

**STATE OF MICHIGAN
MICHIGAN ADMINISTRATIVE HEARING SYSTEM
ADMINISTRATIVE HEARINGS FOR THE
DEPARTMENT OF HUMAN SERVICES**

IN THE MATTER OF:

[REDACTED]

Reg No.: 2012-24002
Issue No.: 2009, 4031
Case No.: [REDACTED]
Hearing Date: March 21, 2012
Wayne County DHS (41)

ADMINISTRATIVE LAW JUDGE: Colleen M. Mamelka

HEARING DECISION

This matter is before the undersigned Administrative Law Judge pursuant to MCL 400.9 and MCL 400.37 upon the Claimant's request for a hearing. After due notice, a telephone hearing was conducted from Detroit, Michigan on Wednesday, March 21, 2012. The Claimant appeared, along with [REDACTED] [REDACTED], and testified. Participating on behalf of the Department of Human Services ("Department") was [REDACTED].

During the hearing, the Claimant waived the time period for the issuance of this decision, in order to allow for the submission of additional medical records. The evidence was received, reviewed, and forwarded to the State Hearing Review Team ("SHRT") for consideration. On August 2, 2012, this office received the SHRT determination which found the Claimant not disabled. This matter is now before the undersigned for a final decision.

ISSUE

Whether the Department properly determined that the Claimant was not disabled for purposes of the Medical Assistance ("MA-P") benefit program?

FINDINGS OF FACT

The Administrative Law Judge, based on the competent, material, and substantial evidence on the whole record, finds as material fact:

1. The Claimant submitted an application for public assistance seeking MA-P benefits on September 22, 2011. (Exhibit 1, pp. 133 – 142)

2012-24002/CMM

2. On December 20, 2011, the Medical Review Team (“MRT”) found the Claimant not disabled. (Exhibit 1, pp. 6, 7)
3. The Department notified the Claimant of the MRT determination on December 23, 2011. (Exhibit 1, p. 3)
4. On January 9, 2012, the Department received the Claimant’s written request for hearing. (Exhibit 1, p. 2)
5. On May 16th and July 20, 2012, the SHRT found the Claimant not disabled. (Exhibit 3)
6. The Claimant alleged physical disabling impairments due to chronic back pain, bronchitis, gastroesophageal reflux disease (“GERD”), and seizure disorder.
7. The Claimant alleged mental disabling impairments due to paranoid schizophrenia, bipolar disorder, depression, schizoaffective disorder, and psychosis.
8. At the time of hearing, the Claimant was [REDACTED] years old with an [REDACTED] birth date; was 5’8½” in height; and weighed 210 pounds.
9. The Claimant has a limited education with an employment history as a child care provider and as a general laborer in the kitchen while incarcerated.
10. The Claimant’s impairments have lasted, or are expected to last, continuously for a period of 12 months or longer.

CONCLUSIONS OF LAW

The Medical Assistance program is established by Subchapter XIX of Chapter 7 of The Public Health & Welfare Act, 42 USC 1397, and is administered by the Department of Human Services, formerly known as the Family Independence Agency, pursuant to MCL 400.10 *et seq.* and MCL 400.105. Department policies are found in the Bridges Administrative Manual (“BAM”), the Bridges Eligibility Manual (“BEM”), and the Bridges Reference Tables (“RFT”).

Disability is defined as the inability to do any substantial gainful activity by reason of any medically determinable physical or mental impairment which can be expected to result in death or which has lasted or can be expected to last for a continuous period of not less than 12 months. 20 CFR 416.905(a). The person claiming a physical or mental disability has the burden to establish it through the use of competent medical evidence from qualified medical sources such as his or her medical history, clinical/laboratory

findings, diagnosis/prescribed treatment, prognosis for recovery and/or medical assessment of ability to do work-related activities or ability to reason and make appropriate mental adjustments, if a mental disability is alleged. 20 CFR 416.913. An individual's subjective pain complaints are not, in and of themselves, sufficient to establish disability. 20 CFR 416.908; 20 CFR 416.929(a). Similarly, conclusory statements by a physician or mental health professional that an individual is disabled or blind, absent supporting medical evidence, is insufficient to establish disability. 20 CFR 416.927.

When determining disability, the federal regulations require several factors to be considered including: (1) the location/duration/frequency/intensity of an applicant's pain; (2) the type/dosage/effectiveness/side effects of any medication the applicant takes to relieve pain; (3) any treatment other than pain medication that the applicant has received to relieve pain; and (4) the effect of the applicant's pain on his or her ability to do basic work activities. 20 CFR 416.929(c)(3). The applicant's pain must be assessed to determine the extent of his or her functional limitation(s) in light of the objective medical evidence presented. 20 CFR 416.929(c)(2).

In order to determine whether or not an individual is disabled, federal regulations require a five-step sequential evaluation process be utilized. 20 CFR 416.920(a)(1). The five-step analysis requires the trier of fact to consider an individual's current work activity; the severity of the impairment(s) both in duration and whether it meets or equals a listed impairment in Appendix 1; residual functional capacity to determine whether an individual can perform past relevant work; and residual functional capacity along with vocational factors (i.e. age, education, and work experience) to determine if an individual can adjust to other work. 20 CFR 416.920(a)(4); 20 CFR 416.945.

If an individual is found disabled, or not disabled, at any step, a determination or decision is made with no need evaluate subsequent steps. 20 CFR 416.920(a)(4). If a determination cannot be made that an individual is disabled, or not disabled, at a particular step, the next step is required. 20 CFR 416.920(a)(4). If an impairment does not meet or equal a listed impairment, an individual's residual functional capacity is assessed before moving from step three to step four. 20 CFR 416.920(a)(4); 20 CFR 416.945. Residual functional capacity is the most an individual can do despite the limitations based on all relevant evidence. 20 CFR 416.945(a)(1). An individual's residual functional capacity assessment is evaluated at both steps four and five. 20 CFR 416.920(a)(4). In determining disability, an individual's functional capacity to perform basic work activities is evaluated and if found that the individual has the ability to perform basic work activities without significant limitation, disability will not be found. 20 CFR 416.994(b)(1)(iv). In general, the individual has the responsibility to prove disability. 20 CFR 416.912(a). An impairment or combination of impairments is not severe if it does not significantly limit an individual's physical or mental ability to do basic work activities. 20 CFR 416.921(a). The individual has the responsibility to

provide evidence of prior work experience; efforts to work; and any other factor showing how the impairment affects the ability to work. 20 CFR 416.912(c)(3)(5)(6).

In addition to the above, when evaluating mental impairments, a special technique is utilized. 20 CFR 416.920a(a). First, an individual's pertinent symptoms, signs, and laboratory findings are evaluated to determine whether a medically determinable mental impairment exists. 20 CFR 416.920a(b)(1). When a medically determinable mental impairment is established, the symptoms, signs and laboratory findings that substantiate the impairment are documented to include the individual's significant history, laboratory findings, and functional limitations. 20 CFR 416.920a(e)(2). Functional limitation(s) is assessed based upon the extent to which the impairment(s) interferes with an individual's ability to function independently, appropriately, effectively, and on a sustained basis. *Id.*; 20 CFR 416.920a(c)(2). Chronic mental disorders, structured settings, medication, and other treatment and the effect on the overall degree of functionality is considered. 20 CFR 416.920a(c)(1). In addition, four broad functional areas (activities of daily living; social functioning; concentration, persistence or pace; and episodes of decompensation) are considered when determining an individual's degree of functional limitation. 20 CFR 416.920a(c)(3). The degree of limitation for the first three functional areas is rated by a five point scale: none, mild, moderate, marked, and extreme. 20 CFR 416.920a(c)(4). A four point scale (none, one or two, three, four or more) is used to rate the degree of limitation in the fourth functional area. *Id.* The last point on each scale represents a degree of limitation that is incompatible with the ability to do any gainful activity. *Id.*

After the degree of functional limitation is determined, the severity of the mental impairment is determined. 20 CFR 416.920a(d). If severe, a determination of whether the impairment meets or is the equivalent of a listed mental disorder is made. 20 CFR 416.920a(d)(2). If the severe mental impairment does not meet (or equal) a listed impairment, an individual's residual functional capacity is assessed. 20 CFR 416.920a(d)(3).

As outlined above, the first step looks at the individual's current work activity. In the record presented, the Claimant is not involved in substantial gainful activity; therefore, is not ineligible for disability benefits under Step 1.

The severity of the Claimant's alleged impairment(s) is considered under Step 2. The Claimant bears the burden to present sufficient objective medical evidence to substantiate the alleged disabling impairments. In order to be considered disabled for MA purposes, the impairment must be severe. 20 CFR 916.920(a)(4)(ii); 20 CFR 916.920(b). An impairment, or combination of impairments, is severe if it significantly limits an individual's physical or mental ability to do basic work activities regardless of age, education and work experience. 20 CFR 916.920(a)(4)(ii); 20 CFR 916.920(c).

Basic work activities means the abilities and aptitudes necessary to do most jobs. 20 CFR 916.921(b). Examples include:

1. Physical functions such as walking, standing, sitting, lifting, pushing, pulling, reaching, carrying, or handling;
2. Capacities for seeing, hearing, and speaking;
3. Understanding, carrying out, and remembering simple instructions;
4. Use of judgment;
5. Responding appropriately to supervision, co-workers and usual work situations; and
6. Dealing with changes in a routine work setting.

Id.

The second step allows for dismissal of a disability claim obviously lacking in medical merit. *Higgs v Bowen*, 880 F2d 860, 862 (CA 6, 1988). The severity requirement may still be employed as an administrative convenience to screen out claims that are totally groundless solely from a medical standpoint. *Id.* at 863 citing *Farris v Sec of Health and Human Services*, 773 F2d 85, 90 n.1 (CA 6, 1985). An impairment qualifies as non-severe only if, regardless of a claimant's age, education, or work experience, the impairment would not affect the claimant's ability to work. *Salmi v Sec of Health and Human Services*, 774 F2d 685, 692 (CA 6, 1985).

In the present case, the Claimant alleges disability due to chronic back pain, bronchitis, GERD, seizure disorder, paranoid schizophrenia, bipolar disorder, depression, schizoaffective disorder, and psychosis.

In support of his claim, some older records from as early as [REDACTED] were submitted which document treatment/diagnoses of schizophrenia, polysubstance dependence, antisocial personality disorder, seizure disorder, psychosis, and GERD.

On [REDACTED] [REDACTED] [REDACTED], a psychiatric assessment was performed. The diagnoses were bipolar I disorder, severe with psychosis, polysubstance dependence, and antisocial personality disorder. The GAF was 45.

On [REDACTED] the Claimant attended therapy. The diagnoses were bipolar I disorder, severe with psychosis, polysubstance dependence, and antisocial personality

disorder. Several psychiatric hospitalizations (20x) and suicide attempts (10+) were documented. The GAF was 45.

On [REDACTED], a Medical Examination Report was completed on behalf of the Claimant. The current diagnoses were depression, GERD, seizure disorder, chronic back pain, sleep disorder, and depression. The Claimant was in stable condition and able to meet his needs in the home.

On [REDACTED], a psycho-social assessment and individualized plan of service was completed.

On [REDACTED], an initial psychiatric evaluation was performed. Multiple scars were noted on his arms from self mutilation/suicide attempts. The diagnoses were schizoaffective disorder and polysubstance dependence with a GAF of 46. The Claimant's medications were refilled and he was referred for psychotherapy.

On [REDACTED] the Claimant attended a follow-up appointment with complaints of sadness, loss of interest, and insomnia. The diagnoses were schizoaffective disorder and polysubstance dependence. The GAF was 46 and his medications were refilled.

On [REDACTED] the Claimant attended a consultative evaluation. The Wechsler Adult Intelligence Scale IV was administered resulting in a full scale IQ between 61 and 69. The Wide Range Achievement Testing IV revealed a reading standard score of 55, spelling of 55, and math computation of 58 which fall at less than the 1 percentile and approximate grade ratings of 2.0, 1.5, and 2.4 respectively. The Psychologist opined that the Claimant is able to manage his own activities of daily living; however his ability to handle money matters is severely impacted. The Claimant's ability to understand, remember, and carry out simple instructions was moderate to severely impacted as opposed to his ability to respond appropriately to others, including co-workers/supervisors, and adapt to change in a work setting, as well as perform work related activities in a reliable, consistent and persistent manner were severely impacted, chronically, and unlikely to improve. It was found improbable that any serious employer would take him on. The Claimant needed intensive psychiatric management, including semi-independent supervised living and structured surveillance regarding treatment and compliance. The diagnoses were schizoaffective disorder, post-traumatic stress disorder, panic disorder, history of alcohol dependency in remission, cocaine dependence in remission, cannabis dependence, cognitive disorder, personality changes, learning disorder, and features of anti-social personality disorder. The GAF was 45 and the prognosis was poor.

The Mental Residual Functional Capacity Assessment was completed on behalf of the Claimant. The Claimant was markedly limited in 12 of the 20 factors with 2 more factors

being between moderate and marked. The Claimant was moderately limited in 3 factors.

As previously noted, the Claimant bears the burden to present sufficient objective medical evidence to substantiate the alleged disabling impairment(s). As summarized above, the Claimant has presented medical records which confirm diagnoses of abdominal pain, gastroparesis, shoulder pain, noncardiac chest pain, asthma, diabetes mellitus, hyperlipidemia, hypertension, obstructive sleep apnea, GERD, hypoglycemia, and history of stroke. The GAF was 45. The medical evidence establishes that the Claimant does have some physical and mental limitations on his ability to perform basic work activities. The degree of functional limitation on the Claimant's activities, social function, concentration, persistence, or pace is marked. The degree of functional limitation in the fourth area (episodes of decompensation) is a 3-4. As summarized above, the Claimant has presented medical evidence establishing that he does have some physical and mental limitations on his ability to perform basic work activities. In light of the *de minimus* standard, the sequential analysis will continue.

In the third step of the sequential analysis of a disability claim, the trier of fact must determine if the Claimant's impairment, or combination of impairments, is listed in Appendix 1 of Subpart P of 20 CFR, Part 404. The medical records confirm Claimant's diagnoses of schizophrenia, polysubstance dependence, anti-social personality disorder, seizure disorder, psychosis, GERD, post traumatic stress disorder, bipolar I disorder, back pain, depression, learning disorder, and panic disorder.

Listing 12.00 encompasses adult mental disorders. The evaluation of disability on the basis of mental disorders requires documentation of a medically determinable impairment(s) and consideration of the degree in which the impairment limits the individual's ability to work, and whether these limitations have lasted or are expected to last for a continuous period of at least 12 months. 12.00A. The existence of a medically determinable impairment(s) of the required duration must be established through medical evidence consisting of symptoms, signs, and laboratory findings, to include psychological test findings. 12.00B. The evaluation of disability on the basis of a mental disorder requires sufficient evidence to (1) establish the presence of a medically determinable mental impairment(s), (2) assess the degree of functional limitation the impairment(s) imposes, and (3) project the probable duration of the impairment(s). 12.00D. The evaluation of disability on the basis of mental disorders requires documentation of a medically determinable impairment(s) and consideration of the degree in which the impairment limits the individual's ability to work, and whether these limitations have lasted or are expected to last for a continuous period of at least 90 days for SDA purposes and 12 months for MA-P purposes. 12.00A.

Listing 12.04 defines affective disorders as being characterized by a disturbance of mood, accompanied by a full or partial manic or depressive syndrome. Generally,

affective disorders involve either depression or elation. The required level of severity for these disorders is met when the requirements of both A and B are satisfied, or when the requirements in C are satisfied.

- A. Medically documented persistence, either continuous or intermittent, of one of the following:
 - 1. Depressive syndrome characterized by at least four of the following:
 - a. Anhedonia or pervasive loss of interest in almost all activities; or
 - b. Appetite disturbance with change in weight; or
 - c. Sleep disturbance; or
 - d. Psychomotor agitation or retardation; or
 - e. Decreased energy; or
 - f. Feelings of guilt or worthlessness; or
 - g. Difficulty concentrating or thinking; or
 - h. Thoughts of suicide; or
 - i. Hallucinations, delusions, or paranoid thinking; or
 - 2. Manic syndrome characterized by at least three of the following:
 - a. Hyperactivity; or
 - b. Pressure of speech; or
 - c. Flight of ideas; or
 - d. Inflated self-esteem; or
 - e. Decreased need for sleep; or
 - f. Easy distractability; or
 - g. Involvement in activities that have a high probability of painful consequences which are not recognized; or
 - h. Hallucinations, delusions, or paranoid thinking; or
 - 3. Bipolar syndrome with a history of episodic periods manifested by the full symptomatic picture of both manic and depressive syndromes (and currently characterized by either or both syndromes)

AND

- B. Resulting in at least two of the following:
 - 1. Marked restriction on activities of daily living; or
 - 2. Marked difficulties in maintaining social functioning; or
 - 3. Marked difficulties in maintaining concentration, persistence, or pace; or

4. Repeated episodes of decompensation, each of extended duration;

OR

- C. Medically documented history of chronic affective disorder of at least 2 years' duration that has caused more than a minimal limitation of ability to do basic work activities, with symptoms or signs currently attenuated by medication or psychosocial support, and one of the following:

1. Repeated episodes of decompensation, each of extended duration;
or
2. A residual disease process that has resulted in such marginal adjustment that even minimal increase in mental demands or change in the environment would be predicted to cause the individual to decompensate; or
3. Current history of 1 or more years' inability to function outside a highly supportive living arrangement, with an indication of continued need for such an arrangement.

Listing 12.05 discusses mental retardation which refers to significantly sub-average general intellectual functioning with deficits in adaptive functioning initially manifested during the developmental period. The required level of severity for this disorder is met when the requirements in A, B, C, or D are satisfied.

- A. Mental incapacity evidenced by dependence upon others for personal needs (e.g., toileting, eating, dressing, or bathing) and inability to follow directions, such that the use of standardized measures of intellectual functioning is precluded;

OR

- B. A valid verbal, performance, or full scale IQ of 59 or less;

OR

- C. A valid verbal, performance, or full scale IQ of 60 through 70 and a physical or other mental impairment imposing an additional and significant work-related limitation of function;

OR

- D. A valid verbal, performance, or full scale IQ of 60 through 70, resulting in at least two of the following:
1. Marked restriction of activities of daily living; or
 2. Marked difficulties in maintaining social functioning; or
 3. Marked difficulties in maintaining concentration, persistence, or pace; or
 4. Repeated episodes of decompensation, each of extended duration.

In this case, the evidence confirms treatment/diagnoses of records confirm diagnoses of schizophrenia, polysubstance dependence, anti-social personality disorder, seizure disorder, psychosis, GERD, post traumatic stress disorder, bipolar I disorder, back pain, depression, learning disorder, and panic disorder. The evidence reflects several suicide attempts and psychiatric hospitalizations. The Claimant's full scale IQ was between 61 and 69 with the most recent GAF of 45. The Claimant was markedly limited in most functional areas. In light of the foregoing, it is found that the Claimant's mental impairments meet, or are the medical equivalent thereof, a listed impairment within 12.00 as detailed above. Accordingly, the Claimant is found disabled at Step 3 with no further analysis required.

The State Disability Assistance program, which provides financial assistance for disabled persons, was established by 2004 PA 344. The Department administers the SDA program pursuant to MCL 400.10 *et seq.* and Mich Admin Code, Rules 400.3151 – 400.3180. Department policies are found in BAM, BEM, and RFT. A person is considered disabled for SDA purposes if the person has a physical or mental impairment which meets federal SSI disability standards for at least ninety days. Receipt of SSI or RSDI benefits based on disability or blindness, or the receipt of MA benefits based on disability or blindness automatically qualifies an individual as disabled for purposes of the SDA program.

In some circumstances benefit payments can, or must, be restricted to someone other than the individual (program group). BAM 420. A protective payee is a person/agency selected to be responsible for receiving and managing the cash assistance on behalf of the individual (program group) as a third party. *Id.* Restricted payments are required in any of the following circumstances:

- Court-ordered shelter arrearage collection
- Third-party resource disqualification
- Minor parent
- Substance Abuse

- Client convicted of a drug-related felony
- Money mismanagement
- A child(ren) receiving FIP has a legal guardian
- Eviction or threatened eviction

Id. Restricted payment status is reviewed when appropriate but at least at every determination. *Id.* The client has the right to request and be granted a review of the restricted payment status every six months. *Id.* An individual (group) may request a hearing to dispute a decision to begin or continue restricted payments or dispute the selection of a protected payee. *Id.* Restricted payments are continued until the hearing matter is resolved. *Id.*

In this case, the Claimant is found disabled for purposes of the MA-P program; therefore, he is found disabled for purposes of SDA benefit program.

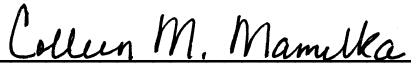

DECISION AND ORDER

The Administrative Law Judge, based on the above findings of fact and conclusions of law finds the Claimant disabled for purposes of the MA-P and SDA benefit programs.

Accordingly, It is ORDERED:

1. The Department's determination is REVERSED.
2. The Department shall initiate processing of the September 22, 2011 application to determine if all other non-medical criteria are met and inform the Claimant of the determination in accordance with Department policy.
3. The Department shall, in light of the Claimant's history of polysubstance dependence and low IQ, evaluate the need for a protective payee in accordance with Department policy.
4. The Department shall supplement for lost benefits (if any) that the Claimant was entitled to receive if otherwise eligible and qualified in accordance with Department policy.

5. The Department shall review the Claimant's continued eligibility in accordance with Department policy in September 2013.

Colleen M. Mamelka
Administrative Law Judge
For Maura Corrigan, Director
Department of Human Services

Date Signed: August 16, 2012

Date Mailed: August 16, 2012

NOTICE: Michigan Administrative Hearing System (MAHS) may order a rehearing or reconsideration on either its own motion or at the request of a party within 30 days of the mailing date of this Decision and Order. MAHS will not order a rehearing or reconsideration on the Department's motion where the final decision cannot be implemented within 90 days of the filing of the original request. (60 days for FAP cases)

The Claimant may appeal the Decision and Order to Circuit Court within 30 days of the receipt of the Decision and Order or, if a timely request for rehearing was made, within 30 days of the receipt date of the rehearing decision.

Claimant may request a rehearing or reconsideration for the following reasons:

- A rehearing **MAY** be granted if there is newly discovered evidence that could affect the outcome of the original hearing decision.
- A reconsideration **MAY** be granted for any of the following reasons:
 - misapplication of manual policy or law in the hearing decision,
 - typographical errors, mathematical error, or other obvious errors in the hearing decision that effect the substantial rights of the claimant:
 - the failure of the ALJ to address other relevant issues in the hearing decision.

Request must be submitted through the local DHS office or directly to MAHS by mail at
