

**STATE OF MICHIGAN**  
**STATE OFFICE OF ADMINISTRATIVE HEARINGS AND RULES**  
**ADMINISTRATIVE HEARINGS FOR THE**  
**DEPARTMENT OF HUMAN SERVICES**

**IN THE MATTER OF:**

[REDACTED]

Reg. No.: 2010-17256  
Issue No.: 2009  
Case No.: [REDACTED]  
Load No.: [REDACTED]  
Hearing Date: March 11, 2010  
Macomb County DHS (12)

**ADMINISTRATIVE LAW JUDGE:** Colleen M. Mamelka

**HEARING DECISION**

This matter is before the undersigned Administrative Law Judge pursuant to MCL 400.9 and MCL 400.37 upon the Claimant's request for a hearing. After due notice, a hearing was held in Clinton Township, Michigan on Thursday, March 11, 2010. The Claimant appeared, along with Ronald Oxendine, and testified. The Claimant was represented by [REDACTED] of [REDACTED]. [REDACTED] appeared on behalf of the Department. [REDACTED] observed the proceedings.

During the hearing, the Claimant waived the time frame for the issuance of this decision in order to allow for the submission of additional medical evidence. The new evidence was received, reviewed, and entered as Exhibits 6 and 7. This matter is now before the undersigned for a final decision.

**ISSUE**

Whether the Department properly determined that the Claimant was not disabled for purposes of the Medical Assistance ("MA-P") benefit program?

**FINDINGS OF FACT**

The Administrative Law Judge, based upon the competent, material, and substantial evidence on the whole record, finds as material fact:

1. The Claimant submitted an application for public assistance seeking MA-P benefits on April 6, 2009.
2. On October 28, 2009, the Medical Review Team ("MRT") found the Claimant not disabled. (Exhibit 1, pp. 39, 40)

3. On November 5, 2009, the Department sent an Eligibility Notice to the Claimant informing him of the MRT decision. (Exhibit 2)
4. On January 12, 2010, the Department received the Claimant's timely written request for hearing. (Exhibit 3)
5. On February 10, 2010, the State Hearing Review Team ("SHRT") found the Claimant not disabled. (Exhibit 5)
6. The Claimant alleged physical disabling impairments due to shoulder pain, back pain, and shortness of breath due to smoke inhalation.
7. The Claimant has not alleged any mental disabling impairment(s).
8. At the time of hearing, the Claimant was 25 years old with a [REDACTED] birth date; was 5'11" in height; and weighed 180 pounds.
9. The Claimant is a high school graduate with some college and an employment history waiting on customers in a meat department, in landscaping/snow removal, at a car wash, and as a porter.

### **CONCLUSIONS OF LAW**

The Medical Assistance ("MA") program is established by Subchapter XIX of Chapter 7 of The Public Health & Welfare Act, 42 USC 1397, and is administered by the Department of Human Services ("DHS"), formerly known as the Family Independence Agency, pursuant to MCL 400.10 *et seq* and MCL 400.105. Department policies are found in the Bridges Administrative Manual ("BAM"), the Bridges Eligibility Manual ("BEM"), and the Bridges Reference Manual ("BRM").

Disability is defined as the inability to do any substantial gainful activity by reason of any medically determinable physical or mental impairment which can be expected to result in death or which has lasted or can be expected to last for a continuous period of not less than 12 months. 20 CFR 416.905(a) The person claiming a physical or mental disability has the burden to establish it through the use of competent medical evidence from qualified medical sources such as his or her medical history, clinical/laboratory findings, diagnosis/prescribed treatment, prognosis for recovery and/or medical assessment of ability to do work-related activities or ability to reason and make appropriate mental adjustments, if a mental disability is alleged. 20 CFR 413.913 An individual's subjective pain complaints are not, in and of themselves, sufficient to establish disability. 20 CFR 416.908; 20 CFR 416.929(a) Similarly, conclusory statements by a physician or mental health professional that an individual is disabled or

blind, absent supporting medical evidence, is insufficient to establish disability. 20 CFR 416.927

When determining disability, the federal regulations require several factors to be considered including: (1) the location/duration/frequency/intensity of an applicant's pain; (2) the type/dosage/effectiveness/side effects of any medication the applicants takes to relieve pain; (3) any treatment other than pain medication that the applicant has received to relieve pain; and (4) the effect of the applicant's pain on his or her ability to do basic work activities. 20 CFR 416.929(c)(3) The applicant's pain must be assessed to determine the extent of his or her functional limitation(s) in light of the objective medical evidence presented. 20 CFR 416.929(c)(2)

In order to determine whether or not an individual is disabled, federal regulations require a five-step sequential evaluation process be utilized. 20 CFR 416.920(a)(1) The five-step analysis requires the trier of fact to consider an individual's current work activity; the severity of the impairment(s) both in duration and whether it meets or equals a listed impairment in Appendix 1; residual functional capacity to determine whether an individual can perform past relevant work; and residual functional capacity along with vocational factors (i.e. age, education, and work experience) to determine if an individual can adjust to other work. 20 CFR 416.920(a)(4); 20 CFR 416.945

If an individual is found disabled, or not disabled, at any step, a determination or decision is made with no need evaluate subsequent steps. 20 CFR 416.920(a)(4) If a determination cannot be made that an individual is disabled, or not disabled, at a particular step, the next step is required. 20 CFR 416.920(a)(4) If an impairment does not meet or equal a listed impairment, an individual's residual functional capacity is assessed before moving from step three to step four. 20 CFR 416.920(a)(4); 20 CFR 416.945 Residual functional capacity is the most an individual can do despite the limitations based on all relevant evidence. 20 CFR 945(a)(1) An individual's residual functional capacity assessment is evaluated at both steps four and five. 20 CFR 416.920(a)(4) In determining disability, an individual's functional capacity to perform basic work activities is evaluated and if found that the individual has the ability to perform basic work activities without significant limitation, disability will not be found. 20 CFR 416.994(b)(1)(iv) In general, the individual has the responsibility to prove disability. 20 CFR 416.912(a) An impairment or combination of impairments is not severe if it does not significantly limit an individual's physical or mental ability to do basic work activities. 20 CFR 416.921(a) The individual has the responsibility to provide evidence of prior work experience; efforts to work; and any other factor showing how the impairment affects the ability to work. 20 CFR 416.912(c)(3)(5)(6)

As outlined above, the first step looks at the individual's current work activity. In the record presented, the Claimant is not involved in substantial gainful activity therefore is not ineligible for disability benefits under Step 1.

The severity of the Claimant's alleged impairment(s) is considered under Step 2. The Claimant bears the burden to present sufficient objective medical evidence to substantiate the alleged disabling impairments. In order to be considered disabled for MA purposes, the impairment must be severe. 20 CFR 916.920(a)(4)(ii); 20 CFR 916.920(b) An impairment, or combination of impairments, is severe if it significantly limits an individual's physical or mental ability to do basic work activities regardless of age, education and work experience. 20 CFR 916.920(a)(4)(ii); 20 CFR 916.920(c) Basic work activities means the abilities and aptitudes necessary to do most jobs. 20 CFR 916.921(b) Examples include:

1. Physical functions such as walking, standing, sitting, lifting, pushing, pulling, reaching, carrying, or handling;
2. Capacities for seeing, hearing, and speaking;
3. Understanding, carrying out, and remembering simple instructions;
4. Use of judgment;
5. Responding appropriately to supervision, co-workers and usual work situations; and
6. Dealing with changes in a routine work setting.

*Id.* The second step allows for dismissal of a disability claim obviously lacking in medical merit. *Higgs v Bowen*, 880 F2d 860, 862 (CA 6, 1988). The severity requirement may still be employed as an administrative convenience to screen out claims that are totally groundless solely from a medical standpoint. *Id.* at 863 *citing Farris v Sec of Health and Human Services*, 773 F2d 85, 90 n.1 (CA 6, 1985) An impairment qualifies as non-severe only if, regardless of a claimant's age, education, or work experience, the impairment would not affect the claimant's ability to work. *Salmi v Sec of Health and Human Services*, 774 F2d 685, 692 (CA 6, 1985)

In the present case, the Claimant alleges disability due to residual complications from smoke inhalation from a house fire and chronic back/shoulder pain.

On [REDACTED], the Claimant was admitted to the hospital after suffering from severe smoke inhalation from a house fire. The Claimant was intubated and transferred to another hospital for hyperbaric treatment. During the course of his stay, eleven bronchoscopies were performed and he eventually underwent a tracheotomy. The Claimant was discharged on [REDACTED] with the diagnosis of inhalation injury.

2010-17256/CMM

On [REDACTED], the Claimant attended a follow-up appointment after some x-rays found possible shoulder fracture or dislocation. After the physical examination, the Claimant was referred to physical therapy to improve his range of motion.

On [REDACTED], the Claimant sought treatment for back pain.

On [REDACTED], a MRI of the thoracic spine revealed degenerative disc disease. A moderate broad based central disc protrusion was noted which indented the thecal sac without gross spinal stenosis or neuroforaminal encroachment. A small central disc bulge/protrusion without spinal stenosis or neuroforaminal narrowing at L5-S1 was also identified.

On [REDACTED], the Claimant sought treatment for back pain.

On [REDACTED], the Claimant sought treatment for back pain.

On [REDACTED], the Claimant sought treatment for back pain.

On [REDACTED], the Claimant presented to the hospital with complaints of back pain. The physical examination revealed some mild muscle pain in the lower paraspinal area. The Claimant was able to bend down and reach his toes without difficulty. Straight leg raising was negative bilaterally. The Claimant was able to walk on his toes and heels without difficulty. Physical therapy was recommended.

On [REDACTED], the Claimant attended a consultative evaluation. The physical examination found the Claimant with a normal gait; able to tandem walk, heel walk, and toe walk; able to squat to 70% of the distance and recover; able to bend 90% and recover; and normal grip strength bilaterally. A pulmonary function test was performed which found the Claimant's lung functioning was normal. The diagnoses were smoke inhalation resulting in shortness of breath on physical exertion and a history of chronic back pain with an MRI documenting degenerative disc disease.

As previously noted, the Claimant bears the burden to present sufficient objective medical evidence to substantiate the alleged disabling impairment(s). As summarized above, the Claimant has presented medical evidence establishing that he does have some physical and mental limitations on his ability to perform basic work activities. The medical evidence has established that the Claimant has an impairment, or combination thereof, that has more than a *de minimis* effect on the Claimant's basic work activities. Further, the impairments have lasted continuously for twelve months; therefore, the Claimant is not disqualified from receipt of MA-P benefits under Step 2.

In the third step of the sequential analysis of a disability claim, the trier of fact must determine if the Claimant's impairment, or combination of impairments, is listed in

Appendix 1 of Subpart P of 20 CFR, Part 404. The Claimant has alleged physical disabling impairments due to residual complications from bilateral upper extremity gunshot wounds and depression.

Listing 1.00 defines musculoskeletal system impairments. Disorders of the musculoskeletal system may result from hereditary, congenital, or acquired pathologic processes. 1.00A Impairments may result from infectious, inflammatory, or degenerative processes, traumatic or developmental events, or neoplastic, vascular, or toxic/metabolic diseases. 1.00A Regardless of the cause(s) of a musculoskeletal impairment, functional loss for purposes of these listings is defined as the inability to ambulate effectively on a sustained basis for any reason, including pain associated with the underlying musculoskeletal impairment, or the inability to perform fine and gross movements effectively on a sustained basis for any reason, including pain associated with the underlying musculoskeletal impairment. 1.00B2a The inability to perform fine and gross movements effectively means an extreme loss of function of both upper extremities. 1.00 B2c In other words, an impairment(s) that interferes very seriously with the individual's ability to independently initiate, sustain, or complete activities. 1.00B2c To use the upper extremities effectively, an individual must be capable of sustaining such functions as reaching, pushing, pulling, grasping, and fingering to be able to carry out activities of daily living. 1.00B2c Examples include the inability to prepare a simple meal, feed oneself, take care of personal hygiene, sort/handle papers/files, or place items in a cabinet at or about the waist level. 1.00B2c Pain or other symptoms are also considered. 1.00B2d

Categories of Musculoskeletal include:

- 1.02 Major dysfunction of a joint(s) due to any cause: Characterized by gross anatomical deformity (e.g. subluxation, contracture, bony or fibrous ankylosis, instability) and chronic joint pain and stiffness with signs of limitation of motion or other abnormal motion of the affected joint(s), and findings on appropriate medically acceptable imaging of joint space narrowing, bony destruction, or ankylosis of the affected joint(s). With:
- A. Involvement of one major peripheral weight-bearing joint (i.e., hip, knee, or ankle), resulting in inability to ambulate effectively as defined in 1.00B2b; or
  - B. Involvement of one major peripheral joint in each upper extremity (i.e., shoulder, elbow, wrist, hand), resulting in inability to perform fine and gross movements effectively as defined in 1.00B2c
- \* \* \*
- 1.04 Disorders of the spine (e.g., herniated nucleus pulposus, spinal arachnoiditis, spinal stenosis, osteoarthritis,

degenerative disc disease, facet arthritis, vertebral fracture), resulting in compromise of a nerve root (including the cauda equine) or spinal cord. With:

- A. Evidence of nerve root compression characterized by neuro-anatomic distribution of pain, limitation of motion of the spine, motor loss (atrophy with associated muscle weakness or muscle weakness) accompanied by sensory or reflex loss and, if there is involvement of the lower back, positive straight-leg raising test (sitting and supine); or
- B. Spinal arachnoiditis, confirmed by an operative note or pathology report of tissue biopsy, or by appropriate medically acceptable imaging, manifested by severe burning or painful dysesthesia, resulting in the need for changes in position or posture more than once every 2 hours; or
- C. Lumbar spinal stenosis resulting in pseudoclaudication, established by findings on appropriate medically acceptable imaging, manifested by chronic nonradicular pain and weakness, and resulting in inability to ambulate effectively, as defined in 1.00B2b. (see above definition)

In this case, the Claimant suffers with chronic back pain due to degenerative disc disease. A MRI revealed disc protrusion however there was not evidence of nerve root compression, spinal arachnoiditis, or lumbar spinal stenosis. Further, there was no evidence that the Claimant was unable to ambulate effectively or evidence of a major joint dysfunction. Ultimately, based on the medical evidence alone, the Claimant's impairment(s) do not meet the intent and severity requirement of a listed impairment within Listing 1.00 as detailed above therefore the Claimant can not be found disabled or not disabled under this listing.

The Claimant alleged disabling impairments due to shortness of breath. Listing defines respiratory system impairments. Respiratory disorders, along with any associated impairment(s), must be established by medical evidence sufficient enough in detail to evaluate the severity of the impairment. 3.00A Evidence must be provided in sufficient detail to permit an independent reviewer to evaluate the severity of the impairment. *Id.* A major criteria for determining the level of respiratory impairments that are episodic in nature, is the frequency and intensity of episodes that occur despite prescribed treatment. 3.00C Attacks of asthma, episodes of bronchitis or pneumonia or hemoptysis (more than blood-streaked sputum), or respiratory failure as referred to in paragraph B of 3.03, 3.04, and 3.07, are defined as prolonged symptomatic episodes lasting one or more days and requiring intensive treatment, such as intravenous

bronchodilator or antibiotic administration or prolonged inhalational bronchodilator therapy in a hospital, emergency room or equivalent setting. 3.00C Hospital admissions are defined as inpatient hospitalizations for longer than 24 hours. *Id.* Medical evidence must include information documenting adherence to a prescribed regimen of treatment as well as a description of physical signs. *Id.*

In this case, the objective evidence confirms the Claimant's diagnosis of shortness of breath however the results of the pulmonary function test showed that the Claimant's lung functioning was normal. Further, although the Claimant uses an inhaler, there was no evidence showing ongoing treatment or hospitalizations as a result. Under these facts, the Claimant's impairment(s) does not meet the intent and severity requirement of a listed impairment within 3.00. Accordingly, the Claimant can not be found disabled, or not disabled under a listing. The Claimant's eligibility is considered under Step 4. 20 CFR 416.905(a)

The fourth step in analyzing a disability claim requires an assessment of the Claimant's residual functional capacity ("RFC") and past relevant employment. 20 CFR 416.920(a)(4)(iv) An individual is not disabled if he/she can perform past relevant work. *Id.*; 20 CFR 416.960(b)(3) Past relevant work is work that has been performed within the past 15 years that was a substantial gainful activity and that lasted long enough for the individual to learn the position. 20 CFR 416.960(b)(1) Vocational factors of age, education, and work experience, and whether the past relevant employment exists in significant numbers in the national economy is not considered. 20 CFR 416.960(b)(3) RFC is assessed based on impairment(s), and any related symptoms, such as pain, which may cause physical and mental limitations that affect what can be done in a work setting. RFC is the most that can be done, despite the limitations.

To determine the physical demands (exertional requirements) of work in the national economy, jobs are classified as sedentary, light, medium, heavy, and very heavy. 20 CFR 416.967 Sedentary work involves lifting of no more than 10 pounds at a time and occasionally lifting or carrying articles like docket files, ledgers, and small tools. 20 CFR 416.967(a) Although a sedentary job is defined as one which involves sitting, a certain amount of walking and standing is often necessary in carrying out job duties. *Id.* Jobs are sedentary if walking and standing are required occasionally and other sedentary criteria are met. Light work involves lifting no more than 20 pounds at a time with frequent lifting or carrying objects weighing up to 10 pounds. 20 CFR 416.967(b) Even though weight lifted may be very little, a job is in this category when it requires a good deal of walking or standing, or when it involves sitting most of the time with some pushing and pulling of arm or leg controls. *Id.* To be considered capable of performing a full or wide range of light work, an individual must have the ability to do substantially all of these activities. *Id.* An individual capable of light work is also capable of sedentary work, unless there are additionally limiting factors such as loss of fine dexterity or inability to sit for long periods of time. *Id.* Medium work involves lifting no

more than 50 pounds at a time with frequent lifting or carrying of objects weighing up to 25 pounds. 20 CFR 416.967(c) An individual capable of performing medium work is also capable of light and sedentary work. *Id.* Heavy work involves lifting no more than 100 pounds at a time with frequent lifting or carrying of objects weighing up to 50 pounds. 20 CFR 416.967(d) An individual capable of heavy work is also capable of medium, light, and sedentary work. *Id.* Finally, very heavy work involves lifting objects weighing more than 100 pounds at a time with frequent lifting or carrying objects weighing 50 pounds or more. 20 CFR 416.967(e) An individual capable of very heavy work is able to perform work under all categories. *Id.*

Limitations or restrictions which affect the ability to meet the demands of jobs other than strength demands (exertional requirements, i.e. sitting, standing, walking, lifting, carrying, pushing, or pulling) are considered nonexertional. 20 CFR 416.969a(a) In considering whether an individual can perform past relevant work, a comparison of the individual's residual functional capacity with the demands of past relevant work. *Id.* If an individual can no longer do past relevant work the same residual functional capacity assessment along with an individual's age, education, and work experience is considered to determine whether an individual can adjust to other work which exists in the national economy. *Id.* Examples of non-exertional limitations or restrictions include difficulty function due to nervousness, anxiousness, or depression; difficulty maintaining attention or concentration; difficulty understanding or remembering detailed instructions; difficulty in seeing or hearing; difficulty tolerating some physical feature(s) of certain work settings (i.e. can't tolerate dust or fumes); or difficulty performing the manipulative or postural functions of some work such as reaching, handling, stooping, climbing, crawling, or crouching. 20 CFR 416.969a(c)(1)(i) – (vi) If the impairment(s) and related symptoms, such as pain, only affect the ability to perform the non-exertional aspects of work-related activities, the rules in Appendix 2 do not direct factual conclusions of disabled or not disabled. 20 CFR 416.969a(c)(2) The determination of whether disability exists is based upon the principles in the appropriate sections of the regulations, giving consideration to the rules for specific case situations in Appendix 2. *Id.*

The Claimant's work history includes employment waiting on customers in a meat department, in landscaping/snow removal, at a car wash, and as a porter. In light of the Claimant's testimony and in consideration of the Occupational Code, the Claimant's prior work is classified as unskilled, light to medium work.

The Claimant testified that he can lift/carry about 5 to 10 pounds; can walk two to three blocks; can stand for about one hour; and can bend and/or squat with some difficulty. The objective medical records indicate that the Claimant can occasionally lift/carry 50 pounds or more; can stand and/or walk at least 2 hours in an 8 hour workday with sitting at about 6 hours during this same time frame; and is able to perform repetitive actions with all extremities. If the impairment or combination of impairments does not limit an

individual's physical or mental ability to do basic work activities, it is not a severe impairment(s) and disability does not exist. 20 CFR 416.920 In consideration of the Claimant's testimony, medical records, and current limitations, it is found that the Claimant is able to return to past relevant employment (unskilled light). Accordingly, the Claimant is found not disabled at Step 4 with no further analysis required.

If Step 5 were necessary, an assessment of the individual's residual functional capacity and age, education, and work experience is considered to determine whether an adjustment to other work can be made. 20 CFR 416.920(4)(v) At the time of hearing, the Claimant was 25 years old thus considered to be a younger individual for MA-P purposes. The Claimant has a high school education with some college. Disability is found if an individual is unable to adjust to other work. *Id.* At this point in the analysis, the burden shifts from the Claimant to the Department to present proof that the Claimant has the residual capacity to substantial gainful employment. 20 CFR 416.960(2); *Richardson v Sec of Health and Human Services*, 735 F2d 962, 964 (CA 6, 1984). While a vocational expert is not required, a finding supported by substantial evidence that the individual has the vocational qualifications to perform specific jobs is needed to meet the burden. *O'Banner v Sec of Health and Human Services*, 587 F2d 321, 323 (CA 6, 1978). Medical-Vocational guidelines found at 20 CFR Subpart P, Appendix II, may be used to satisfy the burden of proving that the individual can perform specific jobs in the national economy. *Heckler v Campbell*, 461 US 458, 467 (1983); *Kirk v Secretary*, 667 F2d 524, 529 (CA 6, 1981) *cert den* 461 US 957 (1983). The age for younger individuals (under 50) generally will not seriously affect the ability to adjust to other work. 20 CFR 416.963(c)

In this case, the evidence reveals that the Claimant suffers from residual complications from smoke inhalation and chronic back pain. That being stated, the Claimant, a younger individual with a high school education and some college, maintains the residual functional capacity for work activities on a regular and continuing basis to meet the at least the physical and mental demands required to perform unskilled sedentary/light work as defined in 20 CFR 416.967(a)(b). After review of the entire record using the Medical-Vocational Guidelines [20 CFR 404, Subpart P, Appendix II] as a guide, specifically Rule 201.27 and 202.20, the Claimant would be found not disabled at Step 5 as well.

### **DECISION AND ORDER**

The Administrative Law Judge, based upon the above findings of fact and conclusions of law finds the Claimant not disabled for purposes of the MA-P benefit program.

Accordingly, it is ORDERED:

2010-17256/CMM

The Department's determination is AFFIRMED.

*Colleen M. Mamelka*
