

**STATE OF MICHIGAN
MICHIGAN ADMINISTRATIVE HEARING SYSTEM
ADMINISTRATIVE HEARINGS FOR THE
DEPARTMENT OF HUMAN SERVICES**

IN THE MATTER OF:

[REDACTED]

Reg. No.: 2014-8237
Issue No(s): 2009
Case No.: [REDACTED]
Hearing Date: February 27, 2014
County: Genesee County DHS #2

ADMINISTRATIVE LAW JUDGE: Colleen Lack

HEARING DECISION

Following Claimant's request for a hearing, this matter is before the undersigned Administrative Law Judge pursuant to MCL 400.9 and 400.37; 42 CFR 431.200 to 431.250; and 45 CFR 205.10. After due notice, a telephone hearing was held on February 27, 2014, from Lansing, Michigan. Participants on behalf of Claimant included [REDACTED], the Claimant, and [REDACTED], Authorized Hearing Representative. Participants on behalf of the Department of Human Services (Department) included [REDACTED], Assistance Payments Worker.

During the hearing, Claimant waived the time period for the issuance of this decision, in order to allow for the submission of additional medical evidence. The evidence was received, reviewed, and forwarded to the State Hearing Review Team ("SHRT") for consideration. The SHRT found Claimant not disabled. This matter is now before the undersigned for a final determination.

ISSUE

Whether the Department properly determined that Claimant was not disabled for purposes of the Medical Assistance (MA) benefit program?

FINDINGS OF FACT

The Administrative Law Judge, based on the competent, material, and substantial evidence on the whole record, finds as material fact:

1. On December 28, 2012, Claimant applied for Medicaid (MA-P) and retroactive MA-P.
2. On July 19, 2013, the Medical Review Team (MRT) found Claimant not disabled.
3. On July 26, 2013, the Department notified Claimant of the MRT determination.

4. On October 24, 2013, the Department received Claimant's timely written request for hearing.
5. On January 23, 2014, and June 3, 2014, the State Hearing Review Team (SHRT) found Claimant not disabled.
6. Claimant alleged no physical disabling impairments.
7. Claimant alleged mental disabling impairments from stroke including: mood swings, frustration and poor memory.
8. At the time of hearing, Claimant was 57 years old with a [REDACTED] birth date; was 6' in height; and did not know his weight.
9. Claimant has an 11th grade education and work history as a live in caregiver and security work.
10. Claimant's impairments have lasted, or are expected to last, continuously for a period of 12 months or longer.

CONCLUSIONS OF LAW

Department policies are contained in the Department of Human Services Bridges Administrative Manual (BAM), Department of Human Services Bridges Eligibility Manual (BEM), and Department of Human Services Reference Tables Manual (RFT).

The Medical Assistance (MA) program is established by Title XIX of the Social Security Act, 42 USC 1396-1396w-5; 42 USC 1315; the Affordable Care Act of 2010, the collective term for the Patient Protection and Affordable Care Act, Pub. L. No. 111-148, as amended by the Health Care and Education Reconciliation Act of 2010, Pub. L. No. 111-152; and 42 CFR 430.10-.25. The Department (formerly known as the Family Independence Agency) administers the MA program pursuant to 42 CFR 435, MCL 400.10, and MCL 400.105-.112k.

Disability is defined as the inability to do any substantial gainful activity by reason of any medically determinable physical or mental impairment which can be expected to result in death or which has lasted or can be expected to last for a continuous period of not less than 12 months. 20 CFR 416.905(a). The person claiming a physical or mental disability has the burden to establish it through the use of competent medical evidence from qualified medical sources such as his or her medical history, clinical/laboratory findings, diagnosis/prescribed treatment, prognosis for recovery and/or medical assessment of ability to do work-related activities or ability to reason and make appropriate mental adjustments, if a mental disability is alleged. 20 CFR 416.913. An individual's subjective pain complaints are not, in and of themselves, sufficient to establish disability. 20 CFR 416.908; 20 CFR 416.929(a). Similarly, conclusory statements by a physician or mental health professional that an individual is disabled or

blind, absent supporting medical evidence, is insufficient to establish disability. 20 CFR 416.927.

When determining disability, the federal regulations require several factors to be considered including: (1) the location/duration/frequency/intensity of an applicant's pain; (2) the type/dosage/effectiveness/side effects of any medication the applicant takes to relieve pain; (3) any treatment other than pain medication that the applicant has received to relieve pain; and (4) the effect of the applicant's pain on his or her ability to do basic work activities. 20 CFR 416.929(c)(3). The applicant's pain must be assessed to determine the extent of his or her functional limitation(s) in light of the objective medical evidence presented. 20 CFR 416.929(c)(2).

In order to determine whether or not an individual is disabled, federal regulations require a five-step sequential evaluation process be utilized. 20 CFR 416.920(a)(1). The five-step analysis requires the trier of fact to consider an individual's current work activity; the severity of the impairment(s) both in duration and whether it meets or equals a listed impairment in Appendix 1; residual functional capacity to determine whether an individual can perform past relevant work; and residual functional capacity along with vocational factors (i.e. age, education, and work experience) to determine if an individual can adjust to other work. 20 CFR 416.920(a)(4); 20 CFR 416.945.

If an individual is found disabled, or not disabled, at any step, a determination or decision is made with no need evaluate subsequent steps. 20 CFR 416.920(a)(4). If a determination cannot be made that an individual is disabled, or not disabled, at a particular step, the next step is required. 20 CFR 416.920(a)(4). If an impairment does not meet or equal a listed impairment, an individual's residual functional capacity is assessed before moving from step three to step four. 20 CFR 416.920(a)(4); 20 CFR 416.945. Residual functional capacity is the most an individual can do despite the limitations based on all relevant evidence. 20 CFR 416.945(a)(1). An individual's residual functional capacity assessment is evaluated at both steps four and five. 20 CFR 416.920(a)(4). In determining disability, an individual's functional capacity to perform basic work activities is evaluated and if found that the individual has the ability to perform basic work activities without significant limitation, disability will not be found. 20 CFR 416.994(b)(1)(iv). In general, the individual has the responsibility to prove disability. 20 CFR 416.912(a). An impairment or combination of impairments is not severe if it does not significantly limit an individual's physical or mental ability to do basic work activities. 20 CFR 416.921(a). The individual has the responsibility to provide evidence of prior work experience; efforts to work; and any other factor showing how the impairment affects the ability to work. 20 CFR 416.912(c)(3)(5)(6).

As outlined above, the first step looks at the individual's current work activity. In the record presented, the Claimant has been working as a live in caregiver for many years. However, the pay of \$658.19 per month is not sufficient to be considered substantial gainful activity. Therefore, Claimant is not ineligible for disability benefits under Step 1.

The severity of the Claimant's alleged impairment(s) is considered under Step 2. The Claimant bears the burden to present sufficient objective medical evidence to substantiate the alleged disabling impairments. In order to be considered disabled for MA purposes, the impairment must be severe. 20 CFR 416.920(a)(4)(ii); 20 CFR 416.920(b). An impairment, or combination of impairments, is severe if it significantly limits an individual's physical or mental ability to do basic work activities regardless of age, education and work experience. 20 CFR 416.920(a)(4)(ii); 20 CFR 416.920(c). Basic work activities means the abilities and aptitudes necessary to do most jobs. 20 CFR 416.921(b). Examples include:

1. Physical functions such as walking, standing, sitting, lifting, pushing, pulling, reaching, carrying, or handling;
2. Capacities for seeing, hearing, and speaking;
3. Understanding, carrying out, and remembering simple instructions;
4. Use of judgment;
5. Responding appropriately to supervision, co-workers and usual work situations; and
6. Dealing with changes in a routine work setting.

Id.

The second step allows for dismissal of a disability claim obviously lacking in medical merit. *Higgs v Bowen*, 880 F2d 860, 862 (CA 6, 1988). The severity requirement may still be employed as an administrative convenience to screen out claims that are totally groundless solely from a medical standpoint. *Id.* at 863 citing *Farris v Sec of Health and Human Services*, 773 F2d 85, 90 n.1 (CA 6, 1985). An impairment qualifies as non-severe only if, regardless of a Claimant's age, education, or work experience, the impairment would not affect the Claimant's ability to work. *Salmi v Sec of Health and Human Services*, 774 F2d 685, 692 (CA 6, 1985).

In the present case, Claimant alleges disability due to mental impairments from stroke including: mood swings, frustration and poor memory. While some older medical records were also submitted, the focus of this analysis will be on the more recent medical evidence.

Claimant was hospitalized September 29-30, 2012 for subcortical infarct, stroke, cocaine abuse and sinus bradycardia.

On February 5, 2013, Claimant started with an internal medicine doctor. Assessment indicated stroke, hyperlipidemia and tobacco abuse. On March 14, 2014, the doctor

completed a DHS-49 Medial Examination Report listing diagnoses of stroke and hyperlipidemia. All exam findings were normal. Physical limitations included lifting less than 10 pounds frequently and up to 25 pounds occasionally as well as standing and/or walking up to 6 hours in an 8 hour work day. It was marked that Claimant has no mental limitations. On March 20, 2013, Claimant followed up with the doctor for a routine physical. Assessment included hyperlipidemia, mood disorder, overweight, tobacco abuse and recent TIA.

On May 16, 2013, Claimant attended a consultative internal medicine examination. Claimant's physical exam was entirely within normal limits and he was noted to be in very good shape for his age. It was noted that Claimant has no physical limitations and there was no impairment on his ability to perform work related activities. Rather, Claimant had concerns that new emotional problems since his September 2012 stroke may affect his ability to continue as a live-in caregiver for a disabled woman.

On June 13, 2013, Claimant attended a consultative psychological examination. Diagnoses were mood disorder due to stroke (irritability) and history of cocaine and alcohol abuse. Claimant's Global Assessment of Functioning (GAF) was 61. The examiner's impression was that Claimant's mental abilities to understand, attend to, remember, and carry out instructions related to work-related behaviors are not overly impaired, Claimant seemed capable of maintaining unskilled work-related behaviors, and there was mild impairment of Claimant's ability to respond appropriately to co-workers and supervision and adapt to change and stress in the workplace. Ongoing marijuana use since age 12 was also noted.

Claimant was hospitalized from October 3, 2013 through October 5, 2013 for syncope. A CT of the head showed an old right occipital infarct. Carotid Doppler and EEG testing were normal. The echocardiogram report indicates heart damage consistent with previous infarct. Other records document the echocardiogram ejection fraction was 39%. The records note Claimant has a pervious history of stroke, hypertension and diabetes mellitus but was not taking his medications, was non-compliant and had not been following up with his primary care doctor. Claimant was started on medications and discharged with prescriptions. Tobacco and marijuana use daily were noted.

On October 21, 2013, Claimant attended a follow up appointment with his internal medicine doctor. Claimant had not had any problems with his medications, blood pressure was controlled and blood sugar readings were also better.

Claimant failed to re-schedule the consultative Mental Status Exam the Department scheduled for him pursuant to the Interim Order Extending the Record.

As previously noted, Claimant bears the burden to present sufficient objective medical evidence to substantiate the alleged disabling impairment(s). As summarized above, Claimant has presented some medical evidence establishing that he does have some limitations on his ability to perform basic work activities. The medical evidence has established that the Claimant has an impairment, or combination thereof, that has more

than a *de minimis* effect on the Claimant's basic work activities. Further, the impairments have lasted continuously for twelve months; therefore, the Claimant is not disqualified from receipt of MA-P benefits under Step 2.

In the third step of the sequential analysis of a disability claim, the trier of fact must determine if the Claimant's impairment, or combination of impairments, is listed in Appendix 1 of Subpart P of 20 CFR, Part 404. The evidence confirms recent diagnosis and treatment of stroke, hypertension, hyperlipidemia, diabetes, and mood disorder.

Listings 4.00 Cardiovascular System and 12.00 Mental Disorders were considered based on the objective medical evidence. However, the medical evidence was not sufficient to meet the intent and severity requirements of these or any other listing, or its equivalent. Accordingly, the Claimant cannot be found disabled, or not disabled, at Step 3; therefore, the Claimant's eligibility is considered under Step 4. 20 CFR 416.905(a).

Before considering the fourth step in the sequential analysis, a determination of the individual's residual functional capacity ("RFC") is made. 20 CFR 416.945. An individual's RFC is the most he/she can still do on a sustained basis despite the limitations from the impairment(s). *Id.* The total limiting effects of all the impairments, to include those that are not severe, are considered. 20 CFR 416.945(e).

To determine the physical demands (exertional requirements) of work in the national economy, jobs are classified as sedentary, light, medium, heavy, and very heavy. 20 CFR 416.967. Sedentary work involves lifting of no more than 10 pounds at a time and occasionally lifting or carrying articles like docket files, ledgers, and small tools. 20 CFR 416.967(a). Although a sedentary job is defined as one which involves sitting, a certain amount of walking and standing is often necessary in carrying out job duties. *Id.* Jobs are sedentary if walking and standing are required occasionally and other sedentary criteria are met. Light work involves lifting no more than 20 pounds at a time with frequent lifting or carrying objects weighing up to 10 pounds. 20 CFR 416.967(b). Even though weight lifted may be very little, a job is in this category when it requires a good deal of walking or standing, or when it involves sitting most of the time with some pushing and pulling of arm or leg controls. *Id.* To be considered capable of performing a full or wide range of light work, an individual must have the ability to do substantially all of these activities. *Id.* An individual capable of light work is also capable of sedentary work, unless there are additionally limiting factors such as loss of fine dexterity or inability to sit for long periods of time. *Id.* Medium work involves lifting no more than 50 pounds at a time with frequent lifting or carrying of objects weighing up to 25 pounds. 20 CFR 416.967(c). An individual capable of performing medium work is also capable of light and sedentary work. *Id.* Heavy work involves lifting no more than 100 pounds at a time with frequent lifting or carrying of objects weighing up to 50 pounds. 20 CFR 416.967(d). An individual capable of heavy work is also capable of medium, light, and sedentary work. *Id.* Finally, very heavy work involves lifting objects weighing more than 100 pounds at a time with frequent lifting or carrying objects

weighing 50 pounds or more. 20 CFR 416.967(e). An individual capable of very heavy work is able to perform work under all categories. *Id.*

Limitations or restrictions which affect the ability to meet the demands of jobs other than strength demands (exertional requirements, i.e. sitting, standing, walking, lifting, carrying, pushing, or pulling) are considered nonexertional. 20 CFR 416.969a(a). In considering whether an individual can perform past relevant work, a comparison of the individual's residual functional capacity with the demands of past relevant work. *Id.* If an individual can no longer do past relevant work the same residual functional capacity assessment along with an individual's age, education, and work experience is considered to determine whether an individual can adjust to other work which exists in the national economy. *Id.* Examples of non-exertional limitations or restrictions include difficulty to function due to nervousness, anxiousness, or depression; difficulty maintaining attention or concentration; difficulty understanding or remembering detailed instructions; difficulty in seeing or hearing; difficulty tolerating some physical feature(s) of certain work settings (i.e. can't tolerate dust or fumes); or difficulty performing the manipulative or postural functions of some work such as reaching, handling, stooping, climbing, crawling, or crouching. 20 CFR 416.969a(c)(1)(i) – (vi). If the impairment(s) and related symptoms, such as pain, only affect the ability to perform the non-exertional aspects of work-related activities, the rules in Appendix 2 do not direct factual conclusions of disabled or not disabled. 20 CFR 416.969a(c)(2). The determination of whether disability exists is based upon the principles in the appropriate sections of the regulations, giving consideration to the rules for specific case situations in Appendix 2. *Id.*

The evidence confirms recent diagnosis and treatment of stroke, hypertension, hyperlipidemia, diabetes, and mood disorder. Claimant alleges no physical limitations, which is consistent with the May 16, 2013, consultative internal medicine examination report. However, the March 14, 2014, DHS-49 Medial Examination Report indicated Claimant would be limited to light work. Claimant's testimony indicated mental impairments with memory as well as mood swings. However, there is no objective medical evidence of significant memory impairment. Rather, the June 13, 2013, consultative psychological examination report only documented diagnoses of mood disorder due to stroke (irritability) and history of cocaine and alcohol abuse and Claimant's Global Assessment of Functioning (GAF) was 61. Further, the examiner's impression was that Claimant's mental abilities to understand, attend to, remember, and carry out instructions related to work-related behaviors are not overly impaired, Claimant seemed capable of maintaining unskilled work-related behaviors, and there was mild impairment of Claimant's ability to respond appropriately to co-workers and supervision and adapt to change and stress in the workplace. Claimant's testimony regarding his functional limitations and abilities is found partially credible based on the objective medical evidence. After review of the entire record it is found, at this point, that Claimant maintains the residual functional capacity to perform unskilled light work as defined by 20 CFR 416.967(b).

The fourth step in analyzing a disability claim requires an assessment of the Claimant's residual functional capacity ("RFC") and past relevant employment. 20 CFR 416.920(a)(4)(iv). An individual is not disabled if he/she can perform past relevant work. *Id.*; 20 CFR 416.960(b)(3). Past relevant work is work that has been performed within the past 15 years that was a substantial gainful activity and that lasted long enough for the individual to learn the position. 20 CFR 416.960(b)(1). Vocational factors of age, education, and work experience, and whether the past relevant employment exists in significant numbers in the national economy is not considered. 20 CFR 416.960(b)(3).

Claimant's has history of work as a live in caregiver of many years, but the pay is not sufficient to be considered substantial gainful activity. Claimant also worked in security for five years. Claimant described the security work as involving sitting about half the time for writing reports and monitoring as well as half the time standing and walking making patrols. Claimant testified there was no lifting or carrying. The security work is most closely considered light un-skilled work based on the significant amount of time spent standing and walking. As noted above, Claimant's testimony regarding his mental limitations was not fully supported by the objective medical evidence. In light of the entire record and Claimant's RFC (see above), it is found that Claimant is able to perform his past relevant work in security. Accordingly, the Claimant is found not disabled at Step 4.

The Administrative Law Judge, based on the above Findings of Fact and Conclusions of Law, and for the reasons stated on the record, if any, finds Claimant not disabled for purposes of the MA benefit program.

DECISION AND ORDER

Accordingly, the Department's determination is **AFFIRMED**.

Colleen Lack
Administrative Law Judge

Department of Human Services

Date Signed: July 9, 2014

Date Mailed: July 9, 2014

NOTICE OF APPEAL: A party may appeal this Hearing Decision in the circuit court in the county in which he/she resides or has its principal place of business in the State, or the circuit court in Ingham County, within 30 days of the receipt date.

A party may request a rehearing or reconsideration of this Hearing Decision from the Michigan Administrative Hearing System (MAHS) within 30 days of the mailing date of this Hearing Decision, or MAHS may order a rehearing or reconsideration on its own motion.

MAHS may grant a party's Request for Rehearing or Reconsideration when one of the following exists:

- Newly discovered evidence that existed at the time of the original hearing that could affect the outcome of the original hearing decision;
- Misapplication of manual policy or law in the hearing decision which led to a wrong conclusion;
- Typographical, mathematical or other obvious error in the hearing decision that affects the rights of the client;
- Failure of the ALJ to address in the hearing decision relevant issues raised in the hearing request.

The party requesting a rehearing or reconsideration must specify all reasons for the request. MAHS will not review any response to a request for rehearing/reconsideration. A request must be *received* in MAHS within 30 days of the date this Hearing Decision is mailed.

A written request may be faxed or mailed to MAHS. If submitted by fax, the written request must be faxed to (517) 335-6088 and be labeled as follows:

Attention: MAHS Rehearing/Reconsideration Request

If submitted by mail, the written request must be addressed as follows:
