STATE OF MICHIGAN
DEPARTMENT OF LICENSING AND REGULATORY AFFAIRS
LANSING

SHELLY EDGERTON
DIRECTOR

[REDACTED]

Date Mailed: October 27, 2017
MAHS Docket No.: 17-007951
Agency No.: [REDACTED]
Petitioner: [REDACTED]

ADMINISTRATIVE LAW JUDGE: Carmen G. Fahie

HEARING DECISION

Following Petitioner's request for a hearing, this matter is before the undersigned Administrative Law Judge pursuant to MCL 400.9 and 400.37; 42 CFR 431.200 to 431.250. After due notice, a telephone hearing was held on August 2, 2016, from Lansing, Michigan. The Petitioner was represented by herself and her granddaughter, [REDACTED]. The Department of Health and Human Services (Department) was represented by [REDACTED], Hearing Facilitator and [REDACTED], Eligibility Specialist. The record was left open for additional medical information, which was received on [REDACTED] and the record was closed.

ISSUE

Whether the Department properly determined that Petitioner was not disabled for purposes of continued State Disability Assistance (SDA) benefit programs?

FINDINGS OF FACT

The Administrative Law Judge, based on the competent, material, and substantial evidence on the whole record, finds as material fact:

1. Petitioner was approved for SDA by the Medical Review Team (MRT) on [REDACTED], with a medical review in December 2016 due to a physical impairments due to recent right shoulder surgery and physical rehabilitation.
2. On [REDACTED], the MRT denied Petitioner's medical review for SDA stating that Petitioner had failed to cooperate per 20 CFR 404.1512, 1519t, 416.91, and 919 by failing to submit symptoms and limitations as required by Department policy so MRT was unable to determine the severity of impairment.

3. Subsequently, the Department Caseworker sent Petitioner a notice that she was denied for continued SDA because she had failed to cooperate.
4. On [REDACTED], the Department received a hearing request from Petitioner, contesting the Department's negative action.
5. Petitioner is a 48-year-old woman whose date of birth is [REDACTED]. Petitioner is 5' 3" tall and weighs 140 pounds. She has completed the 11th grade of high school. Petitioner can read and write and perform basic math. Petitioner was last employed as a manager in 2008 of a sedentary to light level. She was also employed as an assistant manager at the sedentary level, baker at the medium/light level, and lead gluer at the sedentary level.
6. Petitioner's alleged impairments are post-traumatic stress disorder, anxiety, severe depression, bi-polar disorder 1, severe osteoporosis in the hands and left side, peripheral artery disease, and complex regional pain syndrome.
7. On [REDACTED], Petitioner underwent a medication review with her treating psychologist at [REDACTED]. She was diagnosed with bipolar disorder I, current or most recent episode depressed, severe. Petitioner was given a GAF score of 50. She has a hard time staying asleep. Petitioner stated that she hears whispering all the time. She has been compliant on her medications and denies any side effects. Petitioner still smokes marijuana, but less every day. She has partial improvement to meds, but not well. Her medications were changed and added to as medically required. Physically, she had no acute illness. There was no evidence of a severe thought disorder or risk factors. Petitioner Exhibit 1, pgs. a-d.
8. On [REDACTED], Petitioner underwent a psychiatric evaluation with her treating psychologist at [REDACTED]. She was diagnosed with bipolar disorder I, current or most recent episode depressed, severe. Petitioner was given a GAF score of 40. She is taking her required medications. Petitioner found the medications ineffective. Her medications were not effecting her mood positively. She used alcohol frequently and marijuana occasionally. Petitioner had a difficult time falling asleep and staying asleep. She would be okay if she died, but no active suicidal or homicidal ideation or plan. Her medications were changed as medically required. She occasionally smokes marijuana. Petitioner was cooperative and pleasant during the appointment, but at times crying. There was no evidence of a severe thought disorder or risk factors. She had good insight and intact reality/orientation. Petitioner Exhibit 1, pgs. e-j.
9. On [REDACTED], Petitioner was seen by her treating specialist at [REDACTED]. She was seen for osteoporosis. Petitioner has a history of vertebral fractures-kyphoplasty in August 2015. Her vitamin d level in 2016 was low at 27. The osteoporosis was felt to be caused by early menopause. She is currently not being treated for her osteoporosis. Petitioner was positive for joint pain. She

was diagnosed with osteoporosis. Petitioner was given labs. Her treating specialist discussed possible treatments and medications with Petitioner. She had an essentially normal physical examination. Department Exhibit 1, pgs. 267-271.

CONCLUSIONS OF LAW

The State Disability Assistance (SDA) program, which provides financial assistance for disabled persons, was established by 2004 PA 344. The Department administers the SDA program pursuant to 42 CFR 435, MCL 400.10 *et seq.* and Mich Admin Code, Rules 400.3151 – 400.3180. A person is considered disabled for SDA purposes if the person has a physical or mental impairment which meets federal Supplemental Security Income (SSI) disability standards for at least ninety days. Receipt of SSI benefits based on disability or blindness, or the receipt of MA benefits based on disability or blindness, automatically qualifies an individual as disabled for purposes of the SDA program.

The Department's Program Eligibility Manual provides the following policy statements and instructions for caseworkers regarding the SDA program.

DISABILITY – SDA

DEPARTMENT POLICY

SDA

To receive SDA, a person must be disabled, caring for a disabled person, or age 65 or older.

Note: There is no disability requirement for AMP. BEM 261, p. 1.

DISABILITY

A person is disabled for SDA purposes if he:

- . receives other specified disability-related benefits or services, or
- . resides in a qualified Special Living Arrangement facility, or
- . is certified as unable to work due to mental or physical disability for at least 90 days from the onset of the disability.
- . is diagnosed as having Acquired Immunodeficiency Syndrome (AIDS).

If the client's circumstances change so that the basis of his/her disability is no longer valid, determine if he/she meets

any of the other disability criteria. Do NOT simply initiate case closure. BEM, Item 261, p. 1.

Other Benefits or Services

Persons receiving one of the following benefits or services meet the SDA disability criteria:

- . Retirement, Survivors and Disability Insurance (RSDI), due to disability or blindness.
- . Supplemental Security Income (SSI), due to disability or blindness.
- . Medicaid (including spend-down) as blind or disabled if the disability/blindness is based on:
 - .. a DE/MRT/SRT determination, or
 - .. a hearing decision, or
 - .. having SSI based on blindness or disability recently terminated (within the past 12 months) for financial reasons.

Medicaid received by former SSI recipients based on policies in PEM 150 under "**SSI TERMINATIONS,**" INCLUDING "**MA While Appealing Disability Termination,**" does not qualify a person as disabled for SDA. Such persons must be certified as disabled or meet one of the other SDA qualifying criteria. See "**Medical Certification of Disability**" below.

- . Michigan Rehabilitation Services (MRS). A person is receiving services if he has been determined eligible for MRS and has an active MRS case. Do not refer or advise applicants to apply for MRS for the purpose of qualifying for SDA.
- . Special education services from the local intermediate school district. To qualify, the person may be:
 - .. attending school under a special education plan approved by the local Individual Educational Planning Committee (IEPC); **or**
 - .. not attending under an IEPC approved plan but has been certified as a special education student

and is attending a school program leading to a high school diploma or its equivalent, **and** is under age 26. The program does not have to be designated as "special education" as long as the person has been certified as a special education student. Eligibility on this basis continues until the person completes the high school program or reaches age 26, whichever is earlier.

- Refugee or asylee who lost eligibility for Social Security Income (SSI) due to exceeding the maximum time limit BEM, Item 261, pp. 1-2.

"Disability" is:

...the inability to do any substantial gainful activity by reason of any medically determinable physical or mental impairment which can be expected to result in death or which has lasted or can be expected to last for a continuous period of not less than 12 months.... 20 CFR 416.905.

...We follow a set order to determine whether you are disabled. We review any current work activity, the severity of your impairment(s), your residual functional capacity, your past work, and your age, education and work experience. If we can find that you are disabled or not disabled at any point in the review, we do not review your claim further.... 20 CFR 416.920.

...If you are working and the work you are doing is substantial gainful activity, we will find that you are not disabled regardless of your medical condition or your age, education, and work experience. 20 CFR 416.920(b).

...[The impairment]...must have lasted or must be expected to last for a continuous period of at least 12 months. We call this the duration requirement. 20 CFR 416.909.

...If you do not have any impairment or combination of impairments which significantly limits your physical or mental ability to do basic work activities, we will find that you do not have a severe impairment and are, therefore, not disabled.

We will not consider your age, education, and work experience. 20 CFR 416.920(c).

[In reviewing your impairment]...We need reports about your impairments from acceptable medical sources.... 20 CFR 416.913(a).

...Statements about your pain or other symptoms will not alone establish that you are disabled; there must be medical signs and laboratory findings which show that you have a medical impairment.... 20 CFR 416.929(a).

...You must provide medical evidence showing that you have an impairment(s) and how severe it is during the time you say that you are disabled. 20 CFR 416.912(c).

... [The record must show a severe impairment] which significantly limits your physical or mental ability to do basic work activities.... 20 CFR 416.920(c).

...Medical reports should include:

1. Medical history;
2. Clinical findings (such as the results of physical or mental status examinations);
3. Laboratory findings (such as blood pressure, X-rays);
4. Diagnosis (statement of disease or injury based on its signs and symptoms)... 20 CFR 416.913(b).

...The medical evidence...must be complete and detailed enough to allow us to make a determination about whether you are disabled or blind. 20 CFR 416.913(d).

Medical findings consist of symptoms, signs, and laboratory findings:

- (a) **Symptoms** are your own description of your physical or mental impairment. Your statements alone are not enough to establish that there is a physical or mental impairment.
- (b) **Signs** are anatomical, physiological, or psychological abnormalities which can be observed, apart from your statements (symptoms). Signs must be shown by medically acceptable clinical diagnostic techniques.

Psychiatric signs are medically demonstrable phenomena which indicate specific psychological abnormalities e.g., abnormalities of behavior, mood, thought, memory, orientation, development, or perception. They must also be shown by observable facts that can be medically described and evaluated.

- (c) **Laboratory findings** are anatomical, physiological, or psychological phenomena which can be shown by the use of medically acceptable laboratory diagnostic techniques. Some of these diagnostic techniques include chemical tests, electrophysiological studies (electrocardiogram, electroencephalogram, etc.), roentgenological studies (X-rays), and psychological tests. 20 CFR 416.928.

It must allow us to determine:

- (1) The nature and limiting effects of your impairment(s) for any period in question;
- (2) The probable duration of your impairment; and
- (3) Your residual functional capacity to do work-related physical and mental activities. 20 CFR 416.913(d).

In general, Petitioner has the responsibility to prove that he/she is disabled. Petitioner's impairment must result from anatomical, physiological, or psychological abnormalities which can be shown by medically acceptable clinical and laboratory diagnostic techniques. A physical or mental impairment must be established by medical evidence consisting of signs, symptoms, and laboratory findings, not only petitioner's statement of symptoms. 20 CFR 416.908; 20 CFR 416.927. Proof must be in the form of medical evidence showing that the petitioner has an impairment and the nature and extent of its severity. 20 CFR 416.912. Information must be sufficient to enable a determination as to the nature and limiting effects of the impairment for the period in question, the probable duration of the impairment and the residual functional capacity to do work-related physical and mental activities. 20 CFR 416.913.

Once an individual has been determined to be "disabled" for purposes of disability benefits, continued entitlement to benefits must be periodically reviewed. In evaluating whether an individual's disability continues, 20 CFR 416.994 requires the trier of fact to follow a sequential evaluation process by which current work activities, severity of impairment(s), and the possibility of medical improvement and its relationship to the individual's ability to work are assessed. Review may cease and benefits may be continued at any point if there is substantial evidence to find that the individual is unable to engage in substantial gainful activity. 20 CFR 416.994(b)(5).

Step 1

First, the trier of fact must determine if the individual is working and if work is substantial gainful activity. 20 CFR 416.994(b)(5)(i). In this case, the Petitioner is not engaged in substantial gainful activity and has not worked since 2008. Therefore, the Petitioner is not disqualified from receiving disability at Step 1.

Step 2

In the second step of the sequential consideration of a disability claim, the trier of fact must determine if the Petitioner's impairment (or combination of impairments) is listed in Appendix 1 of Subpart P of 20 CFR, Part 404. This Administrative Law Judge finds that the Petitioner's medical record will not support a finding that Petitioner's impairment(s) is a "listed impairment" or equal to a listed impairment. See Appendix 1 of Subpart P of 20 CFR, Part 404, Part A. Accordingly, Petitioner cannot be found to be disabled based upon medical evidence alone. 20 CFR 416.920(d). This Administrative Law Judge finds that the Petitioner's impairments do not rise to the level necessary to be listed as disabling by law. Therefore, the Petitioner is disqualified from receiving disability at Step 2.

Step 3

In the third step of the sequential evaluation, the trier of fact must determine whether there has been medical improvement as defined in 20 CFR 416.994(b)(1)(i). 20 CFR 416.994 (b)(5)(iii). Medical improvement is defined as any decrease in the medical severity of the impairment(s) which was present at the time of the most recent favorable medical decision that the Petitioner was disabled or continues to be disabled. A determination that there has been a decrease in medical severity must be based on changes (improvement) in the symptoms, signs, and/or laboratory findings associated with Petitioner's impairment(s). If there has been medical improvement as shown by a decrease in medical severity, the trier of fact must proceed to Step 4 (which examines whether the medical improvement is related to the Petitioner's ability to do work). If there has been no decrease in medical severity and thus no medical improvement, the trier of fact moves to Step 5 in the sequential evaluation process.

On [REDACTED], Petitioner underwent a medication review with her treating psychologist at [REDACTED]. She was diagnosed with bipolar disorder I, current or most recent episode depressed, severe. Petitioner was given a GAF score of 50. She has a hard time staying asleep. Petitioner stated that she hears whispering all the time. She has been compliant on her medications and denies any side effects. Petitioner still smokes marijuana, but less every day. She has partial improvement to meds, but not well. Her medications were changed and added to as medically required. Physically, she had no acute illness. There was no evidence of a severe thought disorder or risk factors. Petitioner Exhibit 1, pgs. a-d.

On [REDACTED], Petitioner underwent a psychiatric evaluation with her treating psychologist at [REDACTED]. She was diagnosed with bipolar disorder I, current or most recent episode depressed, severe. Petitioner was given a GAF score of 40. She is taking her required medications. Petitioner found the medications ineffective. Her medications were not effecting her mood positively. She used alcohol frequently and marijuana occasionally. Petitioner had a difficult time falling asleep and staying asleep. She would be ok if she died, but no active suicidal or homicidal ideation or plan. Her medications were changed as medically required. She occasionally smokes marijuana. Petitioner was cooperative and pleasant during the appointment, but at times crying. There was no evidence of a severe thought disorder or risk factors. She had good insight and intact reality/orientation. Petitioner Exhibit 1, pgs. e-j.

On [REDACTED], Petitioner was seen by her treating specialist at Bronson. She was seen for osteoporosis. Petitioner has a history of vertebral fractures-kyphoplasty in August 2015. Her vitamin d level in 2016 was low at 27. The osteoporosis was felt to be caused by early menopause. She is currently not being treated for her osteoporosis. Petitioner was positive for joint pain. She was diagnosed with osteoporosis. Petitioner was given labs. Her treating specialist discussed possible treatments and medications with Petitioner. She had an essentially normal physical examination. Department Exhibit 1, pgs. 267-271.

This Administrative Law Judge finds that Petitioner has had medical improvement. She was approved by the MRT because of her recent surgery and physical therapy on her right shoulder. Petitioner has completed treatment. On her most recent medical examination, she had an essentially normal physical examination. She is in treatment and taking medication for her mental impairments. There was no evidence of a severe thought disorder and risk factors. At Step 3, this Administrative Law Judge finds that Petitioner does have medical improvement and her medical improvement is related to Petitioner's ability to perform substantial gainful activity. As a result, Petitioner is able to perform light work. Therefore, Petitioner is disqualified from receiving disability at Step 3.

Step 4

In Step 4 of the sequential evaluation, the trier of fact must determine whether medical improvement is related to Petitioner's ability to do work in accordance with 20 CFR 416.994(b)(1)(i) through (b)(1)(iv). 20 CFR 416.994(b)(5)(iv). It is the finding of this Administrative Law Judge, after careful review of the record, that there has been medical improvement where she can perform work. See Step 3.

At Step 4, Petitioner testified that she does perform some of her daily living activities. Petitioner testified that her condition has gotten worse because she can't deal with people. She does have mental impairments where she is taking medications and in therapy with [REDACTED]. Petitioner does smoke ½ pack of cigarettes a day. She does use illegal or illicit drugs of smoking marijuana. She

stopped drinking alcohol 3 years ago where before she drank a 6 pack of beer on the weekend. Petitioner did not think that there was any work that she could perform.

This Administrative Law Judge finds that Petitioner's medical improvement is related to her ability to do work. Petitioner should be able to perform at least light work. She had an essentially normal physical examination. She is in treatment and taking medications for her mental impairments. She does have physical limitations related to her osteoporosis. Therefore, Petitioner is disqualified from receiving disability at Step 4 where Petitioner can perform light work. If there is a finding of medical improvement related to Petitioner's ability to perform work, the trier of fact is to move to Step 6 in the sequential evaluation process.

Step 6

In the sixth step of the sequential evaluation, the trier of fact is to determine whether the Petitioner's current impairment(s) is not severe per 20 CFR 416.921. 20 CFR 416.994(b)(5)(vi). If the residual functional capacity assessment reveals significant limitations upon a Petitioner's ability to engage in basic work activities, the trier of fact moves to Step 7 in the sequential evaluation process. In this case, this Administrative Law Judge finds Petitioner can perform at light work. See Steps 3 and 4. She was given an essentially normal physical examination. She is in treatment and taking medications for her mental impairments. She is physically limited because of her osteoporosis. Therefore, Petitioner is not disqualified from receiving disability at Step 6 where Petitioner passes for severity.

Step 7

In the seventh step of the sequential evaluation, the trier of fact is to assess a Petitioner's current ability to engage in substantial gainful activities in accordance with 20 CFR 416.960 through 416.969. 20 CFR 416.994(b)(5)(vii). The trier of fact is to assess Petitioner's current residual functional capacity based on all current impairments and consider whether Petitioner can still do work she has done in the past.

At Step 7, Petitioner was last employed as a manager in 2008 of a sedentary to light level. She was also employed as an assistant manager at the sedentary level, baker at the medium/light level, and lead gluer at the sedentary level. In this case, this Administrative Law Judge finds that Petitioner should be able to perform light work, but not her previous work because her manager employment was performed at the skilled and detailed level. She might have a difficult time performing the work of a baker at the light to medium level because of her osteoporosis. However, she should be able to perform the work as a lead gluer at the sedentary level. Petitioner is capable of performing past, relevant work at the light to sedentary level. She is physically limited with her osteoporosis. See Steps 3 and 4. Therefore, Petitioner is disqualified from receiving disability at Step 7 where Petitioner is capable of performing her past, relevant work at the simple and unskilled light to sedentary level.

Step 8

The objective medical evidence on the record is insufficient that the Petitioner lacks the residual functional capacity to perform some other less strenuous tasks than in her previous employment or that she is physically unable to do any tasks demanded of her. Petitioner's testimony as to her limitation indicates her limitations are exertional and non-exertional.

For mental disorders, severity is assessed in terms of the functional limitations imposed by the impairment. Functional limitations are assessed using the criteria in paragraph (B) of the listings for mental disorders (descriptions of restrictions of activities of daily living, social functioning; concentration, persistence, or pace; and ability to tolerate increased mental demands associated with competitive work)... 20 CFR, Part 404, Subpart P, App. 1, 12.00(C).

In the instant case, Petitioner testified that she has bipolar disorder I. Petitioner is taking medication and in therapy for her mental impairments. See MA analysis Step 2. There was no evidence of a serious thought disorder or risk factors. She has improved from a GAF of 40 to 50. Petitioner should be capable of performing at simple and unskilled work.

In the final step, Step 8, of the sequential evaluation, the trier of fact is to consider whether the Petitioner can do any other work, given Petitioner's residual function capacity and Petitioner's age, education, and past work experience. 20 CFR 416.994(b)(5)(viii). In this case, based upon Petitioner's vocational profile of a younger age individual, with a limited education, and a history of skilled, semi-skilled, and unskilled work, MA-P is denied using Vocational Rule 202.20 as a guide. The Medical-Vocational guidelines are not strictly applied with non-exertional impairments such as bipolar disorder I. 20 CFR 404, Subpart P, Appendix 2, Section 200.00. This Administrative Law Judge finds that Petitioner does have medical improvement in this case and the Department has established by the necessary, competent, material and substantial evidence on the record that it was acting in compliance with Department policy when it proposed to close Petitioner's SDA case based upon medical improvement. Because Petitioner does not meet the disability criteria for SDA, she has had medical improvement making her capable of performing simple and unskilled sedentary to light work.

The Administrative Law Judge, based on the above Findings of Fact and Conclusions of Law, and for the reasons stated on the record, if any, finds Petitioner not disabled for purposes of the medical review of SDA benefit programs.

DECISION AND ORDER

Accordingly, the Department's determination is **AFFIRMED**.

CF/hb
