

STATE OF MICHIGAN
MICHIGAN ADMINISTRATIVE HEARING SYSTEM
ADMINISTRATIVE HEARINGS FOR THE
DEPARTMENT OF HUMAN SERVICES

IN THE MATTER OF:

[REDACTED]

Reg. No.: 2012-64974
Issue No.: 2009; 4031
Case No.: [REDACTED]
Hearing Date: November 14, 2012
County: Genesee-02

ADMINISTRATIVE LAW JUDGE: Vicki L. Armstrong

HEARING DECISION

This matter is before the undersigned Administrative Law Judge upon Claimant's request for a hearing made pursuant to Michigan Compiled Laws 400.9 and 400.37, which govern the administrative hearing and appeal process. After due notice, a telephone hearing was commenced on November 14, 2012, from Genesee County, Michigan. Claimant, represented by [REDACTED] of [REDACTED] personally appeared by telephone and testified. Participants on behalf of the Department of Human Services (Department) included Assistant Payments Supervisor [REDACTED] [REDACTED]

ISSUE

Whether the Department of Human Services (the department) properly denied Claimant's application for Medical Assistance (MA-P), Retro-MA and State Disability Assistance (SDA)?

FINDINGS OF FACT

The Administrative Law Judge, based upon the competent, material and substantial evidence on the whole record, finds as material fact:

- (1) On March 21, 2012, Claimant filed an application for MA/Retro-MA and SDA benefits alleging disability.
- (2) On April 12, 2012, the Medical Review Team (MRT) denied Claimant's application for MA-P and Retro-MA indicating Claimant was capable of performing other work based on his non-exertional impairment. SDA was denied due to lack of duration. (Depart Ex. A, pp 1-2).
- (3) On April 17, 2012, the department caseworker sent Claimant notice that his application was denied.
- (4) On July 9, 2012, Claimant's representative filed a request for a hearing to contest the department's negative action.

- (5) On September 4, 2012, the State Hearing Review Team (SHRT) found Claimant was not disabled and retained the capacity to perform light exertional tasks of a simple and repetitive nature. (Depart Ex. B, pp 1-2).
- (6) Claimant has a history of hypertension, Barrett's esophagus, hiatal hernia, neuropathy, ulcer, GERD, seizures, anxiety, bipolar disorder, depression and alcoholism.
- (7) Claimant is a 50 year old man whose birthday is [REDACTED]. Claimant is 6'0" tall and weighs 143 lbs. Claimant completed high school and some college.
- (8) Claimant had applied for Social Security disability benefits at the time of the hearing.

CONCLUSIONS OF LAW

The Medical Assistance (MA) program is established by the Title XIX of the Social Security Act and is implemented by Title 42 of the Code of Federal Regulations (CFR). The Department of Human Services (formerly known as the Family Independence Agency) administers the MA program pursuant to MCL 400.10, *et seq.*, and MCL 400.105. Department policies are found in the Bridges Administrative Manual (BAM), the Bridges Eligibility Manual (BEM) and the Reference Tables Manual (RFT).

The State Disability Assistance (SDA) program which provides financial assistance for disabled persons is established by 2004 PA 344. The Department of Human Services (DHS or department) administers the SDA program pursuant to MCL 400.10, *et seq.*, and Mich Admin Code, Rules 400.3151-400.3180. Department policies are found in the Bridges Administrative Manual (BAM), the Bridges Eligibility Manual (BEM) and the Reference Tables Manual (RFT).

Pursuant to Federal Rule 42 CFR 435.540, the Department of Human Services uses the federal Supplemental Security Income (SSI) policy in determining eligibility for disability under the Medical Assistance program. Under SSI, Disability is defined as:

. . . the inability to do any substantial gainful activity by reason of any medically determinable physical or mental impairment which can be expected to result in death or which has lasted or can be expected to last for a continuous period of not less than 12 months. 20 CFR 416.905

The SDA program differs from the federal MA regulations in that the durational requirement is 90 days. This means that the person's impairments must meet the SSI disability standards for 90 days in order for that person to be eligible for SDA benefits.

Disability is defined as the inability to do any substantial gainful activity by reason of any medically determinable physical or mental impairment which can be expected to result in death or which has lasted or can be expected to last for a continuous period of not

less than 12 months. 20 CFR 416.905(a). The person claiming a physical or mental disability has the burden to establish it through the use of competent medical evidence from qualified medical sources such as his or her medical history, clinical/laboratory findings, diagnosis/prescribed treatment, prognosis for recovery and/or medical assessment of ability to do work-related activities or ability to reason and make appropriate mental adjustments, if a mental disability is alleged. 20 CFR 413.913. An individual's subjective pain complaints are not, in and of themselves, sufficient to establish disability. 20 CFR 416.908; 20 CFR 416.929(a). Similarly, conclusory statements by a physician or mental health professional that an individual is disabled or blind, absent supporting medical evidence, is insufficient to establish disability. 20 CFR 416.927.

When determining disability, the federal regulations require several factors to be considered including: (1) the location/duration/frequency/intensity of an applicant's pain; (2) the type/dosage/effectiveness/side effects of any medication the applicant takes to relieve pain; (3) any treatment other than pain medication that the applicant has received to relieve pain; and, (4) the effect of the applicant's pain on his or her ability to do basic work activities. 20 CFR 416.929(c)(3). The applicant's pain must be assessed to determine the extent of his or her functional limitation(s) in light of the objective medical evidence presented. 20 CFR 416.929(c)(2).

In order to determine whether or not an individual is disabled, federal regulations require a five-step sequential evaluation process be utilized. 20 CFR 416.920(a)(1). The five-step analysis requires the trier of fact to consider an individual's current work activity; the severity of the impairment(s) both in duration and whether it meets or equals a listed impairment in Appendix 1; residual functional capacity to determine whether an individual can perform past relevant work; and residual functional capacity along with vocational factors (e.g., age, education, and work experience) to determine if an individual can adjust to other work. 20 CFR 416.920(a)(4); 20 CFR 416.945.

If an individual is found disabled, or not disabled, at any step, a determination or decision is made with no need to evaluate subsequent steps. 20 CFR 416.920(a)(4). If a determination cannot be made that an individual is disabled, or not disabled, at a particular step, the next step is required. 20 CFR 416.920(a)(4). If an impairment does not meet or equal a listed impairment, an individual's residual functional capacity is assessed before moving from Step 3 to Step 4. 20 CFR 416.920(a)(4); 20 CFR 416.945. Residual functional capacity is the most an individual can do despite the limitations based on all relevant evidence. 20 CFR 945(a)(1). An individual's residual functional capacity assessment is evaluated at both Steps 4 and 5. 20 CFR 416.920(a)(4). In determining disability, an individual's functional capacity to perform basic work activities is evaluated and if found that the individual has the ability to perform basic work activities without significant limitation, disability will not be found. 20 CFR 416.994(b)(1)(iv). In general, the individual has the responsibility to prove disability. 20 CFR 416.912(a). An impairment or combination of impairments is not severe if it does not significantly limit an individual's physical or mental ability to do basic work activities. 20 CFR 416.921(a). The individual has the responsibility to provide evidence of prior work experience; efforts to work; and any other factor showing how the impairment affects the ability to work. 20 CFR 416.912(c)(3)(5)(6).

The Administrative Law Judge is responsible for making the determination or decision about whether the statutory definition of disability is met. The Administrative Law Judge reviews all medical findings and other evidence that support a medical source's statement of disability. 20 CFR 416.927(e).

In determining how a severe mental impairment affects the client's ability to work, four areas considered to be essential to work are looked at, (1) Activities of Daily Living, (2) Social Functioning, (3) Concentration, Persistence or Pace, and (4) Episodes of Decompensation.

Activities of daily living including adaptive activities such as cleaning, shopping, cooking, taking public transportation, paying bills, maintaining a residence, caring appropriately for one's grooming and hygiene, using telephones and directories, using a post office, etc. 20 CFR, Part 404, Subpart P, App. 1, 12.00(C)(1).

Social functioning refers to an individual's capacity to interact independently, appropriately, effectively, and on a sustained basis with other individuals. 20 CFR, Part 404, Subpart P, App. 1, 12.00(C)(2). Social functioning includes the ability to get along with others, such as family members, friends, neighbors, grocery clerks, landlords, or bus drivers. You may demonstrate impaired social functioning by, for example, a history of altercations, evictions, firings, fear of strangers, avoidance of interpersonal relationships, or social isolation. You may exhibit strength in social functioning by such things as your ability to initiate social contacts with others, communicate clearly with others, or interact and actively participate in group activities. We also need to consider cooperative behaviors, consideration for others, awareness of others' feelings, and social maturity. Social functioning in work situations may involve interactions with the public, responding appropriately to persons in authority (e.g., supervisors), or cooperative behaviors involving coworkers. 20 CFR, Part 404, Subpart P, App. 1, 12.00(C)(2). We do not define "marked" by a specific number of different behaviors in which social functioning is impaired, but by the nature and overall degree of interference with function. For example, if you are highly antagonistic, uncooperative or hostile but are tolerated by local storekeepers, we may nevertheless find that you have a marked limitation in social functioning because that behavior is not acceptable in other social contexts. 20 CFR, Part 404, Subpart P, App. 1, 12.00(C)(2).

Concentration, persistence or pace refers to the ability to sustain focused attention and concentration sufficiently long to permit the timely and appropriate completion of tasks commonly found in work settings. 20 CFR, Part 404, Subpart P, App. 1, 12.00(C)(3). Limitations in concentration, persistence, or pace are best observed in work settings, but may also be reflected by limitations in other settings. In addition, major limitations in this area can often be assessed through clinical examination or psychological testing. Wherever possible, however, a mental status examination or psychological test data should be supplemented by other available evidence. 20 CFR, Part 404, Subpart P, App. 1, 12.00(C)(3).

Episodes of decompensation are exacerbations or temporary increases in symptoms or signs accompanied by a loss of adaptive functioning, as manifested by difficulties in performing activities of daily living, maintaining social relationships, or maintaining

concentration, persistence, or pace. 20 CFR 404, Subpart P, App. 1, 12.00(C)(4). Episodes of decompensation may be demonstrated by an exacerbation in symptoms or signs that would ordinarily require increased treatment or a less stressful situation (or a combination of the two). Episodes of decompensation may be inferred from medical records showing significant alteration in medication; or documentation of the need for a more structured psychological support system (e.g., hospitalizations, placement in a halfway house, or a highly structured and directing household); or other relevant information in the record about the existence, severity, and duration of the episode. 20 CFR 404, Subpart P, App. 1, 12.00(C)(4).

The evaluation of disability on the basis of a mental disorder requires sufficient evidence to: (1) establish the presence of a medically determinable mental impairment(s); (2) assess the degree of functional limitation the impairment(s) imposes; and (3) project the probable duration of the impairment(s). Medical evidence must be sufficiently complete and detailed as to symptoms, signs, and laboratory findings to permit an independent determination. In addition, we will consider information from other sources when we determine how the established impairment(s) affects your ability to function. We will consider all relevant evidence in your case record. 20 CFR 404, Subpart P, App. 1, 12.00(D).

When we rate the degree of limitation in the first three functional areas (activities of daily living; social functioning; and concentration, persistence, or pace), we will use the following five-point scale: none, slight, moderate, marked, and extreme. When we rate the degree of limitation in the fourth functional area (episodes of decompensation), we will use the following four-point scale: none, one or two, three, four or more. The last is incompatible with the ability to do any gainful activity. 20 CFR 416.920a(c).

After we rate the degree of functional limitation resulting from the impairment(s), we will determine the severity of your mental impairment(s). 20 CFR 416.920a(d). If we rate the degree of your limitation in the first three functional areas as "none" or "mild" and "none" in the fourth area, we will generally conclude that your impairment(s) is not severe, unless the evidence otherwise indicates that there is more than a minimal limitation in your ability to do any basic work activities. 20 CFR 416.920a(d)(1).

If your mental impairment(s) is severe, we will then determine if it meets or is equivalent in severity to a listed mental disorder. We do this by comparing the diagnostic medical findings about your impairment(s) and the rating of the degree of functional limitation to the criteria of the appropriate listed mental disorder. 20 CFR 416.920a(d)(2). If we find that you have a severe mental impairment(s) that neither meets nor is equivalent in severity to any listing, we will then assess your residual functional capacity. 20 CFR 416.920a(d)(3).

When the record contains evidence of DAA, a determination must be made whether or not the person would continue to be disabled if the individual stopped using drugs or alcohol. The trier of fact must determine what, if any, of the physical or mental limitations would remain if the person were to stop the use of the drugs or alcohol and whether any of these remaining limitations would be disabling. If the remaining limitations would not be disabling, the substance abuse disorder is a contributing factor

to the determination of disability. (20 CFR 404.1535 and 416.935). If so, the claimant is not disabled.

As outlined above, the first step looks at the individual's current work activity. In the record presented, Claimant is not involved in substantial gainful activity and testified that he has not worked since October, 2009. Therefore, he is not disqualified from receiving disability benefits under Step 1.

The severity of the individual's alleged impairment(s) is considered under Step 2. The individual bears the burden to present sufficient objective medical evidence to substantiate the alleged disabling impairments. In order to be considered disabled for MA purposes, the impairment must be severe. 20 CFR 916.920(a)(4)(ii); 20 CFR 916.920(b). An impairment, or combination of impairments, is severe if it significantly limits an individual's physical or mental ability to do basic work activities regardless of age, education and work experience. 20 CFR 916.920(a)(4)(ii); 20 CFR 916.920(c). Basic work activities means the abilities and aptitudes necessary to do most jobs. 20 CFR 916.921(b). Examples include:

1. Physical functions such as walking, standing, sitting, lifting, pushing, pulling, reaching, carrying, or handling;
2. Capacities for seeing, hearing, and speaking;
3. Understanding, carrying out, and remembering simple instructions;
4. Use of judgment;
5. Responding appropriately to supervision, co-workers and usual work situations; and
6. Dealing with changes in a routine work setting. *Id.*

The second step allows for dismissal of a disability claim obviously lacking in medical merit. *Higgs v Bowen*, 880 F2d 860, 862 (CA 6, 1988). The severity requirement may still be employed as an administrative convenience to screen out claims that are totally groundless solely from a medical standpoint. *Id.* at 863 citing *Farris v Sec of Health and Human Services*, 773 F2d 85, 90 n.1 (CA 6, 1985). An impairment qualifies as non-severe only if, regardless of a claimant's age, education, or work experience, the impairment would not affect the claimant's ability to work. *Salmi v Sec of Health and Human Services*, 774 F2d 685, 692 (CA 6, 1985).

In the present case, Claimant alleges disability due to hypertension, Barrett's esophagus, hiatal hernia, neuropathy, ulcer, GERD, seizures, anxiety, bipolar disorder, depression and alcoholism.

On January 12, 2012, Claimant underwent a psychological evaluation by the [REDACTED] [REDACTED]. Claimant listed his impairments as anxiety, depression, cancer of the esophagus, hiatal hernia, enlarged heart, high blood pressure, ulcers, arthritis in his foot and multiple fractures in his foot. He said he occasionally has headaches and used to have seizures. Claimant's speech was unimpaired. His stream of mental activity was spontaneous and organized. His affect was appropriate to mood. His emotional state during the exam appeared to be anxious. The examining psychologist opined that Claimant's mental abilities to understand, attend to, remember and carry out instructions were not impaired. His ability to respond appropriately to co-workers and supervision and to adapt to change and stress in the workplace was moderately impaired. Diagnosis: Axis I: Anxiety disorder; Dysthymic disorder; History of alcohol abuse; Axis V: GAF=55. Prognosis is guarded.

On February 19, 2012, Claimant was admitted to the hospital with a diagnosis of chest pain. He also had upper respiratory tract type symptoms. He admitted to using alcohol daily with his last drink the day before admission when he had 3 drinks of vodka. He has a history of cocaine and marijuana abuse in the past, which he quit 5 years ago. He was an ex-smoker. He quit smoking 4 years ago. He was not in acute distress and had mild nasal congestion. His CBC was normal and his BMP was within normal limits. The EKG showed no acute ST-T changes with normal sinus rhythm and normal rate and axis. During the stress cardiogram, he started complaining of chest pain and shortness of breath; however, the EKG did not show any changes, so the stress echocardiogram was reported as nonconclusive. He had left heart catheterization on 2/22/12 which showed clean coronary arteries. His chest pain was attributed likely secondary to Prinzmetal angina secondary to coronary vasospasm. After catheterization, he remained hemodynamically stable and chest pain free. He was counseled on cessation of alcohol and discharged on 2/22/12.

On February 20, 2012, Claimant underwent a Medical Examination on behalf of the department. Claimant was diagnosed with chest pain on exertion associated with shortness of breath, hypertension, Barrett's esophagus, depression, and a history of alcohol abuse. The examining physician opined that Claimant's condition was stable and he was able to meet his needs at home.

On July 10, 2012, Claimant's therapist at [REDACTED] [REDACTED] completed a Mental Residual Functional Capacity Assessment on Claimant indicating Claimant is markedly limited in his ability to understand and remember one or two-step instructions; understand and remember detailed instructions; carry out detailed instructions; maintain attention and concentration for extended periods; perform activities within a schedule, maintain regular attendance, and to be punctual within customary tolerances; sustain an ordinary routine without supervision; work in coordination with or proximity to others without being distracted by them; make simple work-related decisions, complete a normal workday and worksheet without interruptions from psychologically based symptoms and to perform at a consistent pace without an unreasonable number and length of rest periods; interact appropriately with the general public, accept instructions and respond appropriately to criticism from supervisors; get along with co-workers or peers without distracting them or exhibiting behavioral extremes; maintain socially appropriate behavior and to adhere to basic standards of neatness and cleanliness;

respond appropriately to change in the work setting; travel in unfamiliar places or use public transportation and to set realistic goals or make plans independently of others. Claimant was diagnosed with recurrent severe major depressive disorder with psychotic features and alcohol abuse.

On July 27, 2012, Claimant went to the emergency room complaining of suicidal ideation. He denied any psychosis and stated that he is not suicidal at present. He stated he consumed six to eight 12 ounce beers in the past 48 hours. His alcohol level was .283. A request was sent to ██████████ ██████████ ██████████ for detox with an authorization for the ██████████ program received. On 7/28/12, a social worker coordinated follow-up with ██████████ and Claimant remained clinically stable while pending transportation to ██████████

On August 12, 2012, Claimant was found by pedestrians passed out in the grass and EMS was waved down. Claimant was aroused and transported to the emergency room. Claimant was homeless and stated he had two beers at lunch. Claimant was unsure on how he got to the emergency room. He stated that he was walking and felt his body keeling to the side and passed out. He thinks he had a seizure. On this episode, he was incontinent. He also reported frequent falls and depression. He was oriented to person, place and time and clearly intoxicated. He smelled of urine and alcohol. He was diagnosed with alcohol intoxication. The examining physician opined that it was unlikely that Claimant actually syncope. His ET OH was .364. It was noted that Claimant does fall often and is at risk for seizures. He was discharged on 8/13/12 when he was able to contract for safety.

On August 28, 2012, Claimant reported to the emergency room with a panic attack. He was out of his Xanax, stating that his case worker would not give him any because he keeps losing them. He had wondering thoughts and stated he was homeless. Claimant told the examining physician that he took 3-4 tablets of Xanax, 3 tablets of Zoloft and other prescription medications which he did not remember. He admitted to drinking six 12 ounce beers. He stated he did so because he felt depressed and wanted to kill himself. He stated he was homeless. The physician noted that Claimant's history was unreliable. He was monitored in the emergency department until sober, and once sober, he denied any suicidal ideation. He was discharged to the Sober House.

On November 9, 2012, Claimant presented to the emergency room suicidal stating that he wants to kill himself. He was diagnosed with alcohol intoxication. He appeared to be in no distress. He was oriented to person, place, and time. His affect was blunt. His speech slurred. He exhibited a depressed mood and suicidal ideation. His alcohol level was .369. His lab work was unremarkable. He was transferred to Sober House for further treatment and care.

As previously noted, Claimant bears the burden to present sufficient objective medical evidence to substantiate the alleged disabling impairment(s). As summarized above, Claimant has presented some limited medical evidence establishing that she does have some mental limitations on her ability to perform basic work activities. The medical evidence has established that Claimant has an impairment, or combination thereof, that has more than a *de minimis* effect on Claimant's basic work activities. Further, the

impairments have lasted continuously for twelve months; therefore, Claimant is not disqualified from receipt of MA-P benefits under Step 2.

In the third step of the sequential analysis of a disability claim, the trier of fact must determine if the individual's impairment, or combination of impairments, is listed in Appendix 1 of Subpart P of 20 CFR, Part 404. Claimant has alleged mental disabling impairments due to hypertension, Barrett's esophagus, hiatal hernia, neuropathy, ulcer, GERD, seizures, anxiety, bipolar disorder, depression and alcoholism.

Listing 4.00 (cardiovascular system), Listing 5.00 (digestive system), and Listing 12.04 (mental disorder-affective disorders) were considered in light of the objective evidence. Based on the foregoing, it is found that Claimant's impairments do not meet the intent and severity requirement of a listed impairment; therefore, Claimant cannot be found disabled at Step 3. Accordingly, Claimant's eligibility is considered under Step 4. 20 CFR 416.905(a).

The fourth step in analyzing a disability claim requires an assessment of the individual's residual functional capacity ("RFC") and past relevant employment. 20 CFR 416.920(a)(4)(iv). An individual is not disabled if he/she can perform past relevant work. *Id.*; 20 CFR 416.960(b)(3). Past relevant work is work that has been performed within the past 15 years that was a substantial gainful activity and that lasted long enough for the individual to learn the position. 20 CFR 416.960(b)(1). Vocational factors of age, education, and work experience, and whether the past relevant employment exists in significant numbers in the national economy are not considered. 20 CFR 416.960(b)(3). RFC is assessed based on impairment(s) and any related symptoms, such as pain, which may cause physical and mental limitations that affect what can be done in a work setting. RFC is the most that can be done, despite the limitations.

To determine the physical demands (exertional requirements) of work in the national economy, jobs are classified as sedentary, light, medium, heavy, and very heavy. 20 CFR 416.967. Sedentary work involves lifting of no more than 10 pounds at a time and occasionally lifting or carrying articles like docket files, ledgers, and small tools. 20 CFR 416.967(a). Although a sedentary job is defined as one which involves sitting, a certain amount of walking and standing is often necessary in carrying out job duties. *Id.* Jobs are sedentary if walking and standing are required occasionally and other sedentary criteria are met. Light work involves lifting no more than 20 pounds at a time with frequent lifting or carrying objects weighing up to 10 pounds. 20 CFR 416.967(b). Even though weight lifted may be very little, a job is in this category when it requires a good deal of walking or standing, or when it involves sitting most of the time with some pushing and pulling of arm or leg controls. *Id.* To be considered capable of performing a full or wide range of light work, an individual must have the ability to do substantially all of these activities. *Id.* An individual capable of light work is also capable of sedentary work, unless there are additional limiting factors such as loss of fine dexterity or inability to sit for long periods of time. *Id.* Medium work involves lifting no more than 50 pounds at a time with frequent lifting or carrying of objects weighing up to 25 pounds. 20 CFR 416.967(c). An individual capable of performing medium work is also capable of light and sedentary work. *Id.* Heavy work involves lifting no more than 100 pounds at a time with frequent lifting or carrying of objects weighing up to 50 pounds. 20 CFR

416.967(d). An individual capable of heavy work is also capable of medium, light, and sedentary work. *Id.* Finally, very heavy work involves lifting objects weighing more than 100 pounds at a time with frequent lifting or carrying objects weighing 50 pounds or more. 20 CFR 416.967(e). An individual capable of very heavy work is able to perform work under all categories. *Id.*

Limitations or restrictions which affect the ability to meet the demands of jobs other than strength demands (exertional requirements, e.g., sitting, standing, walking, lifting, carrying, pushing, or pulling) are considered nonexertional. 20 CFR 416.969a(a). In considering whether an individual can perform past relevant work, a comparison of the individual's residual functional capacity to the demands of past relevant work must be made. *Id.* If an individual can no longer do past relevant work, the same residual functional capacity assessment along with an individual's age, education, and work experience is considered to determine whether an individual can adjust to other work which exists in the national economy. *Id.* Examples of non-exertional limitations or restrictions include difficulty functioning due to nervousness, anxiousness, or depression; difficulty maintaining attention or concentration; difficulty understanding or remembering detailed instructions; difficulty in seeing or hearing; difficulty tolerating some physical feature(s) of certain work settings (e.g., can't tolerate dust or fumes); or difficulty performing the manipulative or postural functions of some work such as reaching, handling, stooping, climbing, crawling, or crouching. 20 CFR 416.969a(c)(1)(i) – (vi). If the impairment(s) and related symptoms, such as pain, only affect the ability to perform the non-exertional aspects of work-related activities, the rules in Appendix 2 do not direct factual conclusions of disabled or not disabled. 20 CFR 416.969a(c)(2). The determination of whether disability exists is based upon the principles in the appropriate sections of the regulations, giving consideration to the rules for specific case situations in Appendix 2. *Id.*

Claimant's prior work history consists of work as a land surveyor and house painter. In light of Claimant's testimony, and in consideration of the Occupational Code, Claimant's prior work is classified as unskilled, medium work.

Claimant testified that he is able to walk short distances. The objective medical evidence notes no limitations. If the impairment or combination of impairments does not limit an individual's physical or mental ability to do basic work activities, it is not a severe impairment(s) and disability does not exist. 20 CFR 416.920. In consideration of the Claimant's testimony, medical records, and current limitations, Claimant cannot be found able to return to past relevant work. Accordingly, Step 5 of the sequential analysis is required.

In Step 5, an assessment of the individual's residual functional capacity and age, education, and work experience is considered to determine whether an adjustment to other work can be made. 20 CFR 416.920(4)(v). At the time of hearing, Claimant was 24 years old and was, thus, considered to be a younger individual for MA-P purposes. Claimant completed the ninth grade. Disability is found if an individual is unable to adjust to other work. *Id.* At this point in the analysis, the burden shifts from the Claimant to the Department to present proof that the Claimant has the residual capacity to substantial gainful employment. 20 CFR 416.960(2); *Richardson v Sec of Health and*

Human Services, 735 F2d 962, 964 (CA 6, 1984). While a vocational expert is not required, a finding supported by substantial evidence that the individual has the vocational qualifications to perform specific jobs is needed to meet the burden. *O'Banner v Sec of Health and Human Services*, 587 F2d 321, 323 (CA 6, 1978). Medical-Vocational guidelines found at 20 CFR Subpart P, Appendix II, may be used to satisfy the burden of proving that the individual can perform specific jobs in the national economy. *Heckler v Campbell*, 461 US 458, 467 (1983); *Kirk v Secretary*, 667 F2d 524, 529 (CA 6, 1981) *cert den* 461 US 957 (1983).

In this case, the evidence reveals that Claimant suffers from hypertension, Barrett's esophagus, hiatal hernia, neuropathy, ulcer, GERD, seizures, anxiety, bipolar disorder, depression and alcoholism. The objective medical evidence notes no limitations.

This Administrative Law Judge finds Claimant has failed to submit objective evidence of a severe impairment. However, had Claimant been found disabled, the Federal Regulations at 20 CFR 404.1535 speak to the determination of whether Drug Addiction and Alcoholism (DAA) is material to a person's disability and when benefits will or will not be approved. The regulations require the disability analysis be completed prior to a determination of whether a person's drug and alcohol use is material. It is only when a person meets the disability criterion, as set forth in the regulations, that the issue of materiality becomes relevant. In such cases, the regulations require a sixth step to determine the materiality of DAA to a person's disability.

Claimant's testimony and the information indicate that Claimant has a history of tobacco, drug, and alcohol abuse. Applicable hearing is the Drug Abuse and Alcoholism (DA&A) Legislation, Public Law 104-121, Section 105(b)(1), 110 STAT. 853, 42 USC 423(d)(2)(C), 1382(c)(a)(3)(J) Supplement Five 1999. The law indicates that individuals are not eligible and/or are not disabled where drug addiction or alcoholism is a contributing factor material to the determination of disability. After a careful review of the credible and substantial evidence on the whole record, this Administrative Law Judge finds that Claimant does not meet the statutory disability definition under the authority of the DA&A Legislation because his substance abuse is material to his alleged impairment and alleged disability.

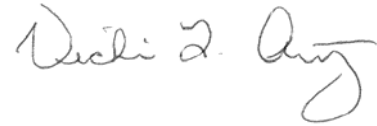

The federal law does not permit a finding of disability for persons whose primary impairment is substance abuse. P.L. 104-121. In addition, a client must follow prescribed medical treatment in order to be eligible for disability benefits. If prescribed medical treatment is not followed, the client cannot meet the disability standard. 20 CFR 416.930. Claimant has failed to follow prescribed medical treatment of abstaining from alcohol.

DECISION AND ORDER

The Administrative Law Judge, based on the above findings of fact and conclusions of law, finds Claimant not disabled for purposes of the MA -P/Retro-MA and SDA benefit programs.

Accordingly, it is ORDERED:

The Department's determination is **AFFIRMED**.

Vicki L. Armstrong
Administrative Law Judge
for Maura D. Corrigan, Director
Department of Human Services

Date Signed: April 2, 2013

Date Mailed: April 2, 2013

NOTICE: Administrative Hearings may order a rehearing or reconsideration on either its own motion or at the request of a party within 30 days of the mailing date of this Decision and Order. Administrative Hearings will not order a rehearing or reconsideration on the Department's motion where the final decision cannot be implemented within 90 days of the filing of the original request.

The Claimant may appeal the Decision and Order to Circuit Court within 30 days of the mailing of the Decision and Order or, if a timely request for rehearing was made, within 30 days of the receipt date of the rehearing decision.

Claimant may request a rehearing or reconsideration for the following reasons:

- A rehearing **MAY** be granted if there is newly discovered evidence that could affect the outcome of the original hearing decision.
- A reconsideration **MAY** be granted for any of the following reasons:
 - misapplication of manual policy or law in the hearing decision,
 - typographical errors, mathematical error, or other obvious errors in the hearing decision that effect the substantial rights of the claimant:
 - the failure of the ALJ to address other relevant issues in the hearing decision.

Request must be submitted through the local DHS office or directly to MAHS by mail at
