#### STATE OF MICHIGAN

# MICHIGAN ADMINISTRATIVE HEARING SYSTEM ADMINISTRATIVE HEARINGS FOR THE DEPARTMENT OF HUMAN SERVICES

Reg. No.: 2011-9477

Issue No.: 2009

Case No.:

Hearing Date: April 11, 2011 Wayne County DHS (18)

ADMINISTRATIVE LAW JUDGE: Colleen M. Mamelka

## **HEARING DECISION**

This matter is before the undersigned Administ rative Law Judge pursuant to MCL 400.9 and MCL 400.37 upon the Claimant's request for a hearing. After due notice, a hearing was held in Taylor, Michigan on Monday, April 11, 2011. The Claimant appeared, along with and testified. The Claimant was represented by appeared on behalf of the Department of Human Services ("Department").

During the hearing, the Claimant waived the time period for the issuance of this decision, in order to allow for the subm ission of additional m edical records. The evidence was received, reviewed, and entered as Exhibit 4. This matter is now before the undersigned for a final decision.

## <u>ISSUE</u>

Whether the Department proper ly determined that the Claimant was not disabled for purposes of the Medical Assistance ("MA-P") benefit program?

## FINDINGS OF FACT

The Administrative Law Judge, based on t he competent, material, and substantial evidence on the whole record, finds as material fact:

- The Claimant submitt ed an application for public assistance seeking MA-P benefits on August 16, 2010.
- 2. On September 30, 2010, the Medical Review Team ("MRT") found the Claimant not disabled.

- 3. On October 6, 2010, the Department sent an Eligibility Notice to the Claimant informing him of the MRT determination. (Exhibit 1, p. 1)
- 4. On December 2, 2010, the Department received the Cla imant's timely wr itten request for hearing.
- 5. On January 11, 2011, the State Hear ing Review T eam ("SHRT") found the Claimant not disabled. (Exhibit 2)
- 6. The Claim ant alleged physical disabl ing impairments due to shoulder, arm, and leg pain and a traumatic brain injury.
- 7. The Claim ant alleged mental dis abling impairments due to depression, an xiety, and cognitive dysfunction.
- 8. At the time of hearing, the Claimant was birth date; was 6' in height; and weighed 175 pounds.
- 9. The Claimant is a high school graduat e with some c ollege and en employment history as a general laborer and computer specialist.
- 10. The Claimant's impairments have lasted, or are expected to last, continuously for a period of 12 months or longer.

### **CONCLUSIONS OF LAW**

The Medical Assistance program is established by Subchapter XIX of Chapter 7 of The Public Health & Welfare Act, 42 USC 1397, and is administered by the Department of Human Services, formerly known as the Family Independenc e Agency, pursuant to MCL 400.10 *et seq.* and MCL 400.105. Department policies are found in the Bridge's Administrative Manual ("BAM"), the Bridges Elig ibility Manual ("BEM"), and the Bridges Reference Tables ("RFT").

Disability is defined as the inability to do any substantial gainful activity by reason of any medically determinable physical or mental im pairment which can be expected to result in death or which has lasted or can be expect ed to last for a continuous period of not less than 12 months. 20 CFR 416.905(a). The person claiming a physical or mental disability has the burden to establish it through the use of competent medical evidence from qualified medical sources such as his or her medical history, clinical/laboratory findings, diagnosis/prescribed treatment, prognosis for recovery and/or medical assessment of ability to do work-related activities or ability to reason and make appropriate mental adjustments, if a mental disability is alleged. 20 CRF 413.913. An individual's subjective pain complaints are not, in and of themselves, sufficient to

establish disab ility. 20 CF R 416.908; 2 0 CFR 4 16.929(a). Similarly, conclusor y statements by a physician or mental health professional that an individual is disabled or blind, absent supporting medical evidence, is insufficient to establish disability. 20 CFR 416.927.

When determining disability, the federal regulations require several factors to be considered including: (1) the location/duration/frequency/intensity of an applicant's pain; (2) the type/dosage/effectiveness/side effects of any medication the applicant takes to relieve pain; (3) any treatment other than pain medication that the applicant has received to relieve pain; and (4) the effect of the applicant's pain on his or her ability to do basic work activities. 20 CFR 416.929(c)(3). The applicant's pain must be assessed to determine the extent of his or her functional limitation(s) in light of the objective medical evidence presented. 20 CFR 416.929(c)(2).

In order to determine whether or not an individual is disabled, federal regulations require a five-step sequential evaluation process be utilized. 20 CFR 416.920(a)(1). The five-step analysis requires the trier of fact to cons ider an individual's current work activit y; the severity of the impairment(s) both in duration and whether it meets or equals a listed impairment in Appendix 1; residual functional capacity to det ermine whether an individual can perform past relev ant work; and residual functional capacity along with vocational factors (i .e. age, education, and work experienc e) to determine if an individual can adjust to other work. 20 CFR 416.920(a)(4); 20 CFR 416.945.

If an individual is found disabled, or not disabled, at any step, a determination or decision is made with no need evaluate subsequent steps. 20 CFR 416.920(a)(4). If a determination cannot be made that an individual is disable ed, or not disabled, at particular step, the next step is required. 20 CFR 416.920(a)(4). If an impairment does not meet or equal a listed impairment, an indi vidual's residual functional capacity is assessed before moving from step three to step four. 20 CFR 416.920(a)(4); 20 CFR 416.945. Residual f unctional capacity is the most an indiv idual can do d espite the limitations based on all relevant evidence. 20 CF R 945(a)(1). An individual's residua l functional capacity assessment is evaluat ed at both steps four and five. 20 CF 416.920(a)(4). In determining disability, an i ndividual's functional capac ity to perform basic work activities is evaluated and if f ound that the individual has the ability to perform basic work activities without significant limitation, disability will not be found. 20 CFR 416.994(b)(1)(iv). In general, the i ndividual has the responsibility to prove disability. 20 CFR 4 16.912(a). An impair ment or combi nation of impairments is not severe if it does not signific antly limit an individual's physical or mental ability to do basic work activities. 20 CFR 416.921(a ). The in dividual has the responsibility to provide evidence of prior work experience; efforts to work; and any other factor showing how the impairment affects the ability to work. 20 CFR 416.912(c)(3)(5)(6).

In addition to the above, when evaluating mental impairments, a special technique is utilized. 2 0 CFR 41 6.920a(a). First, an i ndividual's pertinent sym ptoms, signs, a nd laboratory findings are evaluated to determine whether a medically determinable mental impairment exists. 20 CFR 416.920a(b)(1). When a medically determinable mental impairment is established, the symptoms, signs and laboratory findings that substantiate the impairment are documented to include the individual's significant history, laboratory findings, and functional limitations. 20 CFR 416.920a(e)(2). Functional limitation(s) is assessed based upon the extent to whic h the impairment(s) interferes with an tion independently, appropriately, effectively, and on individual's ability to func а Id.; 20 CFR 416.920a(c)(2). Chronic m ental disorders, structured sustained basis. settings, medication, and other treatment and the effect on the overall degree of functionality is considered. 20 CFR 416.920a(c)(1). In addition, four broad functional areas (activities of daily living; social f unctioning; concentration, persistence or pace; and episodes of decompensat ion) are consider ed when deter mining an individual's degree of functional limitation. 20 CFR 416.920a(c)(3). The degree of limitation for the first three functional areas is rated by a five point scale: none, mild, moderate, marked, and extreme. 20 CFR 416.920a(c)(4). A four point scale (none, one or two, three, four or more) is used to rate the degree of limitation in the fourth functional area. Id. The last point on each scale repr esents a degree of limitation t hat is incompatible with the ability to do any gainful activity. Id.

After the degree of functional limitation is determined, the severity of the mental impairment is determined. 20 CFR 416.920a(d). If severe, a determination of whether the impairment meets or is the equivalent of a listed mental disorder is made. 20 CF R 416.920a(d)(2). If the severe mental im pairment does not meet (or equal) a listed impairment, an individual's residual functional capacity is assessed. 20 CF R 416.920a(d)(3).

As outlined above, the first step looks at the i ndividual's current work activity. In the record presented, the Cla imant is not involved in substantial gainful activity therefore is not ineligible for disability benefits under Step 1.

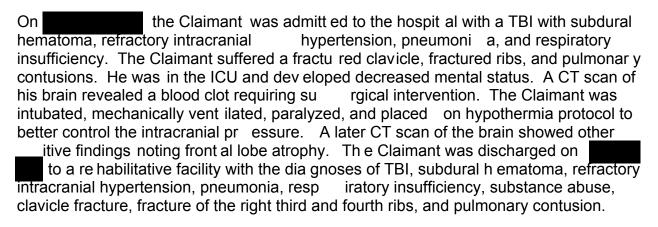

The severity of the Claimant 's alleged impairment(s) is considered under St ep 2. The Claimant bears the burden to pr esent sufficient objective medical evidenc et o substantiate the alleged disa bling impairments. In order to be considered disabled for MA purpos es, the impairment must be se vere. 20 CFR 916. 920(a)(4)(ii); 20 CFR 916.920(b). An impairment, or combination of impairments, is severe if it significantly limits an individual's physical or mental ability to do basic work activities regardless of age, education and work experience. 20 CFR 916.920(a)(4)(ii); 20 CFR 916.920(c). Basic work activities means the abilities and aptitudes necessary to do most jobs. 20 CFR 916.921(b). Examples include:

- 1. Physical functions such as walk ing, standing, sitting, lifting, pushing, pulling, reaching, carrying, or handling;
- 2. Capacities for seeing, hearing, and speaking;
- 3. Understanding, carrying out, and remembering simple instructions:
- 4. Use of judgment;
- 5. Responding appropriately to supervision, co-workers and usual work situations; and
- 6. Dealing with changes in a routine work setting.

ld.

The second step allows for dismissal of a disability claim obviously lacking in medical merit. Higgs v Bowen, 880 F2d 860, 862 (CA 6, 1988). The severity requirement may still be employed as an admin istrative convenience to screen out claims that are totally groundless solely from a medical standpoint. *Id.* at 863 citing Farris v Sec of Health and Human Services, 773 F2d 85, 90 n.1 (CA 6, 1985). An impairment qualifies as non-severe only if, regardless of a claimant's age, education, or work experience, the impairment would not affect the claimant's ability to work. Salmi v Sec of Health and Human Services, 774 F2d 685, 692 (CA 6, 1985).

In the present case, the Claima nt alleges disability due to shoulder, arm, and le g pain, traumatic brain injury ("TBI"), depression, anxiety, and cognitive dysfunction.

The Claimant remained in in-patient rehab until where he was released under the care of his mother and was required to follow a home exercise program.

On the current diagnosis was TBI. The Claim and was listed as disabled and he was restricted to the occasional lifting/carrying of less than 10 pounds and unable to perform repetitive actions with his extremities. The Claimant required a cane for ambulation. Mentally, the Claimant's comprehension, memory, sustained concentration, following simple directions, reading/writing, and social interaction were all limited.

On the Claimant attended a Psy chological consultative examination. The clinical evaluation and scores on the psychometric tests found the Claimant functioning below pre-morbid lev els in areas of verbal reasoning, non-verbal reasoning, memory, and perceptual motor coordination. Notable degradation in short term memory and long term verbal memory was documented with some relative sparing of short and long term visual memory. The Claimant's full scale cognitive functioning was within the range of border line mental deficiency with an terograde and retrograde amnesia. The Psyc hologist opined that the Claimant's ab ility to work is s everely impacted and it was "doubtful that any serious employer would hire him." The Claimant's ability to understand, remember , and carry out simple instructions ar moderately to severely impacted; his ability to respond appropriately to others, including co-workers and super visors, and adapt to changes in the work setting, are moderately to severely impacted; and his ability to perf orm work related activities with reliability. consistency, and persistence, are severely impacted. The diagnoses wer e cognitive disorder, personality changes s econdary to TBI with dis inhibition ov er a nger and irritability, major depression (chronic and severe), and anxiety. The Global Assessment Functioning was 50 noting serious problems in multiple areas. The Mental Residual Functional Capacity Assessment was als o completed. The Claimant was markedly limited in 11 of the 20 factors and moderately limited in 4 factors.

As previously noted, the Claim ant bears the burden to present sufficient objective medical evidence to substantiate the alleged disabling impairment(s). As summarized above, the Claimant has presented medical evidence establishing that he does have physical and mental limitations on his ability to perform basic work activities. The medical evidence has established that the Claimant has an impairment, or combination thereof, that has more than a de minimus effect on the Claimant's basic work activities. Further, the impairments have lasted continuous ly for twelve months; therefore, the Claimant is not disqualified from receipt of MA-P benefits under Step 2.

In the third step of the seque ntial an alysis of a disability claim, the trier of fact must determine if the Claimant's impairment, or co mbination of impairments, is listed in Appendix 1 of Subpart P of 20 CFR, Part 404. The Claim ant has alleged physical and mental disabling impairments due to shoulder, arm, and leg pain, traumatic brain injury ("TBI"), depression, anxiety, and cognitive dysfunction

Listing 12.00 encompasses adult mental disorder s. The evaluation of disability on the basis of mental dis orders requires doc umentation of a medically determinable impairment(s) and consideration of the degr ee in which the impairment limits the individual's ability to work, and whether these limitations have lasted or are expected to last for a continuous period of at least 12 months. 12.00A. The existence of a medically determinable impai rment(s) of the required duration must be established through medical evidence cons isting of symptoms, signs, and laboratory findings, to include psychological test findings. 12.00B The evaluation of disability on the basis of a mental disorder requires sufficient evid ence to (1) establis h the presence of a medically determinable ment al impairment(s), (2) asse ss the degree of functional limitation t he impair ment(s) imposes, and (3) project the probable duration of the impairment(s). 12.00D The eva luation of disab ility on the basis of mental disord ers requires documentation of a medically determinable impairment(s) and consideration of the degree in which the impairment limits the indiv idual's ability to work consideratio n. and whether these limitations have lasted or are expected to last for a continuous period of at least 12 months. 12.00A

Listing 12.02 defined organic mental disor ders which are psychol ogical or behav ioral abnormalities associated with a dysfunction of the brain. The history and physica I examination are considered as well as the abnormal mental state and loss of previously acquired functional ab ilities. The required level of severity for these disorders is met when the requirements in both A and B are satisfied, or when the requirements in C are satisfied.

- A. Demonstration of a loss of specif ic cognitive abilities or affective changes and the medically documented persistence of at least one of the following:
  - 1. Disorientation to time and place; or
  - 2. Memory impairment, either s hort-term (inability to learn new information), intermediate, or long-term (inability to remember information that wa s known sometime in the past); or
  - 3. Perceptual or thinking disturbances (e.g., hallucinations, delusions); or
  - 4. Change in personality; or
  - 5. Disturbance in mood; or

- 6. Emotional lability (e.g., ex plosive temper outbursts, sudden crying, etc.) and impairment in impulse control; or
- 7. Loss of measured intellectual ability of at least 15 I.Q. points from premorbid levels or over all impa irment index clearly within the severely impair ed range on neuropsychological testing, e.g., Luria-Nebraska, Halstead-Reitan, etc;

#### AND

- B. Resulting in at least two of the following:
  - Marked restriction of activities of daily living; or
  - 2. Marked difficulties in maintaining social functioning; or
  - 3. Marked difficulties in maintaining concentration, persistence, or pace; or
- 4. Repeated episodes of decompensation, each of extended duration;

#### OR

- C. Medically documented history of a chronic organic mental disorder of at least 2 years' duration that has caused more than a minima I limitation of ability to do basic wo rk activities, with symptoms or signs currently attenuated by m edication or psychosocial s upport, and one of the following:
  - 1. Repeated episodes of decom pensation, each of extended duration; or
  - 2. A residual disease process that has resulted in such marginal adjustment that even a minimal in crease in mental demands or change in the envir onment would be predicted to cause the individual to decompensate; or
  - 3. Current history of 1 or mo re years' inability to function outside a highly supportive living arrangement, with an indication of continued need for such an arrangement.

In this case, the objective evidence establis hes that in the Claimant suffered the Claimant full scale IQ was 76. The objective findings a severe TBI. In confirm memory impairment, both long and s hort term, and a change in personality. In addition, the Claimant is markedly limited in his ability to maintain social functioning and has marked difficulties in maintaining c oncentration, persistence, or pace. The evaluation noted that the Claimant's Psychologist who performed the independent ability to work was severely impacted and it was doubtful any serious employer would hire him. Family members testi fied about the Claimant's change in personality and his inability to live independently. Based on the foregoing, it is found that the Claimant's impairment(s) meet, or are t he medical equival ent thereof, a listed impairment within 12.00, specifically, 12.02. Accordingly, the Claimant is found disabled at Step 3 with no further analysis required.

## **DECISION AND ORDER**

The Administrative Law Judge, based on the above findings of fact and conclusions of law finds the Claimant disabled for purposes of the MA-P benefit program.

Accordingly, it is ORDERED:

- 1. The Department's determination is REVERSED.
- 2. The The Department shall process the August 16, 2010 application to determine if all other non-medical criteria are met and info rm the Claimant and his Authorized Representative of the det ermination in ac cordance with Department policy.
- 3. The Department shall suppl ement for any lost benefits (if any) that the Claim ant was entitle d to receive if otherwise eligible and qua lified in ac cordance with Department policy.
- 4. The Department shall review the Claimant's continued e ligibility in October 2012 in accordance with Department policy.

Colleen M. Mamilka

Colleen M. Mamelka Administrative Law Judge For Maura Corrigan, Director Department of Human Services

Date Signed: September 27, 2011

Date Mailed: September 27, 2011

**NOTICE:** Administrative Hearings may order a rehearing or reconsideration on either its own motion or at the request of a party wit hin 30 days of the ma iling date of this Decision and Order. Administrative Hear ings will not orde r a rehearing or reconsideration on the Department's mo tion where the final decis ion cannot be implemented within 90 days of the filing of the original request.

The Claimant may appeal the Decision and Order to Circuit Court within 30 days of the mailing of the Decision and Order or, if a ti mely request for rehearing was made, within 30 days of the receipt date of the rehearing decision.

Claimant may request a rehearing or reconsideration for the following reasons:

- A rehearing <u>MAY</u> be granted if there is newly discovered evidence that could affect the outcome of the original hearing decision.
- A reconsideration **MAY** be granted for any of the following reasons:
  - misapplication of manual policy or law in the hearing decision,
  - typographical errors, mathematical error, or other obvious errors in the hearing decision that effect the substantial rights of the claimant:
  - the failure of the ALJ to address other relevant issues in the hearing decision.

Request must be submitted through the local DHS office or directly to MAHS by mail at Michigan Administrative hearings
