuro-anatomic distribution of pain, limitation of motion of the spine, motor loss (atrophy with associated muscle weakness or muscle weakness) accompanied by sensory or reflex loss and, if there is involvement of the lower back, positive straight-leg raising test (sitting and supine); or
  - B. Spinal arachnoiditis, confirmed by an operative note or pathology report of tissue biopsy, or by appropriate medically acceptable imaging, manifested by severe

burning or painful dysesthesia, resulting in the need for changes in position or posture more than once every 2 hours; or

- C. Lumbar spinal stenosis resulting in pseudoclaudication, established by findings on appropriate medically acceptable imaging, manifested by chronic nonradicular pain and weakness, and resulting in inability to ambulate effectively, as defined in 1.00B2b. (see above definition)

In this case, the objective medical evidence (MRIs, discography, and x-rays) establishes that the Claimant has disc herniations, severe pain, an almost complete collapse at C5-6 with stenosis foraminaly affecting nerve roots. The Claimant has been recommended for fusion and decompression surgery. Further, the Claimant has been restricted to the equivalent of less than sedentary activity. In light of the foregoing, it is found that the Claimant's impairments meet, or are the medical equivalent thereof, a listed impairment within Listing 1.00, specifically 1.04. Accordingly, the Claimant is found disabled at Step 3 with no further analysis required.

The State Disability Assistance program, which provides financial assistance for disabled persons, was established by 2004 PA 344. DHS administers the SDA program pursuant to MCL 400.10 *et seq.* and Michigan Administrative Code ("MAC R") 400.3151 – 400.3180. Department policies are found in BAM, BEM, and BRM. A person is considered disabled for SDA purposes if the person has a physical or mental impairment which meets federal SSI disability standards for at least ninety days. Receipt of SSI or RSDI benefits based on disability or blindness, or the receipt of MA benefits based on disability or blindness automatically qualifies an individual as disabled for purposes of the SDA program.

In this case, the Claimant is found disabled for purposes of the Medical Assistance ("MA-P") program therefore the Claimant is found disabled for purposes of SDA benefit program.

### **DECISION AND ORDER**

The Administrative Law Judge, based upon the above findings of fact and conclusions of law finds the Claimant disabled for purposes of the MA-P and SDA benefit programs.

Accordingly, it is ORDERED:

1. The Department's determination is REVERSED.

2. The Department shall initiate review of the April 16, 2009 application to determine if all other non-medical criteria are met and inform the Claimant of the determination.
3. The Department shall supplement for any lost benefits that the Claimant was entitled to receive if otherwise eligible and qualified in accordance with department policy.
4. The Department shall review the Claimant's continued eligibility in accordance department policy in November 2011.

Colleen M. Mamelka  
Administrative Law Judge  
For Ismael Ahmed, Director  
Department of Human Services

Date Signed: 10/26/2010

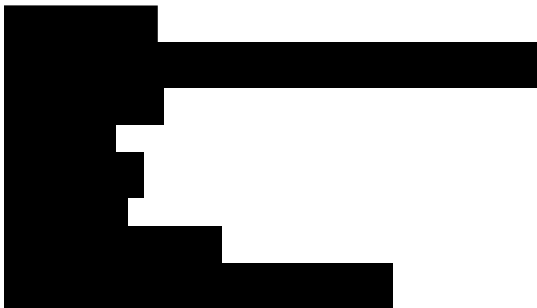

Date Mailed: 10/26/2010

**NOTICE: Administrative Hearings may order a** rehearing or reconsideration on either its own motion or at the request of a party within 30 days of the mailing date of this Decision and Order. Administrative Hearings will not order a rehearing or reconsideration on the Department's motion where the final decision cannot be implemented within 90 days of the filing of the original request.

The Claimant may appeal the Decision and Order to Circuit Court within 30 days of the mailing of the Decision and Order or, if a timely request for rehearing was made, within 30 days of the receipt date of the rehearing decision.
