ISSUE			
	IL-CMH properly deny authorizatio ces (CMS) for Appellant?	n for continued cas	e management
FINDINGS (	OF FACT		
	strative Law Judge, based upon the whole record, finds as materia		terial and substantial
1.	Appellant is a year-old Medica Deficit Hyperactivity Disorder N prescribed by her primary care ph	NOS who is mana	_
2.	Appellant had been receiving , Michigan.	services from	CMH in
3.	In the spring of Appellant located in the NL-CMH catchmen		

4.

, an Initial Clinical Assessment was completed and

Appellant was opened for Targeted Case Management. (State's Exhibit 1)

- 5. Upon subsequent review, it was determined that Appellant did not meet criteria for Targeted Case Management because: she had a guardian for medical and financial matters; she has a physician who is prescribing her medication and she was stable on her medications; she had stable housing and is enrolled in a Medicaid Health Plan. She had adequate natural supports.
- 6. On Appellant, terminating her from Targeted Case Management Services indicating that Appellant does not meet the criteria for services because she already has access to medical care, appropriate stable housing, financial assistance of a guardian and adequate natural supports. (State's Exhibit 2)
- 7. On Appellant filed a request for Hearing to contest the denial of Targeted Case Management Services.

### **CONCLUSIONS OF LAW**

The Medical Assistance Program is established pursuant to Title XIX of the Social Security Act and is implemented by Title 42 of the Code of Federal Regulations (CFR). It is administered in accordance with state statute, the Social Welfare Act, the Administrative Code, and the State Plan under Title XIX of the Social Security Act Medical Assistance Program.

Title XIX of the Social Security Act, enacted in 1965, authorizes Federal grants to States for medical assistance to low-income persons who are age 65 or over, blind, disabled, or members of families with dependent children or qualified pregnant women or children. The program is jointly financed by the Federal and State governments and administered by States. Within broad Federal rules, each State decides eligible groups, types and range of services, payment levels for services, and administrative and operating procedures. Payments for services are made directly by the State to the individuals or entities that furnish the services.

42 CFR 430.0

The State plan is a comprehensive written statement submitted by the agency describing the nature and scope of its Medicaid program and giving assurance that it will be administered in conformity with the specific requirements of Title XIX, the regulations in this Chapter IV, and other applicable official issuances of the Department. The State plan contains all information necessary for CMS to determine whether the plan can be approved to serve as a basis for Federal financial participation (FFP) in the State program.

42 CFR 430.10

Section 1915(b) of the Social Security Act provides:

The Secretary, to the extent he finds it to be cost-effective and efficient and not inconsistent with the purposes of this subchapter, may waive such requirements of section 1396a of this title (other than subsection (s) of this section) (other than sections 1396a(a)(15), 1396a(bb), and 1396a(a)(10)(A) of this title insofar as it requires provision of the care and services described in section 1396d(a)(2)(C) of this title) as may be necessary for a State...

The State of Michigan has opted to simultaneously utilize the authorities of the 1915(b) and 1915(c) programs to provide a continuum of services to disabled and/or elderly populations. Under approval from the Centers for Medicare and Medicaid Services (CMS) the Department of Community Health (MDCH) operates a section 1915(b) Medicaid Managed Specialty Services waiver. Lifeways CMH contracts with the Michigan Department of Community Health to provide specialty mental health services. Services are provided by CMH pursuant to its contract obligations with the Department and in accordance with the federal waiver.

Medicaid beneficiaries are only entitled to medically necessary Medicaid covered services for which they are eligible. Services must be provided in the appropriate scope, duration, and intensity to reasonably achieve the purpose of the covered service. See 42 CFR 440.230. Medical necessity is defined by the Medicaid Provider Manual as follows:

### 2.5 MEDICAL NECESSITY CRITERIA

The following medical necessity criteria apply to Medicaid mental health, developmental disabilities, and substance abuse supports and services.

### 2.5.A. MEDICAL NECESSITY CRITERIA

Mental health, developmental disabilities, and substance abuse services are supports, services, and treatment:

- Necessary for screening and assessing the presence of a mental illness, developmental disability or substance use disorder; and/or
- Required to identify and evaluate a mental illness, developmental disability or substance use disorder; and/or
- Intended to treat, ameliorate, diminish or stabilize the symptoms of mental illness, developmental disability or substance use disorder; and/or
- Expected to arrest or delay the progression of a mental illness, developmental disability, or substance use disorder; and/or
- Designed to assist the beneficiary to attain or maintain a sufficient level of functioning in order to achieve his goals of community inclusion and participation, independence, recovery, or productivity.

#### 2.5.B. DETERMINATION CRITERIA

The determination of a medically necessary support, service or treatment must be:

- Based on information provided by the beneficiary, beneficiary's family, and/or other individuals (e.g., friends, personal assistants/aides) who know the beneficiary; and
- Based on clinical information from the beneficiary's primary care physician or health care professionals with relevant qualifications who have evaluated the beneficiary; and
- For beneficiaries with mental illness or developmental disabilities, based on person centered planning, and for beneficiaries with substance use disorders, individualized treatment planning; and
- Made by appropriately trained mental health, developmental disabilities, or substance abuse professionals with sufficient clinical experience; and
- Made within federal and state standards for timeliness; and
- Sufficient in amount, scope and duration of the service(s) to reasonably achieve its/their purpose.
- Documented in the individual plan of service.

## 2.5.C. SUPPORTS, SERVICES AND TREATMENT AUTHORIZED BY THE PIHP

Supports, services, and treatment authorized by the PIHP must be:

- Delivered in accordance with federal and state standards for timeliness in a location that is accessible to the beneficiary; and
- Responsive to particular needs of multi-cultural populations and furnished in a culturally relevant manner; and
- Responsive to the particular needs of beneficiaries with sensory or mobility impairments and provided with the necessary accommodations; and
- Provided in the least restrictive, most integrated setting. Inpatient, licensed residential or other segregated settings shall be used only when less restrictive levels of treatment, service or support have been, for that beneficiary, unsuccessful or cannot be safely provided; and
- Delivered consistent with, where they exist, available research findings, health care practice guidelines, best practices and standards of practice issued by professionally recognized organizations or government agencies.

#### 2.5.D. PIHP DECISIONS

Using criteria for medical necessity, a PIHP may:

- Deny services that are:
  - deemed ineffective for a given condition based upon professionally and scientifically recognized and accepted standards of care:

- o experimental or investigational in nature; or
- for which there exists another appropriate, efficacious, lessrestrictive and cost effective service, setting or support that otherwise satisfies the standards for medically-necessary services; and/or
- Employ various methods to determine amount, scope and duration of services, including prior authorization for certain services, concurrent utilization reviews, centralized assessment and referral, gate-keeping arrangements, protocols, and guidelines.

A PIHP may not deny services based solely on preset limits of the cost, amount, scope, and duration of services. Instead, determination of the need for services shall be conducted on an individualized basis.

MPM, Mental Health and Substance Abuse Section, October 1, 2013, pp 12-13

Case Management services are also defined in the Medicaid Provider Manual:

#### **SECTION 13 – TARGETED CASE MANAGEMENT**

Targeted case management is a covered service that assists beneficiaries to design and implement strategies for obtaining services and supports that are goal-oriented and individualized. Services include assessment, planning, linkage, advocacy, coordination and monitoring to assist beneficiaries in gaining access to needed health and dental services, financial assistance, housing, employment, education, social services, and other services and natural supports developed through the personcentered planning process. Targeted case management is provided in a responsive, coordinated, effective and efficient manner focusing on process and outcomes.

Targeted case management services must be available for all children with serious emotional disturbance, adults with serious mental illness, persons with a developmental disability, and those with co-occurring substance use disorders who have multiple service needs, have a high level of vulnerability, require access to a continuum of mental health services from the PIHP, and/or are unable to independently access and sustain involvement with needed services.

Beneficiaries must be provided choice of available, qualified case management staff upon initial assignment and on an ongoing basis.

### 13.1 PROVIDER QUALIFICATIONS

Providers must demonstrate the capacity to provide all core requirements specified below and have a sufficient number of staff to meet the needs of the target population.

Providers must document initial and ongoing training for case managers related to the core requirements and applicable to the target population served.

Caseload size and composition must be realistic for the case manager to complete the core requirements as identified in the individual plan of service developed through the person-centered planning process.

#### 13.2 DETERMINATION OF NEED

The determination of the need for case management must occur at the completion of the intake process and through the person-centered planning process for beneficiaries receiving services and supports.

Justification as to whether case management is needed or not must be documented in the beneficiary's record.

#### 13.3 CORE REQUIREMENTS

- Assuring that the person-centered planning process takes place and that it results in the individual plan of service.
- Assuring that the plan of service identifies what services and supports will be provided, who will provide them, and how the case manager will monitor (i.e., interval of face-to-face contacts) the services and supports identified under each goal and objective.
- Overseeing implementation of the individual plan of service, including supporting the beneficiary's dreams, goals, and desires for optimizing independence; promoting recovery; and assisting in the development and maintenance of natural supports.
- Assuring the participation of the beneficiary on an ongoing basis in discussions of his plans, goals, and status.
- Identifying and addressing gaps in service provision.
- Coordinating the beneficiary's services and supports with all providers, making referrals, and advocating for the beneficiary.
- Assisting the beneficiary to access programs that provide financial, medical, and other assistance such as Home Help and Transportation services.
- Assuring coordination with the beneficiary's primary and other health care providers to assure continuity of care.

- Coordinating and assisting the beneficiary in crisis intervention and discharge planning, including community supports after hospitalization.
- Facilitating the transition (e.g., from inpatient to community services, school to work, dependent to independent living) process, including arrangements for follow-up services.
- Assisting beneficiaries with crisis planning.
- Identifying the process for after-hours contact.

Assessment	The provider must have the capacity to perform an initial written comprehensive assessment addressing the beneficiary's needs/wants, barriers to needs/wants, supports to address barriers, and health and welfare issues. Assessments must be updated when there is significant change in the condition or circumstances of the beneficiary. The individual plan of services must also reflect such changes.
Documentation	The beneficiary's record must contain sufficient information to document the provision of case management, including the nature of the service, the date, and the location of contacts between the case manager and the beneficiary, including whether the contacts were face-to-face. The frequency of face-to-face contacts must be dependent on the intensity of the beneficiary's needs.
	The case manager must review services at intervals defined in the individual plan of service. The plan shall be kept current and modified when indicated (reflecting the intensity of the beneficiary's health and welfare needs). A beneficiary or his/her guardian or authorized representative may request and review the plan at any time. A formal review of the plan shall not occur less often than annually to review progress toward goals and objectives and to assess beneficiary satisfaction.
Monitoring	The case manager must determine, on an ongoing basis, if the services and supports have been delivered, and if they are adequate to meet the needs/wants of the beneficiary. Frequency and scope (face-to-face and telephone) of case management monitoring activities must reflect the intensity of the beneficiary's health and welfare needs identified in the individual plan of services.

Targeted case management shall not include direct delivery of ongoing day-to-day supports and/or training, or provision of other Medicaid services. Targeted case managers are prohibited from exercising the agency's authority to authorize or deny the provision of services. Targeted case management shall not duplicate services that are the responsibility of another program.

MPM, Mental Health and Substance Abuse Section, October 1, 2013, pp 74-75

In the instant case, Appellant's witness testified that she has been Appellant's guardian for three years. Appellant is diagnosed with Post Traumatic Stress Disorder (PTSD), oppositional defiant syndrome, anger management problems, mild mental retardation and Attention Deficit Hyperactive Disorder. She was residing in Adult foster Care but currently lives with the guardian. Appellant is unwilling to work with peers or people

who have authority over her. She has bouts of anger. Appellant requested that she receive services through CMH because she is depressed and has attempted suicide in the past. She wants to return to AFC and is going to Magnolia AFC housing because she cannot be independent. She needs case management. Her housing is not stable. The guardian is trying to get Appellant Q1B Medicaid, because Appellant's Doctor's appointments are not currently being covered by Medicaid.

CMH respresentative testified on the record that that Appellant did not meet the criteria for services because she already has access to medical care, appropriate stable housing, financial assistance of a guardian and adequate natural supports. (State's Exhibit 2) She was also denied because she requested therapy for depression which is not a covered service under CMH. If her circumstances change, Appellant can reapply for services and she will be reassessed. Services are available for anger management and Post Traumatic Stress Disorder.

Based on the evidence presented, CMH did properly deny Appellant's request for continued case management services. As indicated above, all services must be medically necessary, meaning those services are, "Designed to assist the beneficiary to attain or maintain a sufficient level of functioning in order to achieve his or her goals of community inclusion and participation, independence, recovery, or productivity." Additionally, "Targeted case management is a covered service that assists beneficiaries to design and implement strategies for obtaining services and supports that are goal-oriented and individualized." Here, Appellant had few case management needs because she has secured housing, benefits, and was engaged in therapy. Any continued assistance Appellant needs can be met through peer supports or community supports, as well as through her therapy, which is still authorized. Appellant was given adequate time to get peer and community supports in place with assistance from her case manager.

The burden is on Appellant to prove by a preponderance of evidence that case management services are still medically necessary. As indicated above, Appellant did not meet this burden.

### **DECISION AND ORDER**

The Administrative Law Judge, based on the above findings of fact and conclusions of law, decides that:

The CMH properly denied authorization for continued case management services for Appellant.

### IT IS THEREFORE ORDERED that:

The CMH's decision is **AFFIRMED**.

Administrative Law Judge for Nick Lyon, Director Michigan Department of Health and Human Services
