IN THE MATTER OF:

Docket No. 14-012530 CMH
Case No. 1

Appellant
_______________________/

DECISION AND ORDER

This matter is before the undersigned Administrative Law Judge pursuant to MCL 400.9 and 42 CFR 431.200 *et seq.,* upon Appellant's request for a hearing.

After due notice, a hearing was held on . , Appellant's mother, appeared and testified on Appellant's behalf.

, Assistant Corporation Counsel, County Community Mental Health Authority (CMH), represented the Department. , Director, appeared as a witness for the Department.

ISSUE

Did the CMH properly deny Appellant's request for behavioral services and an increase in Community Living Supports (CLS)?

FINDINGS OF FACT

The Administrative Law Judge, based upon the competent, material and substantial evidence on the whole record, finds as material fact:

1. Appellant is an year old Medicaid beneficiary, born , receiving services through County Community Mental Health (CMH). (Exhibit A, p 11; Testimony)

1. CMH is under contract with the Department of Community Health (MDCH) to provide Medicaid covered services to people who reside in the CMH service area. (Testimony)

2. Appellant is diagnosed with Autistic Disorder and Mood Disorder NOS. Appellant has a full scale IQ of 74. (Exhibit A, pp 19, 29; Testimony)

3. Appellant lives with her biological mother and two siblings. One of Appellant's siblings also has special needs. (Exhibit A, p 19; Testimony)

4. Appellant is enrolled in special education at [redacted]. (Exhibit A, pp 19, 31; Testimony)

5. Appellant experiences difficulty with changes in routine, lacks coping skills, becomes physically and verbally abusive towards others, struggles in completing Activities of Daily Living and household tasks, and struggles with community behavior and safety. Appellant is able to verbally express herself; however, she experiences difficulties with transitions. (Exhibit A, pp 19, 31; Testimony)

6. Appellant currently receives supports coordination, assessments, behavioral services, CLS and respite through CMH. (Since Appellant's request for hearing, behavioral services have been authorized). (Exhibit A, p 19; Testimony)

7. Following an Annual Assessment on [redacted], the CMH determined that behavioral services could not be authorized because there was no current behavioral assessment in Appellant's records to support behavioral services. (Since Appellant's request for hearing, behavioral services have been authorized). The CMH also denied Appellant's request for 16 CLS hours per week and authorized 10 CLS hours per week because there was no documentation in Appellant's records to support an increase in CLS. Appellant had only been authorized for 10 CLS hours per week since [redacted], but had been using more CLS since [redacted] because she had unused CLS hours available from earlier in the year. (Exhibit A, pp 3, 11-32; Testimony)

8. On [redacted], CMH sent an Action Notice to Appellant's mother informing her that behavioral services would not be authorized and that the request for 16 hours of CLS per week was denied, but that 10 hours of CLS were approved. (Since Appellant's request for hearing, behavioral services have been authorized). (Exhibit A, pp 5-7; Testimony)

9. Appellant's request for a hearing was received by the Michigan Administrative Hearing System on [redacted]. (Exhibit 1)

CONCLUSIONS OF LAW

The Medical Assistance Program is established pursuant to Title XIX of the Social Security Act and is implemented by Title 42 of the Code of Federal Regulations (CFR). It is administered in accordance with state statute, the Social Welfare Act, the Administrative Code, and the State Plan under Title XIX of the Social Security Act Medical Assistance Program.

> Title XIX of the Social Security Act, enacted in 1965, authorizes Federal grants to States for medical assistance to low-income persons who are age 65 or over, blind, disabled, or members of families with dependent children or qualified pregnant women or children. The program is jointly financed by the Federal and State governments and administered by States. Within broad Federal rules, each State decides eligible groups, types and range of services, payment levels for services, and administrative and operating procedures. Payments for services are made directly by the State to the individuals or entities that furnish the services.

42 CFR 430.0

> The State plan is a comprehensive written statement submitted by the agency describing the nature and scope of its Medicaid program and giving assurance that it will be administered in conformity with the specific requirements of title XIX, the regulations in this Chapter IV, and other applicable official issuances of the Department. The State plan contains all information necessary for CMS to determine whether the plan can be approved to serve as a basis for Federal financial participation (FFP) in the State program.

42 CFR 430.10

Section 1915(b) of the Social Security Act provides:

> The Secretary, to the extent he finds it to be cost-effective and efficient and not inconsistent with the purposes of this subchapter, may waive such requirements of section 1396a of this title (other than subsection(s) of this section) (other than sections 1396a(a)(15), 1396a(bb), and 1396a(a)(10)(A) of this title insofar as it requires provision of the care and services described in section 1396d(a)(2)(C) of this title) as may be necessary for a State…

The State of Michigan has opted to simultaneously utilize the authorities of the 1915(b) and 1915(c) programs to provide a continuum of services to disabled and/or elderly populations. Under approval from the Centers for Medicare and Medicaid Services (CMS) the Department of Community Health (MDCH) operates a section 1915(b) and 1915(c) Medicaid Managed Specialty Services and Support program waiver. CMH contracts with the Michigan Department of Community Health to provide services under the waiver pursuant to its contract obligations with the Department.

Medicaid beneficiaries are entitled to medically necessary Medicaid covered services for which they are eligible. Services must be provided in the appropriate scope, duration, and intensity to reasonably achieve the purpose of the covered service. *See 42 CFR 440.230.*

The CMH is mandated by federal regulation to perform an assessment for the Appellant to determine what Medicaid services are medically necessary and determine the amount or level of the Medicaid medically necessary services.

The *Medicaid Provider Manual, Mental Health/Substance Abuse,* section articulates Medicaid policy for Michigan. It states, in relevant part:

> **17.2 CRITERIA FOR AUTHORIZING B3 SUPPORTS AND SERVICES**
>
> The authorization and use of Medicaid funds for any of the B3 supports and services, as well as their amount, scope and duration, are dependent upon:
>
> - The Medicaid beneficiary's eligibility for specialty services and supports as defined in this Chapter; and
> - The service(s) having been identified during person-centered planning; and
> - The service(s) being medically necessary as defined in the Medical Necessity Criteria subsection of this chapter; and
> - The service(s) being expected to achieve one or more of the above-listed goals as identified in the beneficiary's plan of service; and
> - Additional criteria indicated in certain B3 service definitions, as applicable.
>
> Decisions regarding the authorization of a B3 service (including the amount, scope and duration) must take into account the PIHP's documented capacity to reasonably and equitably serve other Medicaid beneficiaries who also have needs for these services. The B3 supports and services are not intended to meet all the individual's needs and preferences, as some needs may be better met by community and other natural supports. Natural supports mean unpaid assistance provided to the beneficiary by people in his/her network (family, friends, neighbors, community volunteers) who are willing and able to provide such assistance. It is reasonable to expect that parents of minor children with disabilities will provide the same level of care they would provide to their

children without disabilities. MDCH encourages the use of natural supports to assist in meeting an individual's needs to the extent that the family or friends who provide the natural supports are willing and able to provide this assistance. PIHPs may not require a beneficiary's natural support network to provide such assistance as a condition for receiving specialty mental health supports and services. The use of natural supports must be documented in the beneficiary's individual plan of service.

Provider qualifications and service locations that are not otherwise identified in this section must meet the requirements identified in the General Information and Program Requirement sections of this chapter.

17.3.B. COMMUNITY LIVING SUPPORTS

Community Living Supports are used to increase or maintain personal self-sufficiency, facilitating an individual's achievement of his goals of community inclusion and participation, independence or productivity. The supports may be provided in the participant's residence or in community settings (including, but not limited to, libraries, city pools, camps, etc.).

Coverage includes:

- Assisting, (that exceeds state plan for adults) prompting, reminding, cueing, observing, guiding and/or training in the following activities:
    - meal preparation
    - laundry
    - routine, seasonal, and heavy household care and maintenance
    - activities of daily living (e.g., bathing, eating, dressing, personal hygiene)
    - shopping for food and other necessities of daily living

CLS services may not supplant state plan services, e.g., Personal Care (assistance with ADLs in a certified specialized residential setting) and Home Help or Expanded Home Help (assistance in the individual's own, unlicensed home with meal preparation, laundry, routine household care and maintenance, activities of daily living and shopping). If such assistance is needed, the beneficiary, with the help of the PIHP case manager or supports coordinator must request Home Help and, if necessary, Expanded Home Help from the Department of Human Services (DHS). CLS may be used for those activities while the beneficiary awaits determination by DHS of the amount, scope and

duration of Home Help or Expanded Home Help. The PIHP case manager or supports coordinator must assist, if necessary, the beneficiary in filling out and sending a request for Fair Hearing when the beneficiary believes that the DHS authorization amount, scope and duration of Home Help does not accurately reflect the beneficiary's needs based on findings of the DHS assessment.

- Staff assistance, support and/or training with activities such as:

  - money management
  - non-medical care (not requiring nurse or physician intervention)
  - socialization and relationship building
  - transportation from the beneficiary's residence to community activities, among community activities, and from the community activities back to the beneficiary's residence (transportation to and from medical appointments is excluded)
  - participation in regular community activities and recreation opportunities (e.g., attending classes, movies, concerts and events in a park; volunteering; voting)
  - attendance at medical appointments
  - acquiring or procuring goods, other than those listed under shopping, and nonmedical services

- Reminding, observing and/or monitoring of medication administration

- Staff assistance with preserving the health and safety of the individual in order that he/she may reside or be supported in the most integrated, independent community setting.

CLS may be provided in a licensed specialized residential setting as a complement to, and in conjunction with, state plan Personal Care services. Transportation to medical appointments is covered by Medicaid through DHS or the Medicaid Health Plan. Payment for CLS services may not be made, directly or indirectly, to responsible relatives (i.e., spouses, or parents of minor children), or guardian of the beneficiary receiving community living supports.

Medicaid Provider Manual
Mental Health/Substance Abuse Chapter
July 1, 2014, pp 112, 114-115.

2.5 MEDICAL NECESSITY CRITERIA

The following medical necessity criteria apply to Medicaid mental health, developmental disabilities, and substance abuse supports and services.

2.5.A. MEDICAL NECESSITY CRITERIA

Mental health, developmental disabilities, and substance abuse services are supports, services, and treatment:

- Necessary for screening and assessing the presence of a mental illness, developmental disability or substance use disorder; and/or
- Required to identify and evaluate a mental illness, developmental disability or substance use disorder; and/or
- Intended to treat, ameliorate, diminish or stabilize the symptoms of mental illness, developmental disability or substance use disorder; and/or
- Expected to arrest or delay the progression of a mental illness, developmental disability, or substance use disorder; and/or
- Designed to assist the beneficiary to attain or maintain a sufficient level of functioning in order to achieve his goals of community inclusion and participation, independence, recovery, or productivity.

2.5.B. DETERMINATION CRITERIA

The determination of a medically necessary support, service or treatment must be:

- Based on information provided by the beneficiary, beneficiary's family, and/or other individuals (e.g., friends, personal assistants/aides) who know the beneficiary;
- Based on clinical information from the beneficiary's primary care physician or health care professionals with relevant qualifications who have evaluated the beneficiary;
- For beneficiaries with mental illness or developmental disabilities, based on person centered planning, and for beneficiaries with substance use disorders, individualized treatment planning;
- Made by appropriately trained mental health, developmental disabilities, or substance abuse professionals with sufficient clinical experience;

- Made within federal and state standards for timeliness;
- Sufficient in amount, scope and duration of the service(s) to reasonably achieve its/their purpose; and
- Documented in the individual plan of service.

2.5.C. SUPPORTS, SERVICES AND TREATMENT AUTHORIZED BY THE PIHP

Supports, services, and treatment authorized by the PIHP must be:

- Delivered in accordance with federal and state standards for timeliness in a location that is accessible to the beneficiary;
- Responsive to particular needs of multi-cultural populations and furnished in a culturally relevant manner;
- Responsive to the particular needs of beneficiaries with sensory or mobility impairments and provided with the necessary accommodations;
- Provided in the least restrictive, most integrated setting. Inpatient, licensed residential or other segregated settings shall be used only when less restrictive levels of treatment, service or support have been, for that beneficiary, unsuccessful or cannot be safely provided; and
- Delivered consistent with, where they exist, available research findings, health care practice guidelines, best practices and standards of practice issued by professionally recognized organizations or government agencies.

2.5.D. PIHP DECISIONS

Using criteria for medical necessity, a PIHP may:

- Deny services:
    - that are deemed ineffective for a given condition based upon professionally and scientifically recognized and accepted standards of care;
    - that are experimental or investigational in nature; or
    - for which there exists another appropriate, efficacious, less-restrictive and cost effective service, setting or support that

otherwise satisfies the standards for medically-necessary services; and/or

- Employ various methods to determine amount, scope and duration of services, including prior authorization for certain services, concurrent utilization reviews, centralized assessment and referral, gate-keeping arrangements, protocols, and guidelines.

A PIHP may not deny services based **solely** on preset limits of the cost, amount, scope, and duration of services. Instead, determination of the need for services shall be conducted on an individualized basis.

Medicaid Provider Manual
Mental Health/Substance Abuse Chapter
July 1, 2014, pp 12-14

CMH's [redacted] Director testified that the [redacted] function is to make eligibility and level of care determinations for persons requesting or receiving CMH services. CMH's [redacted] Director indicated that Appellant is [redacted] years old and diagnosed with Mood Disorder and Autism. CMH's [redacted] Director indicated that Appellant currently receives supports coordination, assessments, behavioral services, CLS and respite through CMH. CMH's [redacted] Director testified that Appellant attends special education at [redacted]. CMH's [redacted] Director reviewed that portion of the Medicaid Provider Manual that deals with the authorization of B-3 services, specifically the section that indicates B3 supports and services are not intended to meet all the individual's needs and preferences, as some needs may be better met by community and other natural supports and the section that indicates It is reasonable to expect that parents of minor children with disabilities will provide the same level of care they would provide to their children without disabilities. CMH's [redacted] Director testified that there was nothing in Appellant's records to indicate that an increase in CLS was medically necessary. CMH's [redacted] Director also opined that the authorized level of CLS (10 hours per week) was sufficient in amount, scope and duration to meet Appellant's needs.

Appellant's mother testified that she thought that Appellant was receiving 15 hours of CLS per week all along, so she did not realize the current request was even an increase. Appellant's mother indicated that services were initially authorized for Appellant in [redacted], but that they could not find anyone to provide the services until [redacted]. Appellant's mother testified that the lack of documentation in Appellant's file is probably due to an issue with Appellant's supports coordinator. Appellant's mother also indicated that Appellant has two other sisters, one of whom also has special needs, so that while she understands that she is expected to provide the same care to her children as parents of children without disabilities, it is very difficult. Appellant's mother indicated that Appellant often elopes and tries to leave the house.

Appellant bears the burden of proving by a preponderance of the evidence that 16 CLS hours per week are medically necessary. CMH provided sufficient evidence that it adhered to federal regulations and state policy when it determined that 16 CLS hours per week were not medically necessary. As indicated above, B3 services are not intended to meet all of a consumer's needs and preferences and it is reasonable to expect parents of minor children with disabilities to provide the same level of care they would provide to children without disabilities. Here, Appellant has been authorized for only 10 CLS hours per week since [redacted] and there was nothing in Appellant's records to support an increase in CLS. It appears that Appellant had been utilizing more than 10 CLS hours per week since [redacted] because Appellant had unused CLS hours from earlier in the year. Based on the evidence presented, 10 CLS hours per week should be sufficient in amount, scope and duration to meet Appellant's needs.

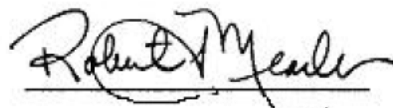
DECISION AND ORDER

The Administrative Law Judge, based on the above findings of fact and conclusions of law, decides that CMH properly denied Appellant's request for 16 CLS hours per week and authorized 10 CLS hours per week.

Appellant's request for behavioral services has been approved and those services have been authorized since the request for hearing was submitted.

IT IS THEREFORE ORDERED that:

The CMH decision is AFFIRMED.



Robert J. Meade
Administrative Law Judge
for Nick Lyon, Director
Michigan Department of Community Health
