STATE OF MICHIGAN MICHIGAN ADMINISTRATIVE HEARING SYSTEM ADMINISTRATIVE HEARINGS FOR THE DEPARTMENT OF HUMAN SERVICES

Reg No.: 2011-38711

Issue No.: 2009

Case No.:

Hearing Date: October 17, 2011 Oakland County DHS (02)

ADMINISTRATIVE LAW JUDGE: Colleen M. Mamelka

HEARING DECISION

This matter is before the undersigned Administ rative Law Judge pursuant to MCL 400.9 and MCL 400.37 upon the Claimant's request for a hearing. After due notice, a hearing was held in Madison Height s, Michigan on Monday, Oct ober 17, 2011. The Claimant appeared and testified. The Claimant was represented by appeared on be half of the Department of Human Services ("Department").

During the hearing, the Claimant waived the time frame for the issuance of this decision in order to allow for the submission of additional medical records. The evidence was received, reviewed, and forwarded to the State Hearing Review Team ("S HRT") for consideration. On April 10, 2012, this office received the SHRT determination which found the Claimant not disabled. This matter is now before the undersigned for a final decision.

<u>ISSUE</u>

Whether the Department proper ly determined that the Claimant was not disabled for purposes of the Medical Assistance ("MA-P") benefit program?

FINDINGS OF FACT

The Administrative Law Judge, based on t he competent, material, and substantial evidence on the whole record, finds as material fact:

 The Claimant submitt ed an application for public assistance seeking MA-P benefits, retroactive to October 2010, on January 28, 2011.

- 2. On March 1, 2011, the Medical Revi ew Team ("MRT") f ound the Claimant not disabled. (Exhibit 1, pp. 1, 2)
- 3. On March 4, 2011, the Department notified the Claim ant of the MRT determination.
- 4. On May 23, 2011, the Department received the Claimant's timely written request for hearing. (Exhibit 2)
- 5. On July 16, 2011 and April 4, 2012, the SHRT found the Claima nt not disabled. (Exhibit 4)
- 6. The Claimant alleged physical dis abling impairments due to back and shoulder pain, feet pain, neuropathy, carpal tunne I syndrome ("CTS"), chronic obstructive pulmonary disease ("COPD"), sleep apnea, high blood pr essure, gastroesophageal reflux diseas e ("GERD"), traumatic brain injury, and seiz ure disorder.
- 7. The Claimant alleged mental disabling impairm ents due to depression and anxiety.
- 8. At the time of hearing, the Claim ant was years old with a birth date; was 6'1" in height; and weighed approximately 319 pounds.
- 9. The Claim ant is a high school graduate with some vocational training and an employment history as a security guard, office manager, mobile home community manager, care provider, office receptionist, and security officer.
- 10. The Claimant's impairments have lasted, or are expected to last, continuously for a period of 12 months or longer.

CONCLUSIONS OF LAW

The Medical Assistance program is established by Subchapter XIX of Chapter 7 of The Public Health & Welfare Act, 42 USC 1397, and is administered by the Department of Human Services, formerly known as the Family Independence Agency, pursuant to MCL 400.10 *et seq.* and MCL 400.105. Department policies are found in the Bridge's Administrative Manual ("BAM"), the Bridges Eligib ility Manual ("BEM"), and the Bridges Reference Tables ("RFT").

Disability is defined as the inability to do any substantial gainful activity by reason of any medically determinable physical or mental im pairment which can be expected to result in death or which has lasted or can be expect ed to last for a continuous period of not

less than 12 months. 20 CFR 416.905(a). The person claiming a physical or mental disability has the burden to establish it through the use of competent medical evidence from qualified medical sources such as his or her medical history, clinical/laboratory findings, diagnosis/prescri bed treatment, prognosis for recovery and/or medical assessment of ability to do work-related ac tivities or ability to reason and make appropriate mental adjustments, if a mental disability is alleged. 20 CRF 416.913. An individual's subjective pain complaints are not, in and of themselves, sufficient to establish disability. 20 CF R 416.908; 2 0 CFR 4 16.929(a). Similarly, conclusor y statements by a physician or mental health professional that an individual is disabled or blind, absent supporting medical evidence, is insufficient to establish disability. 20 CFR 416.927.

When determining disability, the federal regulations require several factors to be considered including: (1) the location/duration/frequency/intensity of an applicant's pain; (2) the type/dosage/effectiveness/side effects of any medication the applicant has takes to relieve pain; (3) any treatment other than pain medication that the applicant has received to relieve pain; and (4) the effect of the applicant's pain on his or her ability to do basic work activities. 20 CFR 416.929(c)(3). The applicant's pain must be assessed to determine the extent of his or her functional limitation(s) in light of the objective medical evidence presented. 20 CFR 416.929(c)(2).

In order to determine whether or not an individual is disabled, federal regulations require a five-step sequential evaluation process be utilized. 20 CFR 416.920(a)(1). The five-step analysis requires the trier of fact to cons ider an individual's current work activit y; the severity of the impairment(s) both in duration and whether it meets or equals a listed impairment in Appendix 1; residual functional capacity to det ermine whether an individual can perform past relev ant work; and residual functional capacity along with vocational factors (i .e. age, education, and work experienc e) to determine if an individual can adjust to other work. 20 CFR 416.920(a)(4); 20 CFR 416.945.

If an individual is found disabled, or not disabled, at any step, a determination or decision is made with no need evaluate subsequent steps. 20 CFR 416.920(a)(4). If a determination cannot be made that an individual is disabl ed, or not disabled, at a particular step, the next step is required. 20 CFR 416.920(a)(4). If an impairment does not meet or equal a listed impairment, an indi vidual's residual functional capacity is assessed before moving from step three to step four. 20 CFR 416.920(a)(4); 20 CFR 416.945. Residual f unctional capacity is the most an indiv idual can do d espite the limitations based on all rele vant evidence. 20 CFR 416.945(a)(1). An individual's residual functional capacity ass essment is ev aluated at both steps four and five. 20 CFR 416.920(a)(4). In determinin g disa bility, an in dividual's functional capacity to perform basic work activities is evaluated and if found that the individual has the ability to perform basic work activities without significant limitation, disability will not be found. 20 CFR 416.994(b)(1)(iv). In general, the indiv idual has the responsibility to prove

disability. 20 CFR 4 16.912(a). An impair ment or combi nation of impairments is not severe if it does not signific antly limit an individual's physical or mental ability to do basic work activities. 20 CFR 416.921(a). The individual has the responsibility to provide evidence of prior work experience; efforts to work; and any other factor showing how the impairment affects the ability to work. 20 CFR 416.912(c)(3)(5)(6).

In addition to the above, when evaluating mental impairments, a special technique is utilized. 2 0 CFR 41 6.920a(a). First, an i ndividual's pertinent sym ptoms, signs, a nd laboratory findings are evaluated to determine whether a medically determinable mental impairment exists. 20 CFR 416.920a(b)(1). When a medically determinable mental impairment is established, the symptoms, signs and laboratory findings that substantiate the impairment are documented to include the individual's significant history, laboratory findings, and functional limitations. 20 CFR 416.920a(e)(2). Functional limitation(s) is assessed based upon the extent to whic h the impairment(s) interferes with an individual's ability to func tion independently, appropriately, effectively, and on Id.; 20 CFR 416.920a(c)(2). Chronic m ental disorders, structured sustained basis. the effect on the overall degree of settings, medication, and other treatment and functionality is considered. 20 CFR 416.920a(c)(1). In addition, four broad functional areas (activities of daily living; social f unctioning; concentration, persistence or pace; and episodes of decompensat ion) are consider ed when deter mining an individual's degree of functional limitation. 20 CFR 416.920a(c)(3). The degree of limitation for the first three functional areas is rated by a five point scale: none, mild, moderate, marked, and extreme. 20 CFR 416.920a(c)(4). A four point scale (none, one or two, three, four or more) is used to rate the degree of limit ation in the fourth functional area. *Id.* The last point on each scale repr esents a degree of limitation t hat is incompatible with the ability to do any gainful activity. Id.

After the degree of functional limitation is determined, the severity of the mental impairment is determined. 20 CFR 416.920a(d). If severe, a determination of whether the impairment meets or is the equivalent of a listed mental disorder is made. 20 CF R 416.920a(d)(2). If the severe mental im pairment does not meet (or equal) a listed impairment, an individual's residual functional capacity is assessed. 20 CF R 416.920a(d)(3).

As outlined above, the first step looks at the i ndividual's current work activity. In the record presented, the Claiman t is not involved in substantial gainful activity and, therefore, is not ineligible for disability benefits under Step 1.

The severity of the Claimant's alleged impa irment(s) is considered under St ep 2. The Claimant bears the burden to present sufficient objective medical evidence to substantiate the alleged disabling impairments. In order to be considered disabled for MA purpos es, the impairment must be seevere. 20 CFR 416. 920(a)(4)(ii); 20 CFR 416.920(b). An impairment, or combination of impairments, is severe if it significantly

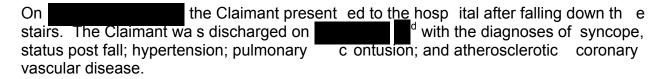

limits an in dividual's physical or mental ability to do basic wo rk activities regardless of age, education and work exper ience. 20 CFR 416.920(a)(4)(ii); 20 CFR 416.920(c). Basic work activities means the abilities and aptitudes necessary to do most jobs. 20 CFR 416.921(b). Examples include:

- 1. Physical functions such as wa lking, standing, sitting, lifting, pushing, pulling, reaching, carrying, or handling;
- 2. Capacities for seeing, hearing, and speaking;
- 3. Understanding, carrying out, and remembering simple instructions;
- 4. Use of judgment;
- 5. Responding appropriately to supervision, co-workers and usual work situations; and
- 6. Dealing with changes in a routine work setting.

ld.

The second step allows for dismissal of a disability claim obviously lacking in medical merit. Higgs v Bowen, 880 F2d 860, 862 (CA 6, 1988). The severity requirement may still be employed as an admin istrative convenience to screen out claims that are totally groundless solely from a medical standpoint. *Id.* at 863 citing Farris v Sec of Health and Human Services, 773 F2d 85, 90 n.1 (CA 6, 1985). An impairment qualifies as non-severe only if, regardless of a claimant's age, education, or work experience, the impairment would not affect the claimant's ability to work. Salmi v Sec of Health and Human Services, 774 F2d 685, 692 (CA 6, 1985).

In the present case, the Cla imant alleges disability due to back and shou lder pain, feet pain, neuropathy, CT S, COPD, sleep apnea, high blood pressur e, GERD, traumatic brain injury, and seizure disorder.

the Claimant's diagnoses were carpal tunnel syndrome, vision changes (likely due to blood pressure fluct uation- retinal detachment and tear ruled out), hypertens ion, GERD, insomnia, hypersomnia, epilepsy, severe

On

hallucinations were discussed

otherwise specified) on the left ear.

diagnoses were lar ge mass on neck, seborrheic

obstructive sleep apnea, neuropathy, meralgia, paresthetics, inadequate sleep hygiene, memory loss, depression, mood disorder, paranoid personality disorder, and obesity. The Claimant's Global Assessment Functioning ("GAF") on May 24, 2011 was 70. On the Claim ant was diagnosed with possible epilepsy, generalized tonic clonic seizures, possible sensory neuropathy, memory loss, and thigh numbness. On a complete neurologic al examination was ordered due to his seizures. The diagnoses were possible epilepsy, possible sensory neuropathy, memory loss, and thigh numbness (likely meralgia paresthetica). On an MRI of the brain was unremarkable. On the Claiman t attended a consultative evaluation. The diagnosis was adjustment disorder with anxiety with a GAF of 50. the Claimant sought treatment for vision loss. On chest x-rays were normal. The Claimant's active medical problems were obesity, GERD, snoring, hypersomn ia, epilepsy, obstructive sleep apnea, inadequate sleep hygiene, hypertension, meralgia parest hetica, memory loss, and lack of adequate sleep. On the Claimant joined an anger management group. a neurops ychological eval uation was per formed. In cognitiv e On functioning the Claim ant had relative difficult y in task s of attention, proces sing speed, and motor functioning. The Claimant's coognitive difficulties were found to be due to emotional issues as opposed to a neurologic event. These difficulties would improve and no restrictions from a neur ological standpoint were warr anted. The diagnosis was memory loss. an MRI of the cervical sp ine revealed subcutaneous fatty tissues or benign lipoma and multiple broad-based central disc protrusions at C4-5, C5-6, and C6-7 with encr oachment upon the anterior thecal sac and bilateral rece sses. Mild canal and bilateral intervertebral foraminal stenos is at those levels without abnormal cord signal was noted.

the Claim ant sought treatment for de

resulting in a dec rease in medication.

pression. Vivid visual

dermatitis, and neoplasm (not

Additiona I

On this same date, the Claimant sought tr eatment for a hump on his back (20+ years) where blood and pus has to be squeezed out of it. Other cysts were documented. An MRI revealed a large mass on the nec k (not warranting int ervention), seborrheic dermatitis, and neoplasm, not otherwise specified, of the left ear (likely lentigo).

On the entire of the right and left foot showed a calc aneal spurs at the heel and were suggestive of mild pes planus deformity. Other diagnoses were hammer toes, right second to e burning/pain, and bluish discoloration under nail. The assessment was hypertension, obesity, and sleep apnea noting the need to lose weight, seizure disorder (no seizur es since finger burn, hammer toes, and right foot neuropathy.

On x-rays of the right foot revealed mild pes planus deformity, calcaneal spur at the heel, and hammertoe deformities of the second through fourth toes.

On the Claimant attended a follow-up app ointment with complaints of not being able to s leep. The Claimant's seizures, obesity, high cholesterol, thyroid disease, asthma, COPD, PUD, blood in stool/urine, liv er/kidney disorder, history of cancer, anemia, congestive heart failure, m eningitis, heart attack, coronary artery disease, and traumatic brain injury were documented as well as depression and anxiety. The physic al examination was unremarkable and the impressions were obstructive sleep apnea, obesity, and seizure disorder.

As previously noted, the Claim ant bears the burden to present sufficient objective medical evidence to substantiate the alleged disabling impairment(s). As summarized above, the Claimant has presented some medical evidence establishing that he does have some physical and mental limitations on his ability to perform basic work activities. The medical evidence has established that the Claimant has an impairment, or combination thereof, that has more than a deminimus effect on the Claimant's basic work activities. Further, the impairmentshave lasted continuous ly for twelve months; therefore, the Claimant is not disqualified from receipt of MA-P benefits under Step 2.

In the third step of the seque ntial an alysis of a disability claim, the trier of fact must determine if the Claimant's impairment, or co mbination of impairm ents, is listed in Appendix 1 of Subpart P of 20 CFR, Part 404. The Claim ant has alleged physical and mental disabling impairments due to back and shoulder pain, feet pain, neuropathy, CTS, COPD, sleep apnea, high blood pressure, GE RD, traumatic brain injury, and seizure disorder.

Listing 1.00 (musculoskeletal system), Listing 2.00 (special senses and speech), Listing 3.00 (respiratory system), Listing 4.00 (c ardiovascular), Listing 5.00 (digestiv e disorders), Listing 11.00 (neurological), and Listing 12.00 (mental disorders) were considered in light of the medical evidence. The objective medical records establish

that the Claimant has multiple medical issues; however, these records do not meet the intent and severity requirements of a listing, or its equivalent. Mentally, the Claimant is able to meet his activ ities of daily living with some mild restriction. In consideration of the Claimant's depression and anxiety, social functioning, concentration, persistence or pace is mildly impact ed. The record does not contain episodes of decompensation of extended duration. In additon, although the Claimant suffers with depressive symptoms, the objective findings do not establish a residual disease process that shows even a minimal increase in ment al demands or change in environment would cause the Claimant to deompensate or require a highly supportive living arrangement. Ultimately, the record does not support a finding of at I east two marked limitations as detailed in 12.02, 12.04 and 12.06. Accordingly, the Claimant cannot be found disabled, or not disabled, at Step 3.

Before considering the fourth step in the sequential analysis, a determination of the individual's residual functional capacity ("RFC") is made. 20 CFR 416.945. An individual's RFC is the most he/she canstill do on a sustained bas is despite the limitations from the impairment(s). *Id.* The total limiting effects of all the impairments, to include those that are not severe, are considered. 20 CFR 416.945(e).

To determine the physical demands (exertional requirements) of work in the national economy, jobs are c lassified as sedentary, light, medium, heavy, and very heavy. 2 0 CFR 416.967. Sedentary work involves lifting of no more than 10 pounds at a time and occasionally lifting or carrying articles like docket files, ledgers, and small tools. 20 CFR 416.967(a). Although a sedentary job is defined as one which involves sitting, a certain amount of walking and standing is often necessary in carrying out job duties. Id. Jobs are sedentary if walking and standing are r equired occasionally and other sedentary criteria are met. Light work involves lifting no more than 20 pounds at a time with frequent lifting or carrying objects weighing up to 10 pounds. 20 CFR 416.967(b). Even though weight lifted may be very little, a job is in this category when it requires a good Ives sit ting most of the time with some deal of walking or standing, or when it invo pushing and pulling of arm or leg controls. *Id.* To be considered capable of performing a full or wide range of light work, an individual must have the ability to do substantially all of thes e activities. Id. A n individual capab le of light work is also capable of sedentary work, unless there are additionally limiting factors such as loss of fin dexterity or inability to sit for long periods of time. Id. Medium work involves lifting no more than 50 pounds at a time with frequent lifting or carrying of objects weighing up to 25 pounds. 20 CFR 416.967(c). An individual capable of performing medium work is also capable of light and sedentary work. *Id.* Heavy work involves lifting no more than 100 pounds at a tim e with frequent lifting or carrying of object s weighing up to 50 pounds. 20 CFR 416.967(d). A n individual capable of heavy work is also c apable of medium, light, and sedentary work. *Id.* Finally, very heavy work involves lifting objects weighing more than 100 pounds at a time with frequent lifting or carrying objects

weighing 50 pounds or more. 20 CFR 416.967(e). An individual capable of very heavy work is able to perform work under all categories. *Id.*

Limitations or restrictions which affect the ability to meet the demands of jobs other than strength demands (exertional requirements, i.e. sitting, standing, walk ing, lifting, carrying, pushing, or pulling) are consider ed nonexertional. 20 CFR 416.969a(a). In considering whether an individual can perform past relevant work, a comparis on of the individual's residual functional c apacity with the demands of past relevant work. an individual can no longer do past relevant work the same residual functional capacity assessment along with an individual's a ge, education, and work experience is considered to determine whether an individual can adjust to other work which exists in the national economy. *Id.* Examples of non-exertional limitations or restrictions include difficulty to function due to nervousness. anxiousness, or depression; difficulty maintaining attention or concentration; difficulty understanding or remembering detailed instructions; difficulty in seeing or hearing; difficulty tolerating so me physical feature(s) of certain work settings (i.e. ca n't tolerate dust or fumes); or difficulty performing the manipulative or postur al functions of some work such as reaching, handling, stooping, climbing, crawling, or crouching. 20 CFR 4 16.969a(c)(1)(i) – (vi). If the imp airment(s) and related symptoms, such as pain, only affect the ability to perform the non-exertional aspects of work-related activities, the rules in Appendix 2 do not direct factual conclusions of disabled or not disabled. 20 CFR 416.969a(c)(2). The determination of whether disability exists is bas ed upon the principles in the appropriate sections of the regulations, giving consideration to the rules fo r specific case situat ions in Appendix 2. ld.

In this case, the Claimant alleged disability based on back and shoulder pain, feet pain, neuropathy, CTS, CO PD, high blood pressu re, sleep apnea, GERD, traumatic brain injury, and seizure disorder. The Claimant testified that he is able to walk without issue; grip/grasp without some difficult y; sit for less than 2 hours; lift/c arry between 10 and 15 pounds; stand less than 2 hours; and is able to partially bend and squat. The objective medical findings do not specify any limitati ons. Mentally, the record does not contain any marked restrictions in the areas of activities of daily living, social functioning, concentration, persistence, or pace and as such, the degree of lim itation is mild. Finally, the record reflects that the Claim ant's mental condition is stable without evidence of repeated episodes of decompensation. Applying the four point scale, the Claimant's degree of limita tion in the fourth functional area is at most a 1. The record does, however, confirm some cognitive dysf unction (emotionally based) as well as memory loss. After review of the entire record to include the Claimant's testimony, it is found that the Claimant maintains the residual functional capacity to perform at least unskilled, limited, sedentary work as defined by 20 CFR 416.967(a). Limitations being the alternation between sitting and standing at will.

The fourth step in analyzing a dis ability claim requires an assessment of the Claimant's residual f unctional capacity ("RFC") and pas t relevant employment. 20 CF R 416.920(a)(4)(iv). An individual is not disabled if he/she can perform past relevant work. *Id.*; 20 CFR 416.960(b)(3). Past relevant work is work that has been performed within the past 15 years that was a substantial gainful activity and that lasted long enough for the individual to lear n the position. 20 CF R 416.960(b)(1). Vocational fact ors of age, education, and work experience, and whether the past relevant employment exists in significant numbers in the national economy is not considered. 20 CFR 416.960(b)(3).

The Claimant's prior work history consists of work as a security guard/supervisor (semi-skilled light), in real estate sales (semi-skilled light), asphalt estimator (skilled light), and as a dump truck driver (semi-skilled medium).

If the impairment or combination of impairment s does not limit physical or mental ability to do basic work activities, it is not a seve re impairment(s) and disability does not exist. 20 CF R 416.920. The Claimant testified that due to both physical and cognitive limitations, he is unable to perform his past relevant work. In light of the entire record and the Claimant's RFC (see above), it is found that the Claimant is unable to perform past relevant work.

In Step 5, an assessment of the individua I's residual functional capace ity and age, education, and work experience is consider ed to determine whet her an adjustment to other work can be made. 20 CFR 416.920(4)(v). At the time of hearing, the Claimant years old thus consider ed to be of advanced age for MA-P purpo Claimant is a high school graduate with som e vocational training. Disability is found if Id. At this po int in the analysis, the an individual is unable to adjust to other work. burden shifts from the Claimant to the Depart ment to present proof that the Claimant I gainful employment. 20 CFR 416.960(2): has the residual capacity to substantia Richardson v Sec of Health and Human Services , 735 F2d 962, 964 (CA 6, 1984). While a vocational expert is not required, a finding supported by substantial evidence that the individual has the vo cational qualifications to perform specific jobs is needed to meet the burden. O'Banner v Sec of Heal th and Hum an Services. 587 F 2d 321. 323 (CA 6, 1978). Medical-Vocational guide lines found at 20 CF R Subpart P, Appendix II, may be used to satisfy the burden of provi and that the individual can perform specific jobs in the national economy. Heckler v Campbell, 461 US 458, 467 (1983); Secretary, 667 F2d 524, 529 (CA 6, 1981) cert den 461 US 957 (1983). In order to find transferability of skills to skilled sedentary work for individuals who are of advanced age (55 and over), there must be very little, if any, vocational adjustment required in terms of tools, work processes, work settings, or the industry. Individuals of advanced age found to be significantly affected in their ability to adjust to other work. 20 CFR 416.963(e).

In this case, the objective findings reveal that the Claimant suffers from neck, back and foot pain, seizures, hypert ension, GERD, insomnia, seve re obstructive sle ep apnea,

memory loss, depression, paranoid persona lity disorder, anxiety, neuropathy, heel spurs, thigh pain, multiple di sc protrusions in the cervical spine, cognitive dysfunction, memory loss, and left ear lesion. After review of the entire record, and in consideration of the Claimant's age, education, work experience, and RFC, finding no contradiction with the Claimant's non-exertional limitations, and using the Medical-Vocational Guidelines [20 CFR 404, Subpart P, Appendix II] as a guide, specifically Rule 201.06, it is found that the Claimant is disabled for purposes of the MA-P program at Step 5.

DECISION AND ORDER

The Administrative Law Judge, based on the above findings of fact and conclusions of law finds the Claimant disabled for purposes of the MA-P benefit program.

Accordingly, It is ORDERED:

- 1. The Department's determination is REVERSED.
- 2. The Department shall initiate processing of the January 28, 2011app lication to determine if all other non-medical criteria are met and inform the Claimant and his Authorized Hearing Represe ntative of the determination in accordance with department policy.
- 3. The Department shall supplement fo r any lost benefits (if any) that the Claimant was entitled to receive if otherwise eligib le and qualifie d in accordance with department policy.
- 4. The Department shall review the Claimant's cont inued eligibility in May 2013 in accordance with department policy.

Administrative Law Judge
For Maura Corrigan, Director
Department of Human Services

Date Signed: April 18, 2012

Date Mailed: April 18, 2012

NOTICE: Michigan Administrative Hearing Syst em (MAHS) may order a rehearing or reconsideration on either its own motion or at the request of a par ty within 30 days of the mailing date of this Dec ision and Order. MAHS will not or der a rehearing or reconsideration on the Department's mo tion where the final decis ion cannot be implemented within 90 days of the filing of the original request. (60 days for FAP cases)

The Claimant may appeal the Decision and Order to Circuit Court within 30 days of the receipt of the Decision and Order or, if a ti mely request for rehearing was made, within 30 days of the receipt date of the rehearing decision.

Claimant may request a rehearing or reconsideration for the following reasons:

- A rehearing <u>MAY</u> be granted if there is newly discovered evidence that could affect the outcome
 of the original hearing decision.
- A reconsideration **MAY** be granted for any of the following reasons:
 - misapplication of manual policy or law in the hearing decision,
 - typographical errors, mathematical error, or other obvious errors in the hearing decision that effect the substantial rights of the claimant:
 - the failure of the ALJ to address other relevant issues in the hearing decision.

Request must be submitted through the local DHS office or directly to MAHS by mail at Michigan Administrative Hearings
