STATE OF MICHIGAN STATE OFFICE OF ADMINISTRATIVE HEARINGS AND RULES ADMINISTRATIVE HEARINGS FOR THE DEPARTMENT OF HUMAN SERVICES

HEARING DECISION

This matter is before the undersigned Administrative Law Judge pursuant to MCL 400.9 and MCL 400.37 upon claimant's request for a hearing. After due notice, an in-person hearing was held on the state of the state

ISSUE

Did the Department of Human Services (the department) properly deny claimant's application for Medical Assistance (MA-P) and State Disability Assistance (SDA)?

FINDINGS OF FACT

The Administrative Law Judge, based upon the competent, material and substantial evidence on the whole record, finds as material fact:

- (1) On **Contract of**, claimant filed an application for Medical Assistance, and State Disability Assistance and benefits alleging disability.
- (2) On application stating that claimant could perform other work pursuant to Medical Vocational Rule 201.21.
- (3) On **Contract of the department caseworker sent claimant notice** that her application was denied.

- (4) On **Contract of the**, claimant filed a request for a hearing to contest the department's negative action.
- (5) On **Control of the state of the state Hearing Review Team again denied** claimant's application stating that it had insufficient evidence and requested an independent internist examination.
- (6) The hearing was held on **the hearing**. At the hearing, claimant waived the time periods and requested to submit additional medical information.
- (7) Additional medical information was submitted and sent to the State Hearing Review Team on the second se
- (8) , the State Hearing Review Team again denied On claimant's application stating in its analysis and recommended decision: the objective medical evidence present does not establish a disability at the Listing or equivalence level. The collective medical evidence shows that the claimant is capable of performing a wide range of light work. The claimant's impairment's do not meet/equal the intent or severity of a Social Security Listing. The medical evidence of record indicates that the claimant retains the capacity to perform a wide range of light work. Therefore, based on the claimant's vocational profile of younger individual, 10th grade education and unskilled work history MA-P is denied using Vocational Rule 202.17 as a guide. Retro MA-P was considered in this case and is also denied. SDA is denied per PEM261 because the nature and severity of the claimant's impairments would not preclude work activity at the above stated level for 90 days.
- (9) On the date of hearing claimant is a finite of d woman whose birth date is the second of the second and weighs and pounds. Claimant completed the second and is able to read and write and does have basic math skills.
- (10) Claimant last worked test keeping at a hotel.
- (11) Claimant alleges as disabling impairments: peripheral artery disease, carpol tunnel syndrome, depression and double vision as well as back and leg pain.

CONCLUSIONS OF LAW

The regulations governing the hearing and appeal process for applicants and recipients of public assistance in Michigan are found in the Michigan Administrative Code, MAC R 400.901-400.951. An opportunity for a hearing shall be granted to an applicant who requests a hearing because his or her claim for assistance has been denied. MAC R

400.903(1). Clients have the right to contest a department decision affecting eligibility or benefit levels whenever it is believed that the decision is incorrect. The department will provide an administrative hearing to review the decision and determine the appropriateness of that decision. BAM 600.

The State Disability Assistance (SDA) program which provides financial assistance for disabled persons is established by 2004 PA 344. The Department of Human Services (DHS or department) administers the SDA program pursuant to MCL 400.10, et seq., and MAC R 400.3151-400.3180. Department policies are found in the Program Administrative Manual (PAM), the Program Eligibility Manual (PEM) and the Program Reference Manual (PRM).

The Medical Assistance (MA) program is established by Title XIX of the Social Security Act and is implemented by Title 42 of the Code of Federal Regulations (CFR). The Department of Human Services (DHS or department) administers the MA program pursuant to MCL 400.10, *et seq.*, and MCL 400.105. Department policies are found in the Bridges Administrative Manual (BAM), the Bridges Eligibility Manual (BEM) and the Program Reference Manual (PRM).

Pursuant to Federal Rule 42 CFR 435.540, the Department of Human Services uses the federal Supplemental Security Income (SSI) policy in determining eligibility for disability under the Medical Assistance program. Under SSI, disability is defined as:

...the inability to do any substantial gainful activity by reason of any medically determinable physical or mental impairment which can be expected to result in death or which has lasted or can be expected to last for a continuous period of not less than 12 months.... 20 CFR 416.905

A set order is used to determine disability. Current work activity, severity of impairments, residual functional capacity, past work, age, or education and work experience is reviewed. If there is a finding that an individual is disabled or not disabled at any point in the review, there will be no further evaluation. 20 CFR 416.920.

If an individual is working and the work is substantial gainful activity, the individual is not disabled regardless of the medical condition, education and work experience. 20 CFR 416.920(c).

If the impairment or combination of impairments do not significantly limit physical or mental ability to do basic work activities, it is not a severe impairment(s) and disability does not exist. Age, education and work experience will not be considered. 20 CFR 416.920.

Statements about pain or other symptoms do not alone establish disability. There must be medical signs and laboratory findings which demonstrate a medical impairment.... 20 CFR 416.929(a).

...Medical reports should include –

- (1) Medical history.
- (2) Clinical findings (such as the results of physical or mental status examinations);
- (3) Laboratory findings (such as blood pressure, X-rays);
- (4) Diagnosis (statement of disease or injury based on its signs and symptoms).... 20 CFR 416.913(b).

In determining disability under the law, the ability to work is measured. An individual's functional capacity for doing basic work activities is evaluated. If an individual has the ability to perform basic work activities without significant limitations, he or she is not considered disabled. 20 CFR 416.994(b)(1)(iv).

Basic work activities are the abilities and aptitudes necessary to do most jobs. Examples of these include --

- (1) Physical functions such as walking, standing, sitting, lifting, pushing, pulling, reaching, carrying, or handling;
- (2) Capacities for seeing, hearing, and speaking;
- (3) Understanding, carrying out, and remembering simple instructions;
- (4) Use of judgment;
- (5) Responding appropriately to supervision, co-workers and usual work situations; and
- (6) Dealing with changes in a routine work setting. 20 CFR 416.921(b).

Medical findings must allow a determination of (1) the nature and limiting effects of your impairment(s) for any period in question; (2) the probable duration of the impairment; and (3) the residual functional capacity to do work-related physical and mental activities. 20 CFR 416.913(d).

Medical evidence may contain medical opinions. Medical opinions are statements from physicians and psychologists or other acceptable medical sources that reflect judgments about the nature and severity of the impairment(s), including your symptoms, diagnosis and prognosis, what an individual can do despite impairment(s), and the physical or mental restrictions. 20 CFR 416.927(a)(2).

All of the evidence relevant to the claim, including medical opinions, is reviewed and findings are made. 20 CFR 416.927(c).

The Administrative Law Judge is responsible for making the determination or decision about whether the statutory definition of disability is met. The Administrative Law Judge reviews all medical findings and other evidence that support a medical source's statement of disability.... 20 CFR 416.927(e).

A statement by a medical source finding that an individual is "disabled" or "unable to work" does not mean that disability exists for the purposes of the program. 20 CFR 416.927(e).

When determining disability, the federal regulations require that several considerations be analyzed in sequential order. If disability can be ruled out at any step, analysis of the next step is <u>not</u> required. These steps are:

- 1. Does the client perform Substantial Gainful Activity (SGA)? If yes, the client is ineligible for MA. If no, the analysis continues to Step 2. 20 CFR 416.920(b).
- Does the client have a severe impairment that has lasted or is expected to last 12 months or more or result in death? If no, the client is ineligible for MA. If yes, the analysis continues to Step 3. 20 CFR 416.920(c).
- 3. Does the impairment appear on a special listing of impairments or are the client's symptoms, signs, and laboratory findings at least equivalent in severity to the set of medical findings specified for the listed impairment? If no, the analysis continues to Step 4. If yes, MA is approved. 20 CFR 416.290(d).
- 4. Can the client do the former work that he/she performed within the last 15 years? If yes, the client is ineligible for MA. If no, the analysis continues to Step 5. 20 CFR 416.920(e).
- Does the client have the Residual Functional Capacity (RFC) to perform other work according to the guidelines set forth at 20 CFR 404, Subpart P, Appendix 2, Sections 200.00-204.00? If yes, the analysis ends and the client is ineligible for MA. If no, MA is approved. 20 CFR 416.920(f).

At Step 1, claimant is not engaged in substantial gainful activity and has not worked since Claimant is not disqualified from receiving disability at Step 1.

The subjective and objective medical evidence on the record indicates that claimant testified on the record that she lives with her fiancé and she doesn't have a driver's license and doesn't want to drive because she occasionally has double vision. Claimant does cook and grocery shop and does some housekeeping duties but is limited for length of time. Claimant testified that on a typical day she gets up **she drinks** she drinks coffee, does the dishes, watches television, periodically gets up to do a little housework, laundry and does things around the house. Claimant testified that her legs hurt when

she's walking and she doesn't have any mental impairment. A medical examination indicates that claimant was casually dressed in a red sweatshirt. dated white pants and black shoes. Moderate length reddish hair and well groomed. She wore corrective lenses from the age of 5 to 16 or 17 years old. She did not wear corrective lens during the evaluation but requires a vision exam in the near future. She was dressed appropriately for the weather. No atypical appearance observations were apparent. She sat primarily leaning forward slightly at a ridget and test position. She did not exhibit finer gross motor hyperactivity or automatic movement. She stated her legs fidget often due to pain. Her speech was calm, stable and appropriate. She remained open motivated and cooperative throughout. Her affect was mildly low dysthymic and sullen. She denied experiencing visual or auditory hallucinations or paranoid or other delusions. She had moderate problems organizing her thoughts and the dates of important events. She self report problems with concentration until she gets lost often and is unaware of her environment. She described herself as forgetful and reported mild problems with short-term memory. She was briefly assessed with having mild problems with long-term memory. She was able to repeat 6 numbers forward and 4 numbers backward. She recalled all 3 objects in an ordered fashion after 3 minutes and she correctly reported 2 of the last 3 Presidents in chronological order. She actively reported 5 large cities. She named several prominent famous people, primarily actors and television personalities. She reported numerous current events including recent earth quake, natural disasters, wars and fires in Flint. Her knowledge of current events is appropriate and not atypical. Her wealth of information is within an average range for her age group. She accurately added and multiplied single digit numbers. She had slight difficulty and made minor mistakes in performing the serial 7's. Her arithmetic skills appeared to be slightly below average. She expressed adequate knowledge of abstract concept and common sayings. She processed extensive knowledge and similarities and differences and verbalized her thought process well. Her verbal skills are in the average range. She appropriately expressed knowledge and awareness of important societal concerns and expectations. She denied attempting suicide, denied suffering from suicidal or homicidal thoughts or ideation presently. She was oriented in all spears, she maintained eye contact for appropriate periods of time she expressed moderate intellectual insight into the nature of her symptoms, she was diagnosed with depressive disorder not otherwise specified and with an active GAF of 61 (Page 29, 30). A May 10, 2010, Physical examination indicates that her pulse was 47 apical regular her blood pressure was 108/68 left arm sitting her height was 5' 2 1/2 " tall her pulse oximetry was 99% and her weight was 165 pounds and her BMI was 29.69. Claimant was a smoker and smoking cessation was suggested. She has some pain in her left leg and right leg. Her hypertension was noted to be benign (Page 32). She appeared her stated age had normal body habitus was well nourished, developed mentally normal in no acute distress. She had no elevation of the jugular venous pulsation, trachea midline. No thyroid enlargement, no thyroid nodule or thyroid tenderness. Normal respiratory effort, normal to auscultation. Regular rate and rhythm the cardiovascular there were no murmurs, gallops, rubs or abnormal heart sounds. The arterial pulses had normal curotids pulses with no bruits. Diminished dorsals pedis pulses bilaterally. In her extremities she had no edema and no varicosities. Her abdomen she a normal bowel sounds in all 4 quadrants no masses no lit abdomen was soft no tenderness. No hernias are present. Right mid thigh and calf is larger by 1cm mild tenderness in thighs by muscles bilaterally. Her reflexes were 2+/4+ Achilles bilaterally, 2+/4+ fiteller bilaterally, absent babinsks bilaterally. Her sensation was normal to light touch. She had

reduced touch sensation in both lower extremities in her upper and lower extremities had normal strength 4/5 in the left lower extremity. 5/5 in the right lower extremity (Page 33). An examination dated **sector extremity**, indicates that claimant was 62 ½" tall and weighed 167 pounds. Her blood pressure was 118/80 pulse 62 chest exhibits moderate air exchange but no rales rhonchi or wheezes appreciated. Slight increase in AP diameter. Heart had regular rate and rhythm normal S1 and S2. No murmurs, rubs or gallops appreciated. Extremities exhibit no clubbing, cyanosis or edema. She had full range of motion of the upper and lower extremities. No difficulty and fine motor skills in the upper extremity. She was able to ambulate to and from the room with the use of any ambulatory device. Gait was normal. Neurologically she was alert and oriented times 3. Cranial nerves 2-12 intact. No gross motor or sensory deficits appreciated. No exaggerated symptoms (Page 36).

At Step 2, claimant has the burden of proof of establishing that she has a severely restrictive physical or mental impairment that has lasted or is expected to last for the duration of at least 12 months. There is insufficient objective clinical medical evidence in the record that claimant suffers a severely restrictive physical or mental impairment. Claimant has reports of pain in multiple areas of her body; however, there are no corresponding clinical findings that support the reports of symptoms and limitations made by the claimant. There are no laboratory or x-ray findings listed in the file. The clinical impression is that claimant is stable. There is no medical finding that claimant has any muscle atrophy or trauma, abnormality or injury that is consistent with a deteriorating condition. In short, claimant has restricted herself from tasks associated with occupational functioning based upon her reports of pain (symptoms) rather than medical findings. Reported symptoms are an insufficient basis upon which a finding that claimant has met the evidentiary burden of proof can be made. This Administrative Law Judge finds that the medical record is insufficient to establish that claimant has a severely restrictive physical impairment.

Claimant alleges the following disabling mental impairments: depression

For mental disorders, severity is assessed in terms of the functional limitations imposed by the impairment. Functional limitations are assessed using the criteria in paragraph (B) of the listings for mental disorders (descriptions of restrictions of activities of daily living, social functioning; concentration, persistence, or pace; and ability to tolerate increased mental demands associated with competitive work).... 20 CFR, Part 404, Subpart P, App. 1, 12.00(C).

There is insufficient objective medical/psychiatric evidence in the record indicating claimant suffers severe mental limitations. There is no mental residual functional capacity assessment in the record. There is insufficient evidence contained in the file of depression or a cognitive dysfunction that is so severe that it would prevent claimant from working at any job. Claimant was oriented to time, person and place during the hearing. Claimant was able to answer all of the questions at the hearing and was responsive to the questions. The evidentiary record is insufficient to find that claimant suffers a severely restrictive mental impairment. For these reasons, this Administrative Law Judge finds that claimant has failed to meet her burden of proof at Step 2. Claimant must be denied benefits at this step based upon her failure to meet the evidentiary burden.

If claimant had not been denied at Step 2, the analysis would proceed to Step 3 where the medical evidence of claimant's condition does not give rise to a finding that she would meet a statutory listing in the code of federal regulations.

If claimant had not already been denied at Step 2, this Administrative Law Judge would have to deny her again at Step 4 based upon her ability to perform her past relevant work. There is no evidence upon which this Administrative Law Judge could base a finding that claimant is unable to perform work in which she has engaged in, in the past. Therefore, if claimant had not already been denied at Step 2, he would be denied again at Step 4.

The Administrative Law Judge will continue to proceed through the sequential evaluation process to determine whether or not claimant has the residual functional capacity to perform some other less strenuous tasks than in her prior jobs.

At Step 5, the burden of proof shifts to the department to establish that claimant does not have residual functional capacity.

The residual functional capacity is what an individual can do despite limitations. All impairments will be considered in addition to ability to meet certain demands of jobs in the national economy. Physical demands, mental demands, sensory requirements and other functions will be evaluated.... 20 CFR 416.945(a).

To determine the physical demands (exertional requirements) of work in the national economy, we classify jobs as sedentary, light, medium and heavy. These terms have the same meaning as they have in the *Dictionary of Occupational Titles*, published by the Department of Labor... 20 CFR 416.967.

Sedentary work. Sedentary work involves lifting no more than 10 pounds at a time and occasionally lifting or carrying articles like docket files, ledgers, and small tools. Although a sedentary job is defined as one which involves sitting, a certain amount of walking and standing is often necessary in carrying out job duties. Jobs are sedentary if walking and standing are required occasionally and other sedentary criteria are met. 20 CFR 416.967(a).

Light work. Light work involves lifting no more than 20 pounds at a time with frequent lifting or carrying of objects weighing up to 10 pounds. Even though the weight lifted may be very little, a job is in this category when it requires a good deal of walking or standing, or when it involves sitting most of the time with some pushing and pulling of arm or leg controls.... 20 CFR 416.967(b).

Claimant has submitted insufficient objective medical evidence that she lacks the residual functional capacity to perform some other less strenuous tasks than in her prior employment or that she is physically unable to do light or sedentary tasks if demanded of her. Claimant's activities of daily living do not appear to be very limited and she should be able to perform light or sedentary work even with her impairments. Claimant has failed to provide the necessary objective medical evidence to establish that she has a severe impairment or combination of impairments which prevent her from performing

any level of work for a period of 12 months. The claimant's testimony as to her limitations indicates that she should be able to perform light or sedentary work.

There is insufficient objective medical/psychiatric evidence contained in the file of depression or a cognitive dysfunction that is so severe that it would prevent claimant from working at any job. Claimant was able to answer all the questions at the hearing and was responsive to the questions. Claimant was oriented to time, person and place during the hearing. Claimant's complaints of pain, while profound and credible, are out of proportion to the objective medical evidence contained in the file as it relates to claimant's ability to perform work. Therefore, this Administrative Law Judge finds that the objective medical evidence on the record does not establish that claimant has no residual functional capacity. Claimant is disqualified from receiving disability at Step 5 based upon the fact that she has not established by objective medical evidence that she cannot perform light or sedentary work even with her impairments. Under the Medical-Vocational guidelines, a younger individual (age 49), with a less than high school education and an unskilled work history who is limited to light work is not considered disabled pursuant to Medical Vocation Rule 202.17.

It should be noted that claimant continues to smoke despite the fact that her doctor has told her to quit. Claimant is not in compliance with her treatment program.

If an individual fails to follow prescribed treatment which would be expected to restore their ability to engage in substantial activity without good cause there will not be a finding of disability.... 20 CFR 416.994(b)(4)(iv).

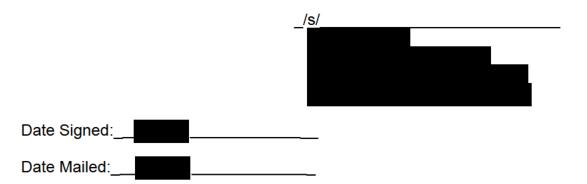

The department's Program Eligibility Manual contains the following policy statements and instructions for caseworkers regarding the State Disability Assistance program: to receive State Disability Assistance, a person must be disabled, caring for a disabled person or age 65 or older. BEM, Item 261, p. 1. Because the claimant does not meet the definition of disabled under the MA-P program and because the evidence of record does not establish that claimant is unable to work for a period exceeding 90 days, the claimant does not meet the disability criteria for State Disability Assistance benefits either.

The Department has established by the necessary competent, material and substantial evidence on the record that it was acting in compliance with department policy when it determined that claimant was not eligible to receive Medical Assistance and/or State Disability Assistance.

DECISION AND ORDER

The Administrative Law Judge, based upon the above findings of fact and conclusions of law, decides that the department has appropriately established on the record that it was acting in compliance with department policy when it denied claimant's application for Medical Assistance, retroactive Medical Assistance and State Disability Assistance benefits. The claimant should be able to perform a wide range of light or sedentary work even with her impairments. The department has established its case by a preponderance of the evidence.

Accordingly, the department's decision is AFFIRMED.

NOTICE: Administrative Hearings may order a rehearing or reconsideration on either its own motion or at the request of a party within 30 days of the mailing date of this Decision and Order. Administrative Hearings will not order a rehearing or reconsideration on the Department's motion where the final decision cannot be implemented within 90 days of the filing of the original request.

The Claimant may appeal the Decision and Order to Circuit Court within 30 days of the mailing of the Decision and Order or, if a timely request for rehearing was made, within 30 days of the receipt date of the rehearing decision.
