

**STATE OF MICHIGAN
MICHIGAN ADMINISTRATIVE HEARING SYSTEM
ADMINISTRATIVE HEARINGS FOR THE
DEPARTMENT OF HUMAN SERVICES**

IN THE MATTER OF:

Reg. No: 201149487
Issue No: 2009, 4031
Case No: [REDACTED]
Hearing Date: November 17, 2011
Kalkaska County DHS

ADMINISTRATIVE LAW JUDGE: Kevin Scully

HEARING DECISION

This matter is before the undersigned Administrative Law Judge by authority of MCL 400.9 and MCL 400.37 upon Claimant's request for a hearing. Claimant's request for a hearing was received on August 19, 2011. After due notice, a telephone hearing was held on Thursday, November 17, 2011. The record was held open to obtain additional medical documentation and the Claimant waived the time periods. The Claimant personally appeared and provided testimony.

ISSUE

Did the Department of Human Services (Department) properly determine that the Claimant did not meet the disability standard for Medical Assistance based on disability (MA-P) and State Disability Assistance (SDA)?

FINDINGS OF FACT

The Administrative Law Judge, based upon the competent, material and substantial evidence on the whole record, finds as material fact:

1. On June 10, 2011, the Claimant submitted an application for Medical Assistance (MA) and State Disability Assistance (SDA) benefits alleging disability.
2. On August 3, 2011, the Medical Review Team (MRT) determined that the Claimant did not meet the disability standard for Medical Assistance (MA-P) and State Disability Assistance (SDA) because it determined that the Claimant's impairment lacks duration of 12 months.
3. On August 11, 2011, the Department sent the Claimant notice that it had denied the application for assistance.
4. On August 19, 2011, the Department received the Claimant's hearing request, protesting the denial of disability benefits.

5. On September 27, 2011, the State Hearing Review Team (SHRT) upheld the Medical Review Team's (MRT) denial of MA-P and SDA benefits.
6. On January 5, 2012, after reviewing the additional medical records, the State Hearing Review Team (SHRT) again upheld the determination of the Medical Review Team (MRT) that the Claimant does not meet the disability standard.
7. The Claimant is a 33-year-old man whose birth date is [REDACTED]. Claimant is 5' 7" tall and weighs 170 pounds. The Claimant is a high school graduate and completed two vocational training programs. The Claimant is able to read and write and does have basic math skills.
8. The Claimant was not engaged in substantial gainful activity at any time relevant to this matter.
9. The Claimant has past relevant work experience as a carpenter where he was required to do trim work, roofing, siding, building of retaining walls, and house construction. The Claimant was required to lift objects weighing as much as 100 pounds and stand for up to 4 hours at a time.
10. The Claimant alleges disability due to a wrist injury.
11. The Claimant has been diagnosed with left forearm pain, which began after lifting a heavy rock.
12. The objective medical evidence indicates that the Claimant's bone marrow within the distal left forearm is normal.
13. The objective medical evidence indicates that the surrounding musculature of the distal left forearm is normal.
14. The objective medical evidence indicates that no acute abnormality of the left distal forearm is demonstrated.
15. The objective medical evidence indicates that the Claimant suffered a left wrist tendon and muscle rupture.
16. The objective medical evidence indicates that the Claimant suffered a right rotator cuff tear and impingement syndrome.
17. The objective medical evidence indicates that the Claimant has been diagnosed with Dequervain's syndrome.
18. The objective medical evidence indicates that the Claimant smokes a pack of cigarettes on a daily basis.

19. The objective medical evidence indicates that the Claimant has excellent range of motion of the wrist; however, it is limited due to discomfort.
20. The Claimant is capable of preparing meals, shopping for groceries, vacuuming, washing dishes, and laundering clothing.
21. The Claimant's impairments do not restrict his ability to walk, stand, or sit.

CONCLUSIONS OF LAW

The regulations governing the hearing and appeal process for applicants and recipients of public assistance in Michigan are found in the Michigan Administrative Code, MAC R 400.901 - 400.951. An opportunity for a hearing shall be granted to an applicant who requests a hearing because his claim for assistance has been denied. MAC R 400.903. Clients have the right to contest a Department decision affecting eligibility or benefit levels whenever it is believed that the decision is incorrect. The Department will provide an administrative hearing to review the decision and determine the appropriateness of that decision. BAM 600.

The Medical Assistance (MA) program is established by Title XIX of the Social Security Act and is implemented by Title 42 of the Code of Federal Regulations (CFR). The Department of Human Services (Department) administers the MA program pursuant to MCL 400.10, et seq., and MCL 400.105. Department policies are found in the Bridges Administrative Manual (BAM), the Bridges Eligibility Manual (BEM) and the Program Reference Manual (PRM).

The State Disability Assistance (SDA) program which provides financial assistance for disabled persons is established by 2004 PA 344. The Department of Human Services (Department) administers the SDA program pursuant to MCL 400.10, et seq., and MAC R 400.3151-400.3180. Department policies are found in the Bridges Administrative Manual (BAM), the Bridges Eligibility Manual (BEM) and the Program Reference Manual (PRM).

Pursuant to Federal Rule 42 CFR 435.540, the Department uses the federal Supplemental Security Income (SSI) policy in determining eligibility for disability under the Medical Assistance and State Disability Assistance (SDA) programs. Under SSI, disability is defined as:

...inability to do any substantial gainful activity by reason of any medically determinable physical or mental impairment which can be expected to result in death or which has lasted or can be expected to last for a continuous period of not less than 12 months. 20 CFR 416.905.

A set order is used to determine disability. Current work activity, severity of impairments, residual functional capacity, past work, age, or education and work experience is reviewed. If there is a finding that an individual is disabled or not disabled at any point in the review, there will be no further evaluation. 20 CFR 416.920.

If an individual is working and the work is substantial gainful activity, the individual is not disabled regardless of the medical condition, education and work experience. 20 CFR 416.920(c).

If the impairment or combination of impairments do not significantly limit the Claimant's physical or mental ability to do basic work activities, it is not a severe impairment(s) and disability does not exist. Age, education and work experience will not be considered. 20 CFR 416.920.

All of the evidence relevant to the claim, including medical opinions, is reviewed and findings are made. 20 CFR 416.927(c).

Statements about pain or other symptoms do not alone establish disability. There must be medical signs and laboratory findings which demonstrate a medical impairment.... 20 CFR 416.929(a).

Medical findings must allow a determination of (1) the nature and limiting effects of your impairment(s) for any period in question; (2) the probable duration of the impairment; and (3) the residual functional capacity to do work-related physical and mental activities. 20 CFR 416.913(d).

Medical evidence may contain medical opinions. Medical opinions are statements from physicians and psychologists or other acceptable medical sources that reflect judgments about the nature and severity of the impairment(s), including your symptoms, diagnosis and prognosis, what an individual can do despite impairment(s), and the physical or mental restrictions. 20 CFR 416.927(a)(2).

Medical evidence includes:

- (1) Medical history.
- (2) Clinical findings (such as the results of physical or mental status examinations);
- (3) Laboratory findings (such as blood pressure, X-rays);

Diagnosis (statement of disease or injury based on its signs and symptoms).... 20 CFR 416.913(b).

...The medical evidence...must be complete and detailed enough to allow us to make a determination about whether you are disabled or blind. 20 CFR 416.913(d).

Medical findings consist of symptoms, signs, and laboratory findings:

- (a) Symptoms are your own description of your physical or mental impairment. Your statements alone are not

enough to establish that there is a physical or mental impairment.

- (b) Signs are anatomical, physiological, or psychological abnormalities which can be observed, apart from your statements (symptoms). Signs must be shown by medically acceptable clinical diagnostic techniques. Psychiatric signs are medically demonstrable phenomena which indicate specific psychological abnormalities e.g., abnormalities of behavior, mood, thought, memory, orientation, development, or perception. They must also be shown by observable facts that can be medically described and evaluated.
- (c) Laboratory findings are anatomical, physiological, or psychological phenomena which can be shown by the use of a medically acceptable laboratory diagnostic techniques. Some of these diagnostic techniques include chemical tests, electrophysiological studies (electrocardiogram, electroencephalogram, etc.), roentgenological studies (X-rays), and psychological tests. 20 CFR 416.928.

How we weigh medical opinions. Regardless of its source, we will evaluate every medical opinion we receive. Unless we give a treating source's opinion controlling weight under paragraph (d)(2) of this section, we consider all of the following factors in deciding the weight we give to any medical opinion.

Examining relationship. Generally, we give more weight to the opinion of a source who has examined you than to the opinion of a source who has not examined you.

Treatment relationship. Generally, we give more weight to opinions from your treating sources, since these sources are likely to be the medical professionals most able to provide a detailed, longitudinal picture of your medical impairment(s) and may bring a unique perspective to the medical evidence that cannot be obtained from the objective medical findings alone or from reports of individual examinations, such as consultative examinations or brief hospitalizations.

Supportability. The more a medical source presents relevant evidence to support an opinion, particularly medical signs and laboratory findings, the more weight we will give that opinion. The better an explanation a source provides for an

opinion, the more weight we will give that opinion. Furthermore, because non-examining sources have no examining or treating relationship with you, the weight we will give their opinions will depend on the degree to which they provide supporting explanations for their opinions.

Consistency. Generally, the more consistent an opinion is with the record as a whole, the more weight we will give to that opinion.

Specialization. We generally give more weight to the opinion of a specialist about medical issues related to his or her area of specialty than to the opinion of a source who is not a specialist. 20 CFR 416.927

In determining disability under the law, the ability to work is measured. An individual's functional capacity for doing basic work activities is evaluated. If an individual has the ability to perform basic work activities without significant limitations, he or she is not considered disabled. 20 CFR 416.994(b)(1)(iv).

Basic work activities are the abilities and aptitudes necessary to do most jobs. Examples of these include:

1. Physical functions such as walking, standing, sitting, lifting, pushing, pulling, reaching, carrying, or handling;
2. Capacities for seeing, hearing, and speaking;
3. Understanding, carrying out, and remembering simple instructions;
4. Use of judgment;
5. Responding appropriately to supervision, co-workers and usual work situations; and
6. Dealing with changes in a routine work setting. 20 CFR 416.921(b).

The Administrative Law Judge is responsible for making the determination or decision about whether the statutory definition of disability is met. The Administrative Law Judge reviews all medical findings and other evidence that support a medical source's statement of disability.... 20 CFR 416.927(e).

A statement by a medical source finding that an individual is "disabled" or "unable to work" does not mean that disability exists for the purposes of the program. 20 CFR 416.927(e).

Unless your impairment is expected to result in death, it must have lasted or must be expected to last for a continuous period of at least 12 months. We call this the duration requirement. 20 CFR 416.909.

When determining disability, the federal regulations require that several considerations be analyzed in sequential order. These steps are:

1. Does the client perform Substantial Gainful Activity (SGA)? If yes, the client is ineligible for MA. If no, the analysis continues to Step 2. 20 CFR 416.920(b).
2. Does the client have a severe impairment that has lasted or is expected to last 12 months or more or result in death? If no, the client is ineligible for MA. If yes, the analysis continues to Step 3. 20 CFR 416.920(c).
3. Does the impairment appear on a special listing of impairments or are the client's symptoms, signs, and laboratory findings at least equivalent in severity to the set of medical findings specified for the listed impairment? If no, the analysis continues to Step 4. If yes, MA is approved. 20 CFR 416.920(d).
4. Can the client do the former work that he performed within the last 15 years? If yes, the client is ineligible for MA. If no, the analysis continues to Step 5. 20 CFR 416.920(e).
5. Does the client have the Residual Functional Capacity (RFC) to perform other work according to the guidelines set forth at 20 CFR 404, Subpart P, Appendix 2, Sections 200.00-204.00? If yes, the analysis ends and the client is ineligible for MA. If no, MA is approved. 20 CFR 416.920(f).

STEP 1

At Step 1, a determination is made on whether the Claimant is engaging in substantial gainful activity (20 CFR 416.920(b)). Substantial gainful activity is defined as work activity that is both substantial and gainful; and involves doing significant physical or mental activities. Gainful work activity is work activity that you do for pay or profit (20 CFR 416.972). If you are engaged in substantial gainful activity, you are not disabled regardless of how severe your physical or mental impairments are and regardless of your age, education, and work experience. Whether the Claimant is performing substantial gainful activity will be determined by federal regulations listed in 20 CFR 416.971 through 416.975.

The Claimant is not engaged in substantial gainful activity and is not disqualified from receiving disability at Step 1.

STEP 2

At Step 2, the Claimant has the burden of proof of establishing that he has a severely restrictive physical or mental impairment that has lasted or is expected to last for the duration of at least 12 months.

The Claimant is a 33- year-old man that is 5' 7" tall and weighs 170 pounds. The Claimant alleges disability due to a wrist injury.

The Claimant has been diagnosed with a left forearm pain, which began after lifting a heavy rock. The objective medical evidence indicates that the Claimant's bone marrow within the distal left forearm is normal. The objective medical evidence indicates that the surrounding musculature of the distal left forearm is normal. The objective medical evidence indicates that there is no acute abnormality of the left distal forearm is demonstrated. The objective medical evidence indicates that the Claimant suffered a left wrist tendon and muscle rupture. The objective medical evidence indicates that the Claimant suffered a right rotator cuff tear and impingement syndrome. The objective medical evidence indicates that the Claimant has been diagnosed with Dequervain's syndrome.

The objective medical evidence indicates that the Claimant smokes a pack of cigarettes on a daily basis.

The objective medical evidence indicates that the Claimant has excellent range of motion of the wrist; however, it is limited to discomfort. The Claimant is capable of preparing meals, shopping for groceries, vacuuming, washing dishes, and laundering clothing. The Claimant's impairments do not restrict his ability to walk, stand, or sit.

The objective medical evidence of record is not sufficient to establish that Claimant has severe impairments that have lasted or are expected to last 12 months or more and prevent employment at any job for 12 months or more. Therefore, Claimant is found not to be disability at this step. In order to conduct a thorough evaluation of Claimant's disability assertion, the analysis will continue.

STEP 3

At Step 3, the Claimant's impairments are evaluated to determine whether they fit the description of a Social Security Administration disability listing in 20 CFR Part 404, Subpart P, Appendix 1. A Claimant that meets one of these listing that meets the duration requirements is considered to be disabled.

1.02 Major dysfunction of a joint(s) (due to any cause): Characterized by gross anatomical deformity (e.g., subluxation, contracture, bony or fibrous ankylosis, instability) and chronic joint pain and stiffness with signs of limitation of motion or other abnormal motion of the affected joint(s), and findings on appropriate medically acceptable imaging of joint space narrowing, bony destruction, or ankylosis of the affected joint(s). With:

- A. Involvement of one major peripheral weight-bearing joint (i.e., hip, knee, or ankle), resulting in inability to ambulate effectively, as defined in 1.00B2b;

OR

- B. Involvement of one major peripheral joint in each upper extremity (i.e., shoulder, elbow, or wrist-hand), resulting in inability to perform fine and gross movements effectively, as defined in 1.00B2c.

The objective medical evidence does not establish that the Claimant is unable to effectively ambulate without assistance.

The objective medical evidence indicates that the Claimant has excellent range of motion of the wrist; however, it is limited due to discomfort. The Claimant is capable of preparing meals, shopping for groceries, vacuuming, washing dishes, and laundering clothing. The objective medical evidence does not establish that the Claimant has lost the ability to perform fine and gross movements with his left arm or hand.

The medical evidence of the Claimant's condition does not give rise to a finding that he would meet a statutory listing in federal code of regulations 20 CFR Part 404, Subpart P, Appendix 1.

STEP 4

At Step 4, the Claimant's residual functional capacity (RFC) is examined to determine if you are still able to perform work you have done in the past. Your RFC is your ability to do physical and mental work activities on a sustained basis despite limitations from your impairments. Your RFC is assessed using all the relevant evidence in the record. If you can still do your past relevant work you are not disabled under these standards.

The Claimant has past relevant work experience as a carpenter where he was required to lift objects weighing as much as 100 pounds.

There is no evidence upon which this Administrative Law Judge could base a finding that the Claimant is unable to perform work in which he has engaged in, in the past.

STEP 5

At Step 5, the burden of proof shifts to the Department to establish that the Claimant has the Residual Functional Capacity (RFC) for Substantial Gainful Activity.

The residual functional capacity is what an individual can do despite limitations. All impairments will be considered in addition to ability to meet certain demands of jobs in the national economy. Physical demands, mental demands, sensory requirements and other functions will be evaluated.... 20 CFR 416.945(a).

To determine the physical demands (exertional requirements) of work in the national economy, we classify jobs as sedentary, light, medium and heavy. These terms have the same meaning as they have in the *Dictionary of Occupational Titles*, published by the Department of Labor... 20 CFR 416.967.

Sedentary work. Sedentary work involves lifting no more than 10 pounds at a time and occasionally lifting or carrying articles like docket files, ledgers, and small tools. Although a sedentary job is defined as one which involves sitting, a certain amount of walking and standing is often necessary in carrying out job duties. Jobs are sedentary if walking and standing are required occasionally and other sedentary criteria are met. 20 CFR 416.967(a).

Light work. Light work involves lifting no more than 20 pounds at a time with frequent lifting or carrying of objects weighing up to 10 pounds. Even though the weight lifted may be very little, a job is in this category when it requires a good deal of walking or standing, or when it involves sitting most of the time with some pushing and pulling of arm or leg controls.... 20 CFR 416.967(b).

The objective medical evidence indicates that the Claimant has the residual functional capacity to perform some other less strenuous tasks than in his prior employment and that he is physically able to do light or sedentary tasks if demanded of him. The Claimant's activities of daily living do not appear to be very limited and he should be able to perform light or sedentary work even with his impairments for a period of 12 months. The Claimant's testimony as to his limitations indicates that he should be able to perform light or sedentary work.

The Claimant's complaints of pain, while profound and credible, are out of proportion to the objective medical evidence contained in the file as it relates to the Claimant's ability to perform work.

Claimant is 33-years-old, a younger person, under age 50, with a high school education and above, and a history of semi-skilled work. Based on the objective medical evidence of record Claimant has the residual functional capacity to perform sedentary work, and Medical Assistance (MA) and State Disability Assistance (SDA) is denied using Vocational Rule 20 CFR 201.28 as a guide.

It should be noted that the Claimant continues to smoke despite the fact that his doctor has told him to quit. Claimant is not in compliance with his treatment program. If an individual fails to follow prescribed treatment which would be expected to restore their ability to engage in substantial activity without good cause there will not be a finding of disability.... 20 CFR 416.994(b)(4)(iv).

The Department's Program Eligibility Manual contains the following policy statements and instructions for caseworkers regarding the State Disability Assistance program: to receive State Disability Assistance, a person must be disabled, caring for a disabled

person or age 65 or older. BEM, Item 261, p. 1. Because the Claimant does not meet the definition of disabled under the MA-P program and because the evidence of record does not establish that the Claimant is unable to work for a period exceeding 90 days, the Claimant does not meet the disability criteria for State Disability Assistance benefits either.

The Department has established by the necessary competent, material and substantial evidence on the record that it was acting in compliance with Department policy when it determined that the Claimant was not eligible to receive Medical Assistance and/or State Disability Assistance.

DECISION AND ORDER

The Administrative Law Judge, based upon the above findings of fact and conclusions of law, decides that the Department has appropriately established on the record that it was acting in compliance with Department policy when it denied the Claimant's application for Medical Assistance, retroactive Medical Assistance and State Disability Assistance benefits. The Claimant should be able to perform a wide range of sedentary work even with his impairments. The Department has established its case by a preponderance of the evidence.

Accordingly, the Department's decision is **AFFIRMED**.
