STATE OF MICHIGAN

STATE OFFICE OF ADMINISTRATIVE HEARINGS AND RULES ADMINISTRATIVE HEARINGS FOR THE DEPARTMENT OF HUMAN SERVICES

N THE MATTER OF:	
	Reg. No.: 2010-33598
	Issue No.: 2009/4031
	Case No.:
	Hearing Date: October 2

Hearing Date: October 27, 2010 Macomb County DHS (12)

ADMINISTRATIVE LAW JUDGE: Colleen M. Mamelka

HEARING DECISION

This matter is before the undersigned Administrative Law Judge pursuant to MCL 400.9 and MCL 400.37 upon the Claimant's request for a hearing. After due notice, a hearing was held in Clinton Township, Michigan on Wednesday, October 27, 2010. The Claimant appeared, along with represented by the control of the Department.

During the hearing, the Claimant waived the time period for the issuance of this decision in order to allow for the submission of additional medical evidence. The new evidence was received, reviewed, and entered as Exhibits 5, 6 and Claimant Exhibit A. This matter is now before the undersigned for a final decision.

<u>ISSUE</u>

Whether the Department properly determined that the Claimant was not disabled for purposes of the Medical Assistance ("MA-P") and State Disability Assistance ("SDA") benefit programs?

FINDINGS OF FACT

The Administrative Law Judge, based upon the competent, material, and substantial evidence on the whole record, finds as material fact:

- The Claimant submitted an application for public assistance seeking MA-P and SDA benefits on March 9, 2010.
- 2. On April 1, 2010, the Medical Review Team ("MRT") found the Claimant not disabled for purposes of the MA-P benefit program. (Exhibit 1, pp. 36, 37)

- 3. On March 22, 2010, the Department sent an Eligibility Notice to the Claimant informing her of the MRT decision. (Exhibit 2)
- 4. On April 26, 2010, the Department received the Claimant's timely written request for hearing. (Exhibit 3)
- 5. On May 17, 2010, the State Hearing Review Team ("SHRT") determined that the Claimant was not disabled. (Exhibit 4)
- 6. The Claimant alleged physical disabling impairments due to stroke, diabetes with neuropathy, and muscle weakness.
- 7. The Claimant alleged mental impairments due to cognitive dysfunction.
- 8. At the time of hearing, the Claimant was 49 years old with a birth date; was 5'1" in height; and weighed 170 pounds.
- 9. The Claimant is a high school graduate with some college with an employment history as an insurance agent.
- 10. The Claimant's impairment(s) have lasted, or are expected to last, continuously for a period of 12-months or longer.

CONCLUSIONS OF LAW

The Medical Assistance ("MA") program is established by Subchapter XIX of Chapter 7 of The Public Health & Welfare Act, 42 USC 1397, and is administered by the Department of Human Services ("DHS"), formerly known as the Family Independence Agency, pursuant to MCL 400.10 *et seq* and MCL 400.105. Department policies are found in the Bridges Administrative Manual ("BAM"), the Bridges Eligibility Manual ("BEM"), and the Bridges Reference Manual ("BRM").

Disability is defined as the inability to do any substantial gainful activity by reason of any medically determinable physical or mental impairment which can be expected to result in death or which has lasted or can be expected to last for a continuous period of not less than 12 months. 20 CFR 416.905(a) The person claiming a physical or mental disability has the burden to establish it through the use of competent medical evidence from qualified medical sources such as his or her medical history, clinical/laboratory findings, diagnosis/prescribed treatment, prognosis for recovery and/or medical assessment of ability to do work-relate activities or ability to reason and make appropriate mental adjustments, if a mental disability is alleged. 20 CRF 413.913 An individual's subjective pain complaints are not, in and of themselves, sufficient to establish disability. 20 CFR 416.908; 20 CFR 416.929(a) Similarly, conclusory

statements by a physician or mental health professional that an individual is disabled or blind, absent supporting medical evidence, is insufficient to establish disability. 20 CFR 416.927

When determining disability, the federal regulations require several factors to be considered including: (1) the location/duration/frequency/intensity of an applicant's pain; (2) the type/dosage/effectiveness/side effects of any medication the applicants takes to relieve pain; (3) any treatment other than pain medication that the applicant has received to relieve pain; and (4) the effect of the applicant's pain on his or her ability to do basic work activities. 20 CFR 416.929(c)(3) The applicant's pain must be assessed to determine the extent of his or her functional limitation(s) in light of the objective medical evidence presented. 20 CFR 416.929(c)(2)

In order to determine whether or not an individual is disabled, federal regulations require a five-step sequential evaluation process be utilized. 20 CFR 416.920(a)(1) The five-step analysis requires the trier of fact to consider an individual's current work activity; the severity of the impairment(s) both in duration and whether it meets or equals a listed impairment in Appendix 1; residual functional capacity to determine whether an individual can perform past relevant work; and residual functional capacity along with vocational factors (i.e. age, education, and work experience) to determine if an individual can adjust to other work. 20 CFR 416.920(a)(4); 20 CFR 416.945

If an individual is found disabled, or not disabled, at any step, a determination or decision is made with no need evaluate subsequent steps. 20 CFR 416.920(a)(4) If a determination cannot be made that an individual is disabled, or not disabled, at a particular step, the next step is required. 20 CFR 416.920(a)(4) If an impairment does not meet or equal a listed impairment, an individual's residual functional capacity is assessed before moving from step three to step four. 20 CFR 416.920(a)(4): 20 CFR 416.945 Residual functional capacity is the most an individual can do despite the limitations based on all relevant evidence. 20 CFR 945(a)(1) An individual's residual functional capacity assessment is evaluated at both steps four and five. 20 CFR 416.920(a)(4) In determining disability, an individual's functional capacity to perform basic work activities is evaluated and if found that the individual has the ability to perform basic work activities without significant limitation, disability will not be found. 20 In general, the individual has the responsibility to prove CFR 416.994(b)(1)(iv) 20 CFR 416.912(a) An impairment or combination of impairments is not severe if it does not significantly limit an individual's physical or mental ability to do 20 CFR 416.921(a) The individual has the responsibility to basic work activities. provide evidence of prior work experience; efforts to work; and any other factor showing how the impairment affects the ability to work. 20 CFR 416.912(c)(3)(5)(6)

In addition to the above, when evaluating mental impairments, a special technique is utilized. 20 CFR 416.920a(a) First, an individual's pertinent symptoms, signs, and

laboratory findings are evaluated to determine whether a medically determinable mental impairment exists. 20 CFR 416.920a(b)(1) When a medically determinable mental impairment is established, the symptoms, signs and laboratory findings that substantiate the impairment are documented to include the individual's significant history, laboratory findings, and functional limitations. 20 CFR 416.920a(e)(2) Functional limitation(s) is assessed based upon the extent to which the impairment(s) interferes with an individual's ability to function independently, appropriately, effectively, and on a sustained basis. Id.; 20 CFR 416.920a(c)(2) Chronic mental disorders, structured settings, medication, and other treatment and the effect on the overall degree of functionality is considered. 20 CFR 416.920a(c)(1) In addition, four broad functional areas (activities of daily living; social functioning; concentration, persistence or pace; and episodes of decompensation) are considered when determining an individual's degree of functional limitation. 20 CFR 416.920a(c)(3) The degree of limitation for the first three functional areas is rated by a five point scale: none, mild, moderate, marked, and extreme. 20 CFR 416.920a(c)(4) A four point scale (none, one or two, three, four or more) is used to rate the degree of limitation in the fourth functional area. Id. The last point on each scale represents a degree of limitation that is incompatible with the ability to do any gainful activity. Id.

After the degree of functional limitation is determined, the severity of the mental impairment is determined. 20 CFR 416.920a(d) If severe, a determination of whether the impairment meets or is the equivalent of a listed mental disorder is made. 20 CFR 416.920a(d)(2) If the severe mental impairment does not meet (or equal) a listed impairment, an individual's residual functional capacity is assessed. 20 CFR 416.920a(d)(3)

As outlined above, the first step looks at the individual's current work activity. In the record presented, the Claimant is not involved in substantial gainful activity therefore is not ineligible for disability benefits under Step 1.

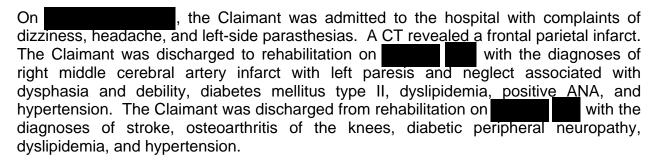

The severity of the Claimant's alleged impairment(s) is considered under Step 2. The Claimant bears the burden to present sufficient objective medical evidence to substantiate the alleged disabling impairments. In order to be considered disabled for MA purposes, the impairment must be severe. 20 CFR 916.920(a)(4)(ii); 20 CFR 916.920(b) An impairment, or combination of impairments, is severe if it significantly limits an individual's physical or mental ability to do basic work activities regardless of age, education and work experience. 20 CFR 916.920(a)(4)(ii); 20 CFR 916.920(c) Basic work activities means the abilities and aptitudes necessary to do most jobs. 20 CFR 916.921(b) Examples include:

1. Physical functions such as walking, standing, sitting, lifting, pushing, pulling, reaching, carrying, or handling;

- 2. Capacities for seeing, hearing, and speaking;
- 3. Understanding, carrying out, and remembering simple instructions;
- 4. Use of judgment;
- 5. Responding appropriately to supervision, co-workers and usual work situations; and
- 6. Dealing with changes in a routine work setting.

Id. The second step allows for dismissal of a disability claim obviously lacking in medical merit. *Higgs v Bowen*, 880 F2d 860, 862 (CA 6, 1988). The severity requirement may still be employed as an administrative convenience to screen out claims that are totally groundless solely from a medical standpoint. *Id.* at 863 *citing Farris v Sec of Health and Human Services*, 773 F2d 85, 90 n.1 (CA 6, 1985) An impairment qualifies as non-severe only if, regardless of a claimant's age, education, or work experience, the impairment would not affect the claimant's ability to work. *Salmi v Sec of Health and Human Services*, 774 F2d 685, 692 (CA 6, 1985)

In the present case, the Claimant alleges disability due to stroke, diabetes with neuropathy, muscle weakness, and cognitive dysfunction.

On ______, a Medical Examination Report was completed on behalf of the Claimant. The Claimant's history of impairments included poor cognitive, poor vision, poor dexterity, and weakness. The Claimant was unable to read/write and had difficulty ambulating requiring an assistive device. The diagnosis was post hemorrhage stroke syndrome. The Claimant was found unable to work, unable to lift/carry any weight; and unable to perform repetitive actions. Mentally, the Claimant was limited in her comprehension, memory, sustained concentration, following simple directions, reading/writing, and social interaction.

On a consultative evaluation was performed. The physical examination found the Claimant barely able to walk or stand without support. The

diagnoses were residual palsy with functional limitations neurologically and orthopedically, diabetes mellitus, hypertension, joint pain, depression, and obesity.

On Wechsler Adult Intelligence Scale ("WAIS") IV was administered and revealed a full scale IQ of 72. There were notable degradations in the areas of verbal reasoning, onverbal reasoning, memory, and perceptual motor coordination. The Claimant required assistance with activities of daily living to include bathing, dressing, toileting, feeding, etc. The Psychologist opined that the Claimant was precluded from work and that no serious employer would hire her. The Claimant's ability to understand, remember, and carry out simple instructions were severely impacted as well as her ability to respond appropriately with others including coworkers and supervisors. The ability to adapt to change was severely impacted as was her ability to perform work related activities in a reliable, persistent, and consistent manner. The diagnoses were vascular dementia with depressed mood and personality changes secondary to her stroke. The Global Assessment Functioning ("GAF") was 45. The Claimant was markedly limited in 14 of the 20 factors on the Mental Residual Functional Capacity Assessment.

As previously noted, the Claimant bears the burden to present sufficient objective medical evidence to substantiate the alleged disabling impairment(s). As summarized above, the Claimant has presented medical evidence establishing that she does have some physical and mental limitations on her ability to perform basic work activities. The medical evidence has established that the Claimant has an impairment, or combination thereof, that has more than a *de minimis* effect on the Claimant's basic work activities. Further, the impairments have lasted continuously for twelve months, therefore, the Claimant is not disgualified from receipt of MA-P benefits under Step 2.

In the third step of the sequential analysis of a disability claim, the trier of fact must determine if the Claimant's impairment, or combination of impairments, is listed in Appendix 1 of Subpart P of 20 CFR, Part 404. The Claimant has alleged physical and mental disabling impairments due to stroke, diabetes with neuropathy, muscle weakness, and cognitive dysfunction.

Listing 12.00 encompasses adult mental disorders. The evaluation of disability on the basis of mental disorders requires documentation of a medically determinable impairment(s) and consideration of the degree in which the impairment limits the individual's ability to work, and whether these limitations have lasted or are expected to last for a continuous period of at least 12 months. 12.00A The existence of a medically determinable impairment(s) of the required duration must be established through medical evidence consisting of symptoms, signs, and laboratory findings, to include psychological test findings. 12.00B The evaluation of disability on the basis of a mental disorder requires sufficient evidence to (1) establish the presence of a medically determinable mental impairment(s), (2) assess the degree of functional limitation the

impairment(s) imposes, and (3) project the probable duration of the impairment(s). 12.00D The evaluation of disability on the basis of mental disorders requires documentation of a medically determinable impairment(s) and consideration of the degree in which the impairment limits the individual's ability to work consideration, and whether these limitations have lasted or are expected to last for a continuous period of at least 12 months. 12.00A

Listing 12.02 defines organic mental disorders as psychological or behavioral abnormalities associated with a dysfunction of the brain. History and physical examination or laboratory tests demonstrate the presence of a specific organic factor judged to be etiologically related to the abnormal mental state and loss of previously acquired functional abilities. The required level of severity for these disorders are met when the requirements in both A and B are satisfied, or when the requirements in C are satisfied.

- A. Demonstration of a loss of specific cognitive abilities or affective changes and the medically documented persistence of at least one of the following:
 - 1. Disorientation to time and place; or
 - 2. Memory impairment, either short-term (inability to learn new information), intermediate, or long-term (inability to remember information that was known sometime in the past); or
 - Perceptual or thinking disturbances (e.g., hallucinations, delusions);
 or
 - 4. Change in personality; or
 - 5. Disturbance in mood; or
 - 6. Emotional lability (e.g., explosive temper outbursts, sudden crying, etc.) and impairment in impulse control; or
 - 7. Loss of measured intellectual ability of at least 15 I.Q. points from premorbid levels or overall impairment index clearly within the severely impaired range on neuropsychological testing, e.g., Luria-Nebraska, Halstead-Reitan, etc;

AND

B. Resulting in at least two of the following:

- 1. Marked restriction of activities of daily living; or
- 2. Marked difficulties in maintaining social functioning; or
- 3. Marked difficulties in maintaining concentration, persistence, or pace; or
- 4. Repeated episodes of decompensation, each of extended duration;

OR

- C. Medically documented history of a chronic organic mental disorder of at least 2 years' duration that has caused more than a minimal limitation of ability to do basic work activities, with symptoms or signs currently attenuated by medication or psychosocial support, and one of the following:
- 1. Repeated episodes of decompensation, each of extended duration; or
 - A residual disease process that has resulted in such marginal adjustment that even a minimal increase in mental demands or change in the environment would be predicted to cause the individual to decompensate; or
 - 3. Current history of 1 or more years' inability to function outside a highly supportive living arrangement, with an indication of continued need for such an arrangement.

The Claimant alleged disabling impairment(s) due to stroke, diabetes with neuropathy, muscle weakness and cognitive dysfunction. The medical evidence shows (as detailed above) a loss of specific cognitive abilities to include disorientation to time and place, disturbance of mood, and a likely loss of intellectual ability. As a result, the evidence demonstrates that the Claimant is markedly limited in her ability to perform activities of daily living, function socially, and in her ability to maintain concentration, persistence, or pace. Ultimately, based on the medical evidence, the Claimant's impairment(s) meets, or is the medical equivalent thereof, a listed impairment within Listing 12.00, specifically 12.02A. Accordingly, the Claimant is found disabled at Step 3 with no further analysis required.

The State Disability Assistance program, which provides financial assistance for disabled persons, was established by 2004 PA 344. DHS administers the SDA program purusant to MCL 400.10 *et seq.* and Michigan Administrative Code ("MAC R") 400.3151

- 400.3180. Department policies are found in BAM, BEM, and BRM. A person is considered disabled for SDA purposes if the person has a physical or mental impariment which meets federal SSI disability standards for at least ninety days. Receipt of SSI or RSDI benefits based on disability or blindness, or the receipt of MA benefits based on disability or blindness automatically qualifies an individual as disabled for purposes of the SDA program.

In this case, the Claimant is found disabled for purposes of the MA-P program therefore the Claimant is found disabled for purposes of SDA benefit program.

DECISION AND ORDER

The Administrative Law Judge, based upon the above findings of fact and conclusions of law finds the Claimant disabled for purposes of the MA-P and SDA benefit programs.

Accordingly, it is ORDERED:

- 1. The Department's determination is REVERSED.
- 2. The Department shall initiate review of the March 9, 2009 application to determine if all other non-medical criteria are met and inform the Claimant and her Authorized Representative of the determination in accordance with department policy.
- 3. The Department shall supplement for any lost lost benefits that the Claimant was entitled to receive if otherwise eligible and qualified in accordance with department policy.
- The Department shall review the Claimant's continued eligibility in 4.

	accordance with departr	nent policy in February 2012.

<u>NOTICE</u>: Administrative Hearings may order a rehearing or reconsideration on either its own motion or at the request of a party within 30 days of the mailing date of this Decision and Order. Administrative Hearings will not order a rehearing or reconsideration on the Department's motion where the final decision cannot be implemented within 90 days of the filing of the original request.

The Claimant may appeal the Decision and Order to Circuit Court within 30 days of the mailing of the Decision and Order or, if a timely request for rehearing was made, within 30 days of the receipt date of the rehearing decision.
