IN THE MATTER OF:

Docket No. 15-012947 PAC

Appellant
____________________/

DECISION AND ORDER

This matter is before the undersigned Administrative Law Judge pursuant to MCL 400.9 and 42 CFR 431.200 *et seq.*, upon a request for a hearing filed on behalf of the minor Appellant.

After due notice, a hearing was held on , Appellant's mother, appeared and testified on Appellant's behalf. the Appellant's father and R.N., of r appeared as witnesses for the Appellant. , Appeals Review Officer, represented the Department of Health and Human Services. , RN, DPN Specialist, appeared as a witness for the Department.

ISSUE

Did the Department properly authorize a transitional reduction in Appellant's private duty nursing (PDN) services?

FINDINGS OF FACT

The Administrative Law Judge, based upon the competent, material and substantial evidence on the whole record, finds as material fact:

1. Appellant is a month old Medicaid beneficiary, born , who is affected by multiple medical problems including micrognathia, hypotonia, hip dislocation, chronic sialorrhea, tracheostomy dependence and eustachian tube dysfunction (Exhibit A, pp 2, 26, 82)

2. As of the Appellant was receiving hours of PDN services a day. (Exhibit A, p 100; Testimony)

3. On [redacted], a nurse visit took place. The visit revealed the Appellant's secretions varied day to day and that suctioning may be hourly or as frequent as every couple of minutes. (Exhibit A, p 50)

4. On [redacted], the Appellant had glands removed in an effort to reduce the amount of secretions. (Exhibit A, pp 68, 80-82; Testimony)

5. On [redacted], a nurse visit took place. The visit revealed the Appellant's secretions varied day to day and that suctioning may be hourly or as frequent as every couple of minutes. (Exhibit A, p 69)

6. On [redacted], the Department sent Appellant's parent written notice of a transitional reduction in PDN services. The notice indicated that [redacted] hours of PDN per day would continue from [redacted] through [redacted] hours of PDN would be approved from [redacted] through [redacted], and [redacted] hours of PDN would be approved from [redacted] through [redacted]. (Exhibit A, pp 100, 101; Testimony)

7. On [redacted], the Michigan Administrative Hearing System (MAHS) received the request for hearing filed on behalf of the minor Appellant. (Exhibit A, p 4)

CONCLUSIONS OF LAW

The Medical Assistance Program is established pursuant to Title XIX of the Social Security Act and is implemented by Title 42 of the Code of Federal Regulations (CFR).

It is administered in accordance with state statute, the Social Welfare Act, the Administrative Code, and the State Plan under Title XIX of the Social Security Act Medical Assistance Program.

This case involves the reduction in Appellant's private duty nursing (PDN) services and, with respect to such services, the applicable version of the Michigan Medicaid Provider Manual (MPM) states:

> **SECTION 1 – GENERAL INFORMATION**
>
> This chapter applies to Independent and Agency Private Duty Nurses.
>
> Private duty nursing (PDN) is a Medicaid benefit when provided in accordance with the policies and procedures outlined in this manual. Providers must adhere to all applicable coverage limitations, policies and procedures set forth in this manual.

PDN is covered for beneficiaries under age 21 who meet the medical criteria in this section. If the beneficiary is enrolled in or receiving case management services from one of the following programs, that program authorizes the PDN services.

- Children's Waiver (the Community Mental Health Services Program)
- Habilitation Supports Waiver (the Community Mental Health Services Program)
- Home and Community-Based Services Waiver for the Elderly and Disabled (the MI Choice Waiver)

For a Medicaid beneficiary who is not receiving services from one of the above programs, the Program Review Division reviews the request for authorization and authorizes the services if the medical criteria and general eligibility requirements are met.

Beneficiaries who are receiving PDN services through one Medicaid program cannot seek supplemental PDN hours from another Medicaid Program (i.e., Children's Waiver, Habilitation Supports Waiver, MI Choice Waiver).

For beneficiaries 21 and older, PDN is a waiver service that may be covered for qualifying individuals enrolled in the Habilitation Supports Waiver or MI Choice Waiver. When

PDN is provided as a waiver service, the waiver agent must be billed for the services.

1.1 DEFINITION OF PDN

Private Duty Nursing is defined as nursing services for beneficiaries who require more individual and continuous care, in contrast to part-time or intermittent care, than is available under the home health benefit. These services are provided by a registered nurse (RN), or licensed practical nurse (LPN) under the supervision of an RN, and must be ordered by the beneficiary's physician. Beneficiaries requiring PDN must demonstrate a need for continuous skilled nursing services, rather than a need for intermittent skilled nursing, personal care, and/or Home Help services. The terms "continuous" and "skilled nursing" are further defined in the Medical Criteria subsection for beneficiaries under age 21.

* * *

1.7 BENEFIT LIMITATION

> The purpose of the PDN benefit is to assist the beneficiary with medical care, enabling the beneficiary to remain in their home. The benefit is not intended to supplant the caregiving responsibility of parents, guardians, or other responsible parties (e.g., foster parents). <u>There must be a primary caregiver (i.e., parent, guardian, significant other adult) who resides with a beneficiary under the age of 18, and the caregiver must provide a monthly average of a minimum of eight hours of care during a typical 24-hour period</u>. The calculation of the number of hours authorized per month includes eight hours or more of care that will be provided by the caregiver during a 24-hour period, which are then averaged across the hours authorized for the month. The caregiver has the flexibility to use the monthly-authorized hours as needed during the month.
>
> The time a beneficiary is under the supervision of another entity or individual (e.g., in school, in day/child care, in work program) cannot be used to meet the eight hours of obligated care as discussed above, nor can the eight hours of care requirement for beneficiaries under age 18 be met by other public funded programs (e.g., MDCH Home Help Program) or other resources for hourly care (e.g., private health insurance, trusts, bequests, private pay). [*MPM, Private Duty Nursing,* July 1, 2014 pp. 1, 7, emphasis added].

Moreover, with respect to determining the amount of hours of PDN that can be approved, the MPM states:

2.4 DETERMINING INTENSITY OF CARE AND MAXIMUM AMOUNT OF PDN

> As part of determining the maximum amount of PDN a beneficiary is eligible for, his Intensity of Care category must be determined. This is a clinical judgment based on the following factors:
>
> - The beneficiary's medical condition;
> - The type and frequency of needed nursing assessments, judgments and interventions; and
> - The impact of delayed nursing interventions.
>
> Equipment needs alone do not determine intensity of care. Other aspects of care (e.g., administering medications) are important when developing a plan for meeting the overall needs of the beneficiary, but do not determine the number of hours of nursing for which the beneficiary is eligible.

High Category	Medium Category	Low Category
Beneficiaries requiring nursing assessments, judgments and interventions by a licensed nurse (RN/LPN) at least one time each hour throughout a 24-hour period, when delayed nursing interventions could result in further deterioration of health status, in loss of function or death, or in acceleration of the chronic condition.	Beneficiaries requiring nursing assessments, judgments and interventions by a licensed nurse (RN/LPN) at least one time every three hours throughout a 24-hour period, or at least 1 time each hour for at least 12 hours per day, when delayed nursing interventions could result in further deterioration of health status, in loss of function or death, or in acceleration of the chronic condition. This category also includes beneficiaries with a higher need for nursing assessments and judgments due to an inability to communicate and direct their own care.	Beneficiaries requiring nursing assessments, judgments and interventions by a licensed nurse (RN/LPN) at least one time every three hours for at least 12 hours per day, as well as those beneficiaries who can participate in and direct their own care

Medicaid uses the "Decision Guide for Establishing Maximum Amount of Private Duty Nursing to be Authorized on a Daily Basis" (below) to establish the amount of PDN that is approved. The Decision Guide is used to determine the appropriate range of nursing hours that can be authorized under the Medicaid PDN benefit and defines the "benefit limitation" for individual beneficiaries. The Decision Guide is used by the authorizing entity after it has determined the beneficiary meets both general eligibility requirements and medical criteria as stated above. The amount of PDN (i.e., the number of hours) that can be authorized for a beneficiary is based on several factors, including the beneficiary's care needs which establish medical necessity for PDN, the beneficiary's and family's circumstances, and other resources for daily care (e.g., private health insurance, trusts, bequests, private pay). To illustrate, the number of hours covered by private health insurance is subtracted from the hours approved under Medicaid PDN. These factors are incorporated into the Decision Guide. The higher number in the range is considered the maximum number of hours that can be authorized. Except in emergency circumstances, Medicaid does not approve more than the maximum hours indicated in the guide.

Only those factors that influence the maximum number of hours that can be authorized are included on this decision matrix. Other factors (e.g., additional dependent children, additional children with special needs, and required nighttime interventions) that impact the caregiver's availability to provide care should be identified during an assessment of service needs. These factors have implications for service planning and should be considered when determining the actual number of hours (within the range) to authorize.

Decision Guide for Establishing Maximum Amount of Private Duty Nursing to be Authorized on a Daily Basis

FAMILY SITUATION/ RESOURCE CONSIDERATIONS		INTENSITY OF CARE Average Number of Hours Per Day		
		LOW	MEDIUM	HIGH
Factor I – Availability of Caregivers Living in the Home	2 or more caregivers; both work or are in school F/T or P/T	4-8	6-12	10-16
	2 or more caregivers; 1 works or is in school F/T or P/T	4-6	4-10	10-14
	2 or more caregivers; neither works or is in school at least P/T	1-4	4-8	6-12
	1 caregiver; works or is in school F/T or P/T	6-12	6-12	10-16
	1 caregiver; does not work or is not a student	1-4	6-10	8-14
Factor II – Health Status of Caregiver(s)	Significant health issues	Add 2 hours if Factor I <= 8	Add 2 hours if Factor I <= 12	Add 2 hours if Factor I <= 14
	Some health issues	Add 1 hour if Factor I <= 7	Add 1 hour if Factor I <= 9	Add 1 hour if Factor I <= 13
Factor III – School *	Beneficiary attends school 25 or more hours per week, on average	Maximum of 6 hours per day	Maximum of 8 hours per day	Maximum of 12 hours per day

* Factor III limits the maximum number of hours which can be authorized for a beneficiary:

- Of any age in a center-based school program for more than 25 hours per week; or
- Age six and older for whom there is no medical justification for a homebound school program.

In both cases, the lesser of the maximum "allowable" for Factors I and II, or the maximum specified for Factor III, applies.

[*MPM, Private Duty Nursing*, § 2.4, October 1, 2014 pp. 11-12].

2.6 CHANGE IN BENEFICIARY'S CONDITION/PDN AS A TRANSITIONAL BENEFIT

Medicaid policy requires that the integrated plan of care (POC) be updated as necessary based on the beneficiary’s medical needs. Additionally, when a beneficiary’s condition changes, warranting a decrease in the number of approved hours or a discontinuation of services, the provider must report the change to the appropriate authorizing agent (i.e., the Program Review Division, Children's Waiver, or Habilitation Supports Waiver) in writing. Changes such as weaning from a ventilator or tracheostomy decannulation can occur after months or years of services, or a beneficiary's condition may stabilize to the point of requiring fewer PDN hours or the discontinuation of hours altogether. It is important that the provider report all changes resulting in a decrease in the number of hours to the authorizing agent as soon as they occur, as well as properly updating the POC. MDCH will seek recovery of monies inappropriately paid to the provider if, during case review, the authorizing agent determines that a beneficiary required fewer PDN hours than was provided and MDCH was not notified of the change in condition.

> In some cases, the authorized PDN services may be considered a transitional benefit. In cases such as this, one of the primary reasons for providing services should be to assist the family or caregiver(s) to become independent in the care of the beneficiary. The provider, in collaboration with the family or caregiver(s), may decide that the authorized number of hours should be decreased gradually to accommodate increased independence on the part of the family, caregiver(s), and/or beneficiary. A detailed exit plan with instructions relating to the decrease in hours and possible discontinuation of care should be documented in the POC. The provider must notify the authorizing agent that hours are being decreased and/or when the care will be discontinued. [*MPM, Private Duty Nursing*, § 2.6, October 1, 2014 p. 15].

Here, it is undisputed that the Appellant needs some PDN services and it is only the amount of hours authorized that is at issue. As discussed above, Appellant was receiving PDN services hours per day, days a week. The Department has now decided to have a transitional reduction in PDN services. The notice indicated that hours of PDN per day would continue from through , hours of PDN would be approved from through , and hours of PDN would be approved from through . The Department based its decision on a review of medical documentation submitted from Appellant's physicians and determined that Appellant no longer met medical criteria for hours of PDN services per day.

Appellant bears the burden of proving by a preponderance of evidence that the Department erred in deciding to reduce her PDN services. For the reasons discussed below, this Administrative Law Judge finds that Appellant has met that burden of proof.

The Department's witness first argued that the Appellant underwent a medical procedure (gland removal) to reduce the amount of secretions which would lead to a reduction in the amount of time spent suctioning. And that the reduction in suctioning would be considered an improvement in the Appellant's condition necessitating a reduction in PDN hours. The problem with this argument is that there is no evidence to indicate that the medical procedure was successful to the point of actually reducing the amount of secretions and suctioning needs. In fact, the medical records that were provided indicated that after the surgery, the amount of secretions and suctioning remained the same. In addition to the medical records, the Appellant's father testified suctioning levels remained the same and that there has been little to no change in the Appellant's condition.

The Department's witness also argued that the PDN services offered are to be considered a transitional benefit to assist the family to become independent in the care of the beneficiary. In order for PDN services to be considered transitional, there must be a gradual reduction to accommodate an increased independence on the part of the family and a detailed exit plan with instructions relating to the decrease in hours and

possible discontinuation of care. The detailed plan should be documented in the plan of care (POC).

In this case, each of the POC's were nearly identical and the most recent POC did not include a detailed plan to accommodate a gradual reduction of PDN services. In fact, there was no evidence of a detailed exit plan with instructions relating to a decrease in hours. As such, I cannot find that this particular reduction meets the requirements to be considered a transitional benefit reduction.

As testified to by the Department's witness, the Department's decision relied upon a determination that the Appellant's condition had improved and that the reduction was considered a transitional benefit reduction. However, that determination is completely unsupported and is also contradicted by Appellant's father's credible testimony. Accordingly, Appellant and her representative have met their burden of proof and the decision to reduce Appellant's PDN services must be reversed.

DECISION AND ORDER

The Administrative Law Judge, based on the above findings of fact and conclusions of law, decides that the Department improperly decided to reduce Appellant's private duty nursing services.

IT IS THEREFORE ORDERED THAT:

The Department's decision is **REVERSED**.
