

**STATE OF MICHIGAN
MICHIGAN ADMINISTRATIVE HEARING SYSTEM
ADMINISTRATIVE HEARINGS FOR THE
DEPARTMENT OF HUMAN SERVICES**

IN THE MATTER OF:

Reg. No: 201152802
Issue No: 2009, 4031
Case No: [REDACTED]
Hearing Date: December 8, 2011
Kent County DHS

ADMINISTRATIVE LAW JUDGE: Kevin Scully

HEARING DECISION

This matter is before the undersigned Administrative Law Judge by authority of MCL 400.9 and MCL 400.37 upon Claimant's request for a hearing. Claimant's request for a hearing was received on September 7, 2011. After due notice, a telephone hearing was held on Thursday, December 8, 2011. The Claimant personally appeared and provided testimony. The record was held open to obtain additional medical documentation and the Claimant waived the time periods.

ISSUE

Did the Department of Human Services (Department) properly determine that the Claimant did not meet the disability standard for Medical Assistance based on disability (MA-P) and State Disability Assistance (SDA)?

FINDINGS OF FACT

The Administrative Law Judge, based upon the competent, material and substantial evidence on the whole record, finds as material fact:

1. On August 3, 2011, the Claimant submitted an application for Medical Assistance (MA) and State Disability Assistance (SDA) benefits alleging disability.
2. On August 19, 2011, the Medical Review Team (MRT) determined that the Claimant did not meet the disability standard for Medical Assistance (MA-P) and State Disability Assistance (SDA) because it determined that the Claimant's impairments lack duration of 12 months.
3. On August 24, 2011, the Department sent the Claimant notice that it had denied the application for assistance.
4. On September 7, 2011, the Department received the Claimant's hearing request, protesting the denial of disability benefits.

5. On November 2, 2011, the State Hearing Review Team (SHRT) upheld the Medical Review Team's (MRT) denial of MA-P and SDA benefits.
6. On January 20, 2012, after reviewing the additional medical records, the State Hearing Review Team (SHRT) again upheld the determination of the Medical Review Team (MRT) that the Claimant does not meet the disability standard.
7. The Claimant is a 36-year-old man whose birth date is [REDACTED]. Claimant is 5' 6" tall and weighs 150 pounds. The Claimant has a limited education but is able to speak and understand English.
8. The Claimant was not engaged in substantial gainful activity at any time relevant to this matter.
9. The Claimant has past relevant work experience as a machine operator, which did not require any significant lifting.
10. The Claimant alleges disability due to psychotic disorder and depressive disorder.
11. The objective medical evidence indicates that the Claimant has been diagnosed with psychotic disorder, mood disorder, substance abuse induced psychotic delusions, alcohol dependence, nicotine dependence, and cannabis abuse.
12. The objective medical evidence indicates that the Claimant has moderately limited memory, concentration, and persistence.
13. The objective medical evidence indicates that the Claimant has moderately restricted abilities for social interaction and adaption.
14. The objective medical evidence indicates that the Claimant experiences paranoid delusions and auditory hallucinations.
15. The objective medical evidence indicates that the Claimant consumes alcohol on a daily basis.
16. The objective medical evidence indicates that the Claimant smokes 5 cigarettes on a daily basis.
17. The objective medical evidence indicates that the Claimant smokes marijuana.
18. The objective medical evidence indicates that the Claimant has been advised to stop consuming alcohol by his treating physicians.

19. The Claimant has the ability to speak and understand English and Spanish.
20. The objective medical evidence indicates that the Claimant tends to speak Spanish while actively psychotic.
21. The objective medical evidence indicates that the Claimant's symptoms improved rapidly following six days of inpatient treatment and his mood and affect returned to baseline.
22. The objective medical evidence indicates that following inpatient treatment the Claimant's thought processes returned to baseline, psychotic symptoms subsided, and the Claimant was discharged in stable condition.
23. The objective medical evidence indicates that the Claimant is cognitively intact.

CONCLUSIONS OF LAW

The regulations governing the hearing and appeal process for applicants and recipients of public assistance in Michigan are found in the Michigan Administrative Code, MAC R 400.901 - 400.951. An opportunity for a hearing shall be granted to an applicant who requests a hearing because his claim for assistance has been denied. MAC R 400.903. Clients have the right to contest a Department decision affecting eligibility or benefit levels whenever it is believed that the decision is incorrect. The Department will provide an administrative hearing to review the decision and determine the appropriateness of that decision. BAM 600.

The Medical Assistance (MA) program is established by Title XIX of the Social Security Act and is implemented by Title 42 of the Code of Federal Regulations (CFR). The Department of Human Services (Department) administers the MA program pursuant to MCL 400.10, et seq., and MCL 400.105. Department policies are found in the Bridges Administrative Manual (BAM), the Bridges Eligibility Manual (BEM) and the Program Reference Manual (PRM).

The State Disability Assistance (SDA) program which provides financial assistance for disabled persons is established by 2004 PA 344. The Department of Human Services (Department) administers the SDA program pursuant to MCL 400.10, et seq., and MAC R 400.3151-400.3180. Department policies are found in the Bridges Administrative Manual (BAM), the Bridges Eligibility Manual (BEM) and the Program Reference Manual (PRM).

Pursuant to Federal Rule 42 CFR 435.540, the Department uses the federal Supplemental Security Income (SSI) policy in determining eligibility for disability under the Medical Assistance and State Disability Assistance (SDA) programs. Under SSI, disability is defined as:

...inability to do any substantial gainful activity by reason of any medically determinable physical or mental impairment which can be expected to result in death or which has lasted or can be expected to last for a continuous period of not less than 12 months. 20 CFR 416.905.

A set order is used to determine disability. Current work activity, severity of impairments, residual functional capacity, past work, age, or education and work experience is reviewed. If there is a finding that an individual is disabled or not disabled at any point in the review, there will be no further evaluation. 20 CFR 416.920.

If an individual is working and the work is substantial gainful activity, the individual is not disabled regardless of the medical condition, education and work experience. 20 CFR 416.920(c).

If the impairment or combination of impairments do not significantly limit the Claimant's physical or mental ability to do basic work activities, it is not a severe impairment(s) and disability does not exist. Age, education and work experience will not be considered. 20 CFR 416.920.

In determining how a severe mental impairment affects a client's ability to work, four areas considered to be essential to work are looked at:

...Activities of daily living including adaptive activities such as cleaning, shopping, cooking, taking public transportation, paying bills, maintaining a residence, caring appropriately for one's grooming and hygiene, using telephones and directories, using a post office, etc. 20 CFR, Part 404, Subpart P, App. 1., 12.00(C)(1).

We do not define "marked" by a specific number of activities of daily living in which functioning is impaired, but by the nature and overall degree of interference with function. For example, if you do a wide range of activities of daily living, we may still find that you have a marked limitation in your daily activities if you have serious difficulty performing them without direct supervision, or in a suitable manner, or on a consistent, useful, routine basis, or without undue interruptions or distractions. 20 CFR, Part 404, Subpart P, App. 1, 12.00(C)(1).

...Social functioning refers to an individual's capacity to interact independently, appropriately, effectively, and on a sustained basis with other individuals. 20 CFR, Part 404, Subpart P, App. 1, 12.00(C)(2).

Social functioning includes the ability to get along with others, such as family members, friends, neighbors, grocery

clerks, landlords, or bus drivers. You may demonstrate impaired social functioning by, for example, a history of altercations, evictions, firings, fear of strangers, avoidance of interpersonal relationships, or social isolation. You may exhibit strength in social functioning by such things as your ability to initiate social contacts with others, communicate clearly with others, or interact and actively participate in group activities. We also need to consider cooperative behaviors, consideration for others, awareness of others' feelings, and social maturity. Social functioning in work situations may involve interactions with the public, responding appropriately to persons in authority (e.g., supervisors), or cooperative behaviors involving coworkers. 20 CFR, Part 404, Subpart P, App. 1, 12.00(C)(2).

We do not define "marked" by a specific number of different behaviors in which social functioning is impaired, but by the nature and overall degree of interference with function. For example, if you are highly antagonistic, uncooperative or hostile but are tolerated by local storekeepers, we may nevertheless find that you have a marked limitation in social functioning because that behavior is not acceptable in other social contexts. 20 CFR, Part 404, Subpart P, App. 1, 12.00(C)(2).

...Concentration, persistence or pace refers to the ability to sustain focused attention and concentration sufficiently long to permit the timely and appropriate completion of tasks commonly found in work settings. 20 CFR, Part 404, Subpart P, App. 1, 12.00(C)(3).

Limitations in concentration, persistence, or pace are best observed in work settings, but may also be reflected by limitations in other settings. In addition, major limitations in this area can often be assessed through clinical examination or psychological testing. Wherever possible, however, a mental status examination or psychological test data should be supplemented by other available evidence. 20 CFR, Part 404, Subpart P, App. 1, 12.00(C)(3).

...On mental status examinations, concentration is assessed by tasks such as having the individual subtract serial sevens or serial threes from 100. In psychological tests of intelligence or memory, concentration is assessed through tasks requiring short-term memory or through tasks that must be completed within established time limits.... 20 CFR 404, Subpart P, App. 1, 12.00(C)(3).

...In work evaluations, concentration, persistence, or pace is assessed by testing your ability to sustain work using appropriate production standards, in either real or simulated work tasks (e.g., filing index cards, locating telephone numbers, or disassembling and reassembling objects). Strengths and weaknesses in areas of concentration and attention can be discussed in terms of your ability to work at a consistent pace for acceptable periods of time and until a task is completed, and your ability to repeat sequences of action to achieve a goal or objective. 20 CFR 404, Subpart P, App. 1, 12.00(C)(3).

Episodes of decompensation are exacerbations or temporary increases in symptoms or signs accompanied by a loss of adaptive functioning, as manifested by difficulties in performing activities of daily living, maintaining social relationships, or maintaining concentration, persistence, or pace. 20 CFR 404, Subpart P, App. 1, 12.00(C)(4).

Episodes of decompensation may be demonstrated by an exacerbation in symptoms or signs that would ordinarily require increased treatment or a less stressful situation (or a combination of the two). Episodes of decompensation may be inferred from medical records showing significant alteration in medication; or documentation of the need for a more structured psychological support system (e.g., hospitalizations, placement in a halfway house, or a highly structured and directing household); or other relevant information in the record about the existence, severity, and duration of the episode. 20 CFR 404, Subpart P, App. 1, 12.00(C)(4).

The evaluation of disability on the basis of a mental disorder requires sufficient evidence to: (1) establish the presence of a medically determinable mental impairment(s); (2) assess the degree of functional limitation the impairment(s) imposes; and (3) project the probable duration of the impairment(s). Medical evidence must be sufficiently complete and detailed as to symptoms, signs, and laboratory findings to permit an independent determination. In addition, we will consider information from other sources when we determine how the established impairment(s) affects your ability to function. We will consider all relevant evidence in your case record. 20 CFR 404, Subpart P, App. 1, 12.00(D).

...Chronic Mental Impairments: Particular problems are often involved in evaluating mental impairments in

individuals who have long histories of repeated hospitalizations or prolonged outpatient care with supportive therapy and medication. For instance, if you have chronic organic, psychotic, and affective disorders you may commonly have your life structured in such a way as to minimize your stress and reduce your signs and symptoms.... 20 CFR 404, Subpart P, App. 1, 12.00(E).

All of the evidence relevant to the claim, including medical opinions, is reviewed and findings are made. 20 CFR 416.927(c).

Statements about pain or other symptoms do not alone establish disability. There must be medical signs and laboratory findings which demonstrate a medical impairment.... 20 CFR 416.929(a).

Medical findings must allow a determination of (1) the nature and limiting effects of your impairment(s) for any period in question; (2) the probable duration of the impairment; and (3) the residual functional capacity to do work-related physical and mental activities. 20 CFR 416.913(d).

Medical evidence may contain medical opinions. Medical opinions are statements from physicians and psychologists or other acceptable medical sources that reflect judgments about the nature and severity of the impairment(s), including your symptoms, diagnosis and prognosis, what an individual can do despite impairment(s), and the physical or mental restrictions. 20 CFR 416.927(a)(2).

Medical evidence includes:

- (1) Medical history.
- (2) Clinical findings (such as the results of physical or mental status examinations);
- (3) Laboratory findings (such as blood pressure, X-rays);
- (4) Diagnosis (statement of disease or injury based on its signs and symptoms).... 20 CFR 416.913(b).

...The medical evidence...must be complete and detailed enough to allow us to make a determination about whether you are disabled or blind. 20 CFR 416.913(d).

Medical findings consist of symptoms, signs, and laboratory findings:

- (a) Symptoms are your own description of your physical or mental impairment. Your statements alone are not

enough to establish that there is a physical or mental impairment.

- (b) Signs are anatomical, physiological, or psychological abnormalities which can be observed, apart from your statements (symptoms). Signs must be shown by medically acceptable clinical diagnostic techniques. Psychiatric signs are medically demonstrable phenomena which indicate specific psychological abnormalities e.g., abnormalities of behavior, mood, thought, memory, orientation, development, or perception. They must also be shown by observable facts that can be medically described and evaluated.
- (c) Laboratory findings are anatomical, physiological, or psychological phenomena which can be shown by the use of a medically acceptable laboratory diagnostic techniques. Some of these diagnostic techniques include chemical tests, electrophysiological studies (electrocardiogram, electroencephalogram, etc.), roentgenological studies (X-rays), and psychological tests. 20 CFR 416.928.

How we weigh medical opinions. Regardless of its source, we will evaluate every medical opinion we receive. Unless we give a treating source's opinion controlling weight under paragraph (d)(2) of this section, we consider all of the following factors in deciding the weight we give to any medical opinion.

Examining relationship. Generally, we give more weight to the opinion of a source who has examined you than to the opinion of a source who has not examined you.

Treatment relationship. Generally, we give more weight to opinions from your treating sources, since these sources are likely to be the medical professionals most able to provide a detailed, longitudinal picture of your medical impairment(s) and may bring a unique perspective to the medical evidence that cannot be obtained from the objective medical findings alone or from reports of individual examinations, such as consultative examinations or brief hospitalizations.

Supportability. The more a medical source presents relevant evidence to support an opinion, particularly medical signs and laboratory findings, the more weight we will give that opinion. The better an explanation a source provides for an

opinion, the more weight we will give that opinion. Furthermore, because non-examining sources have no examining or treating relationship with you, the weight we will give their opinions will depend on the degree to which they provide supporting explanations for their opinions.

Consistency. Generally, the more consistent an opinion is with the record as a whole, the more weight we will give to that opinion.

Specialization. We generally give more weight to the opinion of a specialist about medical issues related to his or her area of specialty than to the opinion of a source who is not a specialist. 20 CFR 416.927

In determining disability under the law, the ability to work is measured. An individual's functional capacity for doing basic work activities is evaluated. If an individual has the ability to perform basic work activities without significant limitations, he or she is not considered disabled. 20 CFR 416.994(b)(1)(iv).

Basic work activities are the abilities and aptitudes necessary to do most jobs. Examples of these include:

1. Physical functions such as walking, standing, sitting, lifting, pushing, pulling, reaching, carrying, or handling;
2. Capacities for seeing, hearing, and speaking;
3. Understanding, carrying out, and remembering simple instructions;
4. Use of judgment;
5. Responding appropriately to supervision, co-workers and usual work situations; and
6. Dealing with changes in a routine work setting. 20 CFR 416.921(b).

The Administrative Law Judge is responsible for making the determination or decision about whether the statutory definition of disability is met. The Administrative Law Judge reviews all medical findings and other evidence that support a medical source's statement of disability.... 20 CFR 416.927(e).

A statement by a medical source finding that an individual is "disabled" or "unable to work" does not mean that disability exists for the purposes of the program. 20 CFR 416.927(e).

Unless your impairment is expected to result in death, it must have lasted or must be expected to last for a continuous period of at least 12 months. We call this the duration requirement. 20 CFR 416.909.

When determining disability, the federal regulations require that several considerations be analyzed in sequential order. These steps are:

1. Does the client perform Substantial Gainful Activity (SGA)? If yes, the client is ineligible for MA. If no, the analysis continues to Step 2. 20 CFR 416.920(b).
2. Does the client have a severe impairment that has lasted or is expected to last 12 months or more or result in death? If no, the client is ineligible for MA. If yes, the analysis continues to Step 3. 20 CFR 416.920(c).
3. Does the impairment appear on a special listing of impairments or are the client's symptoms, signs, and laboratory findings at least equivalent in severity to the set of medical findings specified for the listed impairment? If no, the analysis continues to Step 4. If yes, MA is approved. 20 CFR 416.920(d).
4. Can the client do the former work that he performed within the last 15 years? If yes, the client is ineligible for MA. If no, the analysis continues to Step 5. 20 CFR 416.920(e).
5. Does the client have the Residual Functional Capacity (RFC) to perform other work according to the guidelines set forth at 20 CFR 404, Subpart P, Appendix 2, Sections 200.00-204.00? If yes, the analysis ends and the client is ineligible for MA. If no, MA is approved. 20 CFR 416.920(f).

STEP 1

At Step 1, a determination is made on whether the Claimant is engaging in substantial gainful activity (20 CFR 416.920(b)). Substantial gainful activity is defined as work activity that is both substantial and gainful; and involves doing significant physical or mental activities. Gainful work activity is work activity that you do for pay or profit (20 CFR 416.972). If you are engaged in substantial gainful activity, you are not disabled regardless of how severe your physical or mental impairments are and regardless of your age, education, and work experience. Whether the Claimant is performing substantial gainful activity will be determined by federal regulations listed in 20 CFR 416.971 through 416.975.

The Claimant is not engaged in substantial gainful activity and is not disqualified from receiving disability at Step 1.

STEP 2

At Step 2, the Claimant has the burden of proof of establishing that he has a severely restrictive physical or mental impairment that has lasted or is expected to last for the duration of at least 12 months.

The Claimant is a 35-year-old man that is 5' 6" tall and weighs 150 pounds. The Claimant alleges disability due to psychotic disorder and depressive disorder.

The objective medical evidence indicates the following:

The Claimant has been diagnosed with psychotic disorder, mood disorder, substance abuse induced psychotic delusions, alcohol dependence, nicotine dependence, and cannabis abuse. The Claimant has moderately limited memory, concentration, and persistence. The Claimant has moderately restricted abilities for social interaction and adaption. The Claimant experiences paranoid delusions and auditory hallucinations.

The Claimant consumes alcohol on a daily basis. The Claimant smokes 5 cigarettes on a daily basis. The Claimant smokes marijuana. The Claimant has been advised to stop consuming alcohol.

The Claimant has the ability to speak and understand English and Spanish. The Claimant tends to speak Spanish while actively psychotic.

The Claimant's symptoms improved rapidly following six days of inpatient treatment and his mood and affect returned to baseline. The Claimant's thought processes returned to baseline, psychotic symptoms subsided, and the Claimant was discharged in stable condition. Cognitively, the patient is intact.

Unless your impairment is expected to result in death, it must have lasted or must be expected to last for a continuous period of at least 12 months. We call this the duration requirement.

In order to get benefits, you must follow treatment prescribed by your physician if this treatment can restore your ability to work. If you do not follow the prescribed treatment without a good reason, we will not find you to be disabled. 20 CFR § 416.930.

The objective medical evidence of record is not sufficient to establish that Claimant has severe impairments that have lasted or are expected to last 12 months or more and prevent employment at any job for 12 months or more. Therefore, Claimant is found not

to be disability at this step. In order to conduct a thorough evaluation of Claimant's disability assertion, the analysis will continue.

STEP 3

At Step 3, the Claimant's impairments are evaluated to determine whether they fit the description of a Social Security Administration disability listing in 20 CFR Part 404, Subpart P, Appendix 1. A Claimant that meets one of these listing that meets the duration requirements is considered to be disabled.

12.03 Schizophrenic, paranoid and other psychotic disorders: Characterized by the onset of psychotic features with deterioration from a previous level of functioning. The required level of severity for these disorders is met when the requirements in both A and B are satisfied, or when the requirements in C are satisfied.

- A. Medically documented persistence, either continuous or intermittent, of one or more of the following:
 - 1. Delusions or hallucinations; or
 - 2. Catatonic or other grossly disorganized behavior; or
 - 3. Incoherence, loosening of associations, illogical thinking, or poverty of content of speech if associated with one of the following:
 - a. Blunt affect; or
 - b. Flat affect; or
 - c. Inappropriate affect; OR
 - 4. Emotional withdrawal and/or isolation; AND
- B. Resulting in at least two of the following:
 - 1. Marked restriction of activities of daily living; or
 - 2. Marked difficulties in maintaining social functioning; or
 - 3. Marked difficulties in maintaining concentration, persistence, or pace; or
 - 4. Repeated episodes of decompensation, each of extended duration; OR

- C. Medically documented history of a chronic schizophrenic, paranoid, or other psychotic disorder of at least 2 years' duration that has caused more than a minimal limitation of ability to do basic work activities, with symptoms or signs currently attenuated by medication or psychosocial support, and one of the following:
1. Repeated episodes of decompensation, each of extended duration; or
 2. A residual disease process that has resulted in such marginal adjustment that even a minimal increase in mental demands or change in the environment would be predicted to cause the individual to decompensate; or
 3. Current history of 1 or more years' inability to function outside a highly supportive living arrangement, with an indication of continued need for such an arrangement.

12.04 Affective disorders: Characterized by a disturbance of mood, accompanied by a full or partial manic or depressive syndrome. Mood refers to a prolonged emotion that colors the whole psychic life; it generally involves either depression or elation. The required level of severity for these disorders is met when the requirements in both A and B are satisfied, or when the requirements in C are satisfied.

- A. Medically documented persistence, either continuous or intermittent, of one of the following:
1. Depressive syndrome characterized by at least four of the following:
 - a. Anhedonia or pervasive loss of interest in almost all activities; or
 - b. Appetite disturbance with change in weight; or
 - c. Sleep disturbance; or
 - d. Psychomotor agitation or retardation; or
 - e. Decreased energy; or

- f. Feelings of guilt or worthlessness; or
 - g. Difficulty concentrating or thinking; or
 - h. Thoughts of suicide; or
 - i. Hallucinations, delusions, or paranoid thinking; or
2. Manic syndrome characterized by at least three of the following:
- a. Hyperactivity; or
 - b. Pressure of speech; or
 - c. Flight of ideas; or
 - d. Inflated self-esteem; or
 - e. Decreased need for sleep; or
 - f. Easy distractibility; or
 - g. Involvement in activities that have a high probability of painful consequences which are not recognized; or
 - h. Hallucinations, delusions or paranoid thinking; or
3. Bipolar syndrome with a history of episodic periods manifested by the full symptomatic picture of both manic and depressive syndromes (and currently characterized by either or both syndromes);

AND

- B. Resulting in at least two of the following:
- 1. Marked restriction of activities of daily living; or
 - 2. Marked difficulties in maintaining social functioning; or
 - 3. Marked difficulties in maintaining concentration, persistence, or pace; or

4. Repeated episodes of decompensation, each of extended duration;

OR

- C. Medically documented history of a chronic affective disorder of at least 2 years' duration that has caused more than a minimal limitation of ability to do basic work activities, with symptoms or signs currently attenuated by medication or psychosocial support, and one of the following:
 1. Repeated episodes of decompensation, each of extended duration; or
 2. A residual disease process that has resulted in such marginal adjustment that even a minimal increase in mental demands or change in the environment would be predicted to cause the individual to decompensate; or
 3. Current history of 1 or more years' inability to function outside a highly supportive living arrangement, with an indication of continued need for such an arrangement.

The objective medical evidence indicates that the Claimant has moderately restricted abilities for social interaction and adaptation. The objective medical evidence indicates that the Claimant has moderately limited memory, concentration, and persistence. The objective medical evidence does not indicate marked impairments of the Claimant's abilities.

The objective medical evidence does not establish that the Claimant is not capable of functioning outside of a highly structured environment.

The medical evidence of the Claimant's condition does not give rise to a finding that he would meet a statutory listing in federal code of regulations 20 CFR Part 404, Subpart P, Appendix 1.

STEP 4

At Step 4, the Claimant's residual functional capacity (RFC) is examined to determine if you are still able to perform work you have done in the past. Your RFC is your ability to do physical and mental work activities on a sustained basis despite limitations from your impairments. Your RFC is assessed using all the relevant evidence in the record. If you can still do your past relevant work you are not disabled under these standards.

The Claimant has past relevant work experience as a machine operator, which did not require any significant lifting. The Claimant's past relevant work experience fits the description of light or sedentary work.

There is no evidence upon which this Administrative Law Judge could base a finding that the Claimant is unable to perform work in which he has engaged in, in the past.

STEP 5

At Step 5, the burden of proof shifts to the Department to establish that the Claimant has the Residual Functional Capacity (RFC) for Substantial Gainful Activity.

The residual functional capacity is what an individual can do despite limitations. All impairments will be considered in addition to ability to meet certain demands of jobs in the national economy. Physical demands, mental demands, sensory requirements and other functions will be evaluated.... 20 CFR 416.945(a).

To determine the physical demands (exertional requirements) of work in the national economy, we classify jobs as sedentary, light, medium and heavy. These terms have the same meaning as they have in the *Dictionary of Occupational Titles*, published by the Department of Labor... 20 CFR 416.967.

Sedentary work. Sedentary work involves lifting no more than 10 pounds at a time and occasionally lifting or carrying articles like docket files, ledgers, and small tools. Although a sedentary job is defined as one which involves sitting, a certain amount of walking and standing is often necessary in carrying out job duties. Jobs are sedentary if walking and standing are required occasionally and other sedentary criteria are met. 20 CFR 416.967(a).

Light work. Light work involves lifting no more than 20 pounds at a time with frequent lifting or carrying of objects weighing up to 10 pounds. Even though the weight lifted may be very little, a job is in this category when it requires a good deal of walking or standing, or when it involves sitting most of the time with some pushing and pulling of arm or leg controls.... 20 CFR 416.967(b).

The objective medical evidence indicates that the Claimant has the residual functional capacity to perform some other less strenuous tasks than in his prior employment and that he is physically able to do light or sedentary tasks if demanded of him. The Claimant's activities of daily living do not appear to be very limited and he should be able to perform light or sedentary work even with his impairments for a period of 12 months. The Claimant's testimony as to his limitations indicates that he should be able to perform light or sedentary work.

Claimant is 36 years-old, a younger person, under age 50, with a limited education, and a history of unskilled work. Based on the objective medical evidence of record Claimant has the residual functional capacity to perform light work, and Medical Assistance (MA) and State Disability Assistance (SDA) is denied using Vocational Rule 20 CFR 202.17 as a guide.

The Federal Regulations at 20 CFR 404.1535 speak to the determination of whether Drug Addiction and Alcoholism (DAA) is material to a person's disability and when benefits will or will not be approved. The regulations require the disability analysis be completed prior to a determination of whether a person's drug and alcohol use is material. It is only when a person meets the disability criterion, as set forth in the regulations, that the issue of materiality becomes relevant. In such cases, the regulations require a sixth step to determine the materiality of DAA to a person's disability.

When the record contains evidence of DAA, a determination must be made whether or not the person would continue to be disabled if the individual stopped using drugs or alcohol. The trier of fact must determine what, if any, of the physical or mental limitations would remain if the person were to stop the use of the drugs or alcohol and whether any of these remaining limitations would be disabling.

Claimant's testimony and the information contained in the file indicate that the Claimant has a history of tobacco, drug, and alcohol abuse. Applicable hearing is the Drug Abuse and Alcohol (DA&A) Legislation, Public Law 104-121, Section 105(b)(1), 110 STAT. 853, 42 USC 423(d)(2)(C), 1382(c)(a)(3)(J) Supplement Five 1999. The law indicates that individuals are not eligible and/or are not disabled where drug addiction or alcoholism is a contributing factor material to the determination of disability. After a careful review of the credible and substantial evidence on the whole record, this Administrative Law Judge finds that the Claimant does not meet the statutory disability definition under the authority of the DA&A Legislation because his substance abuse is material to his alleged impairment and alleged disability.

It should be noted that the Claimant continues to smoke despite the fact that his doctor has told him to quit. Claimant is not in compliance with his treatment program. If an individual fails to follow prescribed treatment which would be expected to restore their ability to engage in substantial activity without good cause there will not be a finding of disability.... 20 CFR 416.994(b)(4)(iv).

In order to get benefits, you must follow treatment prescribed by your physician if this treatment can restore your ability to work. If you do not follow the prescribed treatment without a good reason, we will not find you to be disabled. 20 CFR § 416.930.

The objective medical evidence indicates that the Claimant has been diagnosed with substance abuse induced psychotic delusions. The objective medical evidence indicates that the Claimant has been advised to stop consuming alcohol. The objective medical evidence indicates that the Claimant continues to consume alcohol on a daily basis despite the recommendation of physicians.

The Department's Program Eligibility Manual contains the following policy statements and instructions for caseworkers regarding the State Disability Assistance program: to receive State Disability Assistance, a person must be disabled, caring for a disabled person or age 65 or older. BEM, Item 261, p. 1. Because the Claimant does not meet the definition of disabled under the MA-P program and because the evidence of record does not establish that the Claimant is unable to work for a period exceeding 90 days, the Claimant does not meet the disability criteria for State Disability Assistance benefits either.

The Department has established by the necessary competent, material and substantial evidence on the record that it was acting in compliance with Department policy when it determined that the Claimant was not eligible to receive Medical Assistance and/or State Disability Assistance.

DECISION AND ORDER

The Administrative Law Judge, based upon the above findings of fact and conclusions of law, decides that the Department has appropriately established on the record that it was acting in compliance with Department policy when it denied the Claimant's application for Medical Assistance, retroactive Medical Assistance and State Disability Assistance benefits. The Claimant should be able to perform a wide range of light or sedentary work even with his impairments. The Department has established its case by a preponderance of the evidence.

Accordingly, the Department's decision is **AFFIRMED**.
