

STATE OF MICHIGAN  
STATE OFFICE OF ADMINISTRATIVE HEARINGS AND RULES

ADMINISTRATIVE HEARINGS FOR THE  
DEPARTMENT OF HUMAN SERVICES

IN THE MATTER OF: [REDACTED]

Claimant

Reg. No.: 2010-15437  
Issue No.: 2009/4031  
Case No.: [REDACTED]  
Load No.: [REDACTED]  
Hearing Date:  
March 25, 2010  
Oakland County DHS (3)

ADMINISTRATIVE LAW JUDGE: Colleen M. Mamelka

HEARING DECISION

This matter is before the undersigned Administrative Law Judge pursuant to MCL 400.9 and MCL 400.37 upon the Claimant's request for a hearing. After due notice, a telephone hearing was conducted from Detroit, Michigan on Thursday, March 25, 2010. The Claimant appeared and testified. [REDACTED] and [REDACTED] appeared on behalf of the Department.

ISSUE

Whether the Department properly determined that the Claimant was not disabled for purposes of Medical Assistance ("MA-P") and State Disability Assistance ("SDA") benefit programs?

FINDINGS OF FACT

The Administrative Law Judge, based on the competent, material and substantial evidence on the whole record, finds as material fact:

1. The Claimant submitted an application for public assistance seeking MA-P and SDA benefits on April 9, 2009.

2. On September 23, 2009, the Medical Review Team (“MRT”) determined the Claimant was not disabled for purposes of the MA-P and SDA benefit programs. (Exhibit 1, pp. 1, 2)
3. On October 6, 2009, the Department sent an Eligibility Notice to the Claimant informing him that he was found not disabled. (Exhibit 3)
4. On October 22, 2009, the Department received the Claimant’s timely written Request for Hearing. (Exhibit 3)
5. On January 28, 2010, the State Hearing Review Team (“SHRT”) determined that the Claimant was not disabled. (Exhibit 4)
6. The Claimant’s alleged physical disabling impairment(s) are due to chronic back and knee pain, osteoarthritis, cluster headaches, bursitis, and tendonitis.
7. The Claimant’s alleged mental impairment(s) are due to major depression.
8. At the time of hearing, the Claimant was 49 years old with a [REDACTED] birth date; was 5’11” in height; and weighed 190 pounds.
9. The Claimant earned an Associates Degree and has an employment history as a general laborer and Refrigeration Service Technician.

#### CONCLUSIONS OF LAW

The Medical Assistance (“MA”) program is established by Subchapter XIX of Chapter 7 of The Public Health & Welfare Act, 42 USC 1397, and is administered by the Department of Human Services (“DHS”), formerly known as the Family Independence Agency, pursuant to MCL 400.10 *et seq* and MCL 400.105. Department policies are found in the Bridges Administrative Manual (“BAM”), the Bridges Eligibility Manual (“BEM”), and the Bridges Program Glossary (“BPG”).

Disability is defined as the inability to do any substantial gainful activity by reason of any medically determinable physical or mental impairment which can be expected to result in death or which has lasted or can be expected to last for a continuous period of not less than 12 months. 20 CFR 416.905(a) The person claiming a physical or mental disability has the burden to establish it through the use of competent medical evidence from qualified medical sources such as his or her medical history, clinical/laboratory findings, diagnosis/prescribed treatment, prognosis for recovery and/or medical assessment of ability to do work-related activities or ability to reason and make appropriate mental adjustments, if a mental disability is alleged. 20 CFR 413.913 An individual's subjective pain complaints are not, in and of themselves, sufficient to establish disability. 20 CFR 416.908; 20 CFR 416.929(a) Similarly, conclusory statements by a physician or mental health professional that an individual is disabled or blind, absent supporting medical evidence, is insufficient to establish disability. 20 CFR 416.927

When determining disability, the federal regulations require several factors to be considered including: (1) the location/duration/frequency/intensity of an applicant's pain; (2) the type/dosage/effectiveness/side effects of any medication the applicant takes to relieve pain; (3) any treatment other than pain medication that the applicant has received to relieve pain; and (4) the effect of the applicant's pain on his or her ability to do basic work activities. 20 CFR 416.929(c)(3) The applicant's pain must be assessed to determine the extent of his or her functional limitation(s) in light of the objective medical evidence presented. 20 CFR 416.929(c)(2)

In order to determine whether or not an individual is disabled, federal regulations require a five-step sequential evaluation process be utilized. 20 CFR 416.920(a)(1) The five-step analysis requires the trier of fact to consider an individual's current work activity; the severity of

the impairment(s) both in duration and whether it meets or equals a listed impairment in Appendix 1; residual functional capacity to determine whether an individual can perform past relevant work; and residual functional capacity along with vocational factors (i.e. age, education, and work experience) to determine if an individual can adjust to other work. 20 CFR 416.920(a)(4); 20 CFR 416.945

If an individual is found disabled, or not disabled, at any step, a determination or decision is made with no need evaluate subsequent steps. 20 CFR 416.920(a)(4) If a determination cannot be made that an individual is disabled, or not disabled, at a particular step, the next step is required. 20 CFR 416.920(a)(4) If an impairment does not meet or equal a listed impairment, an individual's residual functional capacity is assessed before moving from step three to step four. 20 CFR 416.920(a)(4); 20 CFR 416.945 Residual functional capacity is the most an individual can do despite the limitations based on all relevant evidence. 20 CFR 945(a)(1) An individual's residual functional capacity assessment is evaluated at both steps four and five. 20 CFR 416.920(a)(4) In determining disability, an individual's functional capacity to perform basic work activities is evaluated and if found that the individual has the ability to perform basic work activities without significant limitation, disability will not be found. 20 CFR 416.994(b)(1)(iv) In general, the individual has the responsibility to prove disability. 20 CFR 416.912(a) An impairment or combination of impairments is not severe if it does not significantly limit an individual's physical or mental ability to do basic work activities. 20 CFR 416.921(a) The individual has the responsibility to provide evidence of prior work experience; efforts to work; and any other factor showing how the impairment affects the ability to work. 20 CFR 416.912(c)(3)(5)(6)

In addition to the above, when evaluating mental impairments, a special technique is utilized. 20 CFR 416.920a(a) First, an individual's pertinent symptoms, signs, and laboratory findings are evaluated to determine whether a medically determinable mental impairment exists. 20 CFR 416.920a(b)(1) When a medically determinable mental impairment is established, the symptoms, signs and laboratory findings that substantiate the impairment are documented to include the individual's significant history, laboratory findings, and functional limitations. 20 CFR 416.920a(e)(2) Functional limitation(s) is assessed based upon the extent to which the impairment(s) interferes with an individual's ability to function independently, appropriately, effectively, and on a sustained basis. *Id.*; 20 CFR 416.920a(c)(2) Chronic mental disorders, structured settings, medication, and other treatment and the effect on the overall degree of functionality is considered. 20 CFR 416.920a(c)(1) In addition, four broad functional areas (activities of daily living; social functioning; concentration, persistence or pace; and episodes of decompensation) are considered when determining an individual's degree of functional limitation. 20 CFR 416.920a(c)(3) The degree of limitation for the first three functional areas is rated by a five point scale: none, mild, moderate, marked, and extreme. 20 CFR 416.920a(c)(4) A four point scale (none, one or two, three, four or more) is used to rate the degree of limitation in the fourth functional area. *Id.* The last point on each scale represents a degree of limitation that is incompatible with the ability to do any gainful activity. *Id.*

After the degree of functional limitation is determined, the severity of the mental impairment is determined. 20 CFR 416.920a(d) If severe, a determination of whether the impairment meets or is the equivalent of a listed mental disorder is made. 20 CFR 416.920a(d)(2) If the severe mental impairment does not meet (or equal) a listed impairment, an individual's residual functional capacity is assessed. 20 CFR 416.920a(d)(3)

As outlined above, the first step looks at the individual's current work activity. In the record presented, the Claimant is not involved in substantial gainful activity therefore is not ineligible for disability under Step 1.

The severity of the Claimant's alleged impairment(s) is considered under Step 2. The Claimant bears the burden to present sufficient objective medical evidence to substantiate the alleged disabling impairments. In order to be considered disabled for MA purposes, the impairment must be severe. 20 CFR 916.920(a)(4)(ii); 20 CFR 916.920(b) An impairment, or combination of impairments, is severe if it significantly limits an individual's physical or mental ability to do basic work activities regardless of age, education and work experience. 20 CFR 916.920(a)(4)(ii); 20 CFR 916.920(c) Basic work activities means the abilities and aptitudes necessary to do most jobs. 20 CFR 916.921(b) Examples include:

1. Physical functions such as walking, standing, sitting, lifting, pushing, pulling, reaching, carrying, or handling;
2. Capacities for seeing, hearing, and speaking;
3. Understanding, carrying out, and remembering simple instructions;
4. Use of judgment;
5. Responding appropriately to supervision, co-workers and usual work situations; and
6. Dealing with changes in a routine work setting.

*Id.* The second step allows for dismissal of a disability claim obviously lacking in medical merit. *Higgs v Bowen*, 880 F2d 860, 862 (CA 6, 1988). The severity requirement may still be employed as an administrative convenience to screen out claims that are totally groundless solely from a medical standpoint. *Id.* at 863 citing *Farris v Sec of Health and Human Services*, 773 F2d 85, 90 n.1 (CA 6, 1985) An impairment qualifies as non-severe only if, regardless of a

claimant's age, education, or work experience, the impairment would not affect the claimant's ability to work. *Salmi v Sec of Health and Human Services*, 774 F2d 685, 692 (CA 6, 1985)

In the present case, the Claimant alleges disability due to chronic back and knee pain, osteoarthritis, cluster headaches, bursitis, tendonitis, and depression.

On [REDACTED], the Claimant attended a psychiatric evaluation. The Claimant was diagnosed with major depressive disorder, recurrent, moderate, with polysubstance dependence noting the drug of choice as crack cocaine. The Claimant's Global Assessment Functioning ("GAF") was 45.

On [REDACTED], the Claimant attended a consultative physical evaluation. The physical examination of the cervical, dorsal, and lumbosacral spines, clinically, did not reveal any striking abnormalities. There was no paraspinal muscle tenderness or spasms. Crepitus of the right knee with intact motion and morbid pes planus with intact motion of both ankles was noted. The Claimant's grip strength was 110 pounds on the right and 160 pounds on the left. The Claimant was diagnosed with arthralgia, marked pes planus, major depression, and substance abuse. As a result, the physician opined that the Claimant was employable but limited on prolonged standing, walking, and climbing.

On this same date, a Medical Examination Report was completed on behalf of the Claimant. The current diagnoses were arthralgia, marked pes planus, major depression, and substance abuse. The Claimant's condition was stable and he was found able to frequently lift/carry 25 pounds with occasional lifting/carrying of 50 pounds; stand and/or walk about 6 hours during an 8 hour workday with sitting at about 6 hours during this same time period; and able to perform repetitive actions with all extremities.

On [REDACTED], the Claimant attended a Medication Review with the complaints of depression, racing thoughts, and sleep difficulty. The Claimant was compliant with medication and found to be “more stable.” The Claimant’s Global Assessment Functioning (“GAF”) from [REDACTED], was 45. Ultimately, the Claimant was diagnosed with moderate depression with polysubstance dependence.

As previously noted, the Claimant bears the burden to present sufficient objective medical evidence to substantiate the alleged disabling impairment(s). As summarized above, the Claimant has presented some medical evidence establishing that he does have some physical and mental impairment that effect his ability to perform basic work activities. The medical evidence has established that the Claimant has an impairment, or combination thereof, that has more than a *de minimis* effect on the Claimant’s basic work activities. Further, the impairments have lasted continuously for twelve months; therefore, the Claimant is not disqualified from receipt of MA-P benefits under Step 2.

In the third step of the sequential analysis of a disability claim, the trier of fact must determine if the Claimant’s impairment, or combination of impairments, is listed in Appendix 1 of Subpart P of 20 CFR, Part 404. The Claimant has alleged physical and mental disabling impairment(s) due to chronic back and knee pain, osteoarthritis, cluster headaches, bursitis, tendonitis, and depression

Listing 1.00 defines musculoskeletal system impairments. Disorders of the musculoskeletal system may result from hereditary, congenital, or acquired pathologic processes. 1.00A Impairments may result from infectious, inflammatory, or degenerative processes, traumatic or developmental events, or neoplastic, vascular, or toxic/metabolic diseases. 1.00A Regardless of the cause(s) of a musculoskeletal impairment, functional loss for purposes of these

listings is defined as the inability to ambulate effectively on a sustained basis for any reason, including pain associated with the underlying musculoskeletal impairment, or the inability to perform fine and gross movements effectively on a sustained basis for any reason, including pain associated with the underlying musculoskeletal impairment. Inability to ambulate effectively means an extreme limitation of the ability to walk; i.e., an impairment(s) that interferes very seriously with the individual's ability to independently initiate, sustain, or complete activities.

1.00B2b(1) Ineffective ambulation is defined generally as having insufficient lower extremity function to permit independent ambulation without the use of a hand-held assistive device(s) that limits the functioning of both upper extremities. (Listing 1.05C is an exception to this general definition because the individual has the use of only one upper extremity due to amputation of a hand.) *Id.* To ambulate effectively, individuals must be capable of sustaining a reasonable walking pace over a sufficient distance to be able to carry out activities of daily living.

1.00B2b(2) They must have the ability to travel without companion assistance to and from a place of employment or school. . . . *Id.* When an individual's impairment involves a lower extremity uses a hand-held assistive device, such as a cane, crutch or walker, the medical basis for use of the device should be documented. 1.00J4 The requirement to use a hand-held assistive device may also impact an individual's functional capacity by virtue of the fact that one or both upper extremities are not available for such activities as lifting, carrying, pushing, and pulling. *Id.*

Categories of Musculoskeletal include:

- 1.02 Major dysfunction of a joint(s) due to any cause: Characterized by gross anatomical deformity (e.g. subluxation, contracture, bony or fibrous ankylosis, instability) and chronic joint pain and stiffness with signs of limitation of motion or other abnormal motion of the affected joint(s), and findings on appropriate medically

acceptable imaging of joint space narrowing, bony destruction, or ankylosis of the affected joint(s). With:

- A. Involvement of one major peripheral weight-bearing joint (i.e., hip, knee, or ankle), resulting in inability to ambulate effectively as defined in 1.00B2b; or
- B. Involvement of one major peripheral joint in each upper extremity (i.e., shoulder, elbow, wrist, hand), resulting in inability to perform fine and gross movements effectively a defined in 1.00B2c

\* \* \*

- 1.04 Disorders of the spine (e.g., herniated nucleus pulposus, spinal arachnoiditis, spinal stenosis, osteoarthritis, degenerative disc disease, facet arthritis, and vertebral fracture), resulting in compromise of a nerve root (including the cauda equine) or spinal cord. With:
- A. Evidence of nerve root compression characterized by neuro-anatomic distribution of pain, limitation of motion of the spine, motor loss (atrophy with associated muscle weakness or muscle weakness) accompanied by sensory or reflex loss and, if there is involvement of the lower back, positive straight-leg raising test (sitting and supine); or
  - B. Spinal arachnoiditis, confirmed by an operative note or pathology report of tissue biopsy, or by appropriate medically acceptable imaging, manifested by severe burning or painful dysesthesia, resulting in the need for changes in position or posture more than once every 2 hours; or
  - C. Lumbar spinal stenosis resulting in pseudoclaudication, established by findings on appropriate medically acceptable imaging, manifested by chronic nonradicular pain and weakness, and resulting in inability to ambulate effectively, as defined in 1.00B2b. (see above definition)

In this case, the objective findings document joint pain, crepitus of the right knee (with intact motion), and fallen arch. Despite these diagnoses, the Claimant's ability to walk, sit, lift, carry, push, and pull was not significantly limited. There was no evidence of a major joint dysfunction or of nerve root compression/impingement, spinal arachnoiditis, and/or lumbar spinal stenosis. Instead, the Claimant was found able to perform the equivalent of light to

medium work. Accordingly, the Claimant cannot be found disabled, or not disabled, under a listed impairment within 1.00 as detailed above.

The Claimant testified that he suffers from cluster headaches however there were no objective findings to establish this impairment. Regardless, Listing 11.00 was considered and it is found that the Claimant's impairment does not meet the intent and severity requirement necessary to support a finding of disabled under a neurological impairment. Accordingly, the Claimant cannot be found disabled under this listing.

The Claimant also asserts mental disabling impairment(s) due to depression. Listing 12.00 encompasses adult mental disorders. The evaluation of disability on the basis of mental disorders requires documentation of a medically determinable impairment(s) and consideration of the degree in which the impairment limits the individual's ability to work, and whether these limitations have lasted or are expected to last for a continuous period of at least 12 months. 12.00A The existence of a medically determinable impairment(s) of the required duration must be established through medical evidence consisting of symptoms, signs, and laboratory findings, to include psychological test findings. 12.00B The evaluation of disability on the basis of a mental disorder requires sufficient evidence to (1) establish the presence of a medically determinable mental impairment(s), (2) assess the degree of functional limitation the impairment(s) imposes, and (3) project the probable duration of the impairment(s). 12.00D The evaluation of disability on the basis of mental disorders requires documentation of a medically determinable impairment(s) and consideration of the degree in which the impairment limits the individual's ability to work consideration, and whether these limitations have lasted or are expected to last for a continuous period of at least 12 months. 12.00A The severity requirement is measured according to the functional limitations imposed by the medically determinable

mental impairment. 12.00C Functional limitations are assessed in consideration of an individual's activities of daily living; social functioning; concentration, persistence, or pace; and episodes of decompensation. *Id.*

Listing 12.04 defines affective disorders as being characterized by a disturbance of mood, accompanied by a full or partial manic or depressive syndrome. Generally, affective disorders involve either depression or elation. The required level of severity for these disorders are met when the requirements of both A and B are satisfied, or when the requirements in C are satisfied.

A. Medically documented persistence, either continuous or intermittent, of one of the following:

1. Depressive syndrome characterized by at least four of the following:
  - a. Anhedonia or pervasive loss of interest in almost all activities; or
  - b. Appetite disturbance with change in weight; or
  - c. Sleep disturbance; or
  - d. Psychomotor agitation or retardation; or
  - e. Decreased energy; or
  - f. Feelings of guilt or worthlessness; or
  - g. Difficulty concentrating or thinking; or
  - h. Thoughts of suicide; or
  - i. Hallucinations, delusions, or paranoid thinking; or
2. Manic syndrome characterized by at least three of the following:
  - a. Hyperactivity; or
  - b. Pressure of speech; or
  - c. Flight of ideas; or
  - d. Inflated self-esteem; or
  - e. Decreased need for sleep; or
  - f. Easy distractability; or
  - g. Involvement in activities that have a high probability of painful consequences which are not recognized; or

- h. Hallucinations, delusions, or paranoid thinking; or
    - 3. Bipolar syndrome with a history of episodic periods manifested by the full symptomatic picture of both manic and depressive syndromes (and currently characterized by either or both syndromes)
- AND
- B. Resulting in at least two of the following:
  - 1. Marked restriction on activities of daily living; or
  - 2. Marked difficulties in maintaining social functioning; or
  - 3. Marked difficulties in maintaining concentration, persistence, or pace; or
  - 4. Repeated episodes of decompensation, each of extended duration;
- OR
- C. Medically documented history of chronic affective disorder of at least 2 years' duration that has caused more than a minimal limitation of ability to do basic work activities, with symptoms or signs currently attenuated by medication or psychosocial support, and one of the following:
  - 1. Repeated episodes of decompensation, each of extended duration; or
  - 2. A residual disease process that has resulted in such marginal adjustment that even minimal increase in mental demands or change in the environment would be predicted to cause the individual to decompensate; or
  - 3. Current history of 1 or more years' inability to function outside a highly supportive living arrangement, with an indication of continued need for such an arrangement.

In this case, the Claimant was diagnosed with major depressive disorder, recurrent, moderate with polysubstance abuse. The most recent evaluation (September 2009) found the Claimant compliant with his medication and more stable. There was no evidence necessary to support a finding of disabled under a listing impairment as detailed above. Accordingly, the Claimant cannot be found disabled, or not disabled, at Step 3 therefore the Claimant's eligibility is considered under Step 4. 20 CFR 416.905(a)

The fourth step in analyzing a disability claim requires an assessment of the Claimant's residual functional capacity ("RFC") and past relevant employment. 20 CFR 416.920(a)(4)(iv) An individual is not disabled if he/she can perform past relevant work. *Id.*; 20 CFR 416.960(b)(3) Past relevant work is work that has been performed within the past 15 years that was a substantial gainful activity and that lasted long enough for the individual to learn the position. 20 CFR 416.960(b)(1) Vocational factors of age, education, and work experience, and whether the past relevant employment exists in significant numbers in the national economy is not considered. 20 CFR 416.960(b)(3) RFC is assessed based on impairment(s), and any related symptoms, such as pain, which may cause physical and mental limitations that affect what can be done in a work setting. RFC is the most that can be done, despite the limitations.

To determine the physical demands (exertional requirements) of work in the national economy, jobs are classified as sedentary, light, medium, heavy, and very heavy. 20 CFR 416.967 Sedentary work involves lifting of no more than 10 pounds at a time and occasionally lifting or carrying articles like docket files, ledgers, and small tools. 20 CFR 416.967(a) Although a sedentary job is defined as one which involves sitting, a certain amount of walking and standing is often necessary in carrying out job duties. *Id.* Jobs are sedentary if walking and standing are required occasionally and other sedentary criteria are met. Light work involves lifting no more than 20 pounds at a time with frequent lifting or carrying objects weighing up to 10 pounds. 20 CFR 416.967(b) Even though weight lifted may be very little, a job is in this category when it requires a good deal of walking or standing, or when it involves sitting most of the time with some pushing and pulling of arm or leg controls. *Id.* To be considered capable of performing a full or wide range of light work, an individual must have the ability to do substantially all of these activities. *Id.* An individual capable of light work is also capable of

sedentary work, unless there are additionally limiting factors such as loss of fine dexterity or inability to sit for long periods of time. *Id.* Medium work involves lifting no more than 50 pounds at a time with frequent lifting or carrying of objects weighing up to 25 pounds. 20 CFR 416.967(c) An individual capable of performing medium work is also capable of light and sedentary work. *Id.* Heavy work involves lifting no more than 100 pounds at a time with frequent lifting or carrying of objects weighing up to 50 pounds. 20 CFR 416.967(d) An individual capable of heavy work is also capable of medium, light, and sedentary work. *Id.* Finally, very heavy work involves lifting objects weighing more than 100 pounds at a time with frequent lifting or carrying objects weighing 50 pounds or more. 20 CFR 416.967(e) An individual capable of very heavy work is able to perform work under all categories. *Id.*

Limitations or restrictions which affect the ability to meet the demands of jobs other than strength demands (exertional requirements, i.e. sitting, standing, walking, lifting, carrying, pushing, or pulling) are considered nonexertional. 20 CFR 416.969a(a) In considering whether an individual can perform past relevant work, a comparison of the individual's residual functional capacity with the demands of past relevant work. *Id.* If an individual can no longer do past relevant work the same residual functional capacity assessment along with an individual's age, education, and work experience is considered to determine whether an individual can adjust to other work which exists in the national economy. *Id.* Examples of non-exertional limitations or restrictions include difficulty function due to nervousness, anxiousness, or depression; difficulty maintaining attention or concentration; difficulty understanding or remembering detailed instructions; difficulty in seeing or hearing; difficulty tolerating some physical feature(s) of certain work settings (i.e. can't tolerate dust or fumes); or difficulty performing the manipulative or postural functions of some work such as reaching, handling,

stooping, climbing, crawling, or crouching. 20 CFR 416.969a(c)(1)(i) – (vi) If the impairment(s) and related symptoms, such as pain, only affect the ability to perform the non-exertional aspects of work-related activities, the rules in Appendix 2 do not direct factual conclusions of disabled or not disabled. 20 CFR 416.969a(c)(2) The determination of whether disability exists is based upon the principles in the appropriate sections of the regulations, giving consideration to the rules for specific case situations in Appendix 2. *Id.*

The Claimant's previously worked as a general laborer and refrigeration service technician. In light of the Claimant's testimony and in consideration of the Occupational Code, the Claimant's employment as a general laborer is considered unskilled medium work while the Claimant's employment as a refrigeration service technician is considered semi-skilled/skilled, heavy work.

The Claimant testified that he can walk approximately one hundred yards; can sit/stand for about one hour; can lift/carry about 40 pounds; and has difficulty squatting but is able to bend. The medical records find the Claimant able to frequently lift/carry 25 pounds with occasional lifting/carrying of 50 pounds; standing and/or walking about 6 hours during an 8 hour workday with sitting at around 6 hours during this same time span. The Claimant is able to perform repetitive actions with all extremities. If the impairment or combination of impairments does not limit physical or mental ability to do basic work activities, it is not a severe impairment(s) and disability does not exist. 20 CFR 416.920 In consideration of the Claimant's testimony, medical records, and current limitations, it is found that the Claimant is not able to return to past relevant work as a refrigeration service technician and may encounter some difficulties working as a general laborer performing medium/heavy work thus the fifth step in the sequential evaluation is required.

In Step 5, an assessment of the individual's residual functional capacity and age, education, and work experience is considered to determine whether an adjustment to other work can be made. 20 CFR 416.920(4)(v) At the time of hearing, the Claimant was 49 years old thus considered a younger individual for MA-P purposes. The Claimant also earned an Associates Degree in Applied Science. Disability is found disabled if an individual is unable to adjust to other work. *Id.* At this point in the analysis, the burden shifts from the Claimant to the Department to present proof that the Claimant has the residual capacity to substantial gainful employment. 20 CFR 416.960(2); *Richardson v Sec of Health and Human Services*, 735 F2d 962, 964 (CA 6, 1984). While a vocational expert is not required, a finding supported by substantial evidence that the individual has the vocational qualifications to perform specific jobs is needed to meet the burden. *O'Banner v Sec of Health and Human Services*, 587 F2d 321, 323 (CA 6, 1978). Medical-Vocational guidelines found at 20 CFR Subpart P, Appendix II, may be used to satisfy the burden of proving that the individual can perform specific jobs in the national economy. *Heckler v Campbell*, 461 US 458, 467 (1983); *Kirk v Secretary*, 667 F2d 524, 529 (CA 6, 1981) *cert den* 461 US 957 (1983).

In the record presented, the Claimant is found able to perform the full range of activities necessary for light work as defined in 20 CFR 416.967(b) After review of the entire record finding no contradiction with the Claimant's mental impairment(s) and in consideration of the Medical-Vocational Guidelines [20 CFR 404, Subpart P, Appendix II], specifically Rule 202.20 and 202.22, the Claimant is found not disabled at Step 5 for purposes of the MA-P program.

The State Disability Assistance ("SDA") program, which provides financial assistance for disabled persons, was established by 2004 PA 344. DHS administers the SDA program pursuant to MCL 400.10 et seq. and Michigan Administrative Code ("MAC R") 400.3151 –

400.3180. Department policies are found in BAM, BEM, and BPG. A person is considered disabled for SDA purposes if the person has a physical or mental impairment which meets federal SSI disability standards for at least ninety days. Receipt of SSI or RSDI benefits based on disability or blindness, or the receipt of MA benefits based on disability or blindness (MA-P) automatically qualifies an individual as disabled for purposes of the SDA program.

In this case, the Claimant is found not disabled for purposes of the Medical Assistance (“MA-P”) program, therefore the Claimant’s is found not disabled for purposes of SDA benefits.

DECISION AND ORDER

The Administrative Law Judge, based upon the findings of fact and conclusions of law, finds the Claimant not disabled for purposes of the Medical Assistance program and the State Disability Assistance program.

It is ORDERED:

The Department’s determination is AFFIRMED.

*Colleen M. Mamelka*

Colleen M. Mamelka  
Administrative Law Judge  
For Ishmael Ahmed, Director  
Department of Human Services

Date Signed: 4/13/2010

Date Mailed: 4/13/2010

**NOTICE:** Administrative Hearings may order a rehearing or reconsideration on either its own motion or at the request of a party within 30 days of the mailing date of this Decision and Order. Administrative hearings will not order a rehearing or reconsideration on the Department’s motion where the final decision cannot be implemented within 90 days of the filing of the original request.

The Claimant may appeal the Decision and Order to the Circuit within 30 days of the receipt of the Decision and Order or, if a timely request for rehearing was made, within 30 days of the receipt date of the rehearing decision.
