STATE OF MICHIGAN

MICHIGAN ADMINISTRATIVE HEARING SYSTEM ADMINISTRATIVE HEARINGS FOR THE DEPARTMENT OF HUMAN SERVICES

Reg No.: 2012-35688

Issue No.: 2009

Case No.:

Hearing Date: April 26, 2012 Macomb County DHS (36)

ADMINISTRATIVE LAW JUDGE: Colleen M. Mamelka

HEARING DECISION

This matter is before the undersigned Administrative Law Judge pursuant to MCL 400.9 and MCL 400.37 upon the Claimant 's request for a hearing. After due notice, a telephone hearing was conducted from Detroit, Michigan on Thursday, April 26, 2012. The Claimant appeared, along with appeared on behalf of the Department of Human Services ("Department").

ISSUE

Whether the Department proper ly determined that the Claimant was not disabled for purposes of the Medical Assistance ("MA-P") benefit program?

FINDINGS OF FACT

The Administrative Law Judge, based on t he competent, material, and substantial evidence on the whole record, finds as material fact:

- 1. The Claimant submitt ed an application for public assistance seeking MA-P benefits on January 6, 2012.
- 2. On February 9, 2012, the Medical Re view Team ("MRT") found the Claimant not disabled. (Exhibit 1, pp. 5, 6)
- 3. The Department notified the Claimant of the MRT det ermination on February 16, 2012. (Exhibit 1, pp. 3, 4)
- 4. On March 1, 2012, the Department received the Claimant's timely written request for hearing. (Exhibit 1, p. 2)

- 5. On April 2, 2012, the State Hearing Review Team ("SHRT") found the Claimant not disabled. (Exhibit 2)
- 6. The Claimant alleged physical disable ing impairments due to bilateral shoulder pain with upper extremity nume bness, shortness of breath, asthma, heart pain status post myocardial infarction with steent placement, high blood pressure, and acid reflux.
- 7. The Claim ant alleged mental disabling impairments due to anxiety and depression.
- 8. At the time of hearing, the Claimant was years old with a date; was 5'8" in height; and weighed 218 pounds.
- 9. The Claim ant is a high school graduate with an employ ment history in jewelry sales and design.
- 10. The Claimant's impairments have lasted, or are expected to last, continuously for a period of 12 months or longer.

CONCLUSIONS OF LAW

The Medical Assistance program is established by Subchapter XIX of Chapter 7 of The Public Health & Welfare Act, 42 USC 1397, and is administered by the Department of Human Services, formerly known as the Family Independence Agency, pursuant to MCL 400.10 et seq. and MCL 400.105. Department policies are found in the Bridge's Administrative Manual ("BAM"), the Bridges Elig ibility Manual ("BEM"), and the Bridges Reference Tables ("RFT").

Disability is defined as the inability to do any substantial gainful activity by reason of any medically determinable physical or mental im pairment which can be expected to result in death or which has lasted or can be expect ed to last for a continuous period of not less than 12 months. 20 CFR 416.905(a). The person claiming a physical or mental disability has the burden to establish it through the use of competent medical evidence from qualified medical sources such as his or her medical history, clinical/laboratory findings, diagnosis/prescri bed treatment, prognosis for recovery and/or medical assessment of ability to do work-related ac tivities or ability to reason and make appropriate mental adjustments, if a mental disability is alleged. 20 CFR 416.913. An individual's subjective pain complaints are not, in and of themselves, sufficient to establish disability. 20 CF R 416.908; 2 0 CFR 4 16.929(a). Similarly, conclusor y statements by a physician or mental health professional that an individual is disabled or

blind, absent supporting medical evidence, is insufficient to establish disability. 20 CFR 416.927.

When determining disability, the federal regulations require several factors to be considered including: (1) the location/duration/frequency/intensity of an applicant's pain; (2) the type/dosage/effectiveness/side effects of any medication the applicant nat takes to relieve pain; (3) any treatment other than pain medication that the applicant has received to relieve pain; and (4) the effect of the applicant's pain on his or her ability to do basic work activities. 20 CFR 416.929(c)(3). The applicant's pain must be assessed to determine the extent of his or her functional limitation(s) in light of the objective medical evidence presented. 20 CFR 416.929(c)(2).

In order to determine whether or not an individual is disabled, federal regulations require a five-step sequential evaluation process be utilized. 20 CFR 416.920(a)(1). The five-step analysis requires the trier of fact to cons ider an individual's current work activit y; the severity of the impairment(s) both in duration and whether it meets or equals a listed impairment in Appendix 1; residual functional capacity to det ermine whether an individual can perform past relev ant work; and residual functional capacity along with vocational factors (i .e. age, education, and work experienc e) to determine if an individual can adjust to other work. 20 CFR 416.920(a)(4); 20 CFR 416.945.

If an individual is found disabled, or not disabled, at any step, a determination or decision is made with no need evaluate subsequent steps. 20 CFR 416.920(a)(4). If a determination cannot be made that an individual is disable ed. or not disabled, at particular step, the next step is required. 20 CFR 416.920(a)(4). If an impairment does not meet or equal a listed impairment, an indi vidual's residual functional capacity is assessed before moving from step three to step four. 20 CFR 416.920(a)(4); 20 CFR 416.945. Residual f unctional capacity is the most an indiv idual can do d espite the limitations based on all rele vant evidence. 20 CFR 416.945(a)(1). An individual's residual functional capacity ass essment is eval uated at both steps four and five. 20 CFR 41 6.920(a)(4). In determining disability, an individual's functional capacity to perform basic work activities is evaluated and if found that the individual has the ability to perform basic work activities without significant limitation, disability will not be found. general, the indiv idual has the responsibility to prove 20 CFR 416.994(b)(1)(iv). In disability. 20 CFR 4 16.912(a). An impair ment or combi nation of impairments is not severe if it does not signific antly limit an individual's physical or mental ability to do basic work activities. 20 CFR 416.921(a). The in dividual has the responsibility to provide evidence of prior work experience; efforts to work; and any other factor showing how the impairment affects the ability to work. 20 CFR 416.912(c)(3)(5)(6).

In addition to the above, when evaluating mental impairments, a special technique is utilized. 2 0 CF R 41 6.920a(a). First, an individual's pertinent symptoms, signs, and laboratory findings are evaluated to determine whether a medically determinable mental

impairment exists. 20 CFR 416.920a(b)(1). When a medically determinable mental impairment is established, the symptoms, signs and laboratory findings that substantiate the impairment are documented to include the individual's significant history, laboratory findings, and functional limitations. 20 CFR 416.920a(e)(2). Functional limitation(s) is assessed based upon the extent to whic h the impairment(s) interferes with an individual's ability to func tion independently, appropriately, effectively, and on а Id.; 20 CFR 416.920a(c)(2). Chronic m ental disorders, structured sustained basis. settings, medication, and other treatment and the effect on the overall degree of functionality is considered. 20 CFR 416.920a(c)(1). In addition, four broad functional areas (activities of daily living; social f unctioning; concentration, persistence or pace; and episodes of decompensat ion) are consider ed when deter mining an individual's degree of functional limitation. 20 CFR 416.920a(c)(3). The degree of limitation for the first three functional areas is rated by a five point scale: none, mild, moderate, marked, and extreme. 20 CFR 416.920a(c)(4). A four point scale (none, one or two, three, four or more) is used to rate the degree of limitation in the fourth functional area. *Id.* The last point on each scale repr esents a degree of limitation t hat is incompatible with the ability to do any gainful activity. Id.

After the degree of functional limitation is determined, the severity of the mental impairment is determined. 20 CFR 416.920a(d). If severe, a determination of whether the impairment meets or is the equivalent of a listed mental disorder is made. 20 CF R 416.920a(d)(2). If the severe mental im pairment does not meet (or equal) a listed impairment, an individual's residual functional capacity is assessed. 20 CF R 416.920a(d)(3).

As outlined above, the first step looks at the i ndividual's current work activity. In the record presented, the Claiman t is not involved in substantial gainful activity and, therefore, is not ineligible for disability benefits under Step 1.

The severity of the Claimant's alleged impa irment(s) is considered under St ep 2. The Claimant bears the burden to present sufficient objective medical evidence et o substantiate the alleged disa bling impairments. In order to be considered disabled for MA purpos es, the impairment must be seevere. 20 CFR 416. 920(a)(4)(ii); 20 CFR 416.920(b). An impairment, or combination of impairments, is severe if it significantly limits an individual's physical or mental ability to do basic work activities regardless of age, education and work experience. 20 CFR 416.920(a)(4)(ii); 20 CFR 416.920(c). Basic work activities means the abilities and aptitudes necessary to do most jobs. 20 CFR 416.921(b). Examples include:

- 1. Physical functions such as wa lking, standing, sitting, lifting, pushing, pulling, reaching, carrying, or handling;
- 2. Capacities for seeing, hearing, and speaking;

- 3. Understanding, carrying out, and remembering simple instructions:
- Use of judgment;
- 5. Responding appropriately to supervision, co-workers and usual work situations; and
- 6. Dealing with changes in a routine work setting.

ld.

The second step allows for dismissal of a disability claim obviously lacking in medical merit. Higgs v Bowen, 880 F2d 860, 862 (CA 6, 1988). The severity requirement may still be employed as an administrative convenience to screen out claims that are totally groundless solely from a medical standpoint. *Id.* at 863 citing Farris v Sec of Health and Human Services, 773 F2d 85, 90 n.1 (CA 6, 1985). An impairment qualifies as non-severe only if, regardless of a claimant's age, education, or work experience, the impairment would not affect the claimant's ability to work. Salmi v Sec of Health and Human Services, 774 F2d 685, 692 (CA 6, 1985).

In the present case, the Claima nt alleges disability due to bilateral shou lder pain with upper extremity numbness, shortness of breath, asthma, heart pain status post myocardial infarction with stent placement, high blood pressure, acid reflux, depression, and anxiety.

In support of his claim, some older reco rds from treatment/diagnoses of syncope, hypertension, hypercholesterolemia, coronary artery disease with an ejection fraction of 50%, stent placement, status post right shoulder surgery, GERD, fatty liver, and right remail cyst. The Claimant was referred to orthopedics due to his shoulder pain. An MRI from showed a chronic tear of the supraspinatus tendon with tendon fibers retracted to the middle third of the humeral head. A chronic tear of the infraspinatus tendon was also shown. Moderate to severe atrophy was noted as was severe underlying tendinosis. Severe degenerative change of the glenohumeral j oint with complete cartilage loss involving the humeral head and glenoid with extensive marrow edema was documented as was diffuse chronic tear of the anterior and posterior and superior labrum.

On the Claim ant presented to the emergen cy room with complaint s of chest pain. Chest x-ray was normal. Left heart catheter ization, selective left/right coronary angiography, and left v entriculography were perform ed without complication. The results were mild non-obstructive coro nary artery disease noting 20-30% stenosis

and elevated left ventricular end-diastolic pre ssure. The cardiol ogist opined that the pain was atypical and noncardiac in origin. The Claimant discharged the same day with the diagnosis of atypical chest pain second ary to coronary artery disease st atus post stent placement x3, hypertension, and dyslipidemia.

On the Claimant attended a follow-up appointment where his asthma and heart medication were renewed. On the Claimant attended a consultat ive physical examination. The Claimant's right extremity gr ip strength was markedly limited due to pain as was his ability to perform fine and gross dexterity. Joint movement was markedly limited as was the Claimant's ability to carry, push, or pull. The impressions were right shoulder pain with sev ere arthritis and limited joint mov ement, cardiovascular dise ase, acid reflux, hypertension, and anxiety. the Claimant attended a psychological assess ment. The diagnoses were depressive disorder (not otherwise specified), panic disorder without agoraphobia, and gener alized anxiety disor der. A personality disorder was not ruled out and the Global Assessment Functioning ("GAF") was 55. The prognosis was guarded; however, the Claimant was found able to understand, reta in, and follow s imple direction. The Claimant was referred to the mental health clinic. a provider wrote a le tter on behalf of the Claimant confirming On diagnoses of acute on chroni c heart disease with chest pain, asthma, allergic rhinitis, high blood pressure, diabetes mellitus, hematuria, GERD, anxiety, and depression. The Physician stated, in essence, that without medical assi stance premature death or disability was likely.

On a Medica I Examination Report was completed on behalf of the Claimant. The current diagnos es were list ed in part as degenerative joint disease, hypertension, chronic obstructive pulmona ry diseas e ("COPD"), and anxiety. The physical examination noted respiratory abnormalities due to asthma/COPD, and anxiety, and right shoulder pain.

As previously noted, the Claim ant bears the burden to present sufficient objective medical evidence to substantiate the alleged disabling impairment(s). As summarized above, the Claimant has presented medical evidence establishing that he does have some physical and mental limitations on his ability to perform basic work activities. The medical evidence has established that the Claimant has an impairment, or combination thereof, that has more than a *de minimus* effect on the Claimant's basic work activities. Further, the impairments have lasted continuous ly for twelve months; therefore, the Claimant is not disqualified from receipt of MA-P benefits under Step 2.

In the third step of the seque ntial an alysis of a disability claim, the trier of fact must determine if the Claimant's impairment, or co mbination of impairm ents, is listed in Appendix 1 of Subpart P of 20 CFR, Part 404. The Claim ant has alleged physical and mental dis abling impairments due to b ilateral shoulder pain with upper extremity numbness, shortness of breath, asthma, heart pain s tatus post myocardial infarction with stent placement, high blood pressure, acid reflux, depression, and anxiety.

Listing 1.00 (musculoskeletal system), Listing 3.00 (respiratory system), Listing 4.00 (cardiovascular system); Listing 5.00 (dig estive system), and Listing 12. disorders) were considered in light of the objective findings. There were no objective findings of major joint dysfunction inv olving one major peripher all joint in each upper extremity. Here, the Claimant's has sev ere right shoulder tear/pain. The left upper evidence of persistent, recurrent, and/or extremity is not impacted. There was no uncontrolled (while on prescr ibed treatment) respirator y and/or cardiovascular impairment or end organ damage, nor does it show that the Claim ant's symptoms persist despite prescribed treatment or that the Claimant has very serious limitations in his ab ility to indep endently initiate, sustain, or complete a ctivities of daily liv Mentally, the records show the Claimant suffers with anxie ty and depression; however, there were no marked limitations. Although the objective medical records establish some physical and mental im pairments, these records do not meet the intent and severity requirements of a listing, or its equivalent. Accordingly, the Claimant cannot be found disabled, or not disabled at Step 3; therefore, t he Claimant's e ligibility is considered under Step 4. 20 CFR 416.905(a).

Before considering the fourth step in t he sequential analys is, a determination of the individual's residual functional capacity ("RFC") is made. 20 CFR 416.945. An individual's RFC is the most he/she can still do o n a sustained bas is despite the limitations from the impairment(s). *Id.* The total limiting effects of all the impairments, to include those that are not severe, are considered. 20 CFR 416.945(e).

To determine the physical demands (exertional requirements) of work in the national economy, jobs are c lassified as sedentary, light, medium, heavy, and very heavy. 2 0 CFR 416.967. Sedentary work involves lifting of no more than 10 pounds at a time and occasionally lifting or carrying articles like docket files, ledgers, and small tools. 20 CFR 416.967(a). Although a sedentary job is defined as one which involves sitting, a certain amount of walking and standing is often necessary in carrying out job duties . Id. Jobs are sedentary if walking and standing are r equired occasionally and other sedentary criteria are met. Light work involves lifting no more than 20 pounds at a time with frequent lifting or carrying objects weighing up to 10 pounds. 20 CFR 416.967(b). Even though weight lifted may be very little, a job is in this category when it requires a good deal of walking or standing, or when it invo lves sit ting most of the time with some pushing and pulling of arm or leg controls. *Id.* To be considered capable of performing a full or wide range of light work, an individual must have the ability to do substantially

all of these activities. *Id.* An individual capable of light work is also capable of sedentary work, unless there are additionally limiting factors such as loss of fine dexterity or inability to sit for long periods of time. *Id.* Medium work involves lifting no more than 50 pounds at a time with frequent lifting or carrying of objects weighing up to 25 pounds. 20 CFR 416.967(c). An individual capable of performing medium work is also capable of light and sedentary work. *Id.* Heavy work involves lifting no more than 100 pounds at a time with frequent lifting or carrying of object is weighing up to 50 pounds. 20 CFR 416.967(d). An individual capable of heavy work is also capable of medium, light, and sedentary work. *Id.* Finally, very heavy work involves lifting objects weighing more than 100 pounds at a time with frequent lifting or carrying objects weighing 50 pounds or more. 20 CFR 416.967(e). An individual capable of very heavy work is able to perform work under all categories. *Id.*

Limitations or restrictions which affect the ability to meet the demands of jobs other than strength demands (exertional requirements, i.e. sitting, standing, walk ing, lifting, carrying, pushing, or pulling) are consider ed nonexertional. 20 CFR 416.969a(a). In considering whether an individual can perform past relevant work, a comparis on of the individual's residual functional c apacity with the demands of past relevant work. an individual can no longer do past relevant work the same residual functional capacity assessment along with an individual's a ge, education, and work experience is considered to determine whether an individual can adjust to other work which exists in the national economy. *Id.* Examples of non-exertional limitations or restrictions include difficulty function due to nervousness, anxiousness, or depression; difficulty maintaining attention or concentration; difficulty understanding or remembering detailed instructions; difficulty in seeing or hearing; difficulty tole rating some physical f eature(s) of certain work settings (i.e. can't tolerate dust or fumes); or difficulty performing the manipulative or postural functions of some work such as reaching, handling, stooping, climbing, crawling, or crouching. 20 CFR 416.969a(c)(1)(i) – (vi). If the impairment(s) and related symptoms, such as pain, only affect the ability to perform the non-e xertional aspects of work-related activities, the rules in Appendi x 2 do n ot direct factual conclusions of 969a(c)(2). The determination of whether disabled or not disabled. 20 CFR 416. disability e xists is b ased upon the princi ples in the appropriate sections of the regulations, giving consideration to the rules fo r specific case situat ions in Appendix 2. ld.

In this case, the Claimant alleged disability based on bilateral shoulder pain with upper extremity numbness, shortness of breath, asthma, heart pains tatus post myocardial infarction with stent placemen thingh blood pressure, acide reflux, depression, and anxiety. The Claimant testified that he is able to walk short distances; grip/grasp without difficulty with his left upper extremity only; sit for 15 minutes; lift/carry 10 pounds with his left upper extremity and no weight with his right; stand less than 2 hours; and has difficulties bending and/or squatting. The objective medical findings do not document specific limitations. After review of the entire record to include the Claimant's

testimony, it is found that the Claimant maintains the resi dual functional capacity to perform at least unsk illed, limited, sedentar y work as defined by 20 CFR 416.967(a). Limitations being the alternation between sitting and standing at will.

The fourth step in analyzing a dis ability claim requires an assessment of the Claimant's residual f unctional capacity ("RFC") and pas t relevant em ployment. 20 CF R 416.920(a)(4)(iv). An individual is not disabled if he/she can perform past relevant work. *Id.*; 20 CFR 416.960(b)(3). Past relevant work is work that has been performed within the past 15 years that was a substantial gainful activity and that lasted long enough for the individual to lear n the position. 20 CF R 416.960(b)(1). Vocational fact ors of age, education, and work experience, and whet her the past relevant employment exists in significant numbers in the national economy is not considered. 20 CFR 416.960(b)(3).

The Claimant's prior work histor y consists of work in jewelry s ales and design. In light of the Occupational Code, it is found that the Claimant's work is classified as skilled light work. If the impairment or combination of impairments does not limit physical or mental ability to do basic work activities, it is not a severe impairment(s) and disability does not exist. 20 CFR 416.920. In light of the entire record and the Claimant's RFC (see above), it is found that the Claimant is unable to perform past relevant work.

In Step 5, an assessment of the individua I's residual functional capac ity and age, education, and work experience is consider ed to determine whether an adjustment to other work can be made. 20 CFR 416.920(4)(v). At the time of hearing, the Claimant years old thus consider ed to be a y ounger individual for MA-P purposes. The Claimant is a high school graduate. Disability is found if an individual is unable to adjust to other work. Id. At this point in the analysis, the burden shifts from the Claimant to the Department to present pr oof that the Claimant has t he residual capacity to substantial gainful employ ment. 20 CFR 416.960(2); Richardson v Sec of H ealth and Human Se rvices, 735 F2d 962, 964 (CA 6, 1984). While a vocational expert is no t required, a finding supported by substantial evidence that the individual has th vocational qualifications to perform specif ic jobs is needed to meet the burde n. O'Banner v Sec of Health and Human Services , 587 F2d 321, 323 (CA 6, 1978). Medical-Vocational guidelines found at 20 CFR Subpart P, Appendix II, may be used to satisfy the burden of proving that the individual can perform specific jobs in the national economy. Heckler v Campbell, 461 US 458, 467 (1983); Kirk v Secretary, 667 F2d 524, 529 (CA 6, 1981) cert den 461 US 957 (1983).

In this case, the objective findings reveal that the Claimant suffers from severe right shoulder pain, asthma, chest pain status post myocardial infarction with ste nt placement, anxiety, depression, coronary artery disease, arthritis, and hypertension. In consideration of the Claimant's age, education, work exp erience and RFC, it is found that the Claimant maintains the physical and mental capacity to perform sedentary work as defined by 20 CF R 416.967(a). 20 CFR 416. 963(b) provides that age categorie s

may be mechanically applied in borderline situations when an in dividual is within a fe w months of reaching an older age category, and the older age category results in a determination of being disabled. Such is the case here. In less than 3 months, the Claimant will be greatly years old, thus placed in an older category of approaching advanced age. In light of the foregoing, using the Medical-Vocational Guidelines, 20 CFR 404, Subpart P, Appendix II, as a guide, specifically Rule 201.14, the Claimant is found, at this point, disabled for purposes of the MA-P program.

DECISION AND ORDER

The Administrative Law Judge, based on the above findings of fact and conclusions of law finds the Claimant disabled for purposes of the MA-P benefit program.

Accordingly, It is ORDERED:

- 1. The Department's determination is REVERSED.
- 2. The Department shall initiate proc essing of the January 16, 2012 application to determine if all other non-medical cr iteria are met and inform the Claimant of the determination in accordance with Department policy.
- 3. The Department shall supplement for lo st benefits (if any) that the Claimant was entitled to receiv e if otherwise elig ible and qualified in acc ordance with Department policy.
- 4. The Department shall re view the Claimant's continued eligibility in May 2013 in accordance with Department policy.

Colleen M. Mamelka

Administrative Law Judge For Maura Corrigan, Director Department of Human Services

Date Signed: May 3, 2012

Date Mailed: May 3, 2012

NOTICE: Michigan Administrative Hearing Syst em (MAHS) may order a rehearing or reconsideration on either its own motion or at the request of a par ty within 30 days of the mailing date of this Dec ision and Order. MAHS will not order a rehearing or reconsideration on the Department's mo tion where the final decis ion cannot be implemented within 90 days of the filing of the original request. (60 days for FAP cases)

The Claimant may appeal the Decision and Order to Circuit Court within 30 days of the receipt of the Decision and Order or, if a timely request for rehearing was made, within 30 days of the receipt date of the rehearing decision.

Claimant may request a rehearing or reconsideration for the following reasons:

- A rehearing <u>MAY</u> be granted if there is newly discovered evidence that could affect the outcome of the original hearing decision.
- A reconsideration **MAY** be granted for any of the following reasons:
 - misapplication of manual policy or law in the hearing decision,
 - typographical errors, mathematical error, or other obvious errors in the hearing decision that effect the substantial rights of the claimant:
 - the failure of the ALJ to address other relevant issues in the hearing decision.

Request must be submitted through the local DHS office or directly to MAHS by mail at Michigan Administrative Hearings
