

STATE OF MICHIGAN
MICHIGAN ADMINISTRATIVE HEARING SYSTEM
ADMINISTRATIVE HEARINGS FOR THE
DEPARTMENT OF HUMAN SERVICES

IN THE MATTER OF:

[REDACTED]

Reg No.: 2012-36286
Issue No.: 2009, 4031
Case No.: [REDACTED]
Hearing Date: May 7, 2012
Macomb County DHS (12)

ADMINISTRATIVE LAW JUDGE: Colleen M. Mamelka

HEARING DECISION

This matter is before the undersigned Administrative Law Judge pursuant to MCL 400.9 and MCL 400.37 upon the Claimant's request for a hearing. After due notice, a hearing was held in Clinton Township, Michigan on Monday, May 7, 2012. The Claimant appeared, along with [REDACTED], [REDACTED] and [REDACTED], and testified. Participating on behalf of the Department of Human Services ("Department") was [REDACTED]

During the hearing, the Claimant waived the time period for the issuance of this decision, in order to allow for the submission of additional medical records. Despite attempting to secure the records, no records were received. This matter is now before the undersigned for a final decision.

ISSUE

Whether the Department properly determined that the Claimant was not disabled for purposes of the Medical Assistance ("MA-P") and State Disability Assistance ("SDA") benefit programs?

FINDINGS OF FACT

The Administrative Law Judge, based on the competent, material, and substantial evidence on the whole record, finds as material fact:

1. The Claimant submitted an application for public assistance seeking MA-P benefits on October 31, 2011.

2012-36286/CMM

2. On January 17, 2012, the Medical Review Team (“MRT”) found the Claimant not disabled. (Exhibit 1, pp. 88, 89)
3. On February 6, 2012, the Department notified the Claimant of the MRT determination.
4. On February 10, 2012, the Department received the Claimant’s written request for hearing. (Exhibit 2)
5. On April 11, 2012, the State Hearing Review Team (“SHRT”) found the Claimant not disabled. (Exhibit 3)
6. The Claimant alleged physical disabling impairments due to back, hip, leg, and feet pain, fibromyalgia, degenerative disc disease, and incontinence.
7. The Claimant alleged mental disabling impairment(s) due to anxiety and depression.
8. At the time of hearing, the Claimant was 44 years old with an [REDACTED] birth date; was 5’5” in height; and weighed 200 pounds.
9. The Claimant is high school graduate with vocational training and an employment history of work as a bank teller/supervisor, manager of a full service gas station, and as a short order cook.
10. The Claimant’s impairments have lasted, or are expected to last, continuously for a period of 12 months or longer.

CONCLUSIONS OF LAW

The Medical Assistance program is established by Subchapter XIX of Chapter 7 of The Public Health & Welfare Act, 42 USC 1397, and is administered by the Department of Human Services, formerly known as the Family Independence Agency, pursuant to MCL 400.10 *et seq.* and MCL 400.105. Department policies are found in the Bridges Administrative Manual (“BAM”), the Bridges Eligibility Manual (“BEM”), and the Bridges Reference Tables (“RFT”).

Disability is defined as the inability to do any substantial gainful activity by reason of any medically determinable physical or mental impairment which can be expected to result in death or which has lasted or can be expected to last for a continuous period of not less than 12 months. 20 CFR 416.905(a). The person claiming a physical or mental disability has the burden to establish it through the use of competent medical evidence from qualified medical sources such as his or her medical history, clinical/laboratory

findings, diagnosis/prescribed treatment, prognosis for recovery and/or medical assessment of ability to do work-related activities or ability to reason and make appropriate mental adjustments, if a mental disability is alleged. 20 CFR 416.913. An individual's subjective pain complaints are not, in and of themselves, sufficient to establish disability. 20 CFR 416.908; 20 CFR 416.929(a). Similarly, conclusory statements by a physician or mental health professional that an individual is disabled or blind, absent supporting medical evidence, is insufficient to establish disability. 20 CFR 416.927.

When determining disability, the federal regulations require several factors to be considered including: (1) the location/duration/frequency/intensity of an applicant's pain; (2) the type/dosage/effectiveness/side effects of any medication the applicant takes to relieve pain; (3) any treatment other than pain medication that the applicant has received to relieve pain; and (4) the effect of the applicant's pain on his or her ability to do basic work activities. 20 CFR 416.929(c)(3). The applicant's pain must be assessed to determine the extent of his or her functional limitation(s) in light of the objective medical evidence presented. 20 CFR 416.929(c)(2).

In order to determine whether or not an individual is disabled, federal regulations require a five-step sequential evaluation process be utilized. 20 CFR 416.920(a)(1). The five-step analysis requires the trier of fact to consider an individual's current work activity; the severity of the impairment(s) both in duration and whether it meets or equals a listed impairment in Appendix 1; residual functional capacity to determine whether an individual can perform past relevant work; and residual functional capacity along with vocational factors (i.e. age, education, and work experience) to determine if an individual can adjust to other work. 20 CFR 416.920(a)(4); 20 CFR 416.945.

If an individual is found disabled, or not disabled, at any step, a determination or decision is made with no need to evaluate subsequent steps. 20 CFR 416.920(a)(4). If a determination cannot be made that an individual is disabled, or not disabled, at a particular step, the next step is required. 20 CFR 416.920(a)(4). If an impairment does not meet or equal a listed impairment, an individual's residual functional capacity is assessed before moving from step three to step four. 20 CFR 416.920(a)(4); 20 CFR 416.945. Residual functional capacity is the most an individual can do despite the limitations based on all relevant evidence. 20 CFR 416.945(a)(1). An individual's residual functional capacity assessment is evaluated at both steps four and five. 20 CFR 416.920(a)(4). In determining disability, an individual's functional capacity to perform basic work activities is evaluated and if found that the individual has the ability to perform basic work activities without significant limitation, disability will not be found. 20 CFR 416.994(b)(1)(iv). In general, the individual has the responsibility to prove disability. 20 CFR 416.912(a). An impairment or combination of impairments is not severe if it does not significantly limit an individual's physical or mental ability to do basic work activities. 20 CFR 416.921(a). The individual has the responsibility to

provide evidence of prior work experience; efforts to work; and any other factor showing how the impairment affects the ability to work. 20 CFR 416.912(c)(3)(5)(6).

In addition to the above, when evaluating mental impairments, a special technique is utilized. 20 CFR 416.920a(a). First, an individual's pertinent symptoms, signs, and laboratory findings are evaluated to determine whether a medically determinable mental impairment exists. 20 CFR 416.920a(b)(1). When a medically determinable mental impairment is established, the symptoms, signs and laboratory findings that substantiate the impairment are documented to include the individual's significant history, laboratory findings, and functional limitations. 20 CFR 416.920a(e)(2). Functional limitation(s) is assessed based upon the extent to which the impairment(s) interferes with an individual's ability to function independently, appropriately, effectively, and on a sustained basis. *Id.*; 20 CFR 416.920a(c)(2). Chronic mental disorders, structured settings, medication, and other treatment and the effect on the overall degree of functionality is considered. 20 CFR 416.920a(c)(1). In addition, four broad functional areas (activities of daily living; social functioning; concentration, persistence or pace; and episodes of decompensation) are considered when determining an individual's degree of functional limitation. 20 CFR 416.920a(c)(3). The degree of limitation for the first three functional areas is rated by a five point scale: none, mild, moderate, marked, and extreme. 20 CFR 416.920a(c)(4). A four point scale (none, one or two, three, four or more) is used to rate the degree of limitation in the fourth functional area. *Id.* The last point on each scale represents a degree of limitation that is incompatible with the ability to do any gainful activity. *Id.*

After the degree of functional limitation is determined, the severity of the mental impairment is determined. 20 CFR 416.920a(d). If severe, a determination of whether the impairment meets or is the equivalent of a listed mental disorder is made. 20 CFR 416.920a(d)(2). If the severe mental impairment does not meet (or equal) a listed impairment, an individual's residual functional capacity is assessed. 20 CFR 416.920a(d)(3).

As outlined above, the first step looks at the individual's current work activity. In the record presented, the Claimant is not involved in substantial gainful activity, therefore is not ineligible for disability benefits under Step 1.

The severity of the Claimant's alleged impairment(s) is considered under Step 2. The Claimant bears the burden to present sufficient objective medical evidence to substantiate the alleged disabling impairments. In order to be considered disabled for MA purposes, the impairment must be severe. 20 CFR 416.920(a)(4)(ii); 20 CFR 416.920(b). An impairment, or combination of impairments, is severe if it significantly limits an individual's physical or mental ability to do basic work activities regardless of age, education and work experience. 20 CFR 416.920(a)(4)(ii); 20 CFR 416.920(c).

Basic work activities means the abilities and aptitudes necessary to do most jobs. 20 CFR 416.921(b). Examples include:

1. Physical functions such as walking, standing, sitting, lifting, pushing, pulling, reaching, carrying, or handling;
2. Capacities for seeing, hearing, and speaking;
3. Understanding, carrying out, and remembering simple instructions;
4. Use of judgment;
5. Responding appropriately to supervision, co-workers and usual work situations; and
6. Dealing with changes in a routine work setting.

Id.

The second step allows for dismissal of a disability claim obviously lacking in medical merit. *Higgs v Bowen*, 880 F2d 860, 862 (CA 6, 1988). The severity requirement may still be employed as an administrative convenience to screen out claims that are totally groundless solely from a medical standpoint. *Id.* at 863 citing *Farris v Sec of Health and Human Services*, 773 F2d 85, 90 n.1 (CA 6, 1985). An impairment qualifies as non-severe only if, regardless of a claimant's age, education, or work experience, the impairment would not affect the claimant's ability to work. *Salmi v Sec of Health and Human Services*, 774 F2d 685, 692 (CA 6, 1985).

In the present case, the Claimant alleges disability due to back, hip, leg and feet pain, fibromyalgia, degenerative disc disease, incontinence, depression, and anxiety.

On [REDACTED], the Claimant presented to the emergency room with complaints of low back pain. A CT of the lumbar spine revealed mild disc bulge at L4-5 slightly effacing the thecal sac; diffuse posterior disc bulge at L5-S1 along with compromise of the right neural foramina by a bulging disc and endplate spur. The Claimant was discharged the following day.

On [REDACTED] the Claimant presented to the emergency room with complaints of low back pain. The Claimant was treated and discharged with the diagnosis of back pain.

On [REDACTED], the Claimant sought treatment for back pain. A review of previous MRIs revealed disc bulging, canal stenosis, the nerve impingement. The physical examination documented tenderness over the lumbar paraspinal muscles with reduced range of motion due to pain. The diagnoses were lumbago and rash.

On [REDACTED] the Claimant attended a follow-up appointment. A pulmonary function test was performed. A pulmonary function study revealed a Forced Expiratory Volume at 1 second ("FEV₁") of 1.92, 2.40, 2.33 before bronchodilator and a Forced Vital Capacity ("FVC") of 2.66, 2.57, and 2.50. After medication the FEV₁ was 2.86 and the FVC was 3.53. The Claimant's lung age was 62. The diagnoses were lumbago and tobacco use disorder.

On [REDACTED], the Claimant presented to the emergency room with complaints of back pain. The physical examination revealed tender lumbar paraspinal musculature to palpation with positive straight leg raising bilaterally at approximately 15 degrees. The Claimant was treated and discharged with the diagnosis of acute lumbar radiculopathy.

On [REDACTED] the Claimant presented to the emergency room with complaints of back pain. The physical examination documented reduced range of motion, tenderness, and spasms in the thoracic and lumbar spine. The Claimant was prescribed IV pain medication as well as oral medication and was referred to a spine surgeon. The discharge diagnosis was exacerbation of chronic low back pain.

On [REDACTED] the Claimant attended a consultative evaluation. The physical examination was unremarkable and the diagnosis was low back pain.

On [REDACTED] the Claimant attended a follow-up appointment with complaints of depression, sleeping difficulty, increased appetite, decreased energy, concentration, and interest in previously enjoyable activities, and increased pain. The diagnoses were tobacco use disorder, lumbago, and episodic mood disorder. The Claimant was encouraged to see a surgeon.

As previously noted, the Claimant bears the burden to present sufficient objective medical evidence to substantiate the alleged disabling impairment(s). As summarized above, the Claimant has presented evidence establishing that she does have some physical and mental limitations on her ability to perform basic work activities. The medical evidence has established that the Claimant has an impairment, or combination thereof, that has more than a *de minimus* effect on the Claimant's basic work activities. Further, the impairments have lasted continuously for twelve months; therefore, the Claimant is not disqualified from receipt of MA-P benefits under Step 2.

In the third step of the sequential analysis of a disability claim, the trier of fact must determine if the Claimant's impairment, or combination of impairments, is listed in Appendix 1 of Subpart P of 20 CFR, Part 404. The evidence reveals diagnoses/treatment for disc bulge at L4-5 effacing the thecal sac, diffuse posterior disc bulge at L5-S1 with nerve root impingement and endplate spur, degenerative disc disease, positive straight leg raise at 15 degrees, reduced range of motion, and acute lumbar radiculopathy.

Listing 1.00 defines musculoskeletal system impairments. Disorders of the musculoskeletal system may result from hereditary, congenital, or acquired pathologic processes. 1.00A. Impairments may result from infectious, inflammatory, or degenerative processes, traumatic or developmental events, or neoplastic, vascular, or toxic/metabolic diseases. 1.00A. Regardless of the cause(s) of a musculoskeletal impairment, functional loss for purposes of these listings is defined as the inability to ambulate effectively on a sustained basis for any reason, including pain associated with the underlying musculoskeletal impairment, or the inability to perform fine and gross movements effectively on a sustained basis for any reason, including pain associated with the underlying musculoskeletal impairment. 1.00B2a. The inability to perform fine and gross movements effectively means an extreme loss of function of both upper extremities. 1.00B2c. In other words, an impairment(s) that interferes very seriously with the individual's ability to independently initiate, sustain, or complete activities. 1.00B2c To use the upper extremities effectively, an individual must be capable of sustaining such functions as reaching, pushing, pulling, grasping, and fingering to be able to carry out activities of daily living. 1.00B2c. Examples include the inability to prepare a simple meal, feed oneself, take care of personal hygiene, sort/handle papers/files, or place items in a cabinet at or about the waist level. 1.00B2c. Pain or other symptoms are also considered. 1.00B2d.

Categories of Musculoskeletal include:

* * *

- 1.04 Disorders of the spine (e.g., herniated nucleus pulposus, spinal arachnoiditis, spinal stenosis, osteoarthritis, degenerative disc disease, facet arthritis, vertebral fracture), resulting in compromise of a nerve root (including the cauda equine) or spinal cord. With:
- A. Evidence of nerve root compression characterized by neuro-anatomic distribution of pain, limitation of motion of the spine, motor loss (atrophy with associated muscle weakness or muscle weakness) accompanied by sensory or reflex loss and, if there is involvement of the lower back, positive straight-leg raising test (sitting and supine); or

- B. Spinal arachnoiditis, confirmed by an operative note or pathology report of tissue biopsy, or by appropriate medically acceptable imaging, manifested by severe burning or painful dyesthesia, resulting in the need for changes in position or posture more than once every 2 hours; or
- C. Lumbar spinal stenosis resulting in pseudoclaudication, established by findings on appropriate medically acceptable imaging, manifested by chronic nonradicular pain and weakness, and resulting in inability to ambulate effectively, as defined in 1.00B2b. (see above definition)

In this case, the medical evidence reveals diagnoses/treatment for disc bulge at L4-5 effacing the thecal sac, diffuse posterior disc bulge at L5-S1 with nerve root impingement and endplate spur, degenerative disc disease, positive straight leg raise at 15 degrees, reduced range of motion, and acute lumbar radiculopathy. In light of the foregoing, the Claimant's impairments meet, or are the medical equivalent thereof, a listed impairment within 1.00, specifically, 1.04A. Accordingly, the Claimant is found not disabled at Step 3 with no further analysis required.

The State Disability Assistance program, which provides financial assistance for disabled persons, was established by 2004 PA 344. The Department administers the SDA program pursuant to MCL 400.10 *et seq.* and Mich Admin Code, Rules 400.3151 – 400.3180. Department policies are found in BAM, BEM, and RFT. A person is considered disabled for SDA purposes if the person has a physical or mental impairment which meets federal SSI disability standards for at least ninety days. Receipt of SSI benefits based on disability or blindness, or the receipt of MA benefits based on disability or blindness automatically qualifies an individual as disabled for purposes of the SDA program.

In this case, the Claimant is found disabled for purposes of the MA-P program; therefore, she is found disabled for purposes of SDA benefit program.

DECISION AND ORDER

The Administrative Law Judge, based on the above findings of fact and conclusions of law finds the Claimant disabled for purposes of the MA-P and SDA benefit programs.

Accordingly, It is ORDERED:

1. The Department's determination is REVERSED.
2. The Department shall initiate processing of the October 31, 2011 application, retroactive to July 2011, to determine if all other non-medical criteria are met and inform the Claimant of the determination in accordance with Department policy.
3. The Department shall supplement for lost benefits (if any) that the Claimant was entitled to receive if otherwise eligible and qualified in accordance with Department policy.
4. The Department shall review the Claimant's continued eligibility in October 2013 in accordance with Department policy.

Colleen M. Mamelka
Administrative Law Judge
For Maura Corrigan, Director
Department of Human Services

Date Signed: September 11, 2012

Date Mailed: September 11, 2012

NOTICE: Michigan Administrative Hearing System (MAHS) may order a rehearing or reconsideration on either its own motion or at the request of a party within 30 days of the mailing date of this Decision and Order. MAHS will not order a rehearing or reconsideration on the Department's motion where the final decision cannot be implemented within 90 days of the filing of the original request. (60 days for FAP cases)

The Claimant may appeal the Decision and Order to Circuit Court within 30 days of the receipt of the Decision and Order or, if a timely request for rehearing was made, within 30 days of the receipt date of the rehearing decision.

Claimant may request a rehearing or reconsideration for the following reasons:

2012-36286/CMM

- A rehearing **MAY** be granted if there is newly discovered evidence that could affect the outcome of the original hearing decision.
- A reconsideration **MAY** be granted for any of the following reasons:
 - misapplication of manual policy or law in the hearing decision,
 - typographical errors, mathematical error, or other obvious errors in the hearing decision that effect the substantial rights of the claimant:
 - the failure of the ALJ to address other relevant issues in the hearing decision.

Request must be submitted through the local DHS office or directly to MAHS by mail at
