

**STATE OF MICHIGAN
MICHIGAN ADMINISTRATIVE HEARING SYSTEM
ADMINISTRATIVE HEARINGS FOR THE
DEPARTMENT OF HUMAN SERVICES**

IN THE MATTER OF:

[REDACTED]

Reg. No.: 2013-48994
Issue No.: 2009
Case No.: [REDACTED]
Hearing Date: September 19, 2013
County: Jackson

ADMINISTRATIVE LAW JUDGE: Vicki L. Armstrong

HEARING DECISION

Following Claimant's request for a hearing, this matter is before the undersigned Administrative Law Judge pursuant to MCL 400.9 and 400.37; 42 CFR 431.200 to 431.250; and 45 CFR 205.10. After due notice, an in-person hearing was held on September 19, 2013, at the Jackson County DHS office. Claimant, represented by Mr. [REDACTED], of [REDACTED], appeared and testified. Participants on behalf of the Department of Human Services (Department) included Assistance Payment Supervisor and Eligibility Specialist [REDACTED].

During the hearing, Claimant waived the time period for the issuance of this decision in order to allow for the submission of additional medical evidence. The new evidence was forwarded to the State Hearing Review Team ("SHRT") for consideration. On October 30, 2013, the SHRT found Claimant was not disabled. This matter is now before the undersigned for a final decision.

ISSUE

Whether the Department of Human Services (the department) properly denied Claimant's application for Medical Assistance (MA-P) and Retroactive Medical Assistance (Retro-MA) benefits?

FINDINGS OF FACT

The Administrative Law Judge, based upon the competent, material and substantial evidence on the whole record, finds as material fact:

- (1) On December 7, 2012, Claimant filed an application for MA and Retro-MA benefits alleging disability.
- (2) On February 21, 2013, the Medical Review Team (MRT) denied Claimant's application for MA-P and Retro-MA indicating that Claimant

was capable of other work based on his non-exertional impairment. (Depart Ex. A, pp 175-176).

- (3) On February 27, 2013, the department sent out notice to Claimant that his application for Medicaid had been denied.
- (4) On May 22, 2013, Claimant filed a request for a hearing to contest the department's negative action.
- (5) On July 30, 2013, the State Hearing Review Team (SHRT) upheld the denial of MA-P and Retro-MA benefits indicating the medical evidence of record indicates Claimant retains the capacity to perform wide range of medium work. (Depart Ex. B).
- (6) Claimant has a history of a swollen right leg, obesity, hypertension, diabetes, pneumonia and chronic obstructive pulmonary disease (COPD).
- (7) Claimant is a 45 year old man whose birthday is [REDACTED] Claimant is 6'1" tall and weighs 410 lbs. Claimant completed high school and last worked in February, 2012, as a carpenter.
- (8) Claimant was appealing the denial of Social Security disability benefits at the time of the hearing.

CONCLUSIONS OF LAW

The Medical Assistance (MA) program is established by Subchapter XIX of Chapter 7 of The Public Health & Welfare Act, 42 USC 1397, and is administered by the Department, (DHS or department), pursuant to MCL 400.10 *et seq.* and MCL 400.105. Department policies are found in the Bridges Administrative Manual (BAM), the Bridges Eligibility Manual (BEM), and the Reference Tables Manual (RFT).

Disability is defined as the inability to do any substantial gainful activity by reason of any medically determinable physical or mental impairment which can be expected to result in death or which has lasted or can be expected to last for a continuous period of not less than 12 months. 20 CFR 416.905(a). The person claiming a physical or mental disability has the burden to establish it through the use of competent medical evidence from qualified medical sources such as his or her medical history, clinical/laboratory findings, diagnosis/prescribed treatment, prognosis for recovery and/or medical assessment of ability to do work-related activities or ability to reason and make appropriate mental adjustments, if a mental disability is alleged. 20 CFR 413.913. An individual's subjective pain complaints are not, in and of themselves, sufficient to establish disability. 20 CFR 416.908; 20 CFR 416.929(a). Similarly, conclusory statements by a physician or mental health professional that an individual is disabled or blind, absent supporting medical evidence, is insufficient to establish disability. 20 CFR 416.927.

When determining disability, the federal regulations require several factors to be considered including: (1) the location/duration/frequency/intensity of an applicant's pain; (2) the type/dosage/effectiveness/side effects of any medication the applicant takes to relieve pain; (3) any treatment other than pain medication that the applicant has received to relieve pain; and, (4) the effect of the applicant's pain on his or her ability to do basic work activities. 20 CFR 416.929(c)(3). The applicant's pain must be assessed to determine the extent of his or her functional limitation(s) in light of the objective medical evidence presented. 20 CFR 416.929(c)(2).

In order to determine whether or not an individual is disabled, federal regulations require a five-step sequential evaluation process be utilized. 20 CFR 416.920(a)(1). The five-step analysis requires the trier of fact to consider an individual's current work activity; the severity of the impairment(s) both in duration and whether it meets or equals a listed impairment in Appendix 1; residual functional capacity to determine whether an individual can perform past relevant work; and residual functional capacity along with vocational factors (e.g., age, education, and work experience) to determine if an individual can adjust to other work. 20 CFR 416.920(a)(4); 20 CFR 416.945.

If an individual is found disabled, or not disabled, at any step, a determination or decision is made with no need to evaluate subsequent steps. 20 CFR 416.920(a)(4). If a determination cannot be made that an individual is disabled, or not disabled, at a particular step, the next step is required. 20 CFR 416.920(a)(4). If an impairment does not meet or equal a listed impairment, an individual's residual functional capacity is assessed before moving from Step 3 to Step 4. 20 CFR 416.920(a)(4); 20 CFR 416.945. Residual functional capacity is the most an individual can do despite the limitations based on all relevant evidence. 20 CFR 945(a)(1). An individual's residual functional capacity assessment is evaluated at both Steps 4 and 5. 20 CFR 416.920(a)(4). In determining disability, an individual's functional capacity to perform basic work activities is evaluated and if found that the individual has the ability to perform basic work activities without significant limitation, disability will not be found. 20 CFR 416.994(b)(1)(iv). In general, the individual has the responsibility to prove disability. 20 CFR 416.912(a). An impairment or combination of impairments is not severe if it does not significantly limit an individual's physical or mental ability to do basic work activities. 20 CFR 416.921(a). The individual has the responsibility to provide evidence of prior work experience; efforts to work; and any other factor showing how the impairment affects the ability to work. 20 CFR 416.912(c)(3)(5)(6).

As outlined above, the first step looks at the individual's current work activity. In the record presented, Claimant is not involved in substantial gainful activity and testified that he has not worked since February, 2012. Therefore, he is not disqualified from receiving disability benefits under Step 1.

The severity of the individual's alleged impairment(s) is considered under Step 2. The individual bears the burden to present sufficient objective medical evidence to substantiate the alleged disabling impairments. In order to be considered disabled for

MA purposes, the impairment must be severe. 20 CFR 916.920(a)(4)(ii); 20 CFR 916.920(b). An impairment, or combination of impairments, is severe if it significantly limits an individual's physical or mental ability to do basic work activities regardless of age, education and work experience. 20 CFR 916.920(a)(4)(ii); 20 CFR 916.920(c). Basic work activities means the abilities and aptitudes necessary to do most jobs. 20 CFR 916.921(b). Examples include:

1. Physical functions such as walking, standing, sitting, lifting, pushing, pulling, reaching, carrying, or handling;
2. Capacities for seeing, hearing, and speaking;
3. Understanding, carrying out, and remembering simple instructions;
4. Use of judgment;
5. Responding appropriately to supervision, co-workers and usual work situations; and
6. Dealing with changes in a routine work setting. *Id.*

The second step allows for dismissal of a disability claim obviously lacking in medical merit. *Higgs v Bowen*, 880 F2d 860, 862 (CA 6, 1988). The severity requirement may still be employed as an administrative convenience to screen out claims that are totally groundless solely from a medical standpoint. *Id.* at 863 citing *Farris v Sec of Health and Human Services*, 773 F2d 85, 90 n.1 (CA 6, 1985). An impairment qualifies as non-severe only if, regardless of a claimant's age, education, or work experience, the impairment would not affect the claimant's ability to work. *Salmi v Sec of Health and Human Services*, 774 F2d 685, 692 (CA 6, 1985).

In the present case, Claimant alleges disability due to a swollen right leg, obesity, hypertension, diabetes, pneumonia and chronic obstructive pulmonary disease (COPD).

In September, 2012, Claimant presented to the emergency department with chest pain. His initial studies in the ED did not reveal any evidence of myocardial ischemia. He was admitted to the hospital for observation and a cardiology consult and stress test were obtained. There were no findings to suggest myocardial infarction, pulmonary embolus, pneumothorax, pneumonia, pericarditis, esophageal rupture, pericardial effusion, aortic aneurysm, aortic dissection, or other serious intrathoracic to cause his symptoms. He has some history of food intolerance, suggesting a possible gastrointestinal origin. He was discharged the following day in stable condition with a diagnosis of noncardiac resolved chest pain, morbid obesity and tobacco abuse.

In March, 2013, Claimant underwent a Medical Evaluation and an Adult Mental Status Examination by the [REDACTED]. Diagnosis: Axis I: Adjustment Disorder with mixed anxiety and depressed mood; Nicotine dependence; Axis II: No diagnosis; Axis III: Back pain, COPD, hypertension, cardiac, status post surgeries on right leg, diabetes mellitus, obesity; Axis IV: Unemployed, health; Axis V: Current GAF=55. The examining psychologist opined that Claimant's problems are mainly physical impairments that have impeded his ability to function. He has had two work-related injuries and a number of surgeries on his right leg. He also has cardiac issues. Claimant's chief complaints during the medical evaluation were a broken right leg and heart issues. Claimant did not have any neurological impairment. His right leg did appear relatively stable with no findings of neuropathy or weakness. He may have some underlying facet arthropathy in the lumbar spine but no active radicular symptoms. This does appear to be compounded from his weight gain that he sustained over the past year. Pool therapy, cardio aerobic activity and weight reduction would be helpful to avoid any further deterioration as he did appear to be moderately deconditioned. There is no evidence of joint laxity, crepitance, or effusion. There is lumbar spine straightening. Grip strength remains intact. Dexterity is unimpaired. He could tie and button clothing and open a door. He had no difficulty getting on or off the examination table or heel and toe walking. He had mild difficulty squatting and standing on either foot. His shortness of breath appears related to his weight gain. He did have some bronchogenic breath sounds and has had a history of tobacco use. He did not appear dyspneic. There are no findings of heart failure. His blood pressure is mildly elevated. He states he thinks he may have had a myocardial infarction in the past and did have a stress test. An x-ray could not be performed due to table limit. Claimant underwent a pulmonary function test. His Forced Expiratory Volume (FEV1) was 2.10, 2.20 and 2.09 before bronchodilator and 1.54, 1.61 and 1.47 after bronchodilator. Claimant is 73 inches tall. His Forced Vital Capacity (FVC) was 3.59, 3.27 and 3.09 before bronchodilator and 3.12, 2.80 and 2.93 after bronchodilator.

In May, 2013, Claimant presented to the hospital for respiratory failure. He has a past medical history of multilobar pneumonia requiring prolonged respiratory ambulatory support and acute respiratory distress syndrome (ARDS) in 2009. An ultrasound was negative for deep vein thrombosis in bilateral lower extremities. A transthoracic echocardiogram revealed normal left ventricular ejection fraction and a grossly normal echocardiogram. After nine days, Claimant was discharged in stable condition with a diagnosis of acute respiratory failure due to hypercapnia, sepsis due to pneumonia, haemophilus influenza pneumonia, chronic obstructive pulmonary disease (COPD), acute renal failure status post improvement, obstructive sleep apnea, severe obesity, hypertension and a resolved atrial flutter.

As previously noted, Claimant bears the burden to present sufficient objective medical evidence to substantiate the alleged disabling impairment(s). As summarized above, the Claimant has presented some limited medical evidence establishing that he does have some physical limitations on his ability to perform basic work activities. The medical evidence has established that Claimant has an impairment, or combination thereof, that has more than a *de minimis* effect on the Claimant's basic work activities.

Further, the impairments have lasted continuously for twelve months; therefore, Claimant is not disqualified from receipt of MA-P benefits under Step 2.

In the third step of the sequential analysis of a disability claim, the trier of fact must determine if the individual's impairment, or combination of impairments, is listed in Appendix 1 of Subpart P of 20 CFR, Part 404. Claimant has alleged physical disabling impairments due to a swollen right leg, obesity, hypertension, diabetes, pneumonia and chronic obstructive pulmonary disease (COPD).

Listing 1.00 (musculoskeletal system), Listing 3.00 (respiratory system), Listing 4.00 (cardiovascular system), Listing 9.00 (endocrine disorders), Listing 11.00 (neurological) and Listing 12.00 (mental disorders) were considered in light of the objective evidence.

To meet Listing 3.02(B) for chronic obstructive pulmonary disease with a height of 73 inches, Claimant's FVC must be equal to or less than 1.82. Here, Claimant's FVC test scores were 3.59, 3.27 and 3.09 before bronchodilator and 3.12, 2.80 and 2.93 after bronchodilator. As a result, Claimant does not meet Listing 3.02(B). To meet Listing 3.02(A), Claimant's FEV1 must be equal to or less than 1.65. As evidenced by his before bronchodilator FEV1 test scores of 2.10, 2.20 and 2.09, and after bronchodilator scores of 1.54, 1.61 and 1.47, Claimant may meet the listing. However, it was noted during the testing that Claimant did not exert his best efforts. Claimant coughed up phlegm and needed to sit down during testing. His weight really limited his ability to put forth effort.

Based on the foregoing, it is found that Claimant's impairment(s) does not meet the intent and severity requirement of a listed impairment; therefore, Claimant cannot be found disabled, or not disabled, at Step 3. Accordingly, Claimant's eligibility is considered under Step 4. 20 CFR 416.905(a).

The fourth step in analyzing a disability claim requires an assessment of the individual's residual functional capacity ("RFC") and past relevant employment. 20 CFR 416.920(a)(4)(iv). An individual is not disabled if he/she can perform past relevant work. *Id.*; 20 CFR 416.960(b)(3). Past relevant work is work that has been performed within the past 15 years that was a substantial gainful activity and that lasted long enough for the individual to learn the position. 20 CFR 416.960(b)(1). Vocational factors of age, education, and work experience, and whether the past relevant employment exists in significant numbers in the national economy are not considered. 20 CFR 416.960(b)(3). RFC is assessed based on impairment(s) and any related symptoms, such as pain, which may cause physical and mental limitations that affect what can be done in a work setting. RFC is the most that can be done, despite the limitations.

To determine the physical demands (exertional requirements) of work in the national economy, jobs are classified as sedentary, light, medium, heavy, and very heavy. 20 CFR 416.967. Sedentary work involves lifting of no more than 10 pounds at a time and occasionally lifting or carrying articles like docket files, ledgers, and small tools. 20 CFR 416.967(a). Although a sedentary job is defined as one which involves sitting, a certain

amount of walking and standing is often necessary in carrying out job duties. *Id.* Jobs are sedentary if walking and standing are required occasionally and other sedentary criteria are met. Light work involves lifting no more than 20 pounds at a time with frequent lifting or carrying objects weighing up to 10 pounds. 20 CFR 416.967(b). Even though weight lifted may be very little, a job is in this category when it requires a good deal of walking or standing, or when it involves sitting most of the time with some pushing and pulling of arm or leg controls. *Id.* To be considered capable of performing a full or wide range of light work, an individual must have the ability to do substantially all of these activities. *Id.* An individual capable of light work is also capable of sedentary work, unless there are additional limiting factors such as loss of fine dexterity or inability to sit for long periods of time. *Id.* Medium work involves lifting no more than 50 pounds at a time with frequent lifting or carrying of objects weighing up to 25 pounds. 20 CFR 416.967(c). An individual capable of performing medium work is also capable of light and sedentary work. *Id.* Heavy work involves lifting no more than 100 pounds at a time with frequent lifting or carrying of objects weighing up to 50 pounds. 20 CFR 416.967(d). An individual capable of heavy work is also capable of medium, light, and sedentary work. *Id.* Finally, very heavy work involves lifting objects weighing more than 100 pounds at a time with frequent lifting or carrying objects weighing 50 pounds or more. 20 CFR 416.967(e). An individual capable of very heavy work is able to perform work under all categories. *Id.*

Limitations or restrictions which affect the ability to meet the demands of jobs other than strength demands (exertional requirements, e.g., sitting, standing, walking, lifting, carrying, pushing, or pulling) are considered nonexertional. 20 CFR 416.969a(a). In considering whether an individual can perform past relevant work, a comparison of the individual's residual functional capacity to the demands of past relevant work must be made. *Id.* If an individual can no longer do past relevant work, the same residual functional capacity assessment along with an individual's age, education, and work experience is considered to determine whether an individual can adjust to other work which exists in the national economy. *Id.* Examples of non-exertional limitations or restrictions include difficulty functioning due to nervousness, anxiousness, or depression; difficulty maintaining attention or concentration; difficulty understanding or remembering detailed instructions; difficulty in seeing or hearing; difficulty tolerating some physical feature(s) of certain work settings (e.g., can't tolerate dust or fumes); or difficulty performing the manipulative or postural functions of some work such as reaching, handling, stooping, climbing, crawling, or crouching. 20 CFR 416.969a(c)(1)(i) – (vi). If the impairment(s) and related symptoms, such as pain, only affect the ability to perform the non-exertional aspects of work-related activities, the rules in Appendix 2 do not direct factual conclusions of disabled or not disabled. 20 CFR 416.969a(c)(2). The determination of whether disability exists is based upon the principles in the appropriate sections of the regulations, giving consideration to the rules for specific case situations in Appendix 2. *Id.*

Claimant's prior work history consists of work as a carpenter. In light of Claimant's testimony, and in consideration of the Occupational Code, Claimant's prior work is classified as skilled, medium work.

Claimant testified that he is able to walk short distances and can lift/carry approximately 20 pounds. The objective medical evidence notes no limitations. If the impairment or combination of impairments does not limit an individual's physical or mental ability to do basic work activities, it is not a severe impairment(s) and disability does not exist. 20 CFR 416.920. In consideration of Claimant's testimony, medical records, and current limitations, Claimant cannot be found able to return to past relevant work. Accordingly, Step 5 of the sequential analysis is required.

In Step 5, an assessment of the individual's residual functional capacity and age, education, and work experience is considered to determine whether an adjustment to other work can be made. 20 CFR 416.920(4)(v). At the time of hearing, Claimant was 45 years old and was, thus, considered to be a younger individual for MA-P purposes. Claimant has a high school degree and is a carpenter. Disability is found if an individual is unable to adjust to other work. *Id.* At this point in the analysis, the burden shifts from the Claimant to the Department to present proof that the Claimant has the residual capacity to substantial gainful employment. 20 CFR 416.960(2); *Richardson v Sec of Health and Human Services*, 735 F2d 962, 964 (CA 6, 1984). While a vocational expert is not required, a finding supported by substantial evidence that the individual has the vocational qualifications to perform specific jobs is needed to meet the burden. *O'Banner v Sec of Health and Human Services*, 587 F2d 321, 323 (CA 6, 1978). Medical-Vocational guidelines found at 20 CFR Subpart P, Appendix II, may be used to satisfy the burden of proving that the individual can perform specific jobs in the national economy. *Heckler v Campbell*, 461 US 458, 467 (1983); *Kirk v Secretary*, 667 F2d 524, 529 (CA 6, 1981) *cert den* 461 US 957 (1983). The age for younger individuals (under 50) generally will not seriously affect the ability to adjust to other work. 20 CFR 416.963(c). Where an individual has an impairment or combination of impairments that results in both strength limitations and non-exertional limitations, the rules in Subpart P are considered in determining whether a finding of disabled may be possible based on the strength limitations alone, and if not, the rule(s) reflecting the individual's maximum residual strength capabilities, age, education, and work experience, provide the framework for consideration of how much an individual's work capability is further diminished in terms of any type of jobs that would contradict the non-limitations. Full consideration must be given to all relevant facts of a case in accordance with the definitions of each factor to provide adjudicative weight for each factor.

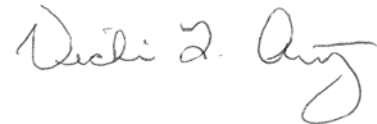

In this case, the evidence reveals that Claimant suffers from a swollen right leg, obesity, hypertension, diabetes, pneumonia and chronic obstructive pulmonary disease (COPD). The objective medical evidence notes no limitations. In light of the foregoing, it is found that Claimant maintains the residual functional capacity for work activities on a regular and continuing basis which includes the ability to meet the physical and mental demands required to perform at least light work as defined in 20 CFR 416.967(b). After review of the entire record using the Medical-Vocational Guidelines [20 CFR 404, Subpart P, Appendix II] as a guide, specifically Rule 202.21, it is found that Claimant is not disabled for purposes of the MA-P program at Step 5.

DECISION AND ORDER

The Administrative Law Judge, based on the above findings of fact and conclusions of law, finds Claimant not disabled for purposes of the MA-P benefit programs.

Accordingly, it is ORDERED:

The Department's determination is **AFFIRMED**.

Vicki L. Armstrong
Administrative Law Judge
for Maura D. Corrigan, Director
Department of Human Services

Date Signed: November 12, 2013

Date Mailed: November 12, 2013

NOTICE OF AP PEAL: The claimant may appeal the Decision and Order to Circuit Court within 30 days of the receipt of the Decision and Order or, if a timely Request for Rehearing or Reconsideration was made, within 30 days of the receipt date of the Decision and Order of Reconsideration or Rehearing Decision.

Michigan Administrative Hearing System (MAHS) may order a rehearing or reconsideration on either its own motion or at the request of a party within 30 days of the mailing date of this Decision and Order. MAHS will not order a rehearing or reconsideration on the Department's motion where the final decision cannot be implemented within 90 days of the filing of the original request (60 days for FAP cases).

A Request for Rehearing or Reconsideration may be granted when one of the following exists:

- Newly discovered evidence that existed at the time of the original hearing that could affect the outcome of the original hearing decision;
- Misapplication of manual policy or law in the hearing decision which led to a wrong conclusion;
- Typographical, mathematical or other obvious error in the hearing decision that affects the rights of the client;
- Failure of the ALJ to address in the hearing decision relevant issues raised in the hearing request.

2013-48994/VLA

The Department, AHR or the claimant must specify all reasons for the request. MAHS will not review any response to a request for rehearing/reconsideration. A request must be *received* in MAHS within 30 days of the date the hearing decision is mailed.

The written request must be faxed to (517) 335-6088 and be labeled as follows:

Attention: MAHS Rehearing/Reconsideration Request

If submitted by mail, the written request must be addressed as follows:

Michigan Administrative Hearings
Reconsideration/Rehearing Request
P.O. Box 30639
Lansing, Michigan 48909-07322
