

STATE OF MICHIGAN
MICHIGAN ADMINISTRATIVE HEARING SYSTEM
FOR THE DEPARTMENT OF HEALTH AND HUMAN SERVICES
P. O. Box 30763, Lansing, MI 48909
(877) 833-0870; Fax (517) 373-4147

IN THE MATTER OF:

██████████

Appellant

_____ /

Docket No. 15-002918 CMH

Case No. ██████████

DECISION AND ORDER

This matter is before the undersigned Administrative Law Judge pursuant to MCL 400.9 upon Appellant's request for a hearing.

After due notice, a hearing was held on ██████████. ██████████, Appellant's mother, appeared and testified on Appellant's behalf.

██████████, Manager, Due Process and Customer Service, appeared on behalf of ██████████ (CMH or Department). ██████████, RN, Director of Access and Utilization Management, appeared as a witness for the Department.

ISSUE

Did the CMH properly deny Appellant's request for 50 respite hours per month and authorize 30 respite hours per month?

FINDINGS OF FACT

The Administrative Law Judge, based upon the competent, material and substantial evidence on the whole record, finds as material fact:

1. Appellant is a ██████ year old Medicaid beneficiary, born ██████████, who has been receiving services through ██████████ (CMH). (Exhibit A, p 1; Testimony)
2. CMH is under contract with the Department of Health and Human Services (DHHS) to provide Medicaid covered services to people who reside in the CMH service area. (Testimony)
3. Appellant is diagnosed with Asperger's syndrome, borderline mental functioning and mild mental retardation. (Exhibit A, pp 3, 8; Testimony)
4. Appellant lives with his parents in a home in ██████████. (Exhibit A,

p 1; Testimony)

5. Appellant's father works outside of the county and is rarely at home. Appellant's mother has severe physical difficulties and poor health, which interfere with her ability to care for Appellant. (Exhibit A, p 15; Testimony)
6. Appellant requires three or more interventions per night and the time required to complete the interventions is more than one hour. (Exhibit A, p 17; Testimony)
7. On ██████████, a respite assessment was completed by CMH staff following Appellant's mother's request for 50 respite hours per month. Following the assessment, CMH determined that 30 hours of respite per month were medically necessary. (Exhibit A, pp 15-19; Testimony)
8. On ██████████, CMH sent an Adequate Action Notice to Appellant's mother notifying her that the request for 50 hours of respite per month was denied, but that 30 hours of respite per month were approved. The notice included rights to a Medicaid fair hearing. (Exhibit A, pp 20-22)
9. The Michigan Administrative Hearing System received Appellant's request for hearing on ██████████. (Exhibit 1)
10. At the hearing on ██████████, the CMH witness indicated that, following Appellant's mother's testimony, Appellant would be approved for an additional 2 respite hours per month, for a total of 32 respite hours per month, effective immediately. (Testimony)

CONCLUSIONS OF LAW

The Medical Assistance Program is established pursuant to Title XIX of the Social Security Act and is implemented by Title 42 of the Code of Federal Regulations (CFR). It is administered in accordance with state statute, the Social Welfare Act, the Administrative Code, and the State Plan under Title XIX of the Social Security Act Medical Assistance Program.

Title XIX of the Social Security Act, enacted in 1965, authorizes Federal grants to States for medical assistance to low-income persons who are age 65 or over, blind, disabled, or members of families with dependent children or qualified pregnant women or children. The program is jointly financed by the Federal and State governments and administered by States. Within broad Federal rules, each State decides eligible groups, types and range of services, payment levels for services, and administrative and operating procedures. Payments for services are made directly by the State to the individuals or entities that furnish

the services.

42 CFR 430.0

The State plan is a comprehensive written statement submitted by the agency describing the nature and scope of its Medicaid program and giving assurance that it will be administered in conformity with the specific requirements of title XIX, the regulations in this Chapter IV, and other applicable official issuances of the Department. The State plan contains all information necessary for CMS to determine whether the plan can be approved to serve as a basis for Federal financial participation (FFP) in the State program.

42 CFR 430.10

Section 1915(b) of the Social Security Act provides:

The Secretary, to the extent he finds it to be cost-effective and efficient and not inconsistent with the purposes of this subchapter, may waive such requirements of section 1396a of this title (other than subsection(s) of this section) (other than sections 1396a(a)(15), 1396a(bb), and 1396a(a)(10)(A) of this title insofar as it requires provision of the care and services described in section 1396d(a)(2)(C) of this title) as may be necessary for a State...

The State of Michigan has opted to simultaneously utilize the authorities of the 1915(b) and 1915(c) programs to provide a continuum of services to disabled and/or elderly populations. Under approval from the Centers for Medicare and Medicaid Services (CMS) the Department of Health and Human Services (DHHS) operates a section 1915(b) and 1915(c) Medicaid Managed Specialty Services and Support program waiver. CMH contracts with the Michigan Department of Health and Human Services to provide services under the waiver pursuant to its contract obligations with the Department.

Medicaid beneficiaries are entitled to medically necessary Medicaid covered services for which they are eligible. Services must be provided in the appropriate scope, duration, and intensity to reasonably achieve the purpose of the covered service. See *42 CFR 440.230*.

The *Medicaid Provider Manual, Mental Health/Substance Abuse* section articulates Medicaid policy for Michigan. It states in relevant part:

2.5 MEDICAL NECESSITY CRITERIA

The following medical necessity criteria apply to Medicaid mental health, developmental disabilities, and substance abuse supports and services.

2.5.A. MEDICAL NECESSITY CRITERIA

Mental health, developmental disabilities, and substance abuse services are supports, services, and treatment:

- Necessary for screening and assessing the presence of a mental illness, developmental disability or substance use disorder; and/or
- Required to identify and evaluate a mental illness, developmental disability or substance use disorder; and/or
- Intended to treat, ameliorate, diminish or stabilize the symptoms of mental illness, developmental disability or substance use disorder; and/or
- Expected to arrest or delay the progression of a mental illness, developmental disability, or substance use disorder; and/or
- Designed to assist the beneficiary to attain or maintain a sufficient level of functioning in order to achieve his goals of community inclusion and participation, independence, recovery, or productivity.

2.5.B. DETERMINATION CRITERIA

The determination of a medically necessary support, service or treatment must be:

- Based on information provided by the beneficiary, beneficiary's family, and/or other individuals (e.g., friends, personal assistants/aides) who know the beneficiary;
- Based on clinical information from the beneficiary's primary care physician or health care professionals with relevant qualifications who have evaluated the beneficiary;
- For beneficiaries with mental illness or developmental disabilities, based on person centered planning, and for beneficiaries with substance use disorders, individualized treatment planning;
- Made by appropriately trained mental health, developmental disabilities, or substance abuse professionals with sufficient clinical experience;
- Made within federal and state standards for timeliness;

- Sufficient in amount, scope and duration of the service(s) to reasonably achieve its/their purpose; and
- Documented in the individual plan of service.

2.5.C. SUPPORTS, SERVICES AND TREATMENT AUTHORIZED BY THE PIHP

Supports, services, and treatment authorized by the PIHP must be:

- Delivered in accordance with federal and state standards for timeliness in a location that is accessible to the beneficiary;
- Responsive to particular needs of multi-cultural populations and furnished in a culturally relevant manner;
- Responsive to the particular needs of beneficiaries with sensory or mobility impairments and provided with the necessary accommodations;
- Provided in the least restrictive, most integrated setting. Inpatient, licensed residential or other segregated settings shall be used only when less restrictive levels of treatment, service or support have been, for that beneficiary, unsuccessful or cannot be safely provided; and
- Delivered consistent with, where they exist, available research findings, health care practice guidelines, best practices and standards of practice issued by professionally recognized organizations or government agencies.

2.5.D. PIHP DECISIONS

Using criteria for medical necessity, a PIHP may:

- Deny services:
 - that are deemed ineffective for a given condition based upon professionally and scientifically recognized and accepted standards of care;
 - that are experimental or investigational in nature; or
 - for which there exists another appropriate, efficacious, less-restrictive and cost effective service, setting or support that otherwise satisfies the standards for medically-necessary services; and/or

- Employ various methods to determine amount, scope and duration of services, including prior authorization for certain services, concurrent utilization reviews, centralized assessment and referral, gate-keeping arrangements, protocols, and guidelines.

A PIHP may not deny services based **solely** on preset limits of the cost, amount, scope, and duration of services. Instead, determination of the need for services shall be conducted on an individualized basis.

SECTION 17 – ADDITIONAL MENTAL HEALTH SERVICES (B3S)

PIHPs must make certain Medicaid-funded mental health supports and services available, in addition to the Medicaid State Plan Specialty Supports and Services or Habilitation Waiver Services, through the authority of 1915(b)(3) of the Social Security Act (hereafter referred to as B3s). The intent of B3 supports and services is to fund medically necessary supports and services that promote community inclusion and participation, independence, and/or productivity when identified in the individual plan of service as one or more goals developed during person-centered planning.

* * * *

17.2 CRITERIA FOR AUTHORIZING B3 SUPPORTS AND SERVICES

The authorization and use of Medicaid funds for any of the B3 supports and services, as well as their amount, scope and duration, are dependent upon:

- The Medicaid beneficiary's eligibility for specialty services and supports as defined in this Chapter; and
- The service(s) having been identified during person-centered planning; and
- The service(s) being medically necessary as defined in the Medical Necessity Criteria subsection of this chapter; and
- The service(s) being expected to achieve one or more of the above-listed goals as identified in the beneficiary's plan of service; and
- Additional criteria indicated in certain B3 service definitions, as applicable.

Decisions regarding the authorization of a B3 service (including the amount, scope and duration) must take into account the PIHP's

documented capacity to reasonably and equitably serve other Medicaid beneficiaries who also have needs for these services. The B3 supports and services are not intended to meet all the individual's needs and preferences, as some needs may be better met by community and other natural supports. Natural supports mean unpaid assistance provided to the beneficiary by people in his/her network (family, friends, neighbors, community volunteers) who are willing and able to provide such assistance. It is reasonable to expect that parents of minor children with disabilities will provide the same level of care they would provide to their children without disabilities. MDCH encourages the use of natural supports to assist in meeting an individual's needs to the extent that the family or friends who provide the natural supports are willing and able to provide this assistance. PIHPs may not require a beneficiary's natural support network to provide such assistance as a condition for receiving specialty mental health supports and services. The use of natural supports must be documented in the beneficiary's individual plan of service.

Provider qualifications and service locations that are not otherwise identified in this section must meet the requirements identified in the General Information and Program Requirement sections of this chapter.

* * * *

17.3.I. RESPITE CARE SERVICES

Respite care services are intended to assist in maintaining a goal of living in a natural community home and are provided on a short-term, intermittent basis to relieve the beneficiary's family or other primary caregiver(s) from daily stress and care demands during times when they are providing unpaid care. Respite is not intended to be provided on a continuous, long-term basis where it is a part of daily services that would enable an unpaid caregiver to work elsewhere full time. In those cases, community living supports, or other services of paid support or training staff, should be used. Decisions about the methods and amounts of respite should be decided during person centered planning. PIHPs may not require active clinical treatment as a prerequisite for receiving respite care. These services do not supplant or substitute for community living support or other services of paid support/training staff.

- "Short-term" means the respite service is provided during a limited period of time (e.g., a few hours, a few days, weekends, or for vacations).
- "Intermittent" means the respite service does not occur regularly or continuously. The service stops and starts repeatedly or with a time period in between.

Docket No. 15-002918 CMH
Decision and Order

- "Primary" caregivers are typically the same people who provide at least some unpaid supports daily.
- "Unpaid" means that respite may only be provided during those portions of the day when no one is being paid to provide the care, i.e., not a time when the beneficiary is receiving a paid State Plan (e.g., home help) or waiver service (e.g., community living supports) or service through other programs (e.g., school).
- Children who are living in a family foster care home may receive respite services. The only exclusion of receiving respite services in a family foster care home is when the child is receiving Therapeutic Foster Care as a Medicaid SED waiver service because that is considered in the bundled rate. (Refer to the Child Therapeutic Foster Care subsection in the Children's Serious Emotional Disturbance Home and Community-Based Services Waiver Appendix for additional information.)

Since adult beneficiaries living at home typically receive home help services and hire their family members, respite is not available when the family member is being paid to provide the home help service, but may be available at other times throughout the day when the caregiver is not paid.

Respite care may be provided in the following settings:

- Beneficiary's home or place of residence
- Licensed family foster care home
- Facility approved by the State that is not a private residence, (e.g., group home or licensed respite care facility)
- Home of a friend or relative chosen by the beneficiary and members of the planning team
- Licensed camp
- In community (social/recreational) settings with a respite worker trained, if needed, by the family
- Licensed family child care home

Respite care may not be provided in:

- day program settings
- ICF/IID's, nursing homes, or hospitals

Docket No. 15-002918 CMH
Decision and Order

Respite care may not be provided by:

- parent of a minor beneficiary receiving the service
- spouse of the beneficiary served
- beneficiary's guardian
- unpaid primary care giver

Cost of room and board must not be included as part of the respite care unless provided as part of the respite care in a facility that is not a private residence.

*Medicaid Provider Manual
Mental Health and Substance Abuse Section
January 1, 2015, pp 12-14, 111-112, 124-126*

The CMH is mandated by federal regulation to perform an assessment for the Appellant to determine what Medicaid services are medically necessary and determine the amount or level of the Medicaid medically necessary services that are needed to reasonably achieve her goals.

The CMH witness reviewed Appellant's Respite Assessment and testified that Appellant was awarded 2 respite hours because Appellant has two or more caregivers, one of whom works or is in school full-time or part-time; 2 respite hours because Appellant's primary caregiver has medical conditions that interfere with the provision of care; and 4 respite hours because Appellant requires 3 or more interventions per night and the time to complete the interventions is more than 1 hour. The CMH witness testified that Appellant was awarded 1 respite hour because he is verbally abusive on a daily basis; 2 respite hours because Appellant is physically abusive to others on a weekly basis; 1 respite hour because Appellant touches himself inappropriately on a weekly basis; 2 respite hours because Appellant engages in property destruction or disruption on a weekly basis; and 2 respite hours because Appellant has daily temper tantrums. The CMH witness indicated that Appellant was awarded 3 respite hours because he can eat independently after set-up; 3 respite hours because he requires assistance with oral care; 3 respite hours because he requires assistance with bathing and 2 respite hours because he requires reminding for dressing. The CMH witness also indicated that Appellant was awarded 3 respite hours because he requires extensive prompting and encouragement to participate in activities. The CMH witness testified that the Respite Assessment resulted in the authorization of a total of 30 respite hours per month. The CMH witness also testified that CMH would grant Appellant an additional 2 hours of respite per month, for a total of 32, due to additional considerations raised by Appellant's mother regarding grooming.

Docket No. 15-002918 CMH
Decision and Order

The CMH witness testified that a person can reach 96 hours of respite per month using the Respite Assessment tool used here, that respite is meant to be a short-term and intermittent service, and that the CMH is allowed to utilize various tools in order to assess clients' respite needs. The CMH witness indicated that, in his professional opinion, the 32 respite hours approved per month accurately reflects the medically necessary needs of Appellant.

Appellant's mother testified that Appellant does have a behavior plan at school and his therapist is working with her on a behavior plan at home. Appellant's mother testified that Appellant is unable to comb his own hair, shave, or cut his own nails. (This information led to the additional 2 respite hours authorized per month). Appellant's mother indicated that because of her health issues, she was hoping to get at least 40 respite hours per month. Appellant's mother testified that the additional hours would give her time to do a few things for herself each month, such as get a massage. Appellant's mother indicated that she is listening to Appellant from the time he gets home from school until the time he goes to bed each night and that it is very exhausting.

Appellant bears the burden of proving by a preponderance of the evidence that the Appellant was entitled to 50 respite hours per month. The testimony of Appellant's mother did not meet the burden to establish medical necessity for 50 respite hours per month. The respite assessment utilized by the CMH is reasonable and appropriate and it was applied to Appellant's needs on an individualized basis. As indicated above, the Medicaid Provider Manual allows PIHP's to "[e]mploy various methods to determine amount, scope and duration of services, including prior authorization for certain services, concurrent utilization reviews, centralized assessment and referral, gate-keeping arrangements, protocols, and guidelines." The undersigned does not have the authority to order the CMH to bypass its regular respite assessment process; only the ability to make sure that the process was properly implemented and followed. Here, there is no evidence that the calculation of Appellant's respite needs was improper. Furthermore, with the additional 2 hours of respite Appellant was granted during the hearing, she is now receiving 32 respite hours per month.

As such, the evidence presented by the Department supports the conclusions it reached with regard to respite based on the information it had at the time the decision was made.

DECISION AND ORDER

The Administrative Law Judge, based on the above findings of fact and conclusions of law, decides that CMH properly denied Appellant's request for 50 hours per month of respite and properly authorized 30 hours per month of respite. At the hearing, the CMH increased Appellant's respite to 32 hours per month, effective immediately.

IT IS THEREFORE ORDERED that:

The CMH decision is **AFFIRMED**.

Robert J. Meade
Administrative Law Judge
for Nick Lyon, Director
Michigan Department of
Health and Human Services
