

STATE OF MICHIGAN
STATE OFFICE OF ADMINISTRATIVE HEARINGS AND RULES
ADMINISTRATIVE HEARINGS FOR THE
DEPARTMENT OF HUMAN SERVICES

IN THE MATTER OF:

[REDACTED]

Reg. No.: 2010-39694
Issue No.: 2009/4031
Case No.: [REDACTED]
Load No.: [REDACTED]
Hearing Date: October 18, 2010
Oakland County DHS (04)

ADMINISTRATIVE LAW JUDGE: Colleen M. Mamelka

HEARING DECISION

This matter is before the undersigned Administrative Law Judge pursuant to MCL 400.9 and MCL 400.37 upon the Claimant's request for a hearing. After due notice, a telephone hearing was conducted from Detroit, Michigan on Monday, October 18, 2010. The Claimant appeared and testified. [REDACTED] and [REDACTED] appeared on behalf of the Department.

ISSUE

Whether the Department properly determined that the Claimant was not disabled for purposes of the Medical Assistance ("MA-P") and State Disability Assistance ("SDA") benefit programs?

FINDINGS OF FACT

The Administrative Law Judge, based upon the competent, material, and substantial evidence on the whole record, finds as material fact:

1. The Claimant submitted an application for public assistance seeking MA-P and SDA benefits on May 10, 2010.
2. On June 4, 2010, the Medical Review Team ("MRT") determined that the Claimant was not disabled. (Exhibit 1, pp. 1, 2)
3. On June 8, 2010, the Department notified the Claimant of the MRT determination.
4. On June 17, 2010, the Department received the Claimant's timely written request for hearing. (Exhibit 3)

5. On June 28, 2010, the State Hearing Review Team (“SHRT”) found the Claimant not disabled. (Exhibit 4)
6. The Claimant’s alleged physical disabling impairments are due to a torn rotator cuff, left arm/shoulder atrophy, degenerative disc disease, and cervical radiculopathy.
7. The Claimant has not alleged any mental disabling impairment(s).
8. At the time of hearing, the Claimant was 48 years old with a [REDACTED] date of birth; was 5’2” in height; and weighed 110 pounds.
9. The Claimant has a limited education and work history working as a Certified Nursing Assistant (“CNA”) and as a childcare provider.
10. The Claimant’s impairment(s) have lasted, or are expected to last, continuously for a period of 12 months or longer.

CONCLUSIONS OF LAW

The Medical Assistance (“MA”) program is established by Subchapter XIX of Chapter 7 of The Public Health & Welfare Act, 42 USC 1397, and is administered by the Department of Human Services (“DHS”), formerly known as the Family Independence Agency, pursuant to MCL 400.10 *et seq* and MCL 400.105. Department policies are found in the Bridges Administrative Manual (“BAM”), the Bridges Eligibility Manual (“BEM”), and the Bridges Reference Manual (“BRM”).

Disability is defined as the inability to do any substantial gainful activity by reason of any medically determinable physical or mental impairment which can be expected to result in death or which has lasted or can be expected to last for a continuous period of not less than 12 months. 20 CFR 416.905(a) The person claiming a physical or mental disability has the burden to establish it through the use of competent medical evidence from qualified medical sources such as his or her medical history, clinical/laboratory findings, diagnosis/prescribed treatment, prognosis for recovery and/or medical assessment of ability to do work-related activities or ability to reason and make appropriate mental adjustments, if a mental disability is alleged. 20 CFR 413.913 An individual’s subjective pain complaints are not, in and of themselves, sufficient to establish disability. 20 CFR 416.908; 20 CFR 416.929(a) Similarly, conclusory statements by a physician or mental health professional that an individual is disabled or blind, absent supporting medical evidence, is insufficient to establish disability. 20 CFR 416.927

When determining disability, the federal regulations require several factors to be considered including: (1) the location/duration/frequency/intensity of an applicant's pain; (2) the type/dosage/effectiveness/side effects of any medication the applicants takes to relieve pain; (3) any treatment other than pain medication that the applicant has received to relieve pain; and (4) the effect of the applicant's pain on his or her ability to do basic work activities. 20 CFR 416.929(c)(3) The applicant's pain must be assessed to determine the extent of his or her functional limitation(s) in light of the objective medical evidence presented. 20 CFR 416.929(c)(2)

In order to determine whether or not an individual is disabled, federal regulations require a five-step sequential evaluation process be utilized. 20 CFR 416.920(a)(1) The five-step analysis requires the trier of fact to consider an individual's current work activity; the severity of the impairment(s) both in duration and whether it meets or equals a listed impairment in Appendix 1; residual functional capacity to determine whether an individual can perform past relevant work; and residual functional capacity along with vocational factors (i.e. age, education, and work experience) to determine if an individual can adjust to other work. 20 CFR 416.920(a)(4); 20 CFR 416.945

If an individual is found disabled, or not disabled, at any step, a determination or decision is made with no need evaluate subsequent steps. 20 CFR 416.920(a)(4) If a determination cannot be made that an individual is disabled, or not disabled, at a particular step, the next step is required. 20 CFR 416.920(a)(4) If an impairment does not meet or equal a listed impairment, an individual's residual functional capacity is assessed before moving from step three to step four. 20 CFR 416.920(a)(4); 20 CFR 416.945 Residual functional capacity is the most an individual can do despite the limitations based on all relevant evidence. 20 CFR 945(a)(1) An individual's residual functional capacity assessment is evaluated at both steps four and five. 20 CFR 416.920(a)(4) In determining disability, an individual's functional capacity to perform basic work activities is evaluated and if found that the individual has the ability to perform basic work activities without significant limitation, disability will not be found. 20 CFR 416.994(b)(1)(iv)

In general, the individual has the responsibility to prove disability. 20 CFR 416.912(a) An impairment or combination of impairments is not severe if it does not significantly limit an individual's physical or mental ability to do basic work activities. 20 CFR 416.921(a) An individual is not disabled regardless of the medical condition, age, education, and work experience, if the individual is working and the work is a substantial, gainful activity. 20 CFR 416.920(a)(4)(i) Substantial gainful activity means work that involves doing significant and productive physical or mental duties and is done (or intended) for pay or profit. 20 CFR 416.910(a)(b) Substantial gainful activity is work activity that is both substantial and gainful. 20 CFR 416.972 Work may be substantial even if it is done on a part-time basis or if an individual does less, with less

responsibility, and gets paid less than prior employment. 20 CFR 416.972(a) Gainful work activity is work activity that is done for pay or profit. 20 CFR 416.972(b)

In addition to the above, when evaluating mental impairments, a special technique is utilized. 20 CFR 416.920a(a) First, an individual's pertinent symptoms, signs, and laboratory findings are evaluated to determine whether a medically determinable mental impairment exists. 20 CFR 416.920a(b)(1) When a medically determinable mental impairment is established, the symptoms, signs and laboratory findings that substantiate the impairment are documented to include the individual's significant history, laboratory findings, and functional limitations. 20 CFR 416.920a(e)(2) Functional limitation(s) is assessed based upon the extent to which the impairment(s) interferes with an individual's ability to function independently, appropriately, effectively, and on a sustained basis. *Id.*; 20 CFR 416.920a(c)(2) Chronic mental disorders, structured settings, medication, and other treatment and the effect on the overall degree of functionality is considered. 20 CFR 416.920a(c)(1) In addition, four broad functional areas (activities of daily living; social functioning; concentration, persistence or pace; and episodes of decompensation) are considered when determining an individual's degree of functional limitation. 20 CFR 416.920a(c)(3) The degree of limitation for the first three functional areas is rated by a five point scale: none, mild, moderate, marked, and extreme. 20 CFR 416.920a(c)(4) A four point scale (none, one or two, three, four or more) is used to rate the degree of limitation in the fourth functional area. *Id.* The last point on each scale represents a degree of limitation that is incompatible with the ability to do any gainful activity. *Id.*

After the degree of functional limitation is determined, the severity of the mental impairment is determined. 20 CFR 416.920a(d) If severe, a determination of whether the impairment meets or is the equivalent of a listed mental disorder is made. 20 CFR 416.920a(d)(2) If the severe mental impairment does not meet (or equal) a listed impairment, an individual's residual functional capacity is assessed. 20 CFR 416.920a(d)(3)

As outlined above, the first step looks at the individual's current work activity. In the record presented, the Claimant is not involved in substantial gainful activity therefore is not ineligible for disability benefits under Step 1.

The severity of the Claimant's alleged impairment(s) is considered under Step 2. The Claimant bears the burden to present sufficient objective medical evidence to substantiate the alleged disabling impairments. In order to be considered disabled for MA purposes, the impairment must be severe. 20 CFR 916.920(a)(4)(ii); 20 CFR 916.920(b) An impairment, or combination of impairments, is severe if it significantly limits an individual's physical or mental ability to do basic work activities regardless of age, education and work experience. 20 CFR 916.920(a)(4)(ii); 20 CFR 916.920(c)

Basic work activities means the abilities and aptitudes necessary to do most jobs. 20 CFR 916.921(b) Examples include:

1. Physical functions such as walking, standing, sitting, lifting, pushing, pulling, reaching, carrying, or handling;
2. Capacities for seeing, hearing, and speaking;
3. Understanding, carrying out, and remembering simple instructions;
4. Use of judgment;
5. Responding appropriately to supervision, co-workers and usual work situations; and
6. Dealing with changes in a routine work setting.

Id. The second step allows for dismissal of a disability claim obviously lacking in medical merit. *Higgs v Bowen*, 880 F2d 860, 862 (CA 6, 1988). The severity requirement may still be employed as an administrative convenience to screen out claims that are totally groundless solely from a medical standpoint. *Id.* at 863 *citing Farris v Sec of Health and Human Services*, 773 F2d 85, 90 n.1 (CA 6, 1985) An impairment qualifies as severe only if, regardless of a claimant's age, education, or work experience, the impairment would not affect the claimant's ability to work. *Salmi v Sec of Health and Human Services*, 774 F2d 685, 692 (CA 6, 1985)

In the present case, the Claimant alleges disability based on a torn rotator cuff, left arm/shoulder atrophy, degenerative disc disease, and cervical radiculopathy.

On [REDACTED], the Claimant sought treatment for neck pain and left shoulder pain/numbness. The Claimant's prior arthroscopic surgery and pain management which included multiple blocks and injections, did not resolve the Claimant's pain. The MRI showed broad disc osteophyte causing some stenosis as well as broad disc osteophyte at C6-C7. Tenderness of the cervical spine and left shoulder were noted and the Claimant was referred to orthopedic surgery. Ultimately, the Claimant was diagnosed with cervical herniated disc with cervical stenosis.

On this same date, the Claimant consulted with a neurologist. The MRI (February 2009) revealed broad-based spondylitic ridging with mild narrowing of the canal at C5-C6 level. The spondylitic ridge was towards the right but there was bilateral foraminal narrowing. Spondylitic changes were seen at C6-C7 and C4-C5. The diagnoses were severe neck, shoulder, and left upper extremity pain. The shoulder appeared to be the main source of pain and the the Claimant was referred to an orthopedic surgeon.

On [REDACTED], the Claimant attended a follow-up visit regarding her pain. An EMG was normal. Some change from C4-C7 was noted as was a prominent spondylitic ridge at C5-C6 thus a bilateral transforaminal block was recommended. Surgical intervention was also discussed.

On [REDACTED], a Medical Examination Report was completed on behalf of the Claimant by her primary care physician. The current diagnoses were cervical disc disease with cervical radiculopathy and degenerative disc disease. The physical examination found the Claimant unable to dress/undress herself, severe neck pain, decreased range of motion of the left upper extremity (30 to 45 degrees); decreased left arm strength; and decreased sensation of the left hand. The Claimant's condition was deteriorating and she was found unable to lift/carry any weight; stand and/or walk less than 2 hours during an 8-hour workday; sit less than 6 hours during this same time frame; and able to perform repetitive actions with her upper right extremity only. The Claimant was unable to use her left arm. The Claimant was also found to be depressed secondary to chronic pain.

On [REDACTED], the Claimant underwent a paravertebral nerve root injection bilaterally at C5-C6 due to cervical radiculopathy and neck pain.

On [REDACTED], a Medical Examination Report was completed on behalf of the Claimant by her pain management orthopaedic physician. The current diagnoses were cervical radiculopathy, cervical degenerative disc disease, and cervical neck pain. The Claimant was found able to occasionally lift/carry less than 10 pounds; stand and/or walk at least 2 hours during an 8-hour workday; sit less than 6 hours during this same time frame; and unable to perform repetitive actions with either upper extremity.

As previously noted, the Claimant bears the burden to present sufficient objective medical evidence to substantiate the alleged disabling impairment(s). As summarized above, the Claimant has presented some objective medical evidence establishing that she does have physical and mental limitations on her ability to perform basic work activities. Accordingly, the Claimant has an impairment, or combination thereof, that has more than a *de minimis* effect on the Claimant's basic work activities. Further, the impairments have lasted continuously for twelve months therefore, the Claimant is not disqualified from receipt of MA-P benefits under Step 2.

In the third step of the sequential analysis of a disability claim, the trier of fact must determine if the Claimant's impairment, or combination of impairments, is listed in Appendix 1 of Subpart P of 20 CFR, Part 404. The Claimant asserts disabling impairments due to a torn rotator cuff, left atrophy, degenerative disc disease, and cervical radiculopathy.

Listing 1.00 defines musculoskeletal system impairments. Disorders of the musculoskeletal system may result from hereditary, congenital, or acquired pathologic processes. 1.00A Impairments may result from infectious, inflammatory, or degenerative processes, traumatic or developmental events, or neoplastic, vascular, or toxic/metabolic diseases. 1.00A Regardless of the cause(s) of a musculoskeletal impairment, functional loss for purposes of these listings is defined as the inability to ambulate effectively on a sustained basis for any reason, including pain associated with the underlying musculoskeletal impairment, or the inability to perform fine and gross movements effectively on a sustained basis for any reason, including pain associated with the underlying musculoskeletal impairment.

Categories of Musculoskeletal include:

- 1.04 Disorders of the spine (e.g., herniated nucleus pulposus, spinal arachnoiditis, spinal stenosis, osteoarthritis, degenerative disc disease, facet arthritis, vertebral fracture), resulting in compromise of a nerve root (including the cauda equine) or spinal cord. With:
- A. Evidence of nerve root compression characterized by neuro-anatomic distribution of pain, limitation of motion of the spine, motor loss (atrophy with associated muscle weakness or muscle weakness) accompanied by sensory or reflex loss and, if there is involvement of the lower back, positive straight-leg raising test (sitting and supine); or
 - B. Spinal arachnoiditis, confirmed by an operative note or pathology report of tissue biopsy, or by appropriate medically acceptable imaging, manifested by severe burning or painful dysesthesia, resulting in the need for changes in position or posture more than once every 2 hours; or
 - C. Lumbar spinal stenosis resulting in pseudoclaudication, established by findings on appropriate medically acceptable imaging, manifested by chronic nonradicular pain and weakness, and resulting in inability to ambulate effectively, as defined in 1.00B2b. (see above definition)

In this case, the objective medical evidence document the Claimant's cervical disc disease with radiculopathy and degenerative disc disease. The Claimant has decreased range of motion, atrophy, and decreased sensation as well as the inability to elicit biceps (on the left). The objective findings (MRI, EMG) confirm broad-based

spondylitic ridging with mild narrowing of the canal at C5-C6 level. The spondylitic ridge was towards the right but there was bilateral forminal narrowing as well as stenosis. Spondylitic changes were seen at C6-C7 and C4-C5. The Claimant has undergone surgery, had multiple blocks and injections, and has participated in pain management/therapy to no avail. The treating physicians have restricted the Claimant to less than sedentary activity. Ultimately, based on the medical evidence, the Claimant's impairment(s) meet, or are the medical equivalent thereof, a listed impairment within Listing 1.00, specifically 1.04, as detailed above. Accordingly, the Claimant is found disabled at Step 3 with no further analysis required.

The State Disability Assistance program, which provides financial assistance for disabled persons, was established by 2004 PA 344. DHS administers the SDA program pursuant to MCL 400.10 *et seq.* and Michigan Administrative Code ("MAC R") 400.3151 – 400.3180. Department policies are found in BAM, BEM, and BRM. A person is considered disabled for SDA purposes if the person has a physical or mental impairment which meets federal SSI disability standards for at least ninety days. Receipt of SSI or RSDI benefits based on disability or blindness, or the receipt of MA benefits based on disability or blindness automatically qualifies an individual as disabled for purposes of the SDA program.

In this case, the Claimant is found disabled for purposes of the MA-P program therefore the Claimant is found disabled for purposes of SDA benefit program.

DECISION AND ORDER

The Administrative Law Judge, based upon the above findings of fact and conclusions of law finds the Claimant disabled for purposes of the MA-P and SDA benefit programs.

Accordingly, it is ORDERED:

1. The Department's determination is REVERSED.
2. The Department shall initiate review of the May 10, 2010 application to determine if all other non-medical criteria are met and inform the Claimant of the determination in accordance with department policy.
3. The Department shall supplement for any lost benefits (if any) that the Claimant was entitled to receive if otherwise eligible and qualified in accordance with department policy.

4. The Department shall review the Claimant's continued eligibility in November 2011 in accordance with department policy.
