CONCLUSIONS OF LAW

The Medical Assistance Program is established pursuant to Title XIX of the Social Security Act and is implemented by Title 42 of the Code of Federal Regulations (CFR). It is administered in accordance with state statute, the Social Welfare Act, the Administrative Code, and the State Plan under Title XIX of the Social Security Act Medical Assistance Program.

On May 30, 1997, the Department received approval from the Health Care Financing Administration, U.S. Department of Health and Human Services, allowing Michigan to restrict Medicaid beneficiaries' choice to obtain medical services only from specified Medicaid Health Plans.

The Respondent is one of those Medicaid Health Plans.

AA. Utilization Management

(1) The major components of the Contractor's utilization management (UM) program must encompass, at a minimum, the following:

a) Written policies with review decision criteria and procedures that conform to managed health care industry standards and processes.
b) A formal utilization review committee directed by the Contractor's medical director to oversee the utilization review process.
c) Sufficient resources to regularly review the effectiveness of the utilization review process and to make changes to the process as needed.
d) An annual review and reporting of utilization review activities and outcomes/interventions from the review.
e) The UM activities of the Contractor must be integrated with the Contractor's QAPI program.

(2) Prior Approval Policy and Procedure

The Contractor must establish and use a written prior approval policy and procedure for UM purposes. The Contractor may not use such policies and procedures to avoid providing medically necessary services within the coverages established under the Contract. The policy must ensure that the review criteria for authorization decisions are applied consistently and require that the reviewer consult with the requesting provider when appropriate. The policy must also require that UM decisions be made by a health care professional who has appropriate clinical expertise regarding the service under review. [Contract, *supra,* p. 55].

The contract provisions allow prior approval procedures for utilization management purposes. The MHP reviewed this prior authorization request under InterQual Guidelines for MRIs of the brain and denied the request because the documentation presented with the PA request did not meet the InterQual Guidelines for MRIs of the brain.

The MHP's Medical Director testified that the PA did not meet the InterQual Guidelines for MRIs of the brain as the PA only indicated complaints of dizziness and did not show a recent exam with nerve-related abnormal findings; did not show the effect of the medication that was prescribed for the Appellant's symptoms or that the Appellant had continued problems even with treatment.

Appellant testified she had vertigo and needed the MRI. This in and of itself does not show the Appellant to have met the InterQual Guidelines provided by the MHP.

Based on the evidence presented, the MHP properly denied Appellant's request for an MRI of her brain based on InterQual Imaging Criteria.

DECISION AND ORDER

The Administrative Law Judge, based on the above findings of fact and conclusions of law, decides that the denial of the Appellant's request for prior-authorization for an MRI of her brain was supported by Medicaid Policy.

IT IS THEREFORE ORDERED that:

The MHP's decision is AFFIRMED.
