

RICK SNYDER  
GOVERNOR

STATE OF MICHIGAN  
DEPARTMENT OF LICENSING AND REGULATORY AFFAIRS  
LANSING

SHELLY EDGERTON  
DIRECTOR

[REDACTED]  
Date Mailed: October 30, 2017  
MAHS Docket No.: 17-009393  
Agency No.: [REDACTED]  
Petitioner: [REDACTED]

**ADMINISTRATIVE LAW JUDGE: Carmen G. Fahie**

**HEARING DECISION**

Following Petitioner's request for a hearing, this matter is before the undersigned Administrative Law Judge pursuant to MCL 400.9 and 400.37; 42 CFR 431.200 to 431.250. After due notice, a telephone hearing was held on September 5, 2017, from [REDACTED], Michigan. The Petitioner was represented by himself and [REDACTED], a family friend. The Department of Health and Human Services (Department) was represented by [REDACTED], Hearing Facilitator and [REDACTED], Eligibility Specialist.

**ISSUE**

Whether the Department properly determined that Petitioner was not disabled for purposes of the Medical Assistance (MA) and/or State Disability Assistance (SDA) benefit programs?

**FINDINGS OF FACT**

The Administrative Law Judge, based on the competent, material, and substantial evidence on the whole record, finds as material fact:

1. On [REDACTED], Petitioner applied for SDA.
2. Petitioner currently has Healthy Michigan Program (HMP) for Medicaid (MA).
3. On [REDACTED], the Medical Review Team (MRT) denied Petitioner's application for SDA per BEM 261 because the nature and severity of Petitioner's impairments would not preclude work activity at the above stated level for 90 days and is capable of performing other work under Medical Vocation Grid Rule 202.14 per 20 CFR 416.920(f).

3. On [REDACTED], the Department Caseworker sent Petitioner a notice that his application was denied.
4. On [REDACTED], the Department received a hearing request from Petitioner, contesting the Department's negative action.
5. Petitioner is a 51-year-old man whose date of birth is [REDACTED]. Petitioner is 5' 11" tall and weighs 175 pounds. Petitioner completed High School and 1 ½ year of college majoring in business. Petitioner can read and write and do basic math. Petitioner was last employed as a temporary factory worker in 2012 at the light level where he was laid off. He was also employed as a painter, sales representative, and a commercial accounts manager.
6. Petitioner's alleged impairments are liver cirrhosis, bilateral hearing loss requiring the use of hearing aids, progressive glaucoma in the right eye and blind in the left eye, two crushed fingers on right hand, chronic colitis, neuropathy in bilateral legs, and depression.
7. Petitioner was seen by his treating ophthalmologist from [REDACTED], PC on [REDACTED]. Petitioner experienced a complete loss of vision that started a day ago. The left eye is affected. His condition is listed as severe. His complaint is associated with blurry vision. He has a history of dry eyes glaucoma, mild cataracts, kerato-conjunctivitis, sicca open angle glaucoma, and nuclear sclerosis myopia presbyopia. The clinical assessment was open angle glaucoma in both eyes, mild. His medications were changed as medically required. Department Exhibit 1, pgs. 197-200.
8. On [REDACTED], Petitioner was seen by his treating specialist at [REDACTED] for gastroenterology. He had no jaundice. Petitioner had an essentially normal physical examination. For his cirrhosis of the liver, he needed 2-gram sodium diet at all times. Petitioner needs a liver cancer screening every 6 months with a blood test and imagining. He needs routine blood tests every 3 months. Petitioner has to follow up with their office every 6 months. He was diagnosed with alcoholic cirrhosis of the liver without ascites. Petitioner was also diagnosed with thrombocytopenia, unspecified. Department Exhibit 1, pgs. 118-120.
9. On [REDACTED], Petitioner was seen by an independent medical examiner for a physical examination at [REDACTED]. He has glaucoma with complication from an eye infection. Petitioner is seeing an ophthalmologist and being treated with antibiotics. He has weakness in his left grip strength when compared to the right. An EMG was recommended for his left hand injury. His right hand is limited secondary to a tendon injury and he does not have use of his 4<sup>th</sup> and 5<sup>th</sup> digits. Petitioner has vertigo and sees an ear nose and throat specialist. He only gets vertigo when he stands up quickly. Petitioner has back pain, but it is not much of an issue for him currently. He has a normal gait and station where he does not require any assistive devices to ambulate. Department Exhibit 1, pgs. 40-44.

## **CONCLUSIONS OF LAW**

Department policies are contained in the Department of Human Services Bridges Administrative Manual (BAM), Department of Human Services Bridges Eligibility Manual (BEM), and Department of Human Services Reference Tables Manual (RFT).

The Medical Assistance (MA) program is established by Title XIX of the Social Security Act, 42 USC 1396-1396w-5; 42 USC 1315; the Affordable Care Act of 2010, the collective term for the Patient Protection and Affordable Care Act, Pub. L. No. 111-148, as amended by the Health Care and Education Reconciliation Act of 2010, Pub. L. No. 111-152; and 42 CFR 430.10-.25. The Department (formerly known as the Department of Human Services) administers the MA program pursuant to 42 CFR 435, MCL 400.10, and MCL 400.105-.112k.

The State Disability Assistance (SDA) program, which provides financial assistance for disabled persons, was established by 2004 PA 344. The Department administers the SDA program pursuant to 42 CFR 435, MCL 400.10 *et seq.* and Mich Admin Code, Rules 400.3151 – 400.3180. A person is considered disabled for SDA purposes if the person has a physical or mental impairment which meets federal Supplemental Security Income (SSI) disability standards for at least ninety days. Receipt of SSI benefits based on disability or blindness, or the receipt of MA benefits based on disability or blindness, automatically qualifies an individual as disabled for purposes of the SDA program.

The Department conforms to State statute in administering the SDA program.

2000 PA 294, Sec. 604, of the statute states:

Sec. 604. (1) The department shall operate a state disability assistance program. Except as provided in subsection (3), persons eligible for this program shall include needy citizens of the United States or aliens exempted from the supplemental security income citizenship requirement who are at least 18 years of age or emancipated minors meeting 1 or more of the following requirements:

- (a) A recipient of supplemental security income, social security, or medical assistance due to disability or 65 years of age or older.
- (b) A person with a physical or mental impairment which meets federal supplemental security income disability standards, except that the minimum duration of the disability shall be 90 days. Substance abuse alone is not defined as a basis for eligibility.

Pursuant to Federal Rule 42 CFR 435.540, the Department uses the Federal Supplemental Security Income (SSI) policy in determining eligibility for disability. Under SSI, disability is defined as:

...the inability to do any substantial gainful activity by reason of any medically determinable physical or mental impairment which can be expected to result in death or which has lasted or can be expected to last for a continuous period of not less than 12 months.... 20 CFR 416.905.

A set order is used to determine disability. Current work activity, severity of impairments, residual functional capacity, past work, age, or education and work experience are reviewed. If there is a finding that an individual is disabled or not disabled at any point in the review, there will be no further evaluation. 20 CFR 416.920.

Medical evidence may contain medical opinions. Medical opinions are statements from physicians and psychologists or other acceptable medical sources that reflect judgments about the nature and severity of the impairment(s), including symptoms, diagnosis and prognosis, what an individual can do despite impairment(s), and the physical or mental restrictions. 20 CFR 416.927(a)(2).

The Administrative Law Judge is responsible for making the determination or decision about whether the statutory definition of disability is met. The Administrative Law Judge reviews all medical findings and other evidence that support a medical source's statement of disability. 20 CFR 416.927(e).

For mental disorders, severity is assessed in terms of the functional limitations imposed by the impairment. Functional limitations are assessed using the criteria in paragraph (B) of the listings for mental disorders (descriptions of restrictions of activities of daily living, social functioning; concentration, persistence or pace; and ability to tolerate increased mental demands associated with competitive work). 20 CFR, Part 404, Subpart P, Appendix 1, 12.00(C).

The residual functional capacity is what an individual can do despite limitations. All impairments will be considered in addition to ability to meet certain demands of jobs in the national economy. Physical demands, mental demands, sensory requirements and other functions will be evaluated. 20 CFR 416.945(a).

To determine the physical demands (exertional requirements) of work in the national economy, we classify jobs as sedentary, light, medium and heavy. These terms have the same meaning as they have in the Dictionary of Occupational Titles, published by the Department of Labor. 20 CFR 416.967.

Pursuant to 20 CFR 416.920, a five-step sequential evaluation process is used to determine disability. An individual's current work activity, the severity of the impairment, the residual functional capacity, past work, age, education and work experience are

evaluated. If an individual is found disabled or not disabled at any point, no further review is made.

The first step is to determine if an individual is working and if that work is “substantial gainful activity” (SGA). If the work is SGA, an individual is not considered disabled regardless of medical condition, age or other vocational factors. 20 CFR 416.920(b).

Secondly, the individual must have a medically determinable impairment that is “severe” or a combination of impairments that is “severe.” 20 CFR 404.1520(c). An impairment or combination of impairments is “severe” within the meaning of regulations if it significantly limits an individual’s ability to perform basic work activities. An impairment or combination of impairments is “not severe” when medical and other evidence establish only a slight abnormality or a combination of slight abnormalities that would have no more than a minimal effect on an individual’s ability to work. 20 CFR 404.1521; Social Security Rulings (SSRs) 85-28, 96-3p, and 96-4p. If the Petitioner does not have a severe medically determinable impairment or combination of impairments, the Petitioner is not disabled. If the Petitioner has a severe impairment or combination of impairments, the analysis proceeds to the third step.

The third step in the process is to assess whether the impairment or combination of impairments meets a Social Security listing. If the impairment or combination of impairments meets or is the medically equivalent of a listed impairment as set forth in Appendix 1 and meets the durational requirements of 20 CFR 404.1509, the individual is considered disabled. If it does not, the analysis proceeds to the next step.

Before considering step four of the sequential evaluation process, the trier must determine the Petitioner’s residual functional capacity. 20 CFR 404.1520(e). An individual’s residual functional capacity is his ability to do physical and mental work activities on a sustained basis despite limitations from his impairments. In making this finding, the trier must consider all of the Petitioner’s impairments, including impairments that are not severe. 20 CFR 404.1520(e) and 404.1545; SSR 96-8p.

The fourth step of the process is whether the Petitioner has the residual functional capacity to perform the requirements of his past relevant work. 20 CFR 404.1520(f). The term past relevant work means work performed (either as the Petitioner actually performed it or as is it generally performed in the national economy) within the last 15 years or 15 years prior to the date that disability must be established. If the Petitioner has the residual functional capacity to do past relevant work, then the Petitioner is not disabled. If the Petitioner is unable to do any past relevant work or does not have any past relevant work, the analysis proceeds to the fifth step.

In the fifth step, an individual’s residual functional capacity is considered in determining whether disability exists. An individual’s age, education, work experience and skills are used to evaluate whether an individual has the residual functional capacity to perform work despite limitations. 20 CFR 416.920(e).

Here, Petitioner has satisfied requirements as set forth in steps one and two of the sequential evaluation. However, Petitioner's impairments do not meet a listing as set forth in Appendix 1, 20 CFR 416.926 for step 3. Therefore, vocational factors will be considered to determine the Petitioner's residual functional capacity to do relevant work and past relevant work.

In the present case, Petitioner was seen by his treating ophthalmologist from [REDACTED] on [REDACTED]. Petitioner experienced a complete loss of vision that started a day ago. The left eye is affected. His condition is listed as severe. His complaint is associated with blurry vision. He has a history of dry eyes glaucoma, mild cataracts, kerato-conjunctivitis, sicca open angle glaucoma, and nuclear sclerosis myopia presbyopia. The clinical assessment was open angle glaucoma in both eyes, mild. His medications were changed as medically required. Department Exhibit 1, pgs. 197-200.

On [REDACTED], Petitioner was seen by his treating specialist at [REDACTED] for gastroenterology. He had no jaundice. Petitioner had an essentially normal physical examination. For his cirrhosis of the liver, he needed 2-gram sodium diet at all times. Petitioner needs a liver cancer screening every 6 months with a blood test and imagining. He needs routine blood tests every 3 months. Petitioner has to follow up with their office every 6 months. He was diagnosed with alcoholic cirrhosis of the liver without ascites. Petitioner was also diagnosed with thrombocytopenia, unspecified. Department Exhibit 1, pgs. 118-120.

On [REDACTED], Petitioner was seen by an independent medical examiner for a physical examination at [REDACTED]. He has glaucoma with complication from an eye infection. Petitioner is seeing an ophthalmologist and being treated with antibiotics. He has weakness in his left grip strength when compared to the right. An EMG was recommended for his left hand injury. His right hand is limited secondary to a tendon injury and he does not have use of his 4<sup>th</sup> and 5<sup>th</sup> digits. Petitioner has vertigo and sees an ear nose and throat specialist. He only gets vertigo when he stands up quickly. Petitioner has back pain, but it is not much of an issue for him currently. He has a normal gait and station where he does not require any assistive devices to ambulate. Department Exhibit 1, pgs. 40-44.

This Administrative Law Judge finds that Petitioner is capable of performing at least light work. He is limited with dexterity of fine and gross movement of his right hand due to a tendon injury and the loss of the use of his 4<sup>th</sup> and 5<sup>th</sup> digits and the grip strength of his left hand. His cirrhosis of the liver is mild and is being medically managed. Petitioner's glaucoma is also being medically managed. There was no evidence of a severe thought disorder or risk factors. Petitioner testified that he had depression, but he is not taking medication or in therapy for his mental impairment.

It is the finding of this Administrative Law Judge, based upon the medical evidence and objective, physical and psychological findings that Petitioner testified that he does perform most of his daily living activities. Petitioner does feel that his condition has

worsened because he lost some vision in his left eye, his legs take longer to get going, and his depression. Petitioner stated that he does have mental impairments where he is not taking medication nor in therapy. Petitioner stopped smoking cigarettes about eight to nine years ago where before he would smoke 2 ½ packs of cigarettes a week. He stopped drinking four years ago, where before he was an alcoholic. He stopped using illegal and illicit drugs of marijuana in college. Petitioner did not feel there was any work he could do.

At Step 4, this Administrative Law Judge finds that Petitioner has not established that he cannot perform any of his prior work. He was previously employed as a temporary factory worker in 2012 at the light level where he was laid off. He was also employed as a painter, sales representative, and a commercial accounts manager. Petitioner is not in therapy nor taking medication for his mental impairments. He has limitations with the dexterity of fine and gross movement of his right hand due to a tendon injury and the loss of the use of his 4<sup>th</sup> and 5<sup>th</sup> digits and the grip strength of his left hand. Therefore, the Petitioner is disqualified from receiving disability at Step 4. Petitioner is capable of performing his past work as a sales representative and commercial accounts manager. However, the Administrative Law Judge will still proceed through the sequential evaluation process to determine whether or not the Petitioner has the residual functional capacity to perform some other less strenuous tasks than in his prior jobs.

The objective medical evidence on the record is insufficient that the Petitioner lacks the residual functional capacity to perform some other less strenuous tasks than in his previous employment or that he is physically unable to do any tasks demanded of him. The Petitioner's testimony as to his limitation indicates his limitations are non-exertional and exertional.

For mental disorders, severity is assessed in terms of the functional limitations imposed by the impairment. Functional limitations are assessed using the criteria in paragraph (B) of the listings for mental disorders (descriptions of restrictions of activities of daily living, social functioning; concentration, persistence, or pace; and ability to tolerate increased mental demands associated with competitive work)... 20 CFR, Part 404, Subpart P, App. 1, 12.00(C).

In the instant case, Petitioner testified that he has depression. Petitioner is not taking medication nor in therapy for his mental impairments. See MA analysis step 2. There was no evidence of a serious thought disorder or risk factors.

In the final step of the analysis, the trier of fact must determine if the Petitioner's impairment(s) prevent the Petitioner from doing other work. 20 CFR 416.920(f). This determination is based upon the Petitioner's:

1. residual functional capacity defined simply as "what can you still do despite your limitations?" 20 CFR 416.945;
2. age, education, and work experience, 20 CFR 416.963-965; and

3. the kinds of work which exist in significant numbers in the national economy which the Petitioner could perform despite his limitations. 20 CFR 416.966.

The residual functional capacity is what an individual can do despite limitations. All impairments will be considered in addition to ability to meet certain demands of jobs in the national economy. Physical demands, mental demands, sensory requirements and other functions will be evaluated. 20 CFR 416.945(a).

To determine the physical demands (exertional requirements) of work in the national economy, we classify jobs as sedentary, light, medium and heavy. These terms have the same meaning as they have in the Dictionary of Occupational Titles, published by the Department of Labor. 20 CFR 416.967.

**Sedentary work.** Sedentary work involves lifting no more than 10 pounds at a time and occasionally lifting or carrying articles like docket files, ledgers, and small tools. Although a sedentary job is defined as one which involves sitting, a certain amount of walking and standing is often necessary in carrying out job duties. Jobs are sedentary if walking and standing are required occasionally and other sedentary criteria are met. 20 CFR 416.967(a).

**Light work.** Light work involves lifting no more than 20 pounds at a time with frequent lifting or carrying of objects weighing up to 10 pounds. Even though the weight lifted may be very little; a job is in this category when it requires a good deal of walking or standing, or when it involves sitting most of the time with some pushing and pulling of arm or leg controls. 20 CFR 416.967(b).

**Medium work.** Medium work involves lifting no more than 50 pounds at a time with frequent lifting or carrying of objects weighing up to 25 pounds. If someone can do medium work, we determine that he or she can also do sedentary and light work. 20 CFR 416.967(c).

**Heavy work.** Heavy work involves lifting no more than 100 pounds at a time with frequent lifting or carrying of objects weighing up to 50 pounds. If someone can do heavy work, we determine that he or she can also do medium, light, and sedentary work. 20 CFR 416.967(d).

At Step 5, Petitioner can meet the physical requirements of light work, based upon Petitioner's physical abilities. Under the Medical-Vocational guidelines, a closely approaching advanced age individual with a high school education and more, and a

semi-skilled and unskilled work history, who is limited to light work, is considered not disabled. 20 CFR 404, Subpart P, Appendix 2, Rule 202.15. The Medical-Vocational guidelines are not strictly applied with non-exertional impairments such as depression. 20 CFR 404, Subpart P, Appendix 2, Section 200.00. Using the Medical-Vocational guidelines as a framework for making this decision and after giving full consideration to the Petitioner's mental and physical impairments, the Administrative Law Judge finds that the Petitioner could perform light work and that Petitioner does not meet the definition of disabled under the SDA program.

### **DECISION AND ORDER**

The Administrative Law Judge, based on the above Findings of Fact and Conclusions of Law, and for the reasons stated on the record, if any, finds Petitioner not disabled for purposes of the SDA benefit program. Petitioner could perform light work and that Petitioner does not meet the definition of disabled under the SDA program.

Accordingly, the Department's determination is **AFFIRMED**.
