

**STATE OF MICHIGAN
MICHIGAN ADMINISTRATIVE HEARING SYSTEM
ADMINISTRATIVE HEARINGS FOR THE
DEPARTMENT OF HUMAN SERVICES**

IN THE MATTER OF:

[REDACTED]

Reg No.: 2012-50553
Issue No.: 2009
Case No.: [REDACTED]
Hearing Date: July 16, 2012
Macomb County DHS (12)

ADMINISTRATIVE LAW JUDGE: Colleen M. Mamelka

HEARING DECISION

This matter is before the undersigned Administrative Law Judge pursuant to MCL 400.9 and MCL 400.37 upon the Claimant's request for a hearing. After due notice, a telephone hearing was conducted from Detroit, Michigan on Monday, July 16, 2012. The Claimant appeared, along with [REDACTED] and testified. [REDACTED] appeared on behalf of the Department of Human Services ("Department").

ISSUE

Whether the Department properly determined that the Claimant was not disabled for purposes of the Medical Assistance ("MA-P") benefit program?

FINDINGS OF FACT

The Administrative Law Judge, based on the competent, material, and substantial evidence on the whole record, finds as material fact:

1. The Claimant submitted an application for public assistance seeking MA-P benefits on February 3, 2012.
2. On April 10, 2012, the Medical Review Team ("MRT") found the Claimant not disabled. (Exhibit 2, pp. 52, 53)
3. The Department notified the Claimant of the MRT determination.
4. On April 27, 2012, the Department received the Claimant's written request for hearing.

5. On June 15, 2012, the State Hearing Review Team (“SHRT”) found the Claimant not disabled. (Exhibit 2)
6. The Claimant alleged physical disabling impairments due to a bleeding colon ulcer.
7. The Claimant alleged mental disabling impairments due to anxiety, depression, and personality disorder.
8. At the time of hearing, the Claimant was [REDACTED] years old with a [REDACTED] birth date; was 5’9” in height; and weighed 135 pounds.
9. The Claimant is a high school graduate under a special education program with some college and a limited employment of work in selling/repairing watches and doing a paper route.

CONCLUSIONS OF LAW

The Medical Assistance program is established by Subchapter XIX of Chapter 7 of The Public Health & Welfare Act, 42 USC 1397, and is administered by the Department of Human Services, formerly known as the Family Independence Agency, pursuant to MCL 400.10 *et seq.* and MCL 400.105. Department policies are found in the Bridge Administrative Manual (“BAM”), the Bridges Eligibility Manual (“BEM”), and the Bridges Reference Tables (“RFT”).

Disability is defined as the inability to do any substantial gainful activity by reason of any medically determinable physical or mental impairment which can be expected to result in death or which has lasted or can be expected to last for a continuous period of not less than 12 months. 20 CFR 416.905(a). The person claiming a physical or mental disability has the burden to establish it through the use of competent medical evidence from qualified medical sources such as his or her medical history, clinical/laboratory findings, diagnosis/prescribed treatment, prognosis for recovery and/or medical assessment of ability to do work-related activities or ability to reason and make appropriate mental adjustments, if a mental disability is alleged. 20 CFR 416.913. An individual’s subjective pain complaints are not, in and of themselves, sufficient to establish disability. 20 CFR 416.908; 20 CFR 416.929(a). Similarly, conclusory statements by a physician or mental health professional that an individual is disabled or blind, absent supporting medical evidence, is insufficient to establish disability. 20 CFR 416.927.

When determining disability, the federal regulations require several factors to be considered including: (1) the location/duration/frequency/intensity of an applicant’s pain; (2) the type/dosage/effectiveness/side effects of any medication the applicant

takes to relieve pain; (3) any treatment other than pain medication that the applicant has received to relieve pain; and (4) the effect of the applicant's pain on his or her ability to do basic work activities. 20 CFR 416.929(c)(3). The applicant's pain must be assessed to determine the extent of his or her functional limitation(s) in light of the objective medical evidence presented. 20 CFR 416.929(c)(2).

In order to determine whether or not an individual is disabled, federal regulations require a five-step sequential evaluation process be utilized. 20 CFR 416.920(a)(1). The five-step analysis requires the trier of fact to consider an individual's current work activity; the severity of the impairment(s) both in duration and whether it meets or equals a listed impairment in Appendix 1; residual functional capacity to determine whether an individual can perform past relevant work; and residual functional capacity along with vocational factors (i.e. age, education, and work experience) to determine if an individual can adjust to other work. 20 CFR 416.920(a)(4); 20 CFR 416.945.

If an individual is found disabled, or not disabled, at any step, a determination or decision is made with no need evaluate subsequent steps. 20 CFR 416.920(a)(4). If a determination cannot be made that an individual is disabled, or not disabled, at a particular step, the next step is required. 20 CFR 416.920(a)(4). If an impairment does not meet or equal a listed impairment, an individual's residual functional capacity is assessed before moving from step three to step four. 20 CFR 416.920(a)(4); 20 CFR 416.945. Residual functional capacity is the most an individual can do despite the limitations based on all relevant evidence. 20 CFR 416.945(a)(1). An individual's residual functional capacity assessment is evaluated at both steps four and five. 20 CFR 416.920(a)(4). In determining disability, an individual's functional capacity to perform basic work activities is evaluated and if found that the individual has the ability to perform basic work activities without significant limitation, disability will not be found. 20 CFR 416.994(b)(1)(iv). In general, the individual has the responsibility to prove disability. 20 CFR 416.912(a). An impairment or combination of impairments is not severe if it does not significantly limit an individual's physical or mental ability to do basic work activities. 20 CFR 416.921(a). The individual has the responsibility to provide evidence of prior work experience; efforts to work; and any other factor showing how the impairment affects the ability to work. 20 CFR 416.912(c)(3)(5)(6).

In addition to the above, when evaluating mental impairments, a special technique is utilized. 20 CFR 416.920a(a). First, an individual's pertinent symptoms, signs, and laboratory findings are evaluated to determine whether a medically determinable mental impairment exists. 20 CFR 416.920a(b)(1). When a medically determinable mental impairment is established, the symptoms, signs and laboratory findings that substantiate the impairment are documented to include the individual's significant history, laboratory findings, and functional limitations. 20 CFR 416.920a(e)(2). Functional limitation(s) is assessed based upon the extent to which the impairment(s) interferes with an individual's ability to function independently, appropriately, effectively, and on a

sustained basis. *Id.*; 20 CFR 416.920a(c)(2). Chronic mental disorders, structured settings, medication, and other treatment and the effect on the overall degree of functionality is considered. 20 CFR 416.920a(c)(1). In addition, four broad functional areas (activities of daily living; social functioning; concentration, persistence or pace; and episodes of decompensation) are considered when determining an individual's degree of functional limitation. 20 CFR 416.920a(c)(3). The degree of limitation for the first three functional areas is rated by a five point scale: none, mild, moderate, marked, and extreme. 20 CFR 416.920a(c)(4). A four point scale (none, one or two, three, four or more) is used to rate the degree of limitation in the fourth functional area. *Id.* The last point on each scale represents a degree of limitation that is incompatible with the ability to do any gainful activity. *Id.*

After the degree of functional limitation is determined, the severity of the mental impairment is determined. 20 CFR 416.920a(d). If severe, a determination of whether the impairment meets or is the equivalent of a listed mental disorder is made. 20 CFR 416.920a(d)(2). If the severe mental impairment does not meet (or equal) a listed impairment, an individual's residual functional capacity is assessed. 20 CFR 416.920a(d)(3).

As outlined above, the first step looks at the individual's current work activity. In the record presented, the Claimant is not involved in substantial gainful activity; therefore, is not ineligible for disability benefits under Step 1.

The severity of the Claimant's alleged impairment(s) is considered under Step 2. The Claimant bears the burden to present sufficient objective medical evidence to substantiate the alleged disabling impairments. In order to be considered disabled for MA purposes, the impairment must be severe. 20 CFR 416.920(a)(4)(ii); 20 CFR 416.920(b). An impairment, or combination of impairments, is severe if it significantly limits an individual's physical or mental ability to do basic work activities regardless of age, education and work experience. 20 CFR 416.920(a)(4)(ii); 20 CFR 416.920(c). Basic work activities means the abilities and aptitudes necessary to do most jobs. 20 CFR 416.921(b). Examples include:

1. Physical functions such as walking, standing, sitting, lifting, pushing, pulling, reaching, carrying, or handling;
2. Capacities for seeing, hearing, and speaking;
3. Understanding, carrying out, and remembering simple instructions;
4. Use of judgment;

5. Responding appropriately to supervision, co-workers and usual work situations; and
6. Dealing with changes in a routine work setting.

Id.

The second step allows for dismissal of a disability claim obviously lacking in medical merit. *Higgs v Bowen*, 880 F2d 860, 862 (CA 6, 1988). The severity requirement may still be employed as an administrative convenience to screen out claims that are totally groundless solely from a medical standpoint. *Id.* at 863 citing *Farris v Sec of Health and Human Services*, 773 F2d 85, 90 n.1 (CA 6, 1985). An impairment qualifies as non-severe only if, regardless of a claimant's age, education, or work experience, the impairment would not affect the claimant's ability to work. *Salmi v Sec of Health and Human Services*, 774 F2d 685, 692 (CA 6, 1985).

In the present case, the Claimant alleges disability due to a bleeding colon ulcer, anxiety, depression, and personality disorder.

In support of his claim, progress notes from his therapy were submitted for the period from [REDACTED] where the Claimant reported periods of stress, anxiety, sleep disturbance, and depression.

On [REDACTED] a Psychiatric/Psychological Examination Report was completed on behalf of the Claimant. The diagnoses were major depression and generalized anxiety disorder. The Global Assessment Functioning ("GAF") was 45.

On this same date, a Mental Residual Functional Capacity Assessment was completed on behalf of the Claimant. The Claimant was markedly limited in 13 of the 20 factors; moderately limited in 2 factors; and not significantly limited in 5 factors. More specifically, the Claimant was not significantly limited in his ability to understand and remember, interact appropriately with the general public, and in his ability to ask simple questions or request assistance. The majority of the marked limitations related to workplace issues.

On [REDACTED], the Claimant attended therapy where he reported anxiety, stress, hand shaking, and nervousness.

On [REDACTED] a Psychological Assessment was performed to determine the Claimant's level of intellectual functioning and personality dynamics. The Claimant's full scale IQ (WAIS-IV) was 81 representing the low range of intellectual functioning. The Claimant had no difficulty understanding the world around him and his social judgment and common sense were good. The diagnostic impressions were major depressive

disorder (recurrent, moderate), panic disorder without agoraphobia, generalized anxiety disorder, alcohol abuse, and personality disorder (not otherwise specified "NOS"). The GAF was 50. The Claimant was found able to manage benefit funds but would have difficulty carrying out one-step instructions. Cognitively, his functioning was low. The Psychologist further opined that the Claimant would have difficulty with social interactions and with his ability to respond appropriately to changes in work routines. The Claimant's function was affected by his bouts of depression and anxiety.

On this same date, a Medical Source Statement of Ability to do Work-Related Activities (Mental) was completed on behalf of the Claimant. The Claimant was markedly limited in his ability to interact appropriately with supervisors.

As previously noted, the Claimant bears the burden to present sufficient objective medical evidence to substantiate the alleged mental disabling impairment(s). There was no evidence to support any physical disabling impairment. The Claimant's symptoms/signs include abnormal sleep pattern and racing thoughts. As summarized above, the Claimant has presented medical evidence establishing that he does have some mental limitations on his ability to perform basic work activities. The degree of functional limitation on the Claimant's activities, social function, concentration, persistence, or pace is moderate. The degree of functional limitation in the fourth area (episodes of decompensation) is at most a 2. Ultimately, the limited medical evidence has established that the Claimant has an impairment and, in consideration of the *de minimus* standard, the Claimant's eligibility at Step 3 will be addressed.

In the third step of the sequential analysis of a disability claim, the trier of fact must determine if the Claimant's impairment, or combination of impairments, is listed in Appendix 1 of Subpart P of 20 CFR, Part 404. The evidence confirms treatment/diagnoses of major depression, anxiety, alcohol abuse, personality disorder, and low intellectual functioning.

Listing 12.00 encompasses adult mental disorders. The evaluation of disability on the basis of mental disorders requires documentation of a medically determinable impairment(s) and consideration of the degree in which the impairment limits the individual's ability to work, and whether these limitations have lasted or are expected to last for a continuous period of at least 12 months. 12.00A. The existence of a medically determinable impairment(s) of the required duration must be established through medical evidence consisting of symptoms, signs, and laboratory findings, to include psychological test findings. 12.00B. The evaluation of disability on the basis of a mental disorder requires sufficient evidence to (1) establish the presence of a medically determinable mental impairment(s), (2) assess the degree of functional limitation the impairment(s) imposes, and (3) project the probable duration of the impairment(s). 12.00D. The evaluation of disability on the basis of mental disorders requires documentation of a medically determinable impairment(s) and consideration of

the degree in which the impairment limits the individual's ability to work, and whether these limitations have lasted or are expected to last for a continuous period of at least 12 months. 12.00A.

Listing 12.04 defines affective disorders as being characterized by a disturbance of mood, accompanied by a full or partial manic or depressive syndrome. Generally, affective disorders involve either depression or elation. The required level of severity for these disorders is met when the requirements of both A and B are satisfied, or when the requirements in C are satisfied.

- A. Medically documented persistence, either continuous or intermittent, of one of the following:
 - 1. Depressive syndrome characterized by at least four of the following:
 - a. Anhedonia or pervasive loss of interest in almost all activities; or
 - b. Appetite disturbance with change in weight; or
 - c. Sleep disturbance; or
 - d. Psychomotor agitation or retardation; or
 - e. Decreased energy; or
 - f. Feelings of guilt or worthlessness; or
 - g. Difficulty concentrating or thinking; or
 - h. Thoughts of suicide; or
 - i. Hallucinations, delusions, or paranoid thinking; or
 - 2. Manic syndrome characterized by at least three of the following:
 - a. Hyperactivity; or
 - b. Pressure of speech; or
 - c. Flight of ideas; or
 - d. Inflated self-esteem; or
 - e. Decreased need for sleep; or
 - f. Easy distractability; or
 - g. Involvement in activities that have a high probability of painful consequences which are not recognized; or
 - h. Hallucinations, delusions, or paranoid thinking; or
 - 3. Bipolar syndrome with a history of episodic periods manifested by the full symptomatic picture of both manic and depressive syndromes (and currently characterized by either or both syndromes)

AND

- B. Resulting in at least two of the following:
1. Marked restriction on activities of daily living; or
 2. Marked difficulties in maintaining social functioning; or
 3. Marked difficulties in maintaining concentration, persistence, or pace; or
 4. Repeated episodes of decompensation, each of extended duration;

OR

- C. Medically documented history of chronic affective disorder of at least 2 years' duration that has caused more than a minimal limitation of ability to do basic work activities, with symptoms or signs currently attenuated by medication or psychosocial support, and one of the following:
1. Repeated episodes of decompensation, each of extended duration; or
 2. A residual disease process that has resulted in such marginal adjustment that even minimal increase in mental demands or change in the environment would be predicted to cause the individual to decompensate; or
 3. Current history of 1 or more years' inability to function outside a highly supportive living arrangement, with an indication of continued need for such an arrangement.

Listing 12.05 discusses mental retardation which refers to significantly sub-average general intellectual functioning with deficits in adaptive functioning initially manifested during the developmental period. The required level of severity for this disorder is met when the requirements in A, B, C, or D are satisfied.

- A. Mental incapacity evidenced by dependence upon others for personal needs (e.g., toileting, eating, dressing, or bathing) and inability to follow directions, such that the use of standardized measures of intellectual functioning is precluded;

OR

- B. A valid verbal, performance, or full scale IQ of 59 or less;

OR

- C. A valid verbal, performance, or full scale IQ of 60 through 70 and a physical or other mental impairment imposing an additional and significant work-related limitation of function;

OR

- D. A valid verbal, performance, or full scale IQ of 60 through 70, resulting in at least two of the following:
 - 1. Marked restriction of activities of daily living; or
 - 2. Marked difficulties in maintaining social functioning; or
 - 3. Marked difficulties in maintaining concentration, persistence, or pace; or
 - 4. Repeated episodes of decompensation, each of extended duration.

Listing 12.06 defines anxiety-related disorders whether anxiety is either the predominant disturbance or it is experienced if the individual attempts to master symptoms. The required level of severity for these disorders is met when the requirements in both A and B are satisfied, or when the requirements in both A and C are satisfied.

- A. Medically documented findings of at least one of the following:
 - 1. Generalized persistent anxiety accompanied by three out of four of the following signs or symptoms:
 - a. Motor tension; or
 - b. Autonomic hyperactivity; or
 - c. Apprehensive expectation; or
 - d. Vigilance and scanning; or
 - 2. A persistent irrational fear of a specific object, activity, or situation which results in a compelling desire to avoid the dreaded object, activity, or situation; or
 - 3. Recurrent severe panic attacks manifested by a sudden unpredictable onset of intense apprehension, fear, terror and sense

of impending doom occurring on the average of at least once a week; or

4. Recurrent obsessions or compulsions which are a source of marked distress; or
5. Recurrent and intrusive recollections of a traumatic experience, which are a source of marked distress;

AND

B. Resulting in at least two of the following:

1. Marked restriction of activities of daily living; or
2. Marked difficulties in maintaining social functioning; or
3. Marked difficulties in maintaining concentration, persistence, or pace; or
4. Repeated episodes of decompensation, each of extended duration.

OR

C. Resulting in complete inability to function independently outside the area of one's home.

In this case, the evidence shows that the Claimant participated in therapy and takes medication for his depression, anxiety, and personality disorder (NOS). The evidence shows that the Claimant is not significantly limited in his ability to understand, remember, interact appropriately with the general public, and his ability to ask simple questions or request assistance. The Claimant's most recent GAF was 50 reflecting serious symptoms or any serious impairment in social, occupational, or school functioning. Intellectually and cognitively, the Claimant functions at a low level; however his full scale IQ is above the required listing level found in 12.05. In addition, the evidence shows marked limitations in his ability to carry out detailed instructions; maintain attention and concentration for extended periods; perform activities within a schedule, maintain regular attendance, and be punctual within customary tolerances; sustain an ordinary routine without supervision; work in coordination with or proximity to others without being distracted by them; make simple work related decisions; or complete a normal workday/worksheet without interruptions from psychologically based symptoms and to perform at a consistent pace without an unreasonable number and length of rest periods. There was no evidence or repeated episodes of decompensation

noting an improvement with therapy and prescribed treatment. Although the objective medical records establish serious mental impairments, these records do not meet the intent and severity requirements of a listing, or its equivalent. Accordingly, the Claimant cannot be found disabled, or not disabled at Step 3; therefore, the Claimant's eligibility is considered under Step 4. 20 CFR 416.905(a).

Before considering the fourth step in the sequential analysis, a determination of the individual's residual functional capacity ("RFC") is made. 20 CFR 416.945. An individual's RFC is the most he/she can still do on a sustained basis despite the limitations from the impairment(s). *Id.* The total limiting effects of all the impairments, to include those that are not severe, are considered. 20 CFR 416.945(e).

To determine the physical demands (exertional requirements) of work in the national economy, jobs are classified as sedentary, light, medium, heavy, and very heavy. 20 CFR 416.967. Sedentary work involves lifting of no more than 10 pounds at a time and occasionally lifting or carrying articles like docket files, ledgers, and small tools. 20 CFR 416.967(a). Although a sedentary job is defined as one which involves sitting, a certain amount of walking and standing is often necessary in carrying out job duties. *Id.* Jobs are sedentary if walking and standing are required occasionally and other sedentary criteria are met. Light work involves lifting no more than 20 pounds at a time with frequent lifting or carrying objects weighing up to 10 pounds. 20 CFR 416.967(b). Even though weight lifted may be very little, a job is in this category when it requires a good deal of walking or standing, or when it involves sitting most of the time with some pushing and pulling of arm or leg controls. *Id.* To be considered capable of performing a full or wide range of light work, an individual must have the ability to do substantially all of these activities. *Id.* An individual capable of light work is also capable of sedentary work, unless there are additionally limiting factors such as loss of fine dexterity or inability to sit for long periods of time. *Id.* Medium work involves lifting no more than 50 pounds at a time with frequent lifting or carrying of objects weighing up to 25 pounds. 20 CFR 416.967(c). An individual capable of performing medium work is also capable of light and sedentary work. *Id.* Heavy work involves lifting no more than 100 pounds at a time with frequent lifting or carrying of objects weighing up to 50 pounds. 20 CFR 416.967(d). An individual capable of heavy work is also capable of medium, light, and sedentary work. *Id.* Finally, very heavy work involves lifting objects weighing more than 100 pounds at a time with frequent lifting or carrying objects weighing 50 pounds or more. 20 CFR 416.967(e). An individual capable of very heavy work is able to perform work under all categories. *Id.*

Limitations or restrictions which affect the ability to meet the demands of jobs other than strength demands (exertional requirements, i.e. sitting, standing, walking, lifting, carrying, pushing, or pulling) are considered nonexertional. 20 CFR 416.969a(a). In considering whether an individual can perform past relevant work, a comparison of the individual's residual functional capacity with the demands of past relevant work. *Id.* If

an individual can no longer do past relevant work the same residual functional capacity assessment along with an individual's age, education, and work experience is considered to determine whether an individual can adjust to other work which exists in the national economy. *Id.* Examples of non-exertional limitations or restrictions include difficulty to function due to nervousness, anxiousness, or depression; difficulty maintaining attention or concentration; difficulty understanding or remembering detailed instructions; difficulty in seeing or hearing; difficulty tolerating some physical feature(s) of certain work settings (i.e. can't tolerate dust or fumes); or difficulty performing the manipulative or postural functions of some work such as reaching, handling, stooping, climbing, crawling, or crouching. 20 CFR 416.969a(c)(1)(i) – (vi). If the impairment(s) and related symptoms, such as pain, only affect the ability to perform the non-exertional aspects of work-related activities, the rules in Appendix 2 do not direct factual conclusions of disabled or not disabled. 20 CFR 416.969a(c)(2). The determination of whether disability exists is based upon the principles in the appropriate sections of the regulations, giving consideration to the rules for specific case situations in Appendix 2. *Id.*

In this case, the evidence confirms diagnoses for anxiety, depression, personality disorder, alcohol abuse, panic disorder, and low intellectual/cognitive functioning. The Claimant testified that he has no physical limitations. The objective medical evidence does not contain any physical limitations; however, as detailed above, the record shows moderate to severe mental limitations. After review of the entire record and considering the Claimant's testimony, it is found, at this point, that the Claimant maintains the residual functional capacity to perform at least limited, sedentary work as defined by 20 CFR 416.967(a). Limitations being the alternation between sitting and standing at will.

The fourth step in analyzing a disability claim requires an assessment of the Claimant's residual functional capacity ("RFC") and past relevant employment. 20 CFR 416.920(a)(4)(iv). An individual is not disabled if he/she can perform past relevant work. *Id.*; 20 CFR 416.960(b)(3). Past relevant work is work that has been performed within the past 15 years that was a substantial gainful activity and that lasted long enough for the individual to learn the position. 20 CFR 416.960(b)(1). Vocational factors of age, education, and work experience, and whether the past relevant employment exists in significant numbers in the national economy is not considered. 20 CFR 416.960(b)(3).

The Claimant's prior employment was in watch sales/repairs and a paper route. In consideration of the Claimant's testimony and Occupational Code, the prior employment in watch sales/repair is classified as semi-skilled, sedentary work while the paper route employment is considered unskilled, light work. If the impairment or combination of impairments does not limit physical or mental ability to do basic work activities, it is not a severe impairment(s) and disability does not exist. 20 CFR 416.920. As noted above, the objective evidence contains no physical limitations but reveals some mental limitations. During the hearing, the Claimant testified that he would be able to work full-

2012-50553/CMM

time repairing watches without issue. In light of the entire record and the Claimant's RFC (see above), it is found that the Claimant is able to perform past relevant work repairing watches. Accordingly, the Claimant is found not disabled at Step 4 with no further analysis required.

DECISION AND ORDER

The Administrative Law Judge, based on the above findings of fact and conclusions of law finds the Claimant not disabled for purposes of the MA-P benefit program.

Accordingly, it is ORDERED:

The Department's determination is AFFIRMED.

Colleen M. Mamelka
Administrative Law Judge
For Maura Corrigan, Director
Department of Human Services

Date Signed: July 31, 2012

Date Mailed: July 31, 2012

NOTICE: Michigan Administrative Hearing System (MAHS) may order a rehearing or reconsideration on either its own motion or at the request of a party within 30 days of the mailing date of this Decision and Order. MAHS will not order a rehearing or reconsideration on the Department's motion where the final decision cannot be implemented within 90 days of the filing of the original request. (60 days for FAP cases)

The Claimant may appeal the Decision and Order to Circuit Court within 30 days of the receipt of the Decision and Order or, if a timely request for rehearing was made, within 30 days of the receipt date of the rehearing decision.

Claimant may request a rehearing or reconsideration for the following reasons:

- A rehearing **MAY** be granted if there is newly discovered evidence that could affect the outcome of the original hearing decision.
- A reconsideration **MAY** be granted for any of the following reasons:

2012-50553/CMM

- misapplication of manual policy or law in the hearing decision,
- typographical errors, mathematical error, or other obvious errors in the hearing decision that effect the substantial rights of the claimant:
- the failure of the ALJ to address other relevant issues in the hearing decision.

Request must be submitted through the local DHS office or directly to MAHS by mail at
Michigan Administrative Hearings
Re consideration/Rehearing Request
