

**STATE OF MICHIGAN**  
**STATE OFFICE OF ADMINISTRATIVE HEARINGS AND RULES**  
**ADMINISTRATIVE HEARINGS FOR THE**  
**DEPARTMENT OF HUMAN SERVICES**

**IN THE MATTER OF:**

[REDACTED]

Reg. No.: 2010-40817  
Issue No.: 2009  
Case No.: [REDACTED]  
Load No.: [REDACTED]  
Hearing Date: August 2, 2010  
Macomb County DHS (36)

**ADMINISTRATIVE LAW JUDGE:** Colleen M. Mamelka

**HEARING DECISION**

This matter is before the undersigned Administrative Law Judge pursuant to MCL 400.9 and MCL 400.37 upon the Claimant's request for a hearing. After due notice, a hearing was held in Sterling Heights, Michigan on Monday, August 2, 2010. The Claimant appeared and testified. The Claimant was represented by [REDACTED] of [REDACTED]. [REDACTED] appeared on behalf of the Department.

**ISSUE**

Whether the Department properly determined that the Claimant was not disabled for purposes of Medical Assistance ("MA-P") benefit program?

**FINDINGS OF FACT**

The Administrative Law Judge, based upon the competent, material, and substantial evidence on the whole record, finds as material fact:

1. The Claimant submitted a public assistance application seeking MA-P benefits on November 2, 2009.
2. On January 7, 2010, the Medical Review Team ("MRT") determined the Claimant was not disabled. (Exhibit 1, pp. 1, 2)
3. The Department sent a Notice of Case Action to the Claimant informing him that he was found not disabled.
4. On February 25, 2010, the Department received the Claimant's timely written request for hearing. (Exhibit 8)

5. On July 8, 2010, the State Hearing Review Team (“SHRT”) found the Claimant not disabled. (Exhibit 10)
6. The Claimant’s alleged physical disabling impairments are due to chronic back pain with compression fractures and deformity, degenerative disc disease, and high blood pressure.
7. The Claimant has not alleged any mental disabling impairment(s).
8. At the time of hearing, the Claimant was 49 years old with a [REDACTED], [REDACTED] birth date; was 5’ 7” in height; and weighed 220 pounds.
9. The Claimant has a limited education with an employment history working as a carpenter and pipe fitter/welder.
10. The Claimant’s impairment(s) has lasted, or is expected to last, continuously for a period of at least 12 months.

### **CONCLUSIONS OF LAW**

The Medical Assistance (“MA”) program is established by the Title XIX of the Social Security Act and is implemented by Title 42 of the Code of Federal Regulations (“CFR”). The Department of Human Services (formerly known as the Family Independence Agency) administers the MA program pursuant to MCL 400.10, *et seq.*, and MCL 400.105. Department policies are found in the Bridges Administrative Manual (“BAM”), the Bridges Eligibility Manual (“BEM”), and the Bridges Reference Manual (“BRM”).

Disability is defined as the inability to do any substantial gainful activity by reason of any medically determinable physical or mental impairment which can be expected to result in death or which has lasted or can be expected to last for a continuous period of not less than 12 months. 20 CFR 416.905(a) The person claiming a physical or mental disability has the burden to establish it through the use of competent medical evidence from qualified medical sources such as his or her medical history, clinical/laboratory findings, diagnosis/prescribed treatment, prognosis for recovery and/or medical assessment of ability to do work-related activities or ability to reason and make appropriate mental adjustments, if a mental disability is alleged. 20 CFR 413.913 An individual’s subjective pain complaints are not, in and of themselves, sufficient to establish disability. 20 CFR 416.908; 20 CFR 416.929(a) Similarly, conclusory statements by a physician or mental health professional that an individual is disabled or blind, absent supporting medical evidence, is insufficient to establish disability. 20 CFR 416.927

When determining disability, the federal regulations require several factors to be considered including: (1) the location/duration/frequency/intensity of an applicant's pain; (2) the type/dosage/effectiveness/side effects of any medication the applicants takes to relieve pain; (3) any treatment other than pain medication that the applicant has received to relieve pain; and (4) the effect of the applicant's pain on his or her ability to do basic work activities. 20 CFR 416.929(c)(3) The applicant's pain must be assessed to determine the extent of his or her functional limitation(s) in light of the objective medical evidence presented. 20 CFR 416.929(c)(2)

In order to determine whether or not an individual is disabled, federal regulations require a five-step sequential evaluation process be utilized. 20 CFR 416.920(a)(1) The five-step analysis requires the trier of fact to consider an individual's current work activity; the severity of the impairment(s) both in duration and whether it meets or equals a listed impairment in Appendix 1; residual functional capacity to determine whether an individual can perform past relevant work; and residual functional capacity along with vocational factors (i.e. age, education, and work experience) to determine if an individual can adjust to other work. 20 CFR 416.920(a)(4); 20 CFR 416.945

If an individual is found disabled, or not disabled, at any step, a determination or decision is made with no need evaluate subsequent steps. 20 CFR 416.920(a)(4) If a determination cannot be made that an individual is disabled, or not disabled, at a particular step, the next step is required. 20 CFR 416.920(a)(4) If an impairment does not meet or equal a listed impairment, an individual's residual functional capacity is assessed before moving from step three to step four. 20 CFR 416.920(a)(4); 20 CFR 416.945 Residual functional capacity is the most an individual can do despite the limitations based on all relevant evidence. 20 CFR 945(a)(1) An individual's residual functional capacity assessment is evaluated at both steps four and five. 20 CFR 416.920(a)(4) In determining disability, an individual's functional capacity to perform basic work activities is evaluated and if found that the individual has the ability to perform basic work activities without significant limitation, disability will not be found. 20 CFR 416.994(b)(1)(iv) In general, the individual has the responsibility to prove disability. 20 CFR 416.912(a) An impairment or combination of impairments is not severe if it does not significantly limit an individual's physical or mental ability to do basic work activities. 20 CFR 416.921(a) The individual has the responsibility to provide evidence of prior work experience; efforts to work; and any other factor showing how the impairment affects the ability to work. 20 CFR 416.912(c)(3)(5)(6)

As outlined above, the first step looks at the individual's current work activity. In the record presented, the Claimant is not involved in substantial gainful activity therefore is not ineligible for disability under Step 1.

The severity of the Claimant's alleged impairment(s) is considered under Step 2. The Claimant bears the burden to present sufficient objective medical evidence to

substantiate the alleged disabling impairments. In order to be considered disabled for MA purposes, the impairment must be severe. 20 CFR 916.920(a)(4)(ii); 20 CFR 916.920(b) An impairment, or combination of impairments, is severe if it significantly limits an individual's physical or mental ability to do basic work activities regardless of age, education and work experience. 20 CFR 916.920(a)(4)(ii); 20 CFR 916.920(c) Basic work activities means the abilities and aptitudes necessary to do most jobs. 20 CFR 916.921(b) Examples include:

1. Physical functions such as walking, standing, sitting, lifting, pushing, pulling, reaching, carrying, or handling;
2. Capacities for seeing, hearing, and speaking;
3. Understanding, carrying out, and remembering simple instructions;
4. Use of judgment;
5. Responding appropriately to supervision, co-workers and usual work situations; and
6. Dealing with changes in a routine work setting.

*Id.* The second step allows for dismissal of a disability claim obviously lacking in medical merit. *Higgs v Bowen*, 880 F2d 860, 862 (CA 6, 1988). The severity requirement may still be employed as an administrative convenience to screen out claims that are totally groundless solely from a medical standpoint. *Id.* at 863 *citing Farris v Sec of Health and Human Services*, 773 F2d 85, 90 n.1 (CA 6, 1985) An impairment qualifies as non-severe only if, regardless of a claimant's age, education, or work experience, the impairment would not affect the claimant's ability to work. *Salmi v Sec of Health and Human Services*, 774 F2d 685, 692 (CA 6, 1985)

In the present case, the Claimant alleges chronic back pain with compression fractures and deformity, degenerative disc disease, and high blood pressure.

On on [REDACTED], chest, wrist, and back x-rays revealed osseous fragment at the left wrist, fracture deformity of the right-side inferior articular facet of L3 and similar-appearing mild anterior wedging and degenerative change of T11-12.

On [REDACTED], the Claimant was treated at the emergency room after falling approximately 20 feet with a positive loss of consciousness and positive alcohol intoxication. X-rays of the lumbar spine were taken which revealed wedged shaped vertebral bodies at the thoracolumbar junction. Prior to being seen by the orthopedic spine surgeon, the Claimant left. The discharge diagnosis was closed head injury.

On [REDACTED], the Claimant received emergency room treatment for neck and back pain.

On [REDACTED], a Medical Examination Report was completed on behalf of the Claimant. The current diagnosis were fractured lumbar vertebrae and lumbar radiculopathy. The Claimant's condition was stable however he needed treatment for at least 12 months. The Claimant was limited to occasionally lift/carry less than 10 pounds; stand and or walk less than 2 hours during an 8 hour workday; and able to perform repetitive actions with his upper extremities except for pushing and pulling. The Claimant was unable to operate foot/leg controls.

On [REDACTED], the Claimant attended a consultative evaluation. The Claimant was found able to work. The diagnoses were osteoarthritis and spinal disorder. The Claimant was able to ambulate without assistance; was able to squat 50% of the distance and recover; was able to tandem walk and tiptoe walk; get on-off the examination table; and straight leg raising was 70 degrees bilaterally.

On [REDACTED], a Medical Examination Report was completed on behalf of the Claimant. The current diagnoses were lumbar remote fracture, deformity involving L3, wedging degenerative of T11 and T12, failed surgery, and arthritis. The Claimant's condition was deteriorating and he was found unable to lift/carry any weight, occasionally stand and/or walk less than 2 hours during an 8 hour work day, but able to perform simple grasping, reaching, and fine manipulation. The Claimant was unable to perform any pushing/pulling or operate foot/leg controls.

On [REDACTED], the Claimant's treating physician authored a letter confirming that the Claimant has degenerative joint disease of the lumbar sacral spine, including a past right L-3 posterior element fracture with associated wedging deformity due to osteoarthritis of T-11 and T-12. The Claimant received physical therapy and epidural injections. Possible spinal cord stimulation procedure was not ruled out.

As previously noted, the Claimant bears the burden to present sufficient objective medical evidence to substantiate the alleged disabling impairment(s). As summarized above, the Claimant has presented medical evidence establishing that he does have some physical and mental impairment that effect his ability to perform basic work activities. The medical evidence has established that the Claimant has an impairment, or combination thereof, that has more than a *de minimis* effect on the Claimant's basic work activities. Further, the impairments have lasted continuously for twelve months, therefore, the Claimant is not disqualified from receipt of MA-P benefits under Step 2.

In the third step of the sequential analysis of a disability claim, the trier of fact must determine if the Claimant's impairment, or combination of impairments, is listed in

Appendix 1 of Subpart P of 20 CFR, Part 404. The Claimant has alleged physical disabling impairment(s) due to chronic back pain with compression fractures and deformity, degenerative disc disease, and high blood pressure.

As a preliminary matter, Listing 4.00 which defines cardiovascular system impairments was considered in light of the Claimant's high blood pressure. It is found that the Claimant's impairment does not meet the intent and severity requirement of a listed impairment within Listing 4.00 thus the Claimant cannot be found disabled under this listing.

Listing 1.00 defines musculoskeletal system impairments. Disorders of the musculoskeletal system may result from hereditary, congenital, or acquired pathologic processes. 1.00A Impairments may result from infectious, inflammatory, or degenerative processes, traumatic or developmental events, or neoplastic, vascular, or toxic/metabolic diseases. 1.00A Regardless of the cause(s) of a musculoskeletal impairment, functional loss for purposes of these listings is defined as the inability to ambulate effectively on a sustained basis for any reason, including pain associated with the underlying musculoskeletal impairment, or the inability to perform fine and gross movements effectively on a sustained basis for any reason, including pain associated with the underlying musculoskeletal impairment. Inability to ambulate effectively means an extreme limitation of the ability to walk; i.e., an impairment(s) that interferes very seriously with the individual's ability to independently initiate, sustain, or complete activities. 1.00B2b(1) Ineffective ambulation is defined generally as having insufficient lower extremity function to permit independent ambulation without the use of a hand-held assistive device(s) that limits the functioning of both upper extremities. (Listing 1.05C is an exception to this general definition because the individual has the use of only one upper extremity due to amputation of a hand.) *Id.* To ambulate effectively, individuals must be capable of sustaining a reasonable walking pace over a sufficient distance to be able to carry out activities of daily living. 1.00B2b(2) They must have the ability to travel without companion assistance to and from a place of employment or school. . . . *Id.* When an individual's impairment involves a lower extremity uses a hand-held assistive device, such as a cane, crutch or walker, the medical basis for use of the device should be documented. 1.00J4 The requirement to use a hand-held assistive device may also impact an individual's functional capacity by virtue of the fact that one or both upper extremities are not available for such activities as lifting, carrying, pushing, and pulling. *Id.*

Categories of Musculoskeletal include:

\* \* \*

1.04 Disorders of the spine (e.g., herniated nucleus pulposus, spinal arachnoiditis, spinal stenosis, osteoarthritis, degenerative disc disease, facet arthritis, vertebral fracture),

resulting in compromise of a nerve root (including the cauda equine) or spinal cord. With:

- A. Evidence of nerve root compression characterized by neuro-anatomic distribution of pain, limitation of motion of the spine, motor loss (atrophy with associated muscle weakness or muscle weakness) accompanied by sensory or reflex loss and, if there is involvement of the lower back, positive straight-leg raising test (sitting and supine); or
- B. Spinal arachnoiditis, confirmed by an operative note or pathology report of tissue biopsy, or by appropriate medically acceptable imaging, manifested by severe burning or painful dysesthesia, resulting in the need for changes in position or posture more than once every 2 hours; or
- C. Lumbar spinal stenosis resulting in pseudoclaudication, established by findings on appropriate medically acceptable imaging, manifested by chronic nonradicular pain and weakness, and resulting in inability to ambulate effectively, as defined in 1.00B2b. (see above definition)

In order to meet a musculoskeletal listing, the impairment must present a major dysfunction resulting in the inability to ambulate effectively. The objective medical documentation establish that the Claimant has lumbar remote fracture, deformity involving L3, wedging degenerative of T11 and T12, failed surgery, radiculopathy, and arthritis. The Claimant is able to ambulate without assistance and there was no evidence of nerve root compromise. Based on the medical evidence alone, the Claimant's physical impairment(s) do not meet or equal the requirements of the above cited listings therefore he cannot be found to be disabled for purposes of the Medical Assistance program. Accordingly, the Claimant's eligibility under Step 4 is considered. 20 CFR 416.905(a)

The fourth step in analyzing a disability claim requires an assessment of the Claimant's residual functional capacity ("RFC") and past relevant employment. 20 CFR 416.920(a)(4)(iv) An individual is not disabled if he/she can perform past relevant work. *Id.*; 20 CFR 416.960(b)(3) Past relevant work is work that has been performed within the past 15 years that was a substantial gainful activity and that lasted long enough for the individual to learn the position. 20 CFR 416.960(b)(1) Vocational factors of age, education, and work experience, and whether the past relevant employment exists in significant numbers in the national economy is not considered. 20 CFR 416.960(b)(3) RFC is assessed based on impairment(s), and any related symptoms, such as pain,

which may cause physical and mental limitations that affect what can be done in a work setting. RFC is the most that can be done, despite the limitations.

To determine the physical demands (exertional requirements) of work in the national economy, jobs are classified as sedentary, light, medium, heavy, and very heavy. 20 CFR 416.967 Sedentary work involves lifting of no more than 10 pounds at a time and occasionally lifting or carrying articles like docket files, ledgers, and small tools. 20 CFR 416.967(a) Although a sedentary job is defined as one which involves sitting, a certain amount of walking and standing is often necessary in carrying out job duties. *Id.* Jobs are sedentary if walking and standing are required occasionally and other sedentary criteria are met. Light work involves lifting no more than 20 pounds at a time with frequent lifting or carrying objects weighing up to 10 pounds. 20 CFR 416.967(b) Even though weight lifted may be very little, a job is in this category when it requires a good deal of walking or standing, or when it involves sitting most of the time with some pushing and pulling of arm or leg controls. *Id.* To be considered capable of performing a full or wide range of light work, an individual must have the ability to do substantially all of these activities. *Id.* An individual capable of light work is also capable of sedentary work, unless there are additionally limiting factors such as loss of fine dexterity or inability to sit for long periods of time. *Id.* Medium work involves lifting no more than 50 pounds at a time with frequent lifting or carrying of objects weighing up to 25 pounds. 20 CFR 416.967(c) An individual capable of performing medium work is also capable of light and sedentary work. *Id.* Heavy work involves lifting no more than 100 pounds at a time with frequent lifting or carrying of objects weighing up to 50 pounds. 20 CFR 416.967(d) An individual capable of heavy work is also capable of medium, light, and sedentary work. *Id.* Finally, very heavy work involves lifting objects weighing more than 100 pounds at a time with frequent lifting or carrying objects weighing 50 pounds or more. 20 CFR 416.967(e) An individual capable of very heavy work is able to perform work under all categories. *Id.*

Limitations or restrictions which affect the ability to meet the demands of jobs other than strength demands (exertional requirements, i.e. sitting, standing, walking, lifting, carrying, pushing, or pulling) are considered nonexertional. 20 CFR 416.969a(a) In considering whether an individual can perform past relevant work, a comparison of the individual's residual functional capacity with the demands of past relevant work. *Id.* If an individual can no longer do past relevant work the same residual functional capacity assessment along with an individual's age, education, and work experience is considered to determine whether an individual can adjust to other work which exists in the national economy. *Id.* Examples of non-exertional limitations or restrictions include difficulty function due to nervousness, anxiousness, or depression; difficulty maintaining attention or concentration; difficulty understanding or remembering detailed instructions; difficulty in seeing or hearing; difficulty tolerating some physical feature(s) of certain work settings (i.e. can't tolerate dust or fumes); or difficulty performing the manipulative or postural functions of some work such as reaching, handling, stooping, climbing,

crawling, or crouching. 20 CFR 416.969a(c)(1)(i) – (vi) If the impairment(s) and related symptoms, such as pain, only affect the ability to perform the non-exertional aspects of work-related activities, the rules in Appendix 2 do not direct factual conclusions of disabled or not disabled. 20 CFR 416.969a(c)(2) The determination of whether disability exists is based upon the principles in the appropriate sections of the regulations, giving consideration to the rules for specific case situations in Appendix 2. *Id.*

The Claimant's prior work history consists of work as a carpenter and pipe fitter/welder. In light of the Claimant's testimony and in consideration of the Occupational Code, the Claimant's prior work is considered semi- skilled, heavy work.

The Claimant testified that he can lift/carry less than 10 pounds; can walk short distances; can sit for approximately ½ hour; can stand for less than ½ hour; experiences difficulty bending; and is unable to squat. The most recent Medical Examination Report prohibits the Claimant from lifting/carrying any weight with standing and/or walking limited to less than 2 hours during an 8 hour workday. The Claimant is able to perform simple grasping, fine manipulation, and reaching with his upper extremities. If the impairment or combination of impairments does not limit physical or mental ability to do basic work activities, it is not a severe impairment(s) and disability does not exist. 20 CFR 416.920 In consideration of the Claimant's testimony, medical records, and current limitations, it is found that the Claimant is not able to return to past relevant therefore Step 5 of the analysis is required.

In Step 5, an assessment of the individual's residual functional capacity and age, education, and work experience is considered to determine whether an adjustment to other work can be made. 20 CFR 416.920(4)(v) At the time of hearing, the Claimant was 49 years old thus considered a younger individual for MA-P purposes. The Claimant completed through the 10<sup>th</sup> grade. Disability is found if an individual is unable to adjust to other work. *Id.* At this point in the analysis, the burden shifts from the Claimant to the Department to present proof that the Claimant has the residual capacity to substantial gainful employment. 20 CFR 416.960(2); *Richardson v Sec of Health and Human Services*, 735 F2d 962, 964 (CA 6, 1984). While a vocational expert is not required, a finding supported by substantial evidence that the individual has the vocational qualifications to perform specific jobs is needed to meet the burden. *O'Banner v Sec of Health and Human Services*, 587 F2d 321, 323 (CA 6, 1978). Medical-Vocational guidelines found at 20 CFR Subpart P, Appendix II, may be used to satisfy the burden of proving that the individual can perform specific jobs in the national economy. *Heckler v Campbell*, 461 US 458, 467 (1983); *Kirk v Secretary*, 667 F2d 524, 529 (CA 6, 1981) *cert den* 461 US 957 (1983).

In the record presented, the total impact caused by the combination of medical problems suffered by the Claimant must be considered to include subjective complaints

of severe pain. Pain is a non-exertional impairment. *Cline v Sullivan*, 939 F2d 560, 565 (CA 8, 1991) In applying the two-prong inquiry announced in *Duncan v Secretary of Health & Human Services*, 801 F2d 847 (CA6, 1986) it is found that the objective medical evidence establishes an underlying medical condition (degenerative joint disease, L-3 posterior fracture, wedging deformity due to osteoarthritis of T-11 and T-12, radiculopathy) that can reasonably be expected to produce the alleged disabling pain. *Id.* at 853. In this case, the Claimant has undergone a failed surgery, physical therapy, and epidural injections yet his condition continues to deteriorate. In light of the foregoing, it is found that the combination of the Claimant's physical impairments have an affect on his ability to perform basic work activities such that the Claimant is unable to meet the physical and mental demands necessary to perform even sedentary work as defined in 20 CFR 416.967(a). After review of the entire record, it is found that the Claimant is disabled for purposes of the MA-P program at Step 5.

### **DECISION AND ORDER**

The Administrative Law Judge, based upon the findings of fact and conclusions of law, finds the Claimant disabled for purposes of the Medical Assistance program.

It is ORDERED:

1. The Department's determination is REVERSED.
2. The Department shall initiate review of the November 2, 2009 application to determine if all other non-medical criteria are met and inform the Claimant and his authorized representative of the determination.
3. The Department shall supplement for any lost lost benefits that the Claimant was entitled to receive if otherwise eligible and qualified in accordance with department policy.
4. The Department shall review the Claimant's continued eligibility in accordance with department policy in September 2011.

*Colleen M. Mamelka*
