

STATE OF MICHIGAN  
MICHIGAN ADMINISTRATIVE HEARING SYSTEM  
ADMINISTRATIVE HEARINGS FOR THE  
DEPARTMENT OF HUMAN SERVICES

**IN THE MATTER OF:**

[REDACTED]

Reg. No: 2012-53736  
Issue No: 2009

[REDACTED]

**ADMINISTRATIVE LAW JUDGE:** Landis Y. Lain

**HEARING DECISION**

This matter is before the undersigned Administrative Law Judge pursuant to MCL 400.9 and MCL 400.37 upon claimant's request for a hearing. After due notice, an in-person hearing was held on [REDACTED]. Claimant personally appeared and testified. Claimant was represented at the hearing by [REDACTED].

**ISSUE**

Did the Department of Human Services (the department) properly deny claimant's application for Medical Assistance (MA-P)?

**FINDINGS OF FACT**

The Administrative Law Judge, based upon the competent, material and substantial evidence on the whole record, finds as material fact:

1. On [REDACTED], claimant filed an application for Medical Assistance and retroactive Medical Assistance benefits alleging disability.
2. On [REDACTED], the Medical Review Team denied claimant's application stating that claimant's impairments lacked duration.
3. On [REDACTED] the department caseworker sent claimant notice that his application was denied.
4. On [REDACTED] filed a request for a hearing to contest the department's negative action.
5. On [REDACTED] the State Hearing Review Team again denied claimant's application stating in its analysis and recommendation: Based on the information in the file the claimant's recovery period will not last 12 months. At the time of the follow up visit, it was noted that he was not

having any headaches. (11.00 listing reviewed). The claimant is not currently engaging in substantial gainful activity based on the information that is available in the file. The claimant's impairments do not meet/equal the intent or severity of a Social Security listing. The medical evidence of record indicates that the claimant's condition is improving or is expected to improve within 12 months from the date of onset or from the date of surgery.

Therefore, MA-P is denied due to lack of duration under 20 CFR 416.909. Retroactive MA-P was considered in this case and is also denied.

6. Claimant is a [REDACTED] whose birth date is [REDACTED]. Claimant is 6'0" tall and weighs 195 pounds. Claimant attended college for two years and studied Marketing Sales. Claimant is able to read and write and does have basic math skills.
7. Claimant last worked [REDACTED] as a freight assistant – loading and unloading stock and moving merchandise. Claimant has also worked doing landscaping, managing an outlet and as a locksmith.
8. Claimant alleges as disabling impairments: Carpal tunnel syndrome, hypertension, chronic headaches, subarachnoid hemorrhage, right distal radius and left proximal ulna dislocation of the elbow with ORIF.

### **CONCLUSIONS OF LAW**

The regulations governing the hearing and appeal process for applicants and recipients of public assistance in Michigan are found in the Michigan Administrative Code, MAC R 400.901-400.951. An opportunity for a hearing shall be granted to an applicant who requests a hearing because his or her claim for assistance has been denied. MAC R 400.903(1). Clients have the right to contest a department decision affecting eligibility or benefit levels whenever it is believed that the decision is incorrect. The department will provide an administrative hearing to review the decision and determine the appropriateness of that decision. BAM 600.

The Medical Assistance (MA) program is established by Title XIX of the Social Security Act and is implemented by Title 42 of the Code of Federal Regulations (CFR). The Department of Human Services (DHS or department) administers the MA program pursuant to MCL 400.10, *et seq.*, and MCL 400.105. Department policies are found in the Bridges Administrative Manual (BAM), the Bridges Eligibility Manual (BEM) and the Program Reference Manual (PRM).

Pursuant to Federal Rule 42 CFR 435.540, the Department of Human Services uses the federal Supplemental Security Income (SSI) policy in determining eligibility for disability under the Medical Assistance program. Under SSI, disability is defined as:

...the inability to do any substantial gainful activity by reason of any medically determinable physical or mental impairment which can be expected to result in death or which has lasted or can be expected to last for a continuous period of not less than 12 months.... 20 CFR 416.905

A set order is used to determine disability. Current work activity, severity of impairments, residual functional capacity, past work, age, or education and work experience is reviewed. If there is a finding that an individual is disabled or not disabled at any point in the review, there will be no further evaluation. 20 CFR 416.920.

If an individual is working and the work is substantial gainful activity, the individual is not disabled regardless of the medical condition, education and work experience. 20 CFR 416.920(c).

If the impairment or combination of impairments do not significantly limit physical or mental ability to do basic work activities, it is not a severe impairment(s) and disability does not exist. Age, education and work experience will not be considered. 20 CFR 416.920.

Statements about pain or other symptoms do not alone establish disability. There must be medical signs and laboratory findings which demonstrate a medical impairment.... 20 CFR 416.929(a).

...Medical reports should include –

1. Medical history.
2. Clinical findings (such as the results of physical or mental status examinations);
3. Laboratory findings (such as blood pressure, X-rays);
4. Diagnosis (statement of disease or injury based on its signs and symptoms).... 20 CFR 416.913(b).

In determining disability under the law, the ability to work is measured. An individual's functional capacity for doing basic work activities is evaluated. If an individual has the ability to perform basic work activities without significant limitations, he or she is not considered disabled. 20 CFR 416.994(b)(1)(iv).

Basic work activities are the abilities and aptitudes necessary to do most jobs. Examples of these include --

1. Physical functions such as walking, standing, sitting, lifting, pushing, pulling, reaching, carrying, or handling;
2. Capacities for seeing, hearing, and speaking;
3. Understanding, carrying out, and remembering simple instructions;
4. Use of judgment;
5. Responding appropriately to supervision, co-workers and usual work situations; and
6. Dealing with changes in a routine work setting. 20 CFR 416.921(b).

Medical findings must allow a determination of (1) the nature and limiting effects of your impairment(s) for any period in question; (2) the probable duration of the impairment; and (3) the residual functional capacity to do work-related physical and mental activities. 20 CFR 416.913(d).

Medical evidence may contain medical opinions. Medical opinions are statements from physicians and psychologists or other acceptable medical sources that reflect judgments about the nature and severity of the impairment(s), including your symptoms, diagnosis and prognosis, what an individual can do despite impairment(s), and the physical or mental restrictions. 20 CFR 416.927(a)(2).

All of the evidence relevant to the claim, including medical opinions, is reviewed and findings are made. 20 CFR 416.927(c).

The Administrative Law Judge is responsible for making the determination or decision about whether the statutory definition of disability is met. The Administrative Law Judge reviews all medical findings and other evidence that support a medical source's statement of disability.... 20 CFR 416.927(e).

A statement by a medical source finding that an individual is "disabled" or "unable to work" does not mean that disability exists for the purposes of the program. 20 CFR 416.927(e).

When determining disability, the federal regulations require that several considerations be analyzed in sequential order. If disability can be ruled out at any step, analysis of the next step is not required. These steps are:

1. Does the client perform Substantial Gainful Activity (SGA)? If yes, the client is ineligible for MA. If no, the analysis continues to Step 2. 20 CFR 416.920(b).
2. Does the client have a severe impairment that has lasted or is expected to last 12 months or more or result in death? If no, the client is ineligible for MA. If yes, the analysis continues to Step 3. 20 CFR 416.920(c).
3. Does the impairment appear on a special listing of impairments or are the client's symptoms, signs, and laboratory findings at least equivalent in severity to the set of medical findings specified for the listed impairment? If no, the analysis continues to Step 4. If yes, MA is approved. 20 CFR 416.290(d).
4. Can the client do the former work that he/she performed within the last 15 years? If yes, the client is ineligible for MA. If no, the analysis continues to Step 5. 20 CFR 416.920(e).
5. Does the client have the Residual Functional Capacity (RFC) to perform other work according to the guidelines set forth at 20 CFR 404, Subpart P, Appendix 2, Sections 200.00-204.00? If yes, the analysis ends and the client is ineligible for MA. If no, MA is approved. 20 CFR 416.920(f).

At Step 1, claimant is not engaged in substantial gainful activity and is not disqualified from receiving disability at Step 1.

The subjective and objective medical evidence on the record indicates claimant testified that he lives with his mother and is single/divorced with no children under the age of 18 that live with him. Claimant stated that he has no income and receives no benefits from the DHS. He reported that he has a driver's license and can drive an automobile approximately several times a week usually to the library and to visit his father. He stated the farthest he has to drive is about 20 miles one way. Claimant testified that his mother cooks for him and grocery shops, but he does do laundry and sweep the floor. He stated that he reads a lot, watches television two hours per day and uses the computer while at the library for approximately one hour at a time. Claimant testified that he can stand for 1 to 2 hours at a time and can sit 1 to 2 hours at a time. He stated he can walk  $\frac{1}{4}$  mile. Claimant testified that he can sometimes squat and bend at the waist. He can shower and dress himself, but not tie his shoes or touch his toes. Claimant stated that he has degenerative disk disease (DDD) in his back, but his knees are fine. He stated that his level of pain on a scale of 1 to 10 without medication is a 6

and with medication his pain goes away. Claimant testified that he is left handed and he has problems with his hands. He stated that he believes that one of his bones in his right hand is broken. Claimant testified that his feet and legs are fine. He reported the heaviest weight he can carry is one gallon of milk. Claimant indicated that he smokes approximately 4 to 5 cigarettes per day and his doctor has told him to quit. He stated that he has cut down and he is not in a smoking cessation program. Claimant testified that he reads a lot on a typical day.

██████████ hospital admission for subarachnoid hemorrhage (SAH) indicates that claimant was treated and released in one week (Pgs. 15-16). There is a ██████████ follow up neurology office visit. The doctor's impression is benign/non-aneurysmal SAH. The angiogram and repeat CTA were negative for evidence of aneurysm. The overall exam was unremarkable (Pgs. 1-3).

A ██████████ indicates that claimant's blood pressure was 133/70. His pulse was 67 and respiration 18. His memory was intact; had intact attention on bedside test; intact constructional abilities on bedside test; his fund of knowledge was intact; oriented to date location and person; his language had normal fluency comprehension repetition and naming and his speech was fluent. Pupils were PERRL; visual fields full to confrontation; optic disks appeared normal; extraocular movements were intact; normal pain and temperature sensation in all three divisions of the trigeminal nerves, bilaterally; normal facial muscle strength bilaterally; auditory acuity intact to bedside testing; normal palate elevation; normal strength of trapezius and SCM muscles, bilaterally; and his tongue protrudes in the midline, no atrophy or fasciculations. His muscle bulk had no atrophy or fasciculations; muscle tone physiologic tone in upper and lower extremities; pronator drift was absent; and his strength was graded 5/5 proximally and distally in all four limbs. He had no tremors or other involuntary movement was observed. His sensory was intact to touch, pain, joint position and vibration in all four limbs. Deep tendon reflexes were graded 2/4 symmetrically in all four limbs. Rapid alternating movements were performed with normal speed, amplitude and rhythm; finger to nose and heel-knee-shin movements performed accurately and without dysmetria. Arises independently; normal posture; gait stable with normal stride length, rate, base and arm swing; heel, toe and tandem gait performed without difficulty. Romberg intact. He was well developed, well nourished, in no acute distress and healthy appearing. His head was normocephalic and atraumatic. Eyes were PERRLA/EOM intact; fundi benign, conjunctiva and sclera clear. Ears TM's intact and clear with normal canals and hearing. Mouth had no deformity or lesions with good dentition. The neck had no masses, thyromegaly or abnormal cervical nodes. His lungs were clear bilaterally to A&P. Heart rate had regular rate and rhythm, S1, S2 without murmurs, rubs, gallops or clicks. His bowel sounds positive; abdomen soft and non-tender without masses, organomegaly or hernias noted. Musculoskeletal no deformity or scoliosis noted with normal posture and gait. Pulses were normal in all four extremities. There was no clubbing, cyanosis, edema or deformity noted with normal full range of motion of all joints. The skin was intact without lesions or rashes. Psychiatrically he was alert and cooperative, normal mood and affect, normal attention span and concentration (Pgs. 2-3).

At Step 2, claimant has the burden of proof of establishing that she has a severely restrictive physical or mental impairment that has lasted or is expected to last for the duration of at least 12 months. There is insufficient objective clinical medical evidence in the record that claimant suffers a severely restrictive physical or mental impairment. Claimant has reports of pain in multiple areas of his body; however, there are no corresponding clinical findings that support the reports of symptoms and limitations made by the claimant. There are no laboratory or x-ray findings listed in the file which support claimant's contention of disability. The clinical impression is that claimant is stable. There is no medical finding that claimant has any muscle atrophy or trauma, abnormality or injury that is consistent with a deteriorating condition. In short, claimant has restricted himself from tasks associated with occupational functioning based upon his reports of pain (symptoms) rather than medical findings. Reported symptoms are an insufficient basis upon which a finding that claimant has met the evidentiary burden of proof can be made. This Administrative Law Judge finds that the medical record is insufficient to establish that claimant has a severely restrictive physical impairment.

Claimant alleges no disabling mental impairments.

For mental disorders, severity is assessed in terms of the functional limitations imposed by the impairment. Functional limitations are assessed using the criteria in paragraph (B) of the listings for mental disorders (descriptions of restrictions of activities of daily living, social functioning; concentration, persistence, or pace; and ability to tolerate increased mental demands associated with competitive work).... 20 CFR, Part 404, Subpart P, App. 1, 12.00(C).

There is insufficient objective medical/psychiatric evidence in the record indicating claimant suffers severe mental limitations. There is no mental residual functional capacity assessment in the record. There is insufficient evidence contained in the file of depression or a cognitive dysfunction that is so severe that it would prevent claimant from working at any job. Claimant was oriented to time, person and place during the hearing. Claimant was able to answer all of the questions at the hearing and was responsive to the questions. The evidentiary record is insufficient to find that claimant suffers a severely restrictive mental impairment. For these reasons, this Administrative Law Judge finds that claimant has failed to meet his burden of proof at Step 2. Claimant must be denied benefits at this step based upon his failure to meet the evidentiary burden.

If claimant had not been denied at Step 2, the analysis would proceed to Step 3 where the medical evidence of claimant's condition does not give rise to a finding that he would meet a statutory listing in the code of federal regulations.

If claimant had not already been denied at Step 2, this Administrative Law Judge would have to deny him again at Step 4 based upon his ability to perform his past relevant work. There is no evidence upon which this Administrative Law Judge could base a finding that claimant is unable to perform work in which he has engaged in, in the past.

Therefore, if claimant had not already been denied at Step 2, he would be denied again at Step 4.

The Administrative Law Judge will continue to proceed through the sequential evaluation process to determine whether or not claimant has the residual functional capacity to perform some other less strenuous tasks than in his prior jobs.

At Step 5, the burden of proof shifts to the department to establish that claimant does not have residual functional capacity.

The residual functional capacity is what an individual can do despite limitations. All impairments will be considered in addition to ability to meet certain demands of jobs in the national economy. Physical demands, mental demands, sensory requirements and other functions will be evaluated.... 20 CFR 416.945(a).

To determine the physical demands (exertional requirements) of work in the national economy, we classify jobs as sedentary, light, medium and heavy. These terms have the same meaning as they have in the *Dictionary of Occupational Titles*, published by the Department of Labor... 20 CFR 416.967.

Sedentary work. Sedentary work involves lifting no more than 10 pounds at a time and occasionally lifting or carrying articles like docket files, ledgers, and small tools. Although a sedentary job is defined as one which involves sitting, a certain amount of walking and standing is often necessary in carrying out job duties. Jobs are sedentary if walking and standing are required occasionally and other sedentary criteria are met. 20 CFR 416.967(a).

Light work. Light work involves lifting no more than 20 pounds at a time with frequent lifting or carrying of objects weighing up to 10 pounds. Even though the weight lifted may be very little, a job is in this category when it requires a good deal of walking or standing, or when it involves sitting most of the time with some pushing and pulling of arm or leg controls.... 20 CFR 416.967(b).

Claimant has submitted insufficient objective medical evidence that he lacks the residual functional capacity to perform some other less strenuous tasks than in his prior employment or that he is physically unable to do light or sedentary tasks if demanded of him. Claimant's activities of daily living do not appear to be very limited and he should be able to perform light or sedentary work even with his impairments. Claimant has failed to provide the necessary objective medical evidence to establish that he has a severe impairment or combination of impairments which prevent him from performing any level of work for a period of 12 months. The claimant's testimony as to his limitations indicates that he should be able to perform light or sedentary work.

There is insufficient objective medical/psychiatric evidence contained in the file of depression or a cognitive dysfunction that is so severe that it would prevent claimant from working at any job. Claimant was able to answer all the questions at the hearing

and was responsive to the questions. Claimant was oriented to time, person and place during the hearing. Claimant's complaints of pain, while profound and credible, are out of proportion to the objective medical evidence contained in the file as it relates to claimant's ability to perform work. Therefore, this Administrative Law Judge finds that the objective medical evidence on the record does not establish that claimant has no residual functional capacity. Claimant is disqualified from receiving disability at Step 5 based upon the fact that he has not established by objective medical evidence that he cannot perform light or sedentary work even with his impairments.

It should be noted that claimant continues to smoke despite the fact that his doctor has told him to quit. Claimant is not in compliance with his treatment program.

If an individual fails to follow prescribed treatment which would be expected to restore their ability to engage in substantial activity without good cause there will not be a finding of disability.... 20 CFR 416.994(b)(4)(iv).

The Department has established by the necessary competent, material and substantial evidence on the record that it was acting in compliance with department policy when it determined that claimant was not eligible to receive Medical Assistance.

**DECISION AND ORDER**

The Administrative Law Judge, based upon the above findings of fact and conclusions of law, decides that the department has appropriately established on the record that it was acting in compliance with department policy when it denied claimant's application for Medical Assistance and retroactive Medical Assistance benefits. The claimant should be able to perform a wide range of light or sedentary work even with his impairments. The department has established its case by a preponderance of the evidence.

Accordingly, the department's decision is **AFFIRMED**.

**NOTICE:** Administrative Hearings may order a rehearing or reconsideration on either its own motion or at the request of a party within 30 days of the mailing date of this Decision and Order. Administrative Hearings will not order a rehearing or reconsideration on the Department's motion where the final decision cannot be implemented within 90 days of the filing of the original request.

The Claimant may appeal the Decision and Order to Circuit Court within 30 days of the mailing of the Decision and Order or, if a timely request for rehearing was made, within 30 days of the receipt date of the rehearing decision.
