STATE OF MICHIGAN
STATE OFFICE OF ADMINISTRATIVE HEARINGS AND RULES
FOR THE DEPARTMENT OF COMMUNITY HEALTH
P.O. Box 30763, Lansing, MI 48909
(877) 833-0870; Fax: (517) 334-9505

IN THE MATTER OF:

Docket No. 2010-22467 CMH
Case No. [redacted]

[redacted],

Appellant
_____/

DECISION AND ORDER

This matter is before the undersigned Administrative Law Judge pursuant to MCL 400.9 upon the Appellant's request for a hearing.

After due notice, a hearing was held [redacted], the Appellant's mother, was present on his behalf. His representative was [redacted] was present as a witness.

[redacted] (CMH), represented the CMHSP. [redacted] ager for the CMH was present as a witness on behalf of the Department of Community Health contracted PIHP.

ISSUE

Did the Department properly deny the request for increased respite services?

FINDINGS OF FACT

The Administrative Law Judge, based upon the competent, material and substantial evidence on the whole record, finds as material fact:

1. The Appellant is a [redacted] Medicaid beneficiary. He resides with his parents and siblings in his family home.

2. The Appellant has two (2) siblings, ages [redacted]

3. The Appellant is diagnosed with Down's Syndrome and a narrow esophagus. He is at risk for food aspiration, thus must have his food pureed.

4. The Appellant is participating in CMH services as a developmentally disabled person. He receives services for physical therapy, speech and language assistance, supports coordination and person-centered planning through CMH.

5. The Appellant's mother is pregnant with the family's fourth child. His father works full time.

6. The Appellant has an Individual Plan of Service which includes authorization for up to 50 hours per month of respite services.

7. The Appellant's grandmother is the respite provider.

8. The Appellant, through his representative and parents, seek an increase in the respite hours authorized at this time due to the fact that the Appellant's mother is expecting a 4th child.

9. A respite authorization for 140 hours per week was sought on or about [redacted] It was denied and an authorization for 50 hours per month approved.

10. The Appellant placed a second request for increased respite hours of 150 per month, on [redacted]

11. The second request for increase was denied and the authorization for 50 hours respite per month remained.

12. The respite authorization sought at hearing is for 35 hours per week. (testimony of the Appellant's representative)

13. The Department has determined it is not medically necessary to authorize respite hours in the amount the Appellant requested, nor to increase the respite services. The Department sent a Negative Action Notice on or about [redacted]

14. The Appellant, through his mother, disagrees with the proposed reduction in the service hours, thus requested a formal, administrative hearing.

CONCLUSIONS OF LAW

The Medical Assistance Program is established pursuant to Title XIX of the Social Security Act and is implemented by Title 42 of the Code of Federal Regulations (CFR). It is administered in accordance with state statute, the Social Welfare Act, the Administrative Code, and the State Plan under Title XIX of the Social Security Act Medical Assistance Program.

> Title XIX of the Social Security Act, enacted in 1965, authorizes Federal grants to States for medical assistance to low-income persons who are age 65 or over, blind, disabled, or members of families with dependent children or qualified pregnant women or children. The program is jointly financed by the Federal and State governments and administered by States. Within broad Federal rules, each State decides eligible groups, types and range of services, payment levels for services, and administrative and operating procedures. Payments for services are made directly by the State to the individuals or entities that furnish the services.
>
> *42 CFR 430.0*

> The State plan is a comprehensive written statement submitted by the agency describing the nature and scope of its Medicaid program and giving assurance that it will be administered in conformity with the specific requirements of title XIX, the regulations in this Chapter IV, and other applicable official issuances of the Department. The State plan contains all information necessary for CMS to determine whether the plan can be approved to serve as a basis for Federal financial participation (FFP) in the State program.
>
> *42 CFR 430.10*

Section 1915(b) of the Social Security Act provides:

> The Secretary, to the extent he finds it to be cost-effective and efficient and not inconsistent with the purposes of this subchapter, may waive such requirements of section 1396a of this title (other than subsection (s) of this section) (other than sections 1396a(a)(15), 1396a(bb), and 1396a(a)(10)(A) of this title insofar as it requires provision of the care and services described in section 1396d(a)(2)(C) of this title) as may be necessary for a State…

The State of Michigan has opted to simultaneously utilize the authorities of the 1915(b) and 1915(c) programs to provide a continuum of services to disabled and/or elderly populations. Under approval from the Centers for Medicare and Medicaid Services (CMS) the Department of Community Health (MDCH) operates a section 1915(b) Medicaid Managed Specialty Services waiver. [redacted] a Prepaid Inpatient Health Plan (PIHP), contracts with the Michigan Department of Community Health to provide 1915(b) specialty mental health services. The PIHP's contract with the Department requires that all services paid for with Medicaid funds must be medically necessary.

Services are provided by CMH pursuant to its contract obligations with the Department and in accordance with the federal waiver.

In performing the terms of its contract with the Department, the PIHP must apply Medicaid funds only to those services deemed medically necessary or appropriate. The Department's policy regarding medical necessity provides as follows:

> **2.5 MEDICAL NECESSITY CRITERIA**
>
> The following medical necessity criteria apply to Medicaid mental health, developmental disabilities, and substance abuse supports and services.
>
> **2.5.A. MEDICAL NECESSITY CRITERIA**
>
> Mental health, developmental disabilities, and substance abuse services are supports, services, and treatment:
>
> - Necessary for screening and assessing the presence of a mental illness, developmental disability or substance use disorder; and/or
> - Required to identify and evaluate a mental illness, developmental disability or substance use disorder; and/or
> - Intended to treat, ameliorate, diminish or stabilize the symptoms of mental illness, developmental disability or substance use disorder; and/or
> - Expected to arrest or delay the progression of a mental illness, developmental disability, or substance use disorder; and/or
> - Designed to assist the beneficiary to attain or maintain a sufficient level of functioning in order to achieve his goals of community inclusion and participation, independence, recovery, or productivity.
>
> **2.5.B. DETERMINATION CRITERIA**
>
> The determination of a medically necessary support, service or treatment must be:
>
> - Based on information provided by the beneficiary, beneficiary's family, and/or other individuals (e.g., friends, personal assistants/aides) who know the beneficiary; and
> - Based on clinical information from the beneficiary's primary care physician or health care professionals with

relevant qualifications who have evaluated the beneficiary; and
- For beneficiaries with mental illness or developmental disabilities, based on person-centered planning, and for beneficiaries with substance use disorders, individualized treatment planning; and
- Made by appropriately trained mental health, developmental disabilities, or substance abuse professionals with sufficient clinical experience; and
- Made within federal and state standards for timeliness; and
- Sufficient in amount, scope and duration of the service(s) to reasonably achieve its/their purpose.

2.5.C. SUPPORTS, SERVICES AND TREATMENT AUTHORIZED BY THE PIHP

Supports, services, and treatment authorized by the PIHP must be:

- Delivered in accordance with federal and state standards for timeliness in a location that is accessible to the beneficiary; and
- Responsive to particular needs of multi-cultural populations and furnished in a culturally relevant manner; and
- Responsive to the particular needs of beneficiaries with sensory or mobility impairments and provided with the necessary accommodations; and
- Provided in the least restrictive, most integrated setting. Inpatient, licensed residential or other segregated settings shall be used only when less restrictive levels of treatment, service or support have been, for that beneficiary, unsuccessful or cannot be safely provided; and
- Delivered consistent with, where they exist, available research findings, health care practice guidelines, best practices and standards of practice issued by professionally recognized organizations or government agencies.

2.5.D. PIHP DECISIONS

Using criteria for medical necessity, a PIHP may:

Deny services that are:

- deemed ineffective for a given condition based upon professionally and scientifically recognized and accepted standards of care;
- experimental or investigational in nature; or
- for which there exists another appropriate, efficacious, less-restrictive and cost-effective service, setting or support that otherwise satisfies the standards for medically-necessary services; and/or
- Employ various methods to determine amount, scope and duration of services, including prior authorization for certain services, concurrent utilization reviews, centralized assessment and referral, gate-keeping arrangements, protocols, and guidelines.

A PIHP may not deny services based **solely** on preset limits of the cost, amount, scope, and duration of services. Instead, determination of the need for services shall be conducted on an individualized basis.

The Medicaid Provider Manual specifies what supports and services are available for persons such as the Appellant. It states in pertinent part:

SECTION 17 – ADDITIONAL MENTAL HEALTH SERVICES (B3S)

PIHPs must make certain Medicaid-funded mental health supports and services available, in addition to the Medicaid State Plan Specialty Supports and Services or Habilitation Waiver Services, through the authority of 1915(b)(3) of the Social Security Act (hereafter referred to as B3s). The intent of B3 supports and services is to fund medically necessary supports and services that promote community inclusion and participation, independence, and/or productivity when identified in the individual plan of service as one or more goals developed during person-centered planning.

17.1 DEFINITIONS OF GOALS THAT MEET THE INTENTS AND PURPOSE OF B3 SUPPORTS AND SERVICES

The goals (listed below) and their operational definitions will vary according to the individual's needs and desires. However, goals that are inconsistent with least restrictive environment (i.e., most integrated home, work, community that meet the individual's needs and desires) and individual choice and control cannot be supported by B3 supports and services unless there is documentation that health and safety would otherwise be jeopardized; or that such least restrictive arrangements or choice and control opportunities have been demonstrated to be unsuccessful for that individual. Care should be taken to insure that these goals are those of the individual first, not those of a parent, guardian, provider, therapist, or case manager, no matter how well intentioned. The services in the plan, whether B3 supports and services alone, or in combination with state plan or Habilitation Supports Waiver services, must reasonably be expected to achieve the goals and intended outcomes identified. The configuration of supports and services should assist the individual to attain outcomes that are typical in his community; and without such services and supports, would be impossible to attain.

Community Inclusion and Participation

The individual uses community services and participates in community activities in the same manner as the typical community citizen. Examples are recreation (parks, movies, concerts, sporting events, arts classes, etc.), shopping, socialization (visiting friends, attending club meetings, dining out) and civic (volunteering, voting, attending governmental meetings, etc.) activities. A beneficiary's use of, and participation in, community activities are expected to be integrated with that of the typical citizen's (e.g., the beneficiary would attend an "integrated" yoga class at the community center rather than a special yoga class for persons with mental retardation)

Independence "Freedom from another's influence, control and determination." (Webster's New World College Dictionary, 1996). Independence in the B3 context means how the individual defines the extent of such freedom for him/herself during person-centered planning. For example, to some beneficiaries, "freedom" could be living on their own, controlling their own budget, choosing an apartment as well as the

persons who will live there with them, or getting around the community on their own. To others, "freedom" could be control over what and when to eat, what and when to watch television, when and how to bathe, or when to go to bed and arise. For children under 18 years old, independence may mean the support given by parents and others to help children achieve the skills they need to be successful in school, enter adulthood and live independently.

Productivity Engaged in activities that result in or lead to maintenance of or increased self-sufficiency. Those activities are typically going to school and work. The operational definition of productivity for an individual may be influenced by age-appropriateness. For example, a person who is 76 years old may choose to volunteer or participate in other community or senior center activities rather than have any productivity goals. For children under the age of five years, productivity may be successful participation in home, pre-school, or child care activities. Children under 18 would be expected to attend school, but may choose to work in addition. In order to use B3 supports and services, individuals would be expected to prepare for, or go to, school or work in the same places that the typical citizen uses.

17.2 CRITERIA FOR AUTHORIZING B3 SUPPORTS AND SERVICES

The authorization and use of Medicaid funds for any of the B3 supports and services, as well as their amount, scope and duration, are dependent upon:

- The Medicaid beneficiary's eligibility for specialty services and supports as defined in this Chapter; and
- The service(s) having been identified during person-centered planning; and
- The service(s) being medically necessary as defined in the Medical Necessity Criteria subsection of this chapter; and
- The service(s) being expected to achieve one or more of the above-listed goals as identified in the beneficiary's plan of service; and
- Additional criteria indicated in certain B3 service definitions, as applicable.

Decisions regarding the authorization of a B3 service (including the amount, scope and duration) must take into account the

PIHP's documented capacity to reasonably and equitably serve other Medicaid beneficiaries who also have needs for these services. The B3 supports and services are not intended to meet all the individual's needs and preferences, as some needs may be better met by community and other natural supports. Natural supports mean unpaid assistance provided to the beneficiary by people his/her network (family, friends, neighbors, community volunteers) who are willing and able to provide such assistance. It is reasonable to expect that parents of minor children with disabilities will provide the same level of care they would provide to their children without disabilities. MDCH encourages the use of natural supports to assist in meeting an individual's needs to the extent that the family or friends who provide the natural supports are willing and able to provide this assistance. PIHPs may not require a beneficiary's natural support network to provide such assistance as a condition for receiving specialty mental health supports and services. The use of natural supports must be documented in the beneficiary's individual plan of service. Provider qualifications and service locations that are not otherwise identified in this section must meet the requirements identified in the General Information and Program Requirement sections of this chapter.

17.3 B3 SUPPORTS AND SERVICES

The B3 supports and services defined below are the supports and services that PIHPs are to provide from their Medicaid capitation.

17.3.J. RESPITE CARE SERVICES

Services that are provided to assist in maintaining a goal of living in a natural community home by temporarily relieving the **unpaid** primary caregiver (e.g., family members and/or adult family foster care providers) and is provided during those portions of the day when the caregivers are not being paid to provide care. Respite is not intended to be provided on a continuous, long-term basis where it is a part of daily services that would enable an unpaid caregiver to work elsewhere full time. In those cases, community living supports, or other services of paid support or training staff, should be used. Decisions about the methods and amounts of respite should be decided during person-centered planning. PIHPs may not require active clinical treatment as a prerequisite for receiving respite care. These services do not supplant or substitute for community living support or other services of paid

support/training staff. Respite care may be provided in the following settings:

- Beneficiary's home or place of residence
- Licensed family foster care home
- Facility approved by the State that is not a private residence, (e.g., group home or licensed respite care facility)
- Home of a friend or relative chosen by the beneficiary and members of the planning team
- Licensed camp
- In community (social/recreational) settings with a respite worker trained, if needed, by the family

Respite care may not be provided in:

- day program settings
- ICF/MRs, nursing homes, or hospitals

Respite care may not be provided by:

- parent of a minor beneficiary receiving the service
- spouse of the beneficiary served
- beneficiary's guardian
- unpaid primary care giver

Cost of room and board must not be included as part of the respite care unless provided as part of the respite care in a facility that is not a private residence.

Medicaid Provider Manual
Mental Health/Substance Abuse
Version Date: April 1, 2010

In this case the service requested is unquestionably the result of the medical condition of the Appellant's mother. She is pregnant, expecting her fourth child. She has three (3) children at home currently, one (1) of whom participates with CMH services. She is married. She states her husband works long hours, thus could not provide the amount of natural supports needed in this case. She asserts her son's own medical condition is the reason additional respite is required. She stated he has a narrow esophagus, thus must be monitored so that he does not aspirate or choke on his food. She has to puree all of it. Additionally, because he is developmentally disabled, he requires more supervision than normal and it is difficult due to the exhaustion she experiences now, to provide it. She said she has other children at home who need her time and attention and care as well. The Appellant's grandmother is the family respite provider. She stated due to the economic conditions, she was not able to provide the natural supports needed free of charge.

The Department witness stated the mother's pregnancy does not justify providing 20 hours of respite per day, nor even the reduced request of 35 hours per week. Respite is not intended to provide care sufficient to allow the unpaid care provider to work outside the home, nor does it substitute for parenting expected to be provided even to the developmentally disabled children in a family. The Department cites Medicaid provider manual statement that "it is reasonable to expect that parents of minor children with disabilities will provide the same level of care they would provide to their children without disabilities".

It was clear from the testimony taken the Appellant's mother is exhausted and would benefit from assistance. That does not evidence a medical need for the Appellant to have an increase in respite authorization such as is being sought, however. The Department has authorized 50 hours per month respite. There is no showing this is inadequate to reasonably achieve the goals of respite. The assertion the Appellant and his mother require five (5) hours per day of respite care is not supported by the evidence of record at this time.

DECISION AND ORDER

The Administrative Law Judge, based on the above findings of fact and conclusions of law, find the authorization of 50 hours per month of respite is adequate to meet the medical needs of the Appellant.

IT IS THEREFORE ORDERED that:

The CMH's decision is AFFIRMED.

Jennifer Isiogu
Administrative Law Judge
for Janet Olszewski, Director
Michigan Department of Community Health
