STATE OF MICHIGAN MICHIGAN ADMINISTRATIVE HEARING SYSTEM FOR THE DEPARTMENT OF COMMUNITY HEALTH

P.O. Box 30763, Lansing, MI 48909 (877) 833-0870; Fax: (517) 334-4147

IN THE MATTER OF:

Docket No. 14-011607 CMH Case No.

Appellant

DECISION AND ORDER

This matter is before the undersigned Administrative Law Judge pursuant to MCL 400.9 upon Appellant's request for a hearing.

After due notice, a hearing was held on Appellant's behalf. Appellant's mother, appeared and testified on Appellant's behalf. Supports Coordinator, appeared as a witness for Appellant.

, Assistant Corporation Counsel, represented County Community Mental Health Authority (CMH or Department).

ISSUE

Did the CMH properly reduce Appellant's Community Living Supports (CLS) hours from 21 to 6 hours per week?

FINDINGS OF FACT

The Administrative Law Judge, based upon the competent, material and substantial evidence on the whole record, finds as material fact:

- 1. Appellant is a year old Medicaid beneficiary, born cereiving services through County Community Mental Health (CMH). (Exhibit A, p 21; Testimony)
- CMH is under contract with the Department of Community Health (MDCH) to provide Medicaid covered services to people who reside in the CMH service area. (Testimony)
- 2. Appellant is diagnosed with Edward's Syndrome and Mental Retardation, Severity Unspecified, and she has a Seizure Disorder. (Exhibit A, p 40,

30; Testimony)

- 3. Appellant lives in a private residence with her mother and four siblings. Appellant's parents are divorced and her father is not involved in her life. Appellant is non-ambulatory but is able to get around the home by scooting on the floor. Appellant requires complete physical assistance with almost all of her Activities of Daily Living (ADL's) and Instrumental Activities of Daily Living (IADL's). (Exhibit A, pp 21, 23, 28; Testimony)
- 4. Appellant attends in the Severely Multiply Impaired (SXI) program. Appellant receives physical therapy, occupational therapy, and speech and language therapy in a group setting at school. (Exhibit A, p 29; Testimony)
- 5. Appellant has been receiving support coordination services through CMH for the past seven years. Appellant currently receives CLS services, respite services and supports coordination. (Exhibit A; p 42; Testimony)
- 6. The goals in Appellant's most recent Person Centered Plan (PCP) are as follows:

 - B. **Barrier** agrees to be provided with training from CLS staff on brushing her teeth with hand over hand assistance to put toothpaste on toothbrush and brush teeth with 5 or less verbal prompts.
 - C. agrees to be provided with training from CLS staff with brushing her hair, 5x a week, with 3 or less verbal prompts.
 - D. agrees to be provided with training from CLS staff on feeding herself including loading the silverware and moving the silverware to her mouth with 5 or less verbal prompts.
 - E. agrees to work on her OT/PT/SLP therapy home exercise plans with assistance from CLS staff daily with 3 or less verbal prompts.
 - F. agrees to be integrated into the community with CLS staff 4x per week for at least 30 minutes. (Exhibit A, pp 44-57; Testimony)
- 7. The objectives in Appellant's most recent PCP are the same as were included in Appellant's PCP and her PCP. (Exhibit A, pp 58-60; Testimony)

- 8. On second a period of a reduction in her CLS hours from 21 to 6 hours per week. The reason for the action was, "CLS effective for community inclusion because interventions have not resolved the same objectives outlined within the PCP effective that have been in place since at least second." (Exhibit A, pp 6-10)
- 9. Appellant's request for a hearing was received by the Michigan Administrative Hearing System on the second seco

CONCLUSIONS OF LAW

The Medical Assistance Program is established pursuant to Title XIX of the Social Security Act and is implemented by Title 42 of the Code of Federal Regulations (CFR). It is administered in accordance with state statute, the Social Welfare Act, the Administrative Code, and the State Plan under Title XIX of the Social Security Act Medical Assistance Program.

Title XIX of the Social Security Act, enacted in 1965, authorizes Federal grants to States for medical assistance to low-income persons who are age 65 or over, blind, disabled, or members of families with dependent children or qualified pregnant women or children. The program is jointly financed by the Federal and State governments and administered by States. Within broad Federal rules, each State decides eligible groups, types and range of services, payment levels for services, and administrative and operating procedures. Payments for services are made directly by the State to the individuals or entities that furnish the services.

42 CFR 430.0

The State plan is a comprehensive written statement submitted by the agency describing the nature and scope of its Medicaid program and giving assurance that it will be administered in conformity with the specific requirements of title XIX, the regulations in this Chapter IV, and other applicable official issuances of the Department. The State plan contains all information necessary for CMS to determine whether the plan can be approved to serve as a basis for Federal financial participation (FFP) in the State program.

42 CFR 430.10

Section 1915(b) of the Social Security Act provides:

The Secretary, to the extent he finds it to be cost-effective and efficient and not inconsistent with the purposes of this subchapter, may waive such requirements of section 1396a of this title (other than subsection(s) of this section) (other than sections 1396a(a)(15), 1396a(bb), and 1396a(a)(10)(A) of this title insofar as it requires provision of the care and services described in section 1396d(a)(2)(C) of this title) as may be necessary for a State...

The State of Michigan has opted to simultaneously utilize the authorities of the 1915(b) and 1915(c) programs to provide a continuum of services to disabled and/or elderly populations. Under approval from the Centers for Medicare and Medicaid Services (CMS) the Department of Community Health (MDCH) operates a section 1915(b) and 1915(c) Medicaid Managed Specialty Services and Support program waiver. CMH contracts with the Michigan Department of Community Health to provide services under the waiver pursuant to its contract obligations with the Department.

Medicaid beneficiaries are entitled to medically necessary Medicaid covered services for which they are eligible. Services must be provided in the appropriate scope, duration, and intensity to reasonably achieve the purpose of the covered service. See 42 CFR 440.230.

The CMH is mandated by federal regulation to perform an assessment for the Appellant to determine what Medicaid services are medically necessary and determine the amount or level of the Medicaid medically necessary services.

The *Medicaid Provider Manual, Mental Health/Substance Abuse,* section articulates Medicaid policy for Michigan. It states, in relevant part:

17.2 CRITERIA FOR AUTHORIZING B3 SUPPORTS AND SERVICES

The authorization and use of Medicaid funds for any of the B3 supports and services, as well as their amount, scope and duration, are dependent upon:

- The Medicaid beneficiary's eligibility for specialty services and supports as defined in this Chapter; and
- The service(s) having been identified during person-centered planning; and
- The service(s) being medically necessary as defined in the Medical Necessity Criteria subsection of this chapter; and

- The service(s) being expected to achieve one or more of the above-listed goals as identified in the beneficiary's plan of service; and
- Additional criteria indicated in certain B3 service definitions, as applicable.

Decisions regarding the authorization of a B3 service (including the amount, scope and duration) must take into account the PIHP's documented capacity to reasonably and equitably serve other Medicaid beneficiaries who also have needs for these services. The B3 supports and services are not intended to meet all the individual's needs and preferences, as some needs may be better met by community and other natural supports. Natural supports mean unpaid assistance provided to the beneficiary by people in his/her network (family, friends, neighbors, community volunteers) who are willing and able to provide such assistance. It is reasonable to expect that parents of minor children with disabilities will provide the same level of care they would provide to their children without disabilities. MDCH encourages the use of natural supports to assist in meeting an individual's needs to the extent that the family or friends who provide the natural supports are willing and able to provide this assistance. PIHPs may not require a beneficiary's natural support network to provide such assistance as a condition for receiving specialty mental health supports and services. The use of natural supports must be documented in the beneficiary's individual plan of service.

Provider qualifications and service locations that are not otherwise identified in this section must meet the requirements identified in the General Information and Program Requirement sections of this chapter.

17.3.B. COMMUNITY LIVING SUPPORTS

Community Living Supports are used to increase or maintain personal self-sufficiency, facilitating an individual's achievement of his goals of community inclusion and participation, independence or productivity. The supports may be provided in the participant's residence or in community settings (including, but not limited to, libraries, city pools, camps, etc.).

Coverage includes:

- Assisting, (that exceeds state plan for adults) prompting, reminding, cueing, observing, guiding and/or training in the following activities:
 - meal preparation

- laundry
- routine, seasonal, and heavy household care and maintenance
- activities of daily living (e.g., bathing, eating, dressing, personal hygiene)
- shopping for food and other necessities of daily living

CLS services may not supplant state plan services, e.g., Personal Care (assistance with ADLs in a certified specialized residential setting) and Home Help or Expanded Home Help (assistance in the individual's own, unlicensed home with meal preparation, laundry, routine household care and maintenance, activities of daily living and shopping). If such assistance is needed, the beneficiary, with the help of the PIHP case manager or supports coordinator must request Home Help and, if necessary, Expanded Home Help from the Department of Human Services (DHS). CLS may be used for those activities while the beneficiary awaits determination by DHS of the amount, scope and duration of Home Help or Expanded Home Help. The PIHP case manager or supports coordinator must assist, if necessary, the beneficiary in filling out and sending a request for Fair Hearing when the beneficiary believes that the DHS authorization amount, scope and duration of Home Help does not accurately reflect the beneficiary's needs based on findings of the DHS assessment.

- Staff assistance, support and/or training with activities such as:
 - money management
 - non-medical care (not requiring nurse or physician intervention)
 - socialization and relationship building
 - transportation from the beneficiary's residence to community activities, among community activities, and from the community activities back to the beneficiary's residence (transportation to and from medical appointments is excluded)
 - participation in regular community activities and recreation opportunities (e.g., attending classes, movies, concerts and events in a park; volunteering; voting)
 - attendance at medical appointments
 - acquiring or procuring goods, other than those listed under shopping, and nonmedical services
- Reminding, observing and/or monitoring of medication administration
- Staff assistance with preserving the health and safety of the individual in order that he/she may reside or be supported in the

most integrated, independent community setting.

CLS may be provided in a licensed specialized residential setting as a complement to, and in conjunction with, state plan Personal Care services. Transportation to medical appointments is covered by Medicaid through DHS or the Medicaid Health Plan. Payment for CLS services may not be made, directly or indirectly, to responsible relatives (i.e., spouses, or parents of minor children), or guardian of the beneficiary receiving community living supports.

Medicaid Provider Manual Mental Health/Substance Abuse Chapter July 1, 2014, pp 112, 114-115.

2.5 MEDICAL NECESSITY CRITERIA

The following medical necessity criteria apply to Medicaid mental health, developmental disabilities, and substance abuse supports and services.

2.5.A. MEDICAL NECESSITY CRITERIA

Mental health, developmental disabilities, and substance abuse services are supports, services, and treatment:

- Necessary for screening and assessing the presence of a mental illness, developmental disability or substance use disorder; and/or
- Required to identify and evaluate a mental illness, developmental disability or substance use disorder; and/or
- Intended to treat, ameliorate, diminish or stabilize the symptoms of mental illness, developmental disability or substance use disorder; and/or
- Expected to arrest or delay the progression of a mental illness, developmental disability, or substance use disorder; and/or
- Designed to assist the beneficiary to attain or maintain a sufficient level of functioning in order to achieve his goals of community inclusion and participation, independence, recovery, or productivity.

2.5.B. DETERMINATION CRITERIA

The determination of a medically necessary support, service or treatment must be:

- Based on information provided by the beneficiary, beneficiary's family, and/or other individuals (e.g., friends, personal assistants/aides) who know the beneficiary;
- Based on clinical information from the beneficiary's primary care physician or health care professionals with relevant qualifications who have evaluated the beneficiary;
- For beneficiaries with mental illness or developmental disabilities, based on person centered planning, and for beneficiaries with substance use disorders, individualized treatment planning;
- Made by appropriately trained mental health, developmental disabilities, or substance abuse professionals with sufficient clinical experience;
- Made within federal and state standards for timeliness;
- Sufficient in amount, scope and duration of the service(s) to reasonably achieve its/their purpose; and
- Documented in the individual plan of service.

2.5.C. SUPPORTS, SERVICES AND TREATMENT AUTHORIZED BY THE PIHP

Supports, services, and treatment authorized by the PIHP must be:

- Delivered in accordance with federal and state standards for timeliness in a location that is accessible to the beneficiary;
- Responsive to particular needs of multi-cultural populations and furnished in a culturally relevant manner;
- Responsive to the particular needs of beneficiaries with sensory or mobility impairments and provided with the necessary accommodations;
- Provided in the least restrictive, most integrated setting. Inpatient, licensed residential or other segregated settings shall be used only when less restrictive levels of treatment, service or support have been, for that beneficiary, unsuccessful or cannot be safely provided; and

• Delivered consistent with, where they exist, available research findings, health care practice guidelines, best practices and standards of practice issued by professionally recognized organizations or government agencies.

2.5.D. PIHP DECISIONS

Using criteria for medical necessity, a PIHP may:

- Deny services:
 - that are deemed ineffective for a given condition based upon professionally and scientifically recognized and accepted standards of care;
 - o that are experimental or investigational in nature; or
 - for which there exists another appropriate, efficacious, lessrestrictive and cost effective service, setting or support that otherwise satisfies the standards for medically-necessary services; and/or
- Employ various methods to determine amount, scope and duration of services, including prior authorization for certain services, concurrent utilization reviews, centralized assessment and referral, gate-keeping arrangements, protocols, and guidelines.

A PIHP may not deny services based **solely** on preset limits of the cost, amount, scope, and duration of services. Instead, determination of the need for services shall be conducted on an individualized basis.

Medicaid Provider Manual Mental Health/Substance Abuse Chapter July 1, 2014, pp 12-14

CMH's Supervisor testified that one of the functions of the sist of determine eligibility and level of care for services. CMH's Supervisor indicated that Appellant is years old and diagnosed with Edward's Syndrome and Mental Retardation, Severity Unspecified, and she has a Seizure Disorder. CMH's Supervisor indicated that Appellant for the past seven years and that Appellant currently receives CLS services, respite services and supports coordination. CMH's Supervisor testified that Appellant attends The Supervisor indicated therapy, occupational therapy, and speech and language therapy in a group setting. CMH's Supervisor indicated that Appellant's CLS was reduced because CLS is

for training purposes and training had not been effective over the past 5 years for Appellant to meet the goals in her PCP. As such, CMH's Supervisor testified that Appellant was authorized for 6 CLS hours per week for community inclusion, the only goal in Appellant's PCP that did not involve training. CMH's Supervisor also pointed out that when the decision to reduce Appellant's CLS hours was made, the latest service notes in Appellant's electronic medical record were , with no service notes from from through when the decision was made. CMH's Supervisor also indicated did not support the goals in Appellant's PCP. CMH's that the notes from Supervisor opined that the 6 hours of CLS authorized per week for Appellant were sufficient in amount, scope and duration to meet Appellant's CLS goal of community inclusion.

Appellant's mother testified that Appellant has been receiving 21 CLS hours per week for many years. Appellant's mother indicated that the **second second** r may not see progress with Appellant because they do not see her every day, but that she sees Appellant making progress. Appellant's mother also testified that Appellant does things now that she could not do before. Appellant's mother also provided a letter from her doctor requesting that Appellant's CLS hours remain unchanged.

Appellant's supports coordinator testified that Appellant needs complete physical assistance with almost all of her ADL's and IADL's. Appellant's supports coordinator indicated that Appellant also needs substantial assistance with self-direction. Appellant's supports coordinator testified that she visits Appellant in her home twice per month and that Appellant's mother gets no support for Appellant, or Appellant's four siblings, from Appellant's father. Appellant's supports coordinator testified that she help Appellant receives from CLS staff is important to Appellant learning the skills she needs. Appellant's supports coordinator indicated that she has seen improvement in little things over the years due to the training Appellant has received from CLS staff. For example, Appellant's supports coordinator indicated that she recently visited Appellant in school and noticed that Appellant was able to help direct food into her mouth using the hand over hand method, which she had not been able to do before.

In response, CMH's Supervisor indicated that the minor gains noted are likely due to natural development as opposed to any CLS training.

CMH's Assistant Corporate Counsel also pointed out that, even if Appellant had shown some gains due to CLS, the documentation in the electronic medical records did not document any gains.

Appellant bears the burden of proving by a preponderance of the evidence that 21 hours of CLS per week are medically necessary. CMH provided sufficient evidence that it adhered to federal regulations and state policy when authorizing 6 hours per week of CLS for Appellant. Appellant failed to prove by a preponderance of the evidence that an additional 15 hours per week of CLS was medically necessary.

Here, Appellant's CLS hours were reduced because Appellant had shown no gains towards the goals in her PCP for at least the past 5 years. In addition, during the current authorization period, Appellant's electronic medical record did not contain any service notes for the past 4 months and the prior service notes also did not show any progress towards the goals in Appellant's PCP. Based on these facts, the CMH properly concluded that the only goal in Appellant's PCP that supported CLS hours was community inclusion, and the CMH authorized 6 CLS hours per week for that purpose. Based on the evidence presented, the current amount of CLS authorized is sufficient in amount, scope and duration to reasonably meet the goal of community inclusion listed in Appellant's PCP.

DECISION AND ORDER

The Administrative Law Judge, based on the above findings of fact and conclusions of law, decides that CMH properly reduced Appellant's CLS hours from 21 to 6 per week.

IT IS THEREFORE ORDERED that:

The CMH decision is AFFIRMED.

Robert J. Meade Administrative Law Judge for Nick Lyon, Director Michigan Department of Community Health

*** NOTICE ***

The Michigan Administrative Hearing System may order a rehearing on either its own motion or at the request of a party within 30 days of the mailing date of this Decision and Order. The Michigan Administrative Hearing System will not order a rehearing on the Department's motion where the final decision or rehearing cannot be implemented within 90 days of the filing of the original request. The Appellant may appeal the Decision and Order to Circuit Court within 30 days of the receipt of the Decision and Order or, if a timely request for rehearing was made, within 30 days of the receipt of the rehearing decision.
