## STATE OF MICHIGAN

# MICHIGAN ADMINISTRATIVE HEARING SYSTEM ADMINISTRATIVE HEARINGS FOR THE DEPARTMENT OF HUMAN SERVICES

Reg No.: 2011-24080

Issue No.: 2009

Case No.:

Hearing Date: June 2, 2011 Wayne County DHS (76)

ADMINISTRATIVE LAW JUDGE: Colleen M. Mamelka

# **HEARING DECISION**

This matter is before the undersigned Administrative Law Judge pursuant to MCL 400.9 and MCL 400.37 upon the Claimant's request for a hearing. After due notice, a hearing was held in Detroit, Michigan on Thursday, June 2, 2011. The Claimant appeared a nd testified. The Claim ant was represented by appeared on behalf of the Department of Human Services ("Department").

During the hearing, the Claimant waived the time frame for the issuance of this decision, in order to allow for the submission of additional medical records. The evidence was received, reviewed, and forwarded to the State Hearing Review Team ("S HRT") for consideration. On December 1, 2011, the is office received the SHRT determination which found the Claimant not disabled. This matter is now before the undersigned for a final decision

## <u>ISSUE</u>

Whether the Department proper ly determined that the Claimant was not disabled for purposes of the Medical Assistance ("MA-P") benefit program?

## FINDINGS OF FACT

The Administrative Law Judge, based on t he competent, material, and substantial evidence on the whole record, finds as material fact:

 The Claimant submitt ed an application for public assistance seeking MA-P benefits on October 27, 2009. (Exhibit 1, pp. 153 – 168)

- 2. On December 18, 2010, the Medical Re view Team ("MRT") found the Claimant not disabled. (Exhibit 1, pp. 7, 8)
- 3. The Department notified the Claimant of the MRT determination.
- 4. On March 2, 2011, the Department rece ived the Claimant's written request for hearing. (Exhibit 1, p. 1)
- 5. On April 6<sup>th</sup> and November 11, 2011, the SHRT found the Claimant not disabled. (Exhibit 2)
- 6. The Claimant alleged physical disabling impairments due to right shoulder nerve damage, neck pain, shoulder pain, right arm pain, encephalitis, breathing issues, Legionnaire disease, chest pain, high blood press ure, bleeding bowels, and headaches.
- 7. The Claim ant alleged mental disabling impairments due to anxiety and depression.
- 8. At the time of hearing, the Claimant was years old with a date; was 5'3" in height; and weighed 162 pounds.
- 9. The Claim ant has a limit ed education with some vocational training and an employment history working as a general laborer and hi-lo driver.

## CONCLUSIONS OF LAW

The Medical Assistance program is established by Subchapter XIX of Chapter 7 of The Public Health & Welfare Act, 42 USC 1397, and is administered by the Department of Human Services, formerly known as the Family Independence Agency, pursuant to MCL 400.10 *et seq.* and MCL 400.105. Department policies are found in the Bridge's Administrative Manual ("BAM"), the Bridges Elig ibility Manual ("BEM"), and the Bridges Reference Tables ("RFT").

Disability is defined as the inability to do any substantial gainful activity by reason of any medically determinable physical or mental im pairment which can be expected to result in death or which has lasted or can be expect ed to last for a continuous period of not less than 12 months. 20 CFR 416.905(a). The person claiming a physical or mental disability has the burden to establish it through the use of competent medical evidence from qualified medical sources such as his or her medical history, clinical/laboratory findings, diagnosis/prescri bed treatment, prognosis for recovery and/or medical assessment of ability to do work-related ac tivities or ability to reason and make appropriate mental adjustments, if a mental disability is alleged. 20 CRF 413.913. An

individual's subjective pain complaints are not, in and of themselves, sufficient to establish disability. 20 CF R 416.908; 2 0 CFR 4 16.929(a). Similarly, conclusor y statements by a physician or mental health professional that an individual is disabled or blind, absent supporting medical evidence, is insufficient to establish disability. 20 CFR 416.927.

When determining disability, the federal regulations require several factors to be considered including: (1) the location/duration/frequency/intensity of an applicant's pain; (2) the type/dosage/effectiveness/side effects of any medication the applicant takes to relieve pain; (3) any treatment other than pain medication that the applicant has received to relieve pain; and (4) the effect of the applicant's pain on his or her ability to do basic work activities. 20 CFR 416.929(c)(3). The applicant's pain must be assessed to determine the extent of his or her functional limitation(s) in light of the objective medical evidence presented. 20 CFR 416.929(c)(2).

In order to determine whether or not an individual is disabled, federal regulations require a five-step sequential evaluation process be utilized. 20 CFR 416.920(a)(1). The five-step analysis requires the trier of fact to cons ider an individual's current work activit y; the severity of the impairment(s) both in duration and whether it meets or equals a listed impairment in Appendix 1; residual functional capacity to det ermine whether an individual can perform past relev ant work; and residual functional capacity along with vocational factors (i .e. age, education, and work experienc e) to determine if an individual can adjust to other work. 20 CFR 416.920(a)(4); 20 CFR 416.945.

If an individual is found disabled, or not disabled, at any step, a determination or decision is made with no need evaluate subsequent steps. 20 CFR 416.920(a)(4). If a determination cannot be made that an individual is disabled, or not disabled, at particular step, the next step is required. 20 CFR 416.920(a)(4). If an impairment does not meet or equal a listed impairment, an indi vidual's residual functional capacity is assessed before moving from step three to step four. 20 CFR 416.920(a)(4); 20 CFR 416.945. Residual f unctional capacity is the most an indiv idual can do d espite the limitations based on all relevant evidence. 20 CF R 945(a)(1). An individual's residua I functional capacity assessment is evaluat ed at both steps four and five. 20 CF 416.920(a)(4). In determining disability, an i ndividual's functional capac ity to perform basic work activities is evaluated and if f ound that the individual has the ability to perform basic work activities without significant limitation, disability will not be found. 20 CFR 416.994(b)(1)(iv). In general, the i ndividual has the responsibility to prove disability. 20 CFR 4 16.912(a). An impair ment or combination of impairments is not severe if it does not signific antly limit an individual's physical or mental ability to do basic work activities. 20 CFR 416.921(a ). The in dividual has the responsibility to provide evidence of prior work experience; efforts to work; and any other factor showing how the impairment affects the ability to work. 20 CFR 416.912(c)(3)(5)(6).

In addition to the above, when evaluating mental impairments, a special technique is utilized. 2 0 CFR 41 6.920a(a). First, an i ndividual's pertinent sym ptoms, signs, a nd laboratory findings are evaluated to determine whether a medically determinable mental impairment exists. 20 CFR 416.920a(b)(1). When a medically determinable mental impairment is established, the symptoms, signs and laboratory findings that substantiate the impairment are documented to include the individual's significant history, laboratory findings, and functional limitations. 20 CFR 416.920a(e)(2). Functional limitation(s) is assessed based upon the extent to whic h the impairment(s) interferes with an tion independently, appropriately, effectively, and on individual's ability to func а Id.; 20 CFR 416.920a(c)(2). Chronic m ental disorders, structured sustained basis. settings, medication, and other treatment and the effect on the overall degree of functionality is considered. 20 CFR 416.920a(c)(1). In addition, four broad functional areas (activities of daily living; social f unctioning; concentration, persistence or pace; and episodes of decompensat ion) are consider ed when deter mining an individual's degree of functional limitation. 20 CFR 416.920a(c)(3). The degree of limitation for the first three functional areas is rated by a five point scale: none, mild, moderate, marked, and extreme. 20 CFR 416.920a(c)(4). A four point scale (none, one or two, three, four or more) is used to rate the degree of limitation in the fourth functional area. Id. The last point on each scale repr esents a degree of limitation t hat is incompatible with the ability to do any gainful activity. Id.

After the degree of functional limitation is determined, the severity of the mental impairment is determined. 20 CFR 416.920a(d). If severe, a determination of whether the impairment meets or is the equivalent of a listed mental disorder is made. 20 CF R 416.920a(d)(2). If the severe mental im pairment does not meet (or equal) a listed impairment, an individual's residual functional capacity is assessed. 20 CF R 416.920a(d)(3).

As outlined above, the first step looks at the i ndividual's current work activity. In the record presented, the Claimant is not involved in substantial gainful activity; therefore, is not ineligible for disability benefits under Step 1.

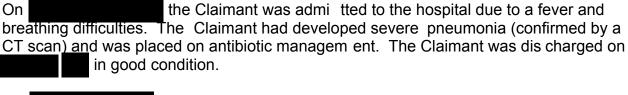

The severity of the Claimant 's alleged impairment(s) is considered under St ep 2. The Claimant bears the burden to pr esent sufficient objective medical evidenc et o substantiate the alleged disa bling impairments. In order to be considered disabled for MA purpos es, the impairment must be se vere. 20 CFR 916. 920(a)(4)(ii); 20 CFR 916.920(b). An impairment, or combination of impairments, is severe if it significantly limits an individual's physical or mental ability to do basic work activities regardless of age, education and work experience. 20 CFR 916.920(a)(4)(ii); 20 CFR 916.920(c). Basic work activities means the abilities and aptitudes necessary to do most jobs. 20 CFR 916.921(b). Examples include:

- 1. Physical functions such as wa lking, standing, sitting, lifting, pushing, pulling, reaching, carrying, or handling;
- 2. Capacities for seeing, hearing, and speaking;
- 3. Understanding, carrying out, and remembering simple instructions:
- 4. Use of judgment;
- 5. Responding appropriately to supervision, co-workers and usual work situations; and
- 6. Dealing with changes in a routine work setting.

ld.

The second step allows for dismissal of a disability claim obviously lacking in medical merit. Higgs v Bowen, 880 F2d 860, 862 (CA 6, 1988). The severity requirement may still be employed as an admin istrative convenience to screen out claims that are totally groundless solely from a medical standpoint. *Id.* at 863 citing Farris v Sec of Health and Human Services, 773 F2d 85, 90 n.1 (CA 6, 1985). An impairment qualifies as non-severe only if, regardless of a claimant's age, education, or work experience, the impairment would not affect the claimant's ability to work. Salmi v Sec of Health and Human Services, 774 F2d 685, 692 (CA 6, 1985).

In the present case, the Claimant alleges di sability due to right shoulder nerve damage, neck pain, shoulder pain, right—arm pain, encephalitis, breat—hing issues, Legionnair e disease, chest pain, high blood pressure, bleeding bowels, headaches, depression, and anxiety.

On an electromyography was performed which was unremarkable finding no definite electrodiagnostic eviden ce of a mononeuropathy, plexopathy, or radiculopathy affecting the right upper extremity.

On the Claimant attended a follow-up appointment for evaluation of his right arm. There was no evidence of at rophy of the right arm and muscle tone was normal. The impression was that the Claimant was suffering from a cervic all

radiculopathy or brachial plexus involving the right arm. The decreased reflexes were suggestive of radicular disease. The Claimant's pain medication was increased.

On the Claimant received emergency room treatment for abdominal pain, gastritis, and rectal bleed.

On the Claimant attended a psychological a ssessment. The diagnoses were depressive dis order, not otherwise s pecified ("NOS") and generalized anxiet y. Cognitive disorder (NOS) was not ruled out. The Global Assessment Functioning ("GAF") was 55. The Claimant's prognosis was good finding hi m able to understand, retain, and follow simple directions. The psychologist opined that the Claimant's depression was secondary to his medical condition.

On this same date, a consultative physical examination was performed. Fine and gross dexterity were reasonable with the excepti on of weak grip in the right hand. The Claimant had some range of motion limitations of the right shoulder, again noting rip and pinch strength was weaker on the right. The Claimant was able to ambulate freely. Based on the examination, the physician opined that the Claimant was able to work with limitations with his right hand of pushing and lifting/carrying of not more than 20 pounds. The Claimant had no problem walking, standing, or climbing stairs and his gross manipulations were satisfactory.

On Report was completed on behalf of the Claimant. The current diagnos es were plexopathy and focal neuropathy. The phys ical examination revealed decreased reflexes in the right arm and pain in the right arm. The Claimant was in stable condit ion and found able to occasionally lift/carry les s than 10 pounds; st and and/or walk about 6 hours during an 8 hour wo rkday; able to perform repetitive actions with his left upper extremity; and able to operate foot/leg controls.

On a Medical Examination Report was completed on behalf of the Claimant. The current diagnos es were hy pertension, low bac k pain, neck pain, and neuropathy of the right arm. The Claimant was in stable c ondition and found ab le to occasionally lift/carry less than 10 pounds; stand and/or walk about 6 hours during an 8 hour workday; able to perform repetitive actions with his left upper extremity; and able to operate foot/leg controls. Mentally, the Cl aimant's memory, sustained concentration, and social interaction were limited.

As previously noted, the Claim ant bears the burden to present sufficient objective medical evidence to substantiate the alleged disabling impairment(s). As summarized above, the Claimant has presented medical evidence establishing that he does have some physical and mental limitations on his ability to perform basic work activities. The medical evidence has established that the Claimant has an impairment, or combination thereof, that has more than a *de minimus* effect on the Claimant's basic work activities.

Further, the impairments have la sted continuous ly for twelve months; therefore, the Claimant is not disqualified from receipt of MA-P benefits under Step 2.

In the third step of the seque ntial an alysis of a disability claim, the trier of fact must determine if the Claimant's impairment, or co mbination of impairm ents, is listed in Appendix 1 of Subpart P of 20 CFR, Part 404.

The Claimant has alleged disa bling impairments due to right shoulder nerve damage, neck pain, shoulder pain, right arm pain, encephalitis, breathing issues, Legionnair e disease, chest pain, high blood pressure, bleeding bowels, and headaches.

Listing 1.00 (musculoskeletal system), Listing 3.00 (respiratory system), Listing 4.00 (cardiovascular system), Listing 5.00 (digestieve system), Listing 11.00 (neurological), and Listing 12.00 (mental disorders) were considered in light of the objective evidence. There was no evidence of a *major* dysfunction of a joint(s) or nerve root impingement. The Claimant was treated in 2009 for seve repneumonia; however, there was no subsequent treatment for any breathing issues. The evidence shows that the Claimant does have some limitation with his right hand/arm although he is able to carry 10 to 20 pounds. Ultimately, based on the medical evidence, it is found that the Claimant's impairment(s) do not meet the intent and severity requirements of a listed impairment. Accordingly, the Claimant's eligibility is considered under Step 4. 20 CFR 416.905(a).

The fourth step in analyzing a dis ability claim requires an assessment of the Claimant's residual f unctional capacity ("RFC") and pas t relevant employment. 20 CF R 416.920(a)(4)(iv). An individual is not disabled if he/she can perform past relevant work. *Id.*; 20 CFR 416.960(b)(3). Past relevant work is work that has been performed within the past 15 years that was a substantial gainful activity and that lasted long enough for the individual to learn the position. 20 CF R 416.960(b)(1). Vocational fact ors of age, education, and work experience, and whether the past relevant employment exists in significant numbers in the national economy is not considered. 20 CF R 416.960(b)(3). RFC is as sessed based on impairment(s), and any related symptoms, such as pain, which may cause physical and mental limitations that affect what can be done in a work setting. RFC is the most that can be done, despite the limitations.

To determine the physical demands (exertional requirements) of work in the national economy, jobs are classified as sedentary, light, medium, heavy, and very heavy. 2 0 CFR 416.967. Sedentary work involves lifting of no more than 10 pounds at a time and occasionally lifting or carrying articles like docket files, ledgers, and small tools. 20 CFR 416.967(a). Although a sedentary j ob is defined as one which involves sitting, a certain amount of walking and standing is often necessary in carrying out job duties. *Id.* Jobs are sedentary if walking and standing are required occasionally and other sedentary criteria are met. Light work involves—lifting no more than 20 pounds at a time with frequent lifting or carrying objects weighing up to 10 pounds. 20 CFR 416.967(b). Even

though weight lifted may be very little, a job is in this category when it requires a good deal of walking or standing, or when it invo lves sit ting most of the time with some pushing and pulling of arm or leg controls. Id. To be considered capable of performing a full or wide range of light work, an individual must have the ability to do substantially all of thes e activities. Id. A n individual capab le of light work is also capable of sedentary work, unless there are additionally limiting factors such as loss of fin е dexterity or inability to sit for long periods of time. *Id.* Medium work involves lifting no more than 50 pounds at a time with frequent lifting or carrying of objects weighing up to 25 pounds. 20 CFR 416.967(c). An individual capable of performing medium work is also capable of light and sedentary work. Id. Heavy work involves lifting no more than 100 pounds at a time with frequent lifting or carrying of object is weighing up to 50 pounds. 20 CFR 416.967(d). A n individual capable of heavy work is also c apable of medium, light, and sedentary work. *Id.* Finally, very heavy work involves lifting objects weighing more than 100 pounds at a time with frequent lifting or carrying objects weighing 50 pounds or more. 20 CFR 416.967(e). An individual capable of very heavy work is able to perform work under all categories. Id.

Limitations or restrictions which affect the ability to meet the demands of jobs other than strength demands (exertional requirements, i.e. sitting, standing, walk ing, lifting, carrying, pushing, or pulling) are consider ed nonexertional. 20 CFR 416.969a(a). In considering whether an individual can perform past relevant work, a comparis on of the individual's residual functional c apacity with the demands of past relevant work. an individual can no longer do past relevant work the same residual functional capacity assessment along with an individual's a ge, education, and work experience is considered to determine whether an individual can adjust to other work which exists in the national economy. Id. Examples of non-exertional limitations or restrictions include difficulty to function due to nervousness, anxiousness, or depression; difficulty maintaining attention or concentration; difficulty understanding or remembering detailed instructions; difficulty in seeing or hearing; difficulty tolerating some physic al feature(s) of certain work settings (i.e. ca n't tolerate dust or fumes); or di fficulty performing the manipulative or postur al functions of some work such as reaching, handling, stooping, climbing, crawling, or crouching. 20 CFR 4 16.969a(c)(1)(i) – (vi). If the imp airment(s) and related symptoms, such as pain, only affect the ability to perform the non-exertional aspects of work-related activities, the rules in Appendix 2 do conclusions of disabled or not disabled. 20 CFR 416.969a(c)(2). The determination of whether disability exists is bas ed upon the principles in the appropriate sections of the regulations, giving consideration to the rules for specific case situations in Appendix 2. ld.

The Claimant's work history in cludes employment history of work as a general laborer and hi-lo driver. In light of the Claimant's testimony and in consideration of the Occupational Code, the Claimant's prior work is classified as unsk illed light to medium work.

The Claim ant testified that he can lift/car ry approx imately 10-15 pounds with his left arm; walk about one block; stand for about 40 minutes; sit for about 40 to 50 minutes; and has some difficulty bending and/or squatting. The objective medical evidence finds the Claimant physically and ment ally able to work with some restrictions using his right arm. If the impairment or combination of impairments does not limit a n individual's physical or mental ability to do basic work activities, it is not a severe impairment(s) and disability does not exist. 20 CFR 416.920. In consideration of the Claimant's testimony and medical records, it is found that the Claimant may not be able to return to past relevant work. Accordingly, Step 5 of the sequential analysis is required.

In Step 5, an assessment of t he individual's residual functional capac ity and age, education, and work experience is consider ed to determine whet her an adjustment to other work can be made. 20 CFR 416.920(4)(v). At the time of hearing, the Claimant was 43 years old and, thus, considered to be a younger individual for MA-P purposes. The Claim ant has a limited education. Disability is found if an individual is unable to *Id.* At this point in the analysi adjust to other work. s, the burden shifts from the Claimant to the Department to present proof that the Claimant has the residual capacity to substantial gainful employment. 20 CFR 416.960(2); Richardson v Sec of Health and Human Se rvices, 735 F2d 962, 964 (CA 6, 1984). While a vocational expert is not required, a finding supported by substantial evidence that the individual has th vocational qualifications to perform specif ic jobs is needed to meet the burde n. , 587 F2d 321, 323 (CA 6, 1978). O'Banner v Sec of Health and Human Services Medical-Vocational guidelines found at 20 CFR Subpart P, Appendix II, may be used to satisfy the burden of proving that the individual can perform specific jobs in the nation al economy. Heckler v Campbell, 461 US 458, 467 (1983); Kirk v Secretary, 667 F2d 524, 529 (CA 6, 1981) cert den 461 US 957 (1983). The age for younger individuals (under 50) generally will not serious ly affect the ability to adjust to other work. 20 CF R 416.963(c).

In this case, the evidence established that the Claimant suffers with weakness and pain in his upper right extremity, depression, and anxiety. The evidence shows that from a mental and physical standpoint, the Claimant is able to work. There was no evidence of functional limitations that would interfere with the Claim ant's ability to function independently, appropriately, ef fectively, or on a sustained basis. Acc ordingly, the Claimant's degree of limitation based on the five point scale is, at most, mild. In light of the foregoing, it is found that the Claimant maintains the re sidual functional capacity for and continuing basis to me et the physica I and menta I work activities on a regular demands required to perform at least sedentary work as defined in 20 CFR 416.967(a). After review of the entire record, finding no contradiction with the Claimant's nonexertional limitations, and us ing the Medical-Vocationa | Guidelines [20 CFR 404, Subpart P, Appendix II] as a guide, specifically Rule 201.18, it is found that the Claimant is not disabled for purposes of the MA-P program at Step 5.

# **DECISION AND ORDER**

The Administrative Law Judge, based on the above findings of fact and conclusions of law, finds the Claimant not disabled for purposes of the MA-P benefit program.

Accordingly, it is ORDERED:

The Department's determination is AFFIRMED.

Colleen M. Mamilka

Colleen M. Mamelka Administrative Law Judge For Maura Corrigan, Director Department of Human Services

Date Signed: December 14, 2011

Date Mailed: December 14, 2011

**NOTICE**: Administrative Hearings may or der a rehearing or reconsideration on either its own motion or at the request of a party within 30 days of the mailing date of this Decision and Order. Administrative Hear ings will not order a rehearing or reconsideration on the Department's motion where the final decision cannot be implemented within 90 days of the filing of the original request.

The Claimant may appeal the Decision and Order to Circuit Court within 30 days of the mailing of the Decision and Order or, if a ti mely request for rehearing was made, within 30 days of the receipt date of the rehearing decision.

Claimant may request a rehearing or reconsideration for the following reasons:

- A rehearing <u>MAY</u> be granted if there is newly discovered evidence that could affect the outcome of the original hearing decision.
- A reconsideration **MAY** be granted for any of the following reasons:
  - misapplication of manual policy or law in the hearing decision,
  - typographical errors, mathematical error, or other obvious errors in the hearing decision that effect the substantial rights of the claimant:
  - the failure of the ALJ to address other relevant issues in the hearing decision.

Request must be submitted through the local DHS office or directly to MAHS by mail at Michigan Administrative hearings
