

STATE OF MICHIGAN  
MICHIGAN ADMINISTRATIVE HEARING SYSTEM  
ADMINISTRATIVE HEARINGS FOR THE  
DEPARTMENT OF HUMAN SERVICES

**IN THE MATTER OF:**

[REDACTED]

Reg No.: 2012-73177  
Issue No.: 2009, 4031  
Case No.: [REDACTED]  
Hearing Date: December 19, 2012  
Wayne County DHS (18)

**ADMINISTRATIVE LAW JUDGE:** Colleen M. Mamelka

**HEARING DECISION**

This matter is before the undersigned Administrative Law Judge pursuant to MCL 400.9 and MCL 400.37 upon the Claimant's request for a hearing. After due notice, a telephone hearing was conducted from Detroit, Michigan on Wednesday, December 19, 2012. The Claimant appeared, along with [REDACTED], and testified. Participating on behalf of the Department of Human Services ("Department") was [REDACTED].

**ISSUE**

Whether the Department properly determined that the Claimant was not disabled for purposes of the Medical Assistance ("MA-P") and State Disability Assistance ("SDA") benefit programs?

**FINDINGS OF FACT**

The Administrative Law Judge, based on the competent, material, and substantial evidence on the whole record, finds as material fact:

1. The Claimant submitted an application for public assistance seeking MA-P and SDA benefits on May 23, 2012.
2. On August 13, 2012, the Medical Review Team ("MRT") found the Claimant not disabled. (Exhibit 1, pp. 2, 3)
3. On August 17, 2012, the Department notified the Claimant of the MRT determination.
4. On August 27, 2012, the Department received the Claimant's written request for hearing. (Exhibit 1, pp. 268, 269)

5. On October 11, 2012, the State Hearing Review Team (“SHRT”) found the Claimant not disabled. (Exhibit 3)
6. The Claimant alleged physical disabling impairments due to shoulder pain, chronic epididymitis, and insomnia.
7. The Claimant alleged mental disabling impairments due obsessive/compulsive disorder (“OCD”), bipolar disorder, schizophrenia, and paranoia.
8. At the time of hearing, the Claimant was 31 years old with an [REDACTED] birth date; was 5’9¾” in height; and weighed 215 pounds.
9. The Claimant is a high school graduate with some college and an employment history as a general laborer.

### **CONCLUSIONS OF LAW**

The Medical Assistance program is established by Subchapter XIX of Chapter 7 of The Public Health & Welfare Act, 42 USC 1397, and is administered by the Department of Human Services, formerly known as the Family Independence Agency, pursuant to MCL 400.10 *et seq.* and MCL 400.105. Department policies are found in the Bridges Administrative Manual (“BAM”), the Bridges Eligibility Manual (“BEM”), and the Bridges Reference Tables (“RFT”).

Disability is defined as the inability to do any substantial gainful activity by reason of any medically determinable physical or mental impairment which can be expected to result in death or which has lasted or can be expected to last for a continuous period of not less than 12 months. 20 CFR 416.905(a). The person claiming a physical or mental disability has the burden to establish it through the use of competent medical evidence from qualified medical sources such as his or her medical history, clinical/laboratory findings, diagnosis/prescribed treatment, prognosis for recovery and/or medical assessment of ability to do work-related activities or ability to reason and make appropriate mental adjustments, if a mental disability is alleged. 20 CFR 416.913. An individual’s subjective pain complaints are not, in and of themselves, sufficient to establish disability. 20 CFR 416.908; 20 CFR 416.929(a). Similarly, conclusory statements by a physician or mental health professional that an individual is disabled or blind, absent supporting medical evidence, is insufficient to establish disability. 20 CFR 416.927.

When determining disability, the federal regulations require several factors to be considered including: (1) the location/duration/frequency/intensity of an applicant’s pain; (2) the type/dosage/effectiveness/side effects of any medication the applicant takes to relieve pain; (3) any treatment other than pain medication that the applicant has

received to relieve pain; and (4) the effect of the applicant's pain on his or her ability to do basic work activities. 20 CFR 416.929(c)(3). The applicant's pain must be assessed to determine the extent of his or her functional limitation(s) in light of the objective medical evidence presented. 20 CFR 416.929(c)(2).

In order to determine whether or not an individual is disabled, federal regulations require a five-step sequential evaluation process be utilized. 20 CFR 416.920(a)(1). The five-step analysis requires the trier of fact to consider an individual's current work activity; the severity of the impairment(s) both in duration and whether it meets or equals a listed impairment in Appendix 1; residual functional capacity to determine whether an individual can perform past relevant work; and residual functional capacity along with vocational factors (i.e. age, education, and work experience) to determine if an individual can adjust to other work. 20 CFR 416.920(a)(4); 20 CFR 416.945.

If an individual is found disabled, or not disabled, at any step, a determination or decision is made with no need evaluate subsequent steps. 20 CFR 416.920(a)(4). If a determination cannot be made that an individual is disabled, or not disabled, at a particular step, the next step is required. 20 CFR 416.920(a)(4). If an impairment does not meet or equal a listed impairment, an individual's residual functional capacity is assessed before moving from step three to step four. 20 CFR 416.920(a)(4); 20 CFR 416.945. Residual functional capacity is the most an individual can do despite the limitations based on all relevant evidence. 20 CFR 416.945(a)(1). An individual's residual functional capacity assessment is evaluated at both steps four and five. 20 CFR 416.920(a)(4). In determining disability, an individual's functional capacity to perform basic work activities is evaluated and if found that the individual has the ability to perform basic work activities without significant limitation, disability will not be found. 20 CFR 416.994(b)(1)(iv). In general, the individual has the responsibility to prove disability. 20 CFR 416.912(a). An impairment or combination of impairments is not severe if it does not significantly limit an individual's physical or mental ability to do basic work activities. 20 CFR 416.921(a). The individual has the responsibility to provide evidence of prior work experience; efforts to work; and any other factor showing how the impairment affects the ability to work. 20 CFR 416.912(c)(3)(5)(6).

In addition to the above, when evaluating mental impairments, a special technique is utilized. 20 CFR 416.920a(a). First, an individual's pertinent symptoms, signs, and laboratory findings are evaluated to determine whether a medically determinable mental impairment exists. 20 CFR 416.920a(b)(1). When a medically determinable mental impairment is established, the symptoms, signs and laboratory findings that substantiate the impairment are documented to include the individual's significant history, laboratory findings, and functional limitations. 20 CFR 416.920a(e)(2). Functional limitation(s) is assessed based upon the extent to which the impairment(s) interferes with an individual's ability to function independently, appropriately, effectively, and on a sustained basis. *Id.*; 20 CFR 416.920a(c)(2). Chronic mental disorders, structured

settings, medication, and other treatment and the effect on the overall degree of functionality is considered. 20 CFR 416.920a(c)(1). In addition, four broad functional areas (activities of daily living; social functioning; concentration, persistence or pace; and episodes of decompensation) are considered when determining an individual's degree of functional limitation. 20 CFR 416.920a(c)(3). The degree of limitation for the first three functional areas is rated by a five point scale: none, mild, moderate, marked, and extreme. 20 CFR 416.920a(c)(4). A four point scale (none, one or two, three, four or more) is used to rate the degree of limitation in the fourth functional area. *Id.* The last point on each scale represents a degree of limitation that is incompatible with the ability to do any gainful activity. *Id.*

After the degree of functional limitation is determined, the severity of the mental impairment is determined. 20 CFR 416.920a(d). If severe, a determination of whether the impairment meets or is the equivalent of a listed mental disorder is made. 20 CFR 416.920a(d)(2). If the severe mental impairment does not meet (or equal) a listed impairment, an individual's residual functional capacity is assessed. 20 CFR 416.920a(d)(3).

As outlined above, the first step looks at the individual's current work activity. In the record presented, the Claimant is not involved in substantial gainful activity therefore is not ineligible for disability benefits under Step 1.

The severity of the Claimant's alleged impairment(s) is considered under Step 2. The Claimant bears the burden to present sufficient objective medical evidence to substantiate the alleged disabling impairments. In order to be considered disabled for MA purposes, the impairment must be severe. 20 CFR 416.920(a)(4)(ii); 20 CFR 416.920(b). An impairment, or combination of impairments, is severe if it significantly limits an individual's physical or mental ability to do basic work activities regardless of age, education and work experience. 20 CFR 416.920(a)(4)(ii); 20 CFR 416.920(c). Basic work activities means the abilities and aptitudes necessary to do most jobs. 20 CFR 416.921(b). Examples include:

1. Physical functions such as walking, standing, sitting, lifting, pushing, pulling, reaching, carrying, or handling;
2. Capacities for seeing, hearing, and speaking;
3. Understanding, carrying out, and remembering simple instructions;
4. Use of judgment;

5. Responding appropriately to supervision, co-workers and usual work situations; and
6. Dealing with changes in a routine work setting.

*Id.*

The second step allows for dismissal of a disability claim obviously lacking in medical merit. *Higgs v Bowen*, 880 F2d 860, 862 (CA 6, 1988). The severity requirement may still be employed as an administrative convenience to screen out claims that are totally groundless solely from a medical standpoint. *Id.* at 863 citing *Farris v Sec of Health and Human Services*, 773 F2d 85, 90 n.1 (CA 6, 1985). An impairment qualifies as non-severe only if, regardless of a claimant's age, education, or work experience, the impairment would not affect the claimant's ability to work. *Salmi v Sec of Health and Human Services*, 774 F2d 685, 692 (CA 6, 1985).

In the present case, the Claimant alleges disability due to shoulder pain, chronic epididymitis, insomnia, OCD, bipolar disorder, schizophrenia, and paranoia.

On March 23, 2011, a mental assessment found the Claimant did not have any immediate ongoing case management needs. The Claimant was to continue in the Medication Review Program with a scheduled return date in 90 days.

On June 10, 2011, the Claimant's mood was stable noting some paranoia.

On September 21, 2011, the Claimant's mood was stable without hallucinations. The Claimant was to continue his medications.

On October 26, 2011, the Claimant's medications were reduced noting stable mood.

On November 21, 2011, the Claimant sought treatment for a back wound/abrasion.

On January 4, 2012, the Claimant's medications were renewed.

On January 15, 2012, the Claimant was treated for shoulder pain. X-rays were normal.

On February 5, 2012, the Claimant was treated for testicular pain. A Doppler confirmed normal flow within both testicles. A sonograph was normal.

On February 11, 2012, the Claimant presented to the hospital with complaints of urinary tract infection. The Claimant was treated and discharged with the diagnosis of epididymitis, unspecified (improving).

2012-73177/CMM

On February 12, 2012, the Claimant presented to the hospital with complaints of right testicular pain. The Claimant was treated and discharged with the diagnosis of acute testicular pain.

On February 13, 2012, the Claimant attended a follow-up appointment with complaints of right testicular pain. The Claimant was diagnosed with epididymitis and hydrocele.

On February 17, 2012, the Claimant's right testicular pain was evaluated. The diagnosis was lower urinary tract infection and right testicular pain (improving with medication).

On March 9, 2012, the Claimant sought treatment for continued scrotal pain. The physical examination revealed tenderness over the right epididymis. The diagnosis was right epididymitis/scrotal pain.

On March 23, 2012, the Claimant presented to the hospital with complaints of left testicular pain and difficulty urinating. The Claimant was treated and discharged with the diagnoses of left testicular pain.

On March 30, 2012, a scrotal sonogram was normal without evidence of hydrocele.

On April 11, 2012, the Claimant presented to the hospital with complaints of testicular pain. An ultrasound of the scrotum was normal. The Claimant was treated and discharged with the diagnosis of epididymitis.

On April 13, 2012, the Claimant attended a follow-up appointment with the urology clinic. The Claimant history of schizophrenia and depression was noted. The diagnoses were bilateral on and off testicular pain (negative ultrasound) and lower urinary tract symptoms.

On May 10, 2012, the Claimant presented to the hospital with complaints of right testicular pain. An ultrasound of the scrotum was normal. A Doppler found tiny left epididymal cyst and stable tiny bilateral hydroceles. Normal Doppler flow was noted within both testicles. The Claimant was treated and discharged with the diagnoses of acute right testicular pain (resolved) and small bilateral hydroceles.

A Medical Examination Report was completed on behalf of the Claimant. The current diagnosis was testicular pain. The physical examination was normal noting a history of schizophrenia. The Claimant was in stable condition and able to meet his needs in the home.

On June 8, 2012, the Claimant attended a follow-up appointment with complaints of urinary urgency/frequency. The physical examination was normal.

In June 2012, the Claimant's urologist wrote a statement confirming treatment of recurrent pain in testes since February 2012.

On September 7, 2012, the Claimant attended a consultative mental status examination. The Claimant was found able to comprehend and carry out simple directions, and perform repetitive simple tasks. Mild difficulty in comprehending complex tasks was noted, although the Claimant was found able to carry out complex tasks with some physical limitations. Moderate difficulties were found in the Claimant's ability to create and maintain good working relationships. The diagnosis was mild depressed mood.

As previously noted, the Claimant bears the burden to present sufficient objective medical evidence to substantiate the alleged disabling impairment(s). As summarized above, the Claimant has presented some medical evidence establishing that he does have some physical and mental limitations on his ability to perform basic work activities. The degree of functional limitation on the Claimant's activities, social function, concentration, persistence, or pace is mild. The degree of functional limitation in the fourth area (episodes of decompensation) is a 1. The medical evidence has established that the Claimant has an impairment, or combination thereof, that has more than a *de minimis* effect on the Claimant's basic work activities. Further, the impairments have lasted continuously for twelve months; therefore, the Claimant is not disqualified from receipt of MA-P benefits under Step 2.

In the third step of the sequential analysis of a disability claim, the trier of fact must determine if the Claimant's impairment, or combination of impairments, is listed in Appendix 1 of Subpart P of 20 CFR, Part 404. The evidence confirms treatment/diagnoses of mild depression, back wound/abrasion, shoulder pain, testicular pain, urinary urgency/frequency and infection, epididymitis, and hydroceles. A history of schizophrenia was documented.

In this case, the Claimant's scrotum pain, and associated diagnoses, does meet the intent and severity requirement of any listing. Mentally, there was no evidence of any marked limitations. As such, the Claimant's mental impairment(s) do not meet the intent and severity requirement within 12.00. Accordingly, the Claimant can not be found disabled, or not disabled at Step 3; therefore, the Claimant's eligibility is considered under Step 4. 20 CFR 416.905(a).

Before considering the fourth step in the sequential analysis, a determination of the individual's residual functional capacity ("RFC") is made. 20 CFR 416.945. An individual's RFC is the most he/she can still do on a sustained basis despite the limitations from the impairment(s). *Id.* The total limiting effects of all the impairments, to include those that are not severe, are considered. 20 CFR 416.945(e).

To determine the physical demands (exertional requirements) of work in the national economy, jobs are classified as sedentary, light, medium, heavy, and very heavy. 20 CFR 416.967. Sedentary work involves lifting of no more than 10 pounds at a time and occasionally lifting or carrying articles like docket files, ledgers, and small tools. 20 CFR 416.967(a). Although a sedentary job is defined as one which involves sitting, a certain amount of walking and standing is often necessary in carrying out job duties. *Id.* Jobs are sedentary if walking and standing are required occasionally and other sedentary criteria are met. Light work involves lifting no more than 20 pounds at a time with frequent lifting or carrying objects weighing up to 10 pounds. 20 CFR 416.967(b). Even though weight lifted may be very little, a job is in this category when it requires a good deal of walking or standing, or when it involves sitting most of the time with some pushing and pulling of arm or leg controls. *Id.* To be considered capable of performing a full or wide range of light work, an individual must have the ability to do substantially all of these activities. *Id.* An individual capable of light work is also capable of sedentary work, unless there are additionally limiting factors such as loss of fine dexterity or inability to sit for long periods of time. *Id.* Medium work involves lifting no more than 50 pounds at a time with frequent lifting or carrying of objects weighing up to 25 pounds. 20 CFR 416.967(c). An individual capable of performing medium work is also capable of light and sedentary work. *Id.* Heavy work involves lifting no more than 100 pounds at a time with frequent lifting or carrying of objects weighing up to 50 pounds. 20 CFR 416.967(d). An individual capable of heavy work is also capable of medium, light, and sedentary work. *Id.* Finally, very heavy work involves lifting objects weighing more than 100 pounds at a time with frequent lifting or carrying objects weighing 50 pounds or more. 20 CFR 416.967(e). An individual capable of very heavy work is able to perform work under all categories. *Id.*

Limitations or restrictions which affect the ability to meet the demands of jobs other than strength demands (exertional requirements, i.e. sitting, standing, walking, lifting, carrying, pushing, or pulling) are considered nonexertional. 20 CFR 416.969a(a). In considering whether an individual can perform past relevant work, a comparison of the individual's residual functional capacity with the demands of past relevant work. *Id.* If an individual can no longer do past relevant work the same residual functional capacity assessment along with an individual's age, education, and work experience is considered to determine whether an individual can adjust to other work which exists in the national economy. *Id.* Examples of non-exertional limitations or restrictions include difficulty to function due to nervousness, anxiousness, or depression; difficulty maintaining attention or concentration; difficulty understanding or remembering detailed instructions; difficulty in seeing or hearing; difficulty tolerating some physical feature(s) of certain work settings (i.e. can't tolerate dust or fumes); or difficulty performing the manipulative or postural functions of some work such as reaching, handling, stooping, climbing, crawling, or crouching. 20 CFR 416.969a(c)(1)(i) – (vi). If the impairment(s) and related symptoms, such as pain, only affect the ability to perform the non-exertional aspects of work-related activities, the rules in Appendix 2 do not direct factual

conclusions of disabled or not disabled. 20 CFR 416.969a(c)(2). The determination of whether disability exists is based upon the principles in the appropriate sections of the regulations, giving consideration to the rules for specific case situations in Appendix 2. *Id.*

In this case, the evidence confirms treatment/diagnoses of mild depression, back wound/abrasion, shoulder pain, testicular pain, urinary urgency/frequency and infection, epididymitis, and hydroceles. A history of schizophrenia was documented. The Claimant testified that he is able to walk without issue; grip/grasp without issue; sit for 2 hours; lift/carry approximately 20 pounds; possibly stand for 2 hours; and is able to bend and squat. The objective medical evidence does not contain any physical limitations or marked mental limitations. After review of the entire record and considering the Claimant's testimony, it is found, at this point, that the Claimant maintains the residual functional capacity to perform at least unskilled, light work as defined by 20 CFR 416.967(b).

The fourth step in analyzing a disability claim requires an assessment of the Claimant's residual functional capacity ("RFC") and past relevant employment. 20 CFR 416.920(a)(4)(iv). An individual is not disabled if he/she can perform past relevant work. *Id.*; 20 CFR 416.960(b)(3). Past relevant work is work that has been performed within the past 15 years that was a substantial gainful activity and that lasted long enough for the individual to learn the position. 20 CFR 416.960(b)(1). Vocational factors of age, education, and work experience, and whether the past relevant employment exists in significant numbers in the national economy is not considered. 20 CFR 416.960(b)(3).

The Claimant's prior employment was as a general laborer consisting of unloading a truck, stocking, dishwasher, security guard, at an airport, fitness center porter, and as a busboy/cleaner at restaurants. In consideration of the Claimant's testimony and Occupational Code, the prior employment is classified as unskilled, sedentary to medium work. If the impairment or combination of impairments does not limit physical or mental ability to do basic work activities, it is not a severe impairment(s) and disability does not exist. 20 CFR 416.920. As noted above, the objective evidence does not contain any physical or mental restrictions that would preclude employment. In light of the entire record and the Claimant's RFC (see above), it is found that the Claimant is able to perform past relevant work as a security guard and other unskilled, light work. Accordingly, the Claimant is found not disabled at Step 4 with no further analysis required.

Assuming *arguendo*, that Step 5 were required; at Step 5 an assessment of the Claimant's residual functional capacity and age, education, and work experience would be considered to determine whether an adjustment to other work can be made. 20 CFR 416.920(4)(v). At the time of hearing, the Claimant was 31 years old and, thus, considered to be a younger individual for MA-P purposes. The Claimant is a high

school graduate with some college. Disability is found if an individual is unable to adjust to other work. *Id.* At this point in the analysis, the burden shifts from the Claimant to the Department to present proof that the Claimant has the residual capacity to substantial gainful employment. 20 CFR 416.960(2); *Richardson v Sec of Health and Human Services*, 735 F2d 962, 964 (CA 6, 1984). While a vocational expert is not required, a finding supported by substantial evidence that the individual has the vocational qualifications to perform specific jobs is needed to meet the burden. *O'Banner v Sec of Health and Human Services*, 587 F2d 321, 323 (CA 6, 1978). Medical-Vocational guidelines found at 20 CFR Subpart P, Appendix II, may be used to satisfy the burden of proving that the individual can perform specific jobs in the national economy. *Heckler v Campbell*, 461 US 458, 467 (1983); *Kirk v Secretary*, 667 F2d 524, 529 (CA 6, 1981) *cert den* 461 US 957 (1983). The age for younger individuals (under 50) generally will not seriously affect the ability to adjust to other work. 20 CFR 416.963(c).

In this case, the evidence confirms treatment/diagnoses of mild depression, back wound/abrasion, shoulder pain, testicular pain, urinary urgency/frequency and infection, epididymitis, and hydroceles. A history of schizophrenia was documented. The Claimant testified that he was able to perform physical activity comparable to light activity. In light of the foregoing, it is found that the Claimant maintains the residual functional capacity for work activities on a regular and continuing basis to meet the physical and mental demands required to perform at light work as defined in 20 CFR 416.967(b). After review of the entire record, finding no contradiction with the Claimant's non-exertional limitations, and in consideration of the Claimant's age, education, work experience, RFC, and using the Medical-Vocational Guidelines [20 CFR 404, Subpart P, Appendix II] as a guide, specifically Rule 202.20, the Claimant would be found not disabled at Step 5 as well.

The State Disability Assistance program, which provides financial assistance for disabled persons, was established by 2004 PA 344. The Department administers the SDA program pursuant to MCL 400.10 *et seq.* and Mich Admin Code, Rules 400.3151 – 400.3180. Department policies are found in BAM, BEM, and RFT. A person is considered disabled for SDA purposes if the person has a physical or mental impairment which meets federal SSI disability standards for at least ninety days. Receipt of SSI benefits based on disability or blindness, or the receipt of MA benefits based on disability or blindness automatically qualifies an individual as disabled for purposes of the SDA program.

In this case, the Claimant is found not disabled for purposes of the MA-P benefit program; therefore, he is found not disabled for purposes of the SDA benefit program.

**DECISION AND ORDER**

The Administrative Law Judge, based on the above findings of fact and conclusions of law finds the Claimant not disabled for purposes of the MA-P and SDA benefit programs.

Accordingly, it is ORDERED:

The Department's determination is AFFIRMED.

*Colleen M. Mamelka*

Colleen M. Mamelka  
Administrative Law Judge  
For Maura Corrigan, Director  
Department of Human Services

Date Signed: January 23, 2013

Date Mailed: January 23, 2013

**NOTICE:** Michigan Administrative Hearing System (MAHS) may order a rehearing or reconsideration on either its own motion or at the request of a party within 30 days of the mailing date of this Decision and Order. MAHS will not order a rehearing or reconsideration on the Department's motion where the final decision cannot be implemented within 90 days of the filing of the original request. (60 days for FAP cases)

The Claimant may appeal the Decision and Order to Circuit Court within 30 days of the receipt of the Decision and Order or, if a timely request for rehearing was made, within 30 days of the receipt date of the rehearing decision.

Claimant may request a rehearing or reconsideration for the following reasons:

- A rehearing **MAY** be granted if there is newly discovered evidence that could affect the outcome of the original hearing decision.
- A reconsideration **MAY** be granted for any of the following reasons:
  - misapplication of manual policy or law in the hearing decision,
  - typographical errors, mathematical error, or other obvious errors in the hearing decision that effect the substantial rights of the claimant:
  - the failure of the ALJ to address other relevant issues in the hearing decision.

2012-73177/CMM
