CONCLUSIONS OF LAW

The Medical Assistance Program is established pursuant to Title XIX of the Social Security Act and is implemented by Title 42 of the Code of Federal Regulations (CFR). It is administered in accordance with state statute, the Social Welfare Act, the Administrative Code, and the State Plan under Title XIX of the Social Security Act Medical Assistance Program.

On May 30, 1997, the Department received approval from the Health Care Financing Administration, U.S. Department of Health and Human Services, allowing Michigan to restrict Medicaid beneficiaries' choice to obtain medical services only from specified Medicaid Health Plans.

The Respondent is one of those Medicaid Health Plans.

Article 1.020 Scope of [Services], at §1.022 E (1) contract, 2010, p. 22.

The MHP witnesses [REDACTED] testified that the Appellant failed to meet plan requirements as a plan member with a life threatening complication such as HTN, DM or other illness that would be otherwise unresponsive to treatment – thus requiring bariatric surgery.

Medical Director [REDACTED] agreed. He said there was no life threatening issue in the Appellant's medical record or in her request for service.

The Appellant said she has depression and schizophrenia – including shortness of breath, related to obesity.

She said she needs *Advair* for her shortness of breath and that she has tried many diets without success to relieve her SOB. This is why she wants bariatric surgery.

The MHP and their exhibit showed that there was no evidence to demonstrate a life threatening condition in the Appellant. See Respondent's Exhibit A, at pages 1-27; 34-41.

The Michigan Medicaid Provider Manual (MPM) policy related to weight reduction is as follows:

[Weight Reduction]

Medicaid covers treatment of obesity when done for the purpose of controlling life-endangering complications, such as hypertension and diabetes. If conservative measures to control weight and manage the complications have failed, other weight reduction efforts may be approved. The physician must obtain PA for this service. Medicaid does not cover treatment specifically for obesity or weight reduction and maintenance alone.

The request for PA must include the medical history, past and current treatment and results, complications

encountered, all weight control methods that have been tried and have failed, and expected benefits or prognosis for the method being requested. If surgical intervention is desired, a psychiatric evaluation of the beneficiary's willingness/ability to alter his lifestyle following surgical intervention must be included.

If the request is approved, the physician receives an authorization letter for the service. A copy of the letter must be supplied to any other provider, such as a hospital, that is involved in providing care to the beneficiary.

MPM, Practitioner §4.22,¹ April 1, 2011, page 40.

The Petitioner has the burden of proving by a preponderance of evidence that she met the Medicaid policy criteria for coverage of bariatric surgery. The MHP witness testified that they considered her medical documentation and testimony at their internal grievance hearing and found it lacking. The MHP established that Appellant had not demonstrated the existence of life threatening medical conditions sufficient to justify the risk of bariatric surgery.

The MHP properly denied the request for bariatric surgery.

DECISION AND ORDER

The Administrative Law Judge, based on the above findings of fact and conclusions of law, decides that the Medicaid Health Plan properly denied Appellant's request for Bariatric surgery.

IT IS THEREFORE ORDERED that:

The Medicaid Health Plan's decision is **AFFIRMED**.
