

RICK SNYDER
GOVERNOR

STATE OF MICHIGAN
DEPARTMENT OF LICENSING AND REGULATORY AFFAIRS
MICHIGAN ADMINISTRATIVE HEARING SYSTEM
Christopher Seppanen
Executive Director

SHELLY EDGERTON
DIRECTOR

[REDACTED]

Date Mailed: May 27, 2016
MAHS Docket No.: 16-003165
Agency No.: [REDACTED]
Petitioner: [REDACTED]

ADMINISTRATIVE LAW JUDGE: Carmen G. Fahie

HEARING DECISION

Following Petitioner's request for a hearing, this matter is before the undersigned Administrative Law Judge pursuant to MCL 400.9 and 400.37; 42 CFR 431.200 to 431.250; and 45 CFR 205.10. After due notice, a telephone hearing was held on April 26, 2016, from Lansing, Michigan. The Petitioner was represented by herself. The Department of Health and Human Services (Department) was represented by [REDACTED] [REDACTED] Lead Worker.

ISSUE

Whether the Department properly determined that Petitioner was not disabled for purposes of continued State Disability Assistance (SDA) benefit programs?

FINDINGS OF FACT

The Administrative Law Judge, based on the competent, material, and substantial evidence on the whole record, finds as material fact:

1. On October 16, 2014, the Petitioner was approved for continued SDA by an Administrative Law Judge with medical review due on October 2015 due to a continuing physical impairment and lack of improvement.
2. On February 17, 2016, the MRT denied the Petitioner's medical review for SDA stating that the Petitioner had medical improvement where she hasn't had any seizures and is not taking any anti-seizure medications and her back surgery of 2013 where her most recent examination reveals that her condition is stable without complications or infections.
3. On February 19, 2016, the Department Caseworker sent the Petitioner a notice that she was denied for SDA because she had had medical improvement.

4. On March 11, 2016, the Department received a hearing request from the Petitioner, contesting the Department's negative action.
5. The Petitioner is a 47 year-old woman whose date of birth is [REDACTED]. The Petitioner is 5' 4 ½" tall and weighs 205 pounds. She has gained over 50 pounds because of her physical limitations. The Petitioner has completed the 9th grade of high school. She was special education in all subjects. The Petitioner can read and write, but has problems with basic math of multiplication and division. The Petitioner was last employed as a cook at the light level for one month in 2012. She has no pertinent work history.
4. The Petitioner's alleged impairments are migraines, back fusion on September 9, 2013, seizures, fibromyalgia, neuropathy, type II diabetes, and another possible back fusion surgery.

CONCLUSIONS OF LAW

The State Disability Assistance (SDA) program which provides financial assistance for disabled persons is established by 2004 PA 344. The Department of Human Services (DHS or department) administers the SDA program pursuant to MCL 400.10, *et seq.*, and MAC R 400.3151-400.3180. Department policies are found in the Program Administrative Manual (PAM), the Program Eligibility Manual (PEM) and the Program Reference Manual (PRM).

The Department's Program Eligibility Manual provides the following policy statements and instructions for caseworkers regarding the SDA program.

DISABILITY – SDA

DEPARTMENT POLICY

SDA

To receive SDA, a person must be disabled, caring for a disabled person, or age 65 or older.

Note: There is no disability requirement for AMP. PEM 261, p. 1.

DISABILITY

A person is disabled for SDA purposes if he:

- . receives other specified disability-related benefits or services, or

- . resides in a qualified Special Living Arrangement facility, or
- . is certified as unable to work due to mental or physical disability for at least 90 days from the onset of the disability.
- . is diagnosed as having Acquired Immunodeficiency Syndrome (AIDS).

If the client's circumstances change so that the basis of his/her disability is no longer valid, determine if he/she meets any of the other disability criteria. Do NOT simply initiate case closure. PEM, Item 261, p. 1.

Other Benefits or Services

Persons receiving one of the following benefits or services meet the SDA disability criteria:

- . Retirement, Survivors and Disability Insurance (RSDI), due to disability or blindness.
- . Supplemental Security Income (SSI), due to disability or blindness.
- . Medicaid (including spend-down) as blind or disabled if the disability/blindness is based on:
 - .. a DE/MRT/SRT determination, or
 - .. a hearing decision, or
 - .. having SSI based on blindness or disability recently terminated (within the past 12 months) for financial reasons.

Medicaid received by former SSI recipients based on policies in PEM 150 under "**SSI TERMINATIONS,**" INCLUDING "**MA While Appealing Disability Termination,**" does not qualify a person as disabled for SDA. Such persons must be certified as disabled or meet one of the other SDA qualifying criteria. See "**Medical Certification of Disability**" below.

- . Michigan Rehabilitation Services (MRS). A person is receiving services if he has been determined eligible

for MRS and has an active MRS case. Do not refer or advise applicants to apply for MRS for the purpose of qualifying for SDA.

- . Special education services from the local intermediate school district. To qualify, the person may be:
 - .. attending school under a special education plan approved by the local Individual Educational Planning Committee (IEPC); **or**
 - .. not attending under an IEPC approved plan but has been certified as a special education student **and** is attending a school program leading to a high school diploma or its equivalent, **and** is under age 26. The program does not have to be designated as "special education" as long as the person has been certified as a special education student. Eligibility on this basis continues until the person completes the high school program or reaches age 26, whichever is earlier.
- . Refugee or asylee who lost eligibility for Social Security Income (SSI) due to exceeding the maximum time limit PEM, Item 261, pp. 1-2.

"Disability" is:

...the inability to do any substantial gainful activity by reason of any medically determinable physical or mental impairment which can be expected to result in death or which has lasted or can be expected to last for a continuous period of not less than 12 months.... 20 CFR 416.905.

...We follow a set order to determine whether you are disabled. We review any current work activity, the severity of your impairment(s), your residual functional capacity, your past work, and your age, education and work experience. If we can find that you are disabled or not disabled at any point in the review, we do not review your claim further.... 20 CFR 416.920.

...If you are working and the work you are doing is substantial gainful activity, we will find that you are not disabled regardless of your medical condition or your age, education, and work experience. 20 CFR 416.920(b).

...[The impairment]...must have lasted or must be expected to last for a continuous period of at least 12 months. We call this the duration requirement. 20 CFR 416.909.

...If you do not have any impairment or combination of impairments which significantly limits your physical or mental ability to do basic work activities, we will find that you do not have a severe impairment and are, therefore, not disabled.

We will not consider your age, education, and work experience. 20 CFR 416.920(c).

[In reviewing your impairment]...We need reports about your impairments from acceptable medical sources.... 20 CFR 416.913(a).

...Statements about your pain or other symptoms will not alone establish that you are disabled; there must be medical signs and laboratory findings which show that you have a medical impairment.... 20 CFR 416.929(a).

...You must provide medical evidence showing that you have an impairment(s) and how severe it is during the time you say that you are disabled. 20 CFR 416.912(c).

... [The record must show a severe impairment] which significantly limits your physical or mental ability to do basic work activities.... 20 CFR 416.920(c).

...Medical reports should include --

- (1) Medical history.
- (2) Clinical findings (such as the results of physical or mental status examinations);
- (3) Laboratory findings (such as blood pressure, X-rays);
- (4) Diagnosis (statement of disease or injury based on its signs and symptoms).... 20 CFR 416.913(b).

...The medical evidence...must be complete and detailed enough to allow us to make a determination about whether you are disabled or blind. 20 CFR 416.913(d).

Medical findings consist of symptoms, signs, and laboratory findings:

- (a) **Symptoms** are your own description of your physical or mental impairment. Your statements alone are not enough to establish that there is a physical or mental impairment.
- (b) **Signs** are anatomical, physiological, or psychological abnormalities which can be observed, apart from your statements (symptoms). Signs must be shown by medically acceptable clinical diagnostic techniques. Psychiatric signs are medically demonstrable phenomena which indicate specific psychological abnormalities e.g., abnormalities of behavior, mood, thought, memory, orientation, development, or perception. They must also be shown by observable facts that can be medically described and evaluated.
- (c) **Laboratory findings** are anatomical, physiological, or psychological phenomena which can be shown by the use of medically acceptable laboratory diagnostic techniques. Some of these diagnostic techniques include chemical tests, electrophysiological studies (electrocardiogram, electroencephalogram, etc.), roentgenological studies (X-rays), and psychological tests. 20 CFR 416.928.

It must allow us to determine --

- (1) The nature and limiting effects of your impairment(s) for any period in question;
- (2) The probable duration of your impairment; and
- (3) Your residual functional capacity to do work-related physical and mental activities. 20 CFR 416.913(d).

In general, Petitioner has the responsibility to prove that he/she is disabled. Petitioner's impairment must result from anatomical, physiological, or psychological abnormalities which can be shown by medically acceptable clinical and laboratory diagnostic techniques. A physical or mental impairment must be established by medical evidence consisting of signs, symptoms, and laboratory findings, not only petitioner's statement of symptoms. 20 CFR 416.908; 20 CFR 416.927. Proof must be in the form of medical evidence showing that the petitioner has an impairment and the nature and extent of its severity. 20 CFR 416.912. Information must be sufficient to enable a determination as to the nature and limiting effects of the impairment for the period in question, the probable duration of the impairment and the residual functional capacity to do work-related physical and mental activities. 20 CFR 416.913.

Once an individual has been determined to be “disabled” for purposes of disability benefits, continued entitlement to benefits must be periodically reviewed. In evaluating whether an individual’s disability continues, 20 CFR 416.994 requires the trier of fact to follow a sequential evaluation process by which current work activities, severity of impairment(s), and the possibility of medical improvement and its relationship to the individual’s ability to work are assessed. Review may cease and benefits may be continued at any point if there is substantial evidence to find that the individual is unable to engage in substantial gainful activity. 20 CFR 416.994(b)(5).

Step 1

First, the trier of fact must determine if the individual is working and if work is substantial gainful activity. 20 CFR 416.994(b)(5)(i). In this case, the Petitioner is not engaged in substantial gainful activity and has no pertinent work history. Therefore, the Petitioner is not disqualified from receiving disability at Step 1.

Step 2

In the second step of the sequential consideration of a disability claim, the trier of fact must determine if the Petitioner’s impairment (or combination of impairments) is listed in Appendix 1 of Subpart P of 20 CFR, Part 404. This Administrative Law Judge finds that the Petitioner’s medical record will not support a finding that Petitioner’s impairment(s) is a “listed impairment” or equal to a listed impairment. See Appendix 1 of Subpart P of 20 CFR, Part 404, Part A. Accordingly, Petitioner cannot be found to be disabled based upon medical evidence alone. 20 CFR 416.920(d). This Administrative Law Judge finds that the Petitioner’s impairments do not rise to the level necessary to be listed as disabling by law. Therefore, the Petitioner is disqualified from receiving disability at Step 2.

Step 3

In the third step of the sequential evaluation, the trier of fact must determine whether there has been medical improvement as defined in 20 CFR 416.994(b)(1)(i). 20 CFR 416.994 (b)(5)(iii). Medical improvement is defined as any decrease in the medical severity of the impairment(s) which was present at the time of the most recent favorable medical decision that the Petitioner was disabled or continues to be disabled. A determination that there has been a decrease in medical severity must be based on changes (improvement) in the symptoms, signs, and/or laboratory findings associated with Petitioner’s impairment(s). If there has been medical improvement as shown by a decrease in medical severity, the trier of fact must proceed to Step 4 (which examines whether the medical improvement is related to the Petitioner’s ability to do work). If there has been no decrease in medical severity and thus no medical improvement, the trier of fact moves to Step 5 in the sequential evaluation process.

On [REDACTED] the Petitioner was seen by her treating physician at [REDACTED] for an office visit. She was seen for generalized idiopathic epilepsy and epileptic syndromes, intractable, without status epilepticus. Her medications were refilled and adjusted as required. Her vitals were normal. Claimant Exhibit w-v.

On [REDACTED], the Petitioner was seen by her treating physician at [REDACTED] for an office visit. Her chief complaint was peripheral neuropathy. She had some physical limitations with her back with her antalgic gait. She was able to rise from a seated position without pushing off. The Petitioner was able to walk on heels, toes, and in tandem without difficulty. Her neurological exam was essentially normal. Department Exhibit 53-80.

On [REDACTED], the Petitioner underwent a lumbar spine CT without contrast. The radiologist's impression was a suspected disc protrusion at L5-S1 that may affect the traversing right S1 nerve root. A better image would be seen on an MRI. She had degenerative facet changes most prominent within the lower thoracic spine. Department Exhibit 85.

At Step 3, this Administrative Law Judge finds that the Petitioner does have medical improvement and her medical improvement is related to the Petitioner's ability to perform substantial gainful activity. She was given an essentially normal physical examination with some limitations with her back. She is in treatment and taking medications for mental impairments. As a result, the Petitioner is able to perform simple and unskilled, light work. Therefore, the Petitioner is disqualified from receiving disability at Step 3.

Step 4

In Step 4 of the sequential evaluation, the trier of fact must determine whether medical improvement is related to Petitioner's ability to do work in accordance with 20 CFR 416.994(b)(1)(i) through (b)(1)(iv). 20 CFR 416.994(b)(5)(iv). It is the finding of this Administrative Law Judge, after careful review of the record, that there has been medical improvement where she can perform work.

At Step 4, the Petitioner testified that she does not perform any of her daily living activities. However, the objective medical evidence on the record does not support that level of impairment. The Petitioner testified that her condition has gotten worse because she needs more assistance. She does have mental impairments where she is taking medications and in therapy. The Petitioner does not smoke since July 12, 2013, where before she smoked 1 pack of cigarettes a day. She stopped using illegal or illicit drugs when she was 17 or 18 where before she used speed and weed. She stopped drinking alcohol in 2012 where years before she drank socially. The Petitioner did not think that there was any work that she could perform.

This Administrative Law Judge finds that the Petitioner's medical improvement is related to her ability to do work. The Petitioner should be able to perform at least simple and unskilled, light work. Therefore, the Petitioner is disqualified from receiving disability at Step 4 where the Petitioner can perform simple and unskilled, light work. If there is a finding of medical improvement related to Petitioner's ability to perform work, the trier of fact is to move to Step 6 in the sequential evaluation process.

Step 6

In the sixth step of the sequential evaluation, the trier of fact is to determine whether the Petitioner's current impairment(s) is not severe per 20 CFR 416.921. 20 CFR 416.994(b)(5)(vi). If the residual functional capacity assessment reveals significant limitations upon a Petitioner's ability to engage in basic work activities, the trier of fact moves to Step 7 in the sequential evaluation process. In this case, this Administrative Law Judge finds Petitioner can perform at simple and unskilled, light work. See Steps 3 and 4. She was given an essentially normal physical examination. The Petitioner does have issues with her back. She is in treatment and taking medications for mental impairments. Therefore, the Petitioner is not disqualified from receiving disability at Step 6 where the Petitioner passes for severity.

Step 7

In the seventh step of the sequential evaluation, the trier of fact is to assess a Petitioner's current ability to engage in substantial gainful activities in accordance with 20 CFR 416.960 through 416.969. 20 CFR 416.994(b)(5)(vii). The trier of fact is to assess the Petitioner's current residual functional capacity based on all current impairments and consider whether the Petitioner can still do work he/she has done in the past. At Step 7, the Petitioner has no pertinent work history. She does have limitations with her back. In this case, this Administrative Law Judge finds that Petitioner should be able to perform simple and unskilled, light work. The Petitioner is capable of performing work at the light level. See Steps 3 and 4. Therefore, the Petitioner is disqualified from receiving disability at Step 7 where the Petitioner is capable of performing work.

Step 8

The objective medical evidence on the record is insufficient that the Petitioner lacks the residual functional capacity to perform some other less strenuous tasks than in her previous employment or that she is physically unable to do any tasks demanded of her. The Petitioner's testimony as to her limitation indicates her limitations are exertional and non-exertional.

For mental disorders, severity is assessed in terms of the functional limitations imposed by the impairment. Functional limitations are assessed using the criteria in paragraph (B) of the listings for mental disorders (descriptions of restrictions of activities of daily living, social functioning; concentration, persistence, or pace; and ability to tolerate

increased mental demands associated with competitive work).... 20 CFR, Part 404, Subpart P, App. 1, 12.00(C).

In the instant case, the Petitioner testified that she has migraines and seizures. The Petitioner is taking medication and in therapy for her mental impairments. See MA analysis step 2. There was no evidence of a serious thought disorder or risk factors. The Petitioner has a limited education of the completing the 9th grade and not being able to perform basic math of division and multiplication. However, she should be capable of performing at least simple, unskilled work.

In the final step, Step 8, of the sequential evaluation, the trier of fact is to consider whether the Petitioner can do any other work, given the Petitioner's residual function capacity and Petitioner's age, education, and past work experience. 20 CFR 416.994(b)(5)(viii). In this case, based upon the Petitioner's vocational profile of a younger age individual, with a limited education, and a history of no work, MA-P is denied using Vocational Rule 202.17 as a guide. The Medical-Vocational guidelines are not strictly applied with non-exertional impairments such as migraines and seizures. 20 CFR 404, Subpart P, Appendix 2, Section 200.00. This Administrative Law Judge finds that Petitioner does have medical improvement in this case and the Department has established by the necessary, competent, material and substantial evidence on the record that it was acting in compliance with Department policy when it proposed to close Petitioner's SDA case based upon medical improvement. Because the Petitioner does not meet the disability criteria for SDA, she has had medical improvement making her capable of performing simple and unskilled, light work.

The Administrative Law Judge, based on the above Findings of Fact and Conclusions of Law, and for the reasons stated on the record, if any, finds Petitioner not disabled for purposes of the medical review of SDA benefit programs.

DECISION AND ORDER

Accordingly, the Department's determination is **AFFIRMED**.
