

**STATE OF MICHIGAN
MICHIGAN ADMINISTRATIVE HEARING SYSTEM
FOR THE DEPARTMENT OF HEALTH AND HUMAN SERVICES**

P. O. Box 30763, Lansing, MI 48909
(517) 335-2484; Fax (517) 334-9505

IN THE MATTER OF:

██████████,

Appellant

_____ /

Docket No. 15-002674 CMH

Case No. ██████████

DECISION AND ORDER

This matter is before the undersigned Administrative Law Judge, pursuant to MCL 400.9 and 42 CFR 431.200 *et seq.*, and upon a request for hearing filed on the minor Appellant's behalf.

After due notice, a telephone hearing was held on ██████████ ██████████, Appellant's mother, appeared and testified on Appellant's behalf through an interpreter. ██████████, Appellant's independent supports coordinator, also testified as a witness for Appellant. ██████████, Manager of Due Process, represented the Respondent Oakland County Community Mental Health Authority (OCCMHA). ██████████, Director of Community Supports, and ██████████, Self Determination Coordinator, from Community Living Services of Oakland County (CLS-OC) also testified as witnesses for the Respondent.

ISSUE

Did OCCMHA properly deny Appellant's request for two additional hours of respite care services per week?

FINDINGS OF FACT

The Administrative Law Judge, based upon the competent, material and substantial evidence on the whole record, finds as material fact:

1. The OCCMHA is under contract with the Michigan Department of Health and Human Services (DHHS) to provide Medicaid covered services to beneficiaries who reside in its service area.
2. In turn, the OCCMHA contracts with CLS-OC to provide and oversee services.
3. Appellant is an eleven year-old male who has been diagnosed with Autism Disorder and who has been receiving services through OCCMHA and CLS-OC. (Exhibit A, pages 2, 15).

4. Appellant's specific services include four (4) hours of respite care services per week. (Exhibit A, page 7).
5. On ██████████, an Individual Plan of Services (IPOS) meeting was held with respect to Appellant's services for the upcoming year. (Exhibit A, pages 2-15).
6. During that meeting, Appellant's mother requested six (6) respite care hours per week and it was noted that Appellant had previously been receiving that amount, but that his independent supports coordinator had erred the year before and only requested four hours per week of such services. (Exhibit A, pages 3-4; Testimony of Christian).
7. It was also noted during the meeting that Appellant lives with two parents, two sisters and a baby brother; his mother is his primary caregiver; and she meets all of his daily needs. (Exhibit A, pages 3, 15).
8. It was further noted that Appellant attends school fulltime and that he does not require any specific monitoring while sleeping. (Exhibit A, pages 4, 8).
9. A Development Disability Proxy Measures and Case Management Assessment was performed on the same day of the IPOS meeting and, in that assessment, it was noted that Appellant attends school in a special education classroom for children with autism; he receives speech therapy and occupational therapy at school; he loves school; he meets with a therapist monthly; he sleeps fine; and that, while he is independent in many personal care tasks, he needs someone with him at all times when he is awake and is very dependent on his mother. (Exhibit A, pages 17-25).
10. The Case Management Assessment also provided that Appellant's behaviors have improved since Appellant's mother started using the reward system she learned from Appellant's therapist. (Exhibit A, page 28).
11. On ██████████, CLS-OC sent a written notice to Appellant's parents notifying them that the request for two additional hours per month of respite care services was denied. (Exhibit A, pages 40-41).
12. On ██████████, the Michigan Administrative Hearing System (MAHS) received the request for hearing filed in this matter. (Exhibit 1, pages 1-3).

CONCLUSIONS OF LAW

The Medical Assistance Program is established pursuant to Title XIX of the Social Security Act and is implemented by Title 42 of the Code of Federal Regulations (CFR). It is administered in accordance with state statutes, the Social Welfare Act, the Administrative Code, and the State Plan under Title XIX of the Social Security Act

Docket No. 15-002674 CMH
Decision and Order

Medical Assistance Program.

Title XIX of the Social Security Act, enacted in 1965, authorizes Federal grants to States for medical assistance to low-income persons who are age 65 or over, blind, disabled, or members of families with dependent children or qualified pregnant women or children. The program is jointly financed by the Federal and State governments and administered by States. Within broad Federal rules, each State decides eligible groups, types and range of services, payment levels for services, and administrative and operating procedures. Payments for services are made directly by the State to the individuals or entities that furnish the services.

42 CFR 430.0

Additionally,

The State plan is a comprehensive written statement submitted by the agency describing the nature and scope of its Medicaid program and giving assurance that it will be administered in conformity with the specific requirements of title XIX, the regulations in this Chapter IV, and other applicable official issuances of the Department. The State plan contains all information necessary for CMS to determine whether the plan can be approved to serve as a basis for Federal financial participation (FFP) in the State program.

42 CFR 430.10

Section 1915(b) of the Social Security Act also provides:

The Secretary, to the extent he finds it to be cost-effective and efficient and not inconsistent with the purposes of this subchapter, may waive such requirements of section 1396a of this title (other than subsection(s) of this section) (other than sections 1396a(a)(15), 1396a(bb), and 1396a(a)(10)(A) of this title insofar as it requires provision of the care and services described in section 1396d(a)(2)(C) of this title) as may be necessary for a State...

42 USC 1396n(b)

The State of Michigan has opted to simultaneously utilize the authorities of the 1915(b)

and 1915(c) programs to provide a continuum of services to disabled and/or elderly populations. Under approval from the Centers for Medicare and Medicaid Services (CMS) the Department of Health and Human Services (DHHS) operates a section 1915(b) and 1915(c) Medicaid Managed Specialty Services and Support program waiver.

Among the services that can be provided by OCCMHA pursuant to that waiver are respite care services and, with respect to such services, the applicable version of the Medicaid Provider Manual (MPM) states:

17.3.I RESPITE CARE SERVICES

Respite care services are intended to assist in maintaining a goal of living in a natural community home and are provided on a short-term, intermittent basis to relieve the beneficiary's family or other primary caregiver(s) from daily stress and care demands during times when they are providing unpaid care. Respite is not intended to be provided on a continuous, long-term basis where it is a part of daily services that would enable an unpaid caregiver to work elsewhere full time. In those cases, community living supports, or other services of paid support or training staff, should be used. Decisions about the methods and amounts of respite should be decided during person centered planning. PIHPs may not require active clinical treatment as a prerequisite for receiving respite care. These services do not supplant or substitute for community living support or other services of paid support/training staff.

- "Short-term" means the respite service is provided during a limited period of time (e.g., a few hours, a few days, weekends, or for vacations).
- "Intermittent" means the respite service does not occur regularly or continuously. The service stops and starts repeatedly or with a time period in between.
- "Primary" caregivers are typically the same people who provide at least some unpaid supports daily.
- "Unpaid" means that respite may only be provided during those portions of the day when no one is being paid to provide the care, i.e.,

not a time when the beneficiary is receiving a paid State Plan (e.g., home help) or waiver service (e.g., community living supports) or service through other programs (e.g., school).

- Children who are living in a family foster care home may receive respite services. The only exclusion of receiving respite services in a family foster care home is when the child is receiving Therapeutic Foster Care as a Medicaid SED waiver service because that is considered in the bundled rate. (Refer to the Child Therapeutic Foster Care subsection in the Children's Serious Emotional Disturbance Home and Community-Based Services Waiver Appendix for additional information.)

Since adult beneficiaries living at home typically receive home help services and hire their family members, respite is not available when the family member is being paid to provide the home help service, but may be available at other times throughout the day when the caregiver is not paid.

Respite care may be provided in the following settings:

- Beneficiary's home or place of residence
- Licensed family foster care home
- Facility approved by the State that is not a private residence, (e.g., group home or licensed respite care facility)
- Home of a friend or relative chosen by the beneficiary and members of the planning team
- Licensed camp
- In community (social/recreational) settings with a respite worker trained, if needed, by the family
- Licensed family child care home

Respite care may not be provided in:

- day program settings
- ICF/IIDs, nursing homes, or hospitals

Respite care may not be provided by:

- parent of a minor beneficiary receiving the service
- spouse of the beneficiary served
- beneficiary's guardian
- unpaid primary care giver

Cost of room and board must not be included as part of the respite care unless provided as part of the respite care in a facility that is not a private residence.

MPM, January 1, 2015 version
Mental Health/Substance Abuse Chapter, pages 132-134

However, while respite care is a covered service, Medicaid beneficiaries are still only entitled to medically necessary services as the waiver did not affect the federal Medicaid regulation that requires that authorized services be medically necessary. See 42 CFR 440.230.

Regarding medical necessity, the applicable version of the MPM states:

2.5 MEDICAL NECESSITY CRITERIA

The following medical necessity criteria apply to Medicaid mental health, developmental disabilities, and substance abuse supports and services.

2.5.A. MEDICAL NECESSITY CRITERIA

Mental health, developmental disabilities, and substance abuse services are supports, services, and treatment:

- Necessary for screening and assessing the presence of a mental illness, developmental disability or substance

use disorder; and/or

- Required to identify and evaluate a mental illness, developmental disability or substance use disorder; and/or
- Intended to treat, ameliorate, diminish or stabilize the symptoms of mental illness, developmental disability or substance use disorder; and/or
- Expected to arrest or delay the progression of a mental illness, developmental disability, or substance use disorder; and/or
- Designed to assist the beneficiary to attain or maintain a sufficient level of functioning in order to achieve his goals of community inclusion and participation, independence, recovery, or productivity.

2.5.B. DETERMINATION CRITERIA

The determination of a medically necessary support, service or treatment must be:

- Based on information provided by the beneficiary, beneficiary's family, and/or other individuals (e.g., friends, personal assistants/aides) who know the beneficiary;
- Based on clinical information from the beneficiary's primary care physician or health care professionals with relevant qualifications who have evaluated the beneficiary;
- For beneficiaries with mental illness or developmental disabilities, based on person-centered planning, and for beneficiaries with substance use disorders, individualized treatment planning;

- Made by appropriately trained mental health, developmental disabilities, or substance abuse professionals with sufficient clinical experience;
- Made within federal and state standards for timeliness;
- Sufficient in amount, scope and duration of the service(s) to reasonably achieve its/their purpose; and
- Documented in the individual plan of service.

2.5.C. SUPPORTS, SERVICES AND TREATMENT AUTHORIZED BY THE PIHP

Supports, services, and treatment authorized by the PIHP must be:

- Delivered in accordance with federal and state standards for timeliness in a location that is accessible to the beneficiary;
- Responsive to particular needs of multi-cultural populations and furnished in a culturally relevant manner;
- Responsive to the particular needs of beneficiaries with sensory or mobility impairments and provided with the necessary accommodations;
- Provided in the least restrictive, most integrated setting. Inpatient, licensed residential or other segregated settings shall be used only when less restrictive levels of treatment, service or support have been, for that beneficiary, unsuccessful or cannot be safely provided; and
- Delivered consistent with, where they exist, available research findings, health

care practice guidelines, best practices and standards of practice issued by professionally recognized organizations or government agencies.

2.5.D. PIHP DECISIONS

Using criteria for medical necessity, a PIHP may:

- Deny services:
 - that are deemed ineffective for a given condition based upon professionally and scientifically recognized and accepted standards of care;
 - that are experimental or investigational in nature; or
 - for which there exists another appropriate, efficacious, less-restrictive and cost-effective service, setting or support that otherwise satisfies the standards for medically-necessary services; and/or
- Employ various methods to determine amount, scope and duration of services, including prior authorization for certain services, concurrent utilization reviews, centralized assessment and referral, gate-keeping arrangements, protocols, and guidelines.

A PIHP may not deny services based **solely** on preset limits of the cost, amount, scope, and duration of services. Instead, determination of the need for services shall be conducted on an individualized basis.

*MPM, January 1, 2015 version
Mental Health/Substance Abuse Chapter, pages 12-14*

Moreover, in addition to medical necessity, the MPM also identifies other criteria for B3 supports and services such as respite care services:

SECTION 17 – ADDITIONAL MENTAL HEALTH SERVICES (B3s)

PIHPs must make certain Medicaid-funded mental health supports and services available, in addition to the Medicaid State Plan Specialty Supports and Services or Habilitation Waiver Services, through the authority of 1915(b)(3) of the Social Security Act (hereafter referred to as B3s). The intent of B3 supports and services is to fund medically necessary supports and services that promote community inclusion and participation, independence, and/or productivity when identified in the individual plan of service as one or more goals developed during person-centered planning. NOTE: Certain services found in this section are State Plan EPSDT services when delivered to children birth-21 years, which include community living supports, family support and training (Parent-to-Parent/Parent Support Partner) peer-delivered services, prevention/direct models of parent education and services for children of adults with mental illness, skill building, supports coordination, and supported employment.

17.1 DEFINITIONS OF GOALS THAT MEET THE INTENTS AND PURPOSE OF B3 SUPPORTS AND SERVICES

The goals (listed below) and their operational definitions will vary according to the individual's needs and desires. However, goals that are inconsistent with least restrictive environment (i.e., most integrated home, work, community that meet the individual's needs and desires) and individual choice and control cannot be supported by B3 supports and services unless there is documentation that health and safety would otherwise be jeopardized; or that such least restrictive arrangements or choice and control opportunities have been demonstrated to be unsuccessful for that individual. Care should be taken to insure that these goals are those of the individual first, not those of a parent, guardian, provider, therapist, or case manager, no matter how well intentioned. The services in the plan, whether B3 supports and services alone, or in combination with state plan or Habilitation Supports Waiver services, must reasonably be expected to achieve the goals and intended outcomes identified. The configuration of supports and

services should assist the individual to attain outcomes that are typical in his community; and without such services and supports, would be impossible to attain.

* * *

17.2 CRITERIA FOR AUTHORIZING B3 SUPPORTS AND SERVICES

The authorization and use of Medicaid funds for any of the B3 supports and services, as well as their amount, scope and duration, are dependent upon:

- The Medicaid beneficiary's eligibility for specialty services and supports as defined in this Chapter; and
- The service(s) having been identified during person-centered planning; and
- The service(s) being medically necessary as defined in the Medical Necessity Criteria subsection of this chapter; and
- The service(s) being expected to achieve one or more of the above-listed goals as identified in the beneficiary's plan of service; and
- Additional criteria indicated in certain B3 service definitions, as applicable.

Decisions regarding the authorization of a B3 service (including the amount, scope and duration) must take into account the PIHP's documented capacity to reasonably and equitably serve other Medicaid beneficiaries who also have needs for these services. The B3 supports and services are not intended to meet all the individual's needs and preferences, as some needs may be better met by community and other natural supports. Natural supports mean unpaid assistance provided to the beneficiary by people in his/her network (family, friends, neighbors, community volunteers) who are willing and able to provide such assistance. It is reasonable to expect that parents of minor children with disabilities will provide the same level of care they would provide to their children without disabilities. MDCH encourages the use of natural supports to assist in

meeting an individual's needs to the extent that the family or friends who provide the natural supports are willing and able to provide this assistance. PIHPs may not require a beneficiary's natural support network to provide such assistance as a condition for receiving specialty mental health supports and services. The use of natural supports must be documented in the beneficiary's individual plan of service.

Provider qualifications and service locations that are not otherwise identified in this section must meet the requirements identified in the General Information and Program Requirement sections of this chapter.

MPM, January 1, 2015 version
Mental Health/Substance Abuse Chapter, pages 119-120

Here, pursuant to the above policies, CLS-OC sent written notice to Appellant's parents notifying them that the request for two additional hours per month of respite care services was denied and that Appellant would continue to be approved for four hours per week of respite care services. Specifically, its witnesses testified that the approved hours meet the need to provide to Appellant's unpaid caregivers with short-term, intermittent relief from the daily stress and demands of caring for Appellant given that Appellant lives with two parents; sleeps through the night; attends school fulltime; and has demonstrated improvement in his behaviors during the past year. The Respondent's witnesses also testified that each assessment stands on its own and that the amount of services Appellant received two years ago is irrelevant.

In response, Appellant's independent supports coordinator testified that Appellant was approved for six hours of respite care services two years ago, but that she mistakenly failed to request that same amount in the next person-centered plan. She also testified that she again requested it in this plan because, while Appellant is a little better because of the help he is receiving, his behavior is still a significant problem; he is constantly seeking his mother's attention and interrupting her; and his behaviors are having a significant and negative effect on Appellant's mother's ability to care for her other children, including a baby and one sister who is also exhibiting emotional problems. Appellant's supports coordinator further testified that, to the extent she wrote in the IPOS that Appellant rides his bike independently, that information is incorrect and she now understands that Appellant will only ride a bike if his mother or sister is present.

Appellant's mother also testified that she used the additional respite hours to be with her other children and that one of her daughters is exhibiting emotional problems. In particular, that daughter has talked about how jealous she is of the attention that Appellant and the baby receive.

Docket No. 15-002674 CMH
Decision and Order

Appellant bears the burden of proving by a preponderance of the evidence that Respondent erred in denying the request for additional respite care hours. Moreover, the undersigned Administrative Law Judge is limited to reviewing the Respondent's decision in light of the information available at the time that decision was made.

Given the record in this case, the undersigned Administrative Law Judge finds that Appellant has not met that burden of proof. Regardless of the amount of respite care services Appellant received years ago, the information provided during the recent IPOS meeting and assessments does not reflect a need for additional services. Appellant has already been approved for four hours of respite care services and, as noted by the Respondent and undisputed by Appellant, while Appellant may exhibit some challenging behaviors, he also lives with two parents who can both provide care; he sleeps through the night without any need for specific monitoring from them; he attends school fulltime and is therefore out of their care during that time; and he is independent in many self-care tasks.

Moreover, much of Appellant's witnesses' testimony is unsupported and contradicted by the record. For example, while Appellant's witnesses testified that Appellant has only shown minimal improvement, the actual documentation submitted to Respondent reflects that Appellant has demonstrated improvement since Appellant's mother started using the reward system she learned from Appellant's therapist.

Accordingly, applying the above policies and facts to the decision at issue in this case, the undersigned Administrative Law Judge finds that Appellant has failed to meet his burden of proof and that OCCMHA's decision to deny the request for two additional respite care hours per month must be sustained.

DECISION AND ORDER

The Administrative Law Judge, based on the above findings of fact and conclusions of law, decides that OCCMHA properly denied Appellant's request for additional respite care services.

IT IS THEREFORE ORDERED that:

Respondent's decision is **AFFIRMED**.
