ISSUE

Did the Department properly determine that Claimant had medical improvement and was no longer disabled for purposes of the Medical Assistance (MA-P) and State Disability Assistance (SDA) benefit programs?

7. On July 13, 2012, the Social Security Administration (SSA) issued a Notice of Decision - Unfavorable which determined that Claimant was not disabled.
8. On December 7, 2013, the MRT, following a review, found that Claimant was no longer disabled.
9. On December 17, 2013, the Department caseworker sent Claimant notice that his application was denied.

CONCLUSIONS OF LAW

The Medical Assistance (MA) program is established by Title XIX of the Social Security Act and is implemented by Title 42 of the Code of Federal Regulations (CFR). The Department of Human Services (DHS or Department) administers the MA program pursuant to MCL 400.10, *et seq.*, and MCL 400.105. Department policies are found in the Bridges Administrative Manual (BAM), the Bridges Eligibility Manual (BEM) and the Program Reference Manual (PRM).

The State Disability Assistance (SDA) program which provides financial assistance for disabled persons is established by 2004 PA 344. The Department of Human Services (DHS or department) administers the SDA program pursuant to MCL 400.10, *et seq.*, and Mich Admin Code, Rules 400.3151-400.3180. Department policies are found in the

Bridges Administrative Manual (BAM), the Bridges Eligibility Manual (BEM) and the Reference Tables Manual (RFT).

Pursuant to the federal regulations at 20 CFR 416.994, once a client is determined eligible for disability benefits; the eligibility for such benefits must be reviewed periodically. Before determining that a client is no longer eligible for disability benefits, the agency must establish that there has been a medical improvement of the client's impairment that is related to the client's ability to work. 20 CFR 416.994(b)(5).

To assure that disability reviews are carried out in a uniform manner, that a decision of continuing disability can be made in the most expeditious and administratively efficient way, and that any decisions to stop disability benefits are made objectively, neutrally, and are fully documented, we will follow specific steps in reviewing the question of whether your disability continues. Our review may cease and benefits may be continued at any point if we determine there is sufficient evidence to find that you are still unable to engage in substantial gainful activity. 20 CFR 416.994(b)(5).

The first question asks:

- (i) Are you engaging in substantial gainful activity? If you are (and any applicable trial work period has been completed), we will find disability to have ended (see paragraph (b)(3)(v) of this section).

Claimant is not disqualified from this step because he has not engaged in substantial gainful activity at any time relevant to this matter. Furthermore, the evidence on the record fails to establish that Claimant has a severe impairment which meets or equals a listed impairment found at 20 CFR 404, Subpart P, Appendix 1. Therefore, the analysis continues. 20 CF 416.994(b)(5)(ii).

The next step asks the question if there has been medical improvement.

Medical improvement is any decrease in the medical severity of your impairment(s) which was present at the time of the most recent favorable medical decision that you were disabled or continued to be disabled. A determination that there has been a decrease in medical severity must be based on changes (improvement) in the symptoms, signs and/or laboratory findings associated with your impairment(s). 20 CFR 416.994(b)(1)(i).

If there is a decrease in medical severity as shown by the symptoms, signs and laboratory findings, we then must determine if it is related to your ability to do work. In paragraph (b)(1)(iv) of this section, we explain the

relationship between medical severity and limitation on functional capacity to do basic work activities (or residual functional capacity) and how changes in medical severity can affect your residual functional capacity. In determining whether medical improvement that has occurred is related to your ability to do work, we will assess your residual functional capacity (in accordance with paragraph (b)(1)(iv) of this section) based on the current severity of the impairment(s) which was present at your last favorable medical decision. 20 CFR 416.994(b)(2)(ii).

In the instant matter, the State Hearing Review Team upheld the denial of SDA and MA benefits on the basis that the Medical Review Team (MRT) found Claimant's medical condition had improved. In support of its determination that Claimant was no longer disabled due to medical improvement, the Department included a copy of the July 13, 2012 Social Security Administration (SSA) unfavorable Notice of Decision. The Department did not include any additional documents and failed to include any medical records.

Pursuant to the federal regulations, at medical review, the Department has the burden of not only proving Claimant's medical condition has improved, but that the improvement relates to the client's ability to do basic work activities. The Department has the burden of establishing that Claimant is currently capable of doing basic work activities based on objective medical evidence from qualified medical sources. 20 CFR 416.994(b)(5).

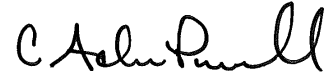

In this case, the Department has not met its burden of proof. As indicated above, the Department has provided no evidence that indicates Claimant's condition has improved, or that the alleged improvement relates to his ability to do basic work activities. The Department provided no objective medical evidence from qualified medical sources that show Claimant is currently capable of doing basic work activities. Accordingly, the Department's SDA and MA eligibility determination cannot be upheld at this time.

DECISION AND ORDER

The Administrative Law Judge, based upon the above findings of fact and conclusions of law, decides that the Department erred in proposing to close Claimant's MA and SDA case based upon a finding of improvement at review.

Accordingly, the Department's action is **REVERSED**, and this case is returned to the local office for benefit continuation as long as all other eligibility criteria are met, with Claimant's next mandatory medical review scheduled in May, 2015, (unless he is approved eligible for Social Security disability benefits by that time).

IT IS SO ORDERED.
