Date Mailed: June 12, 2019
MOAHR Docket No.: 19-002445
Agency No.: ██████████
Petitioner: ██████████

ADMINISTRATIVE LAW JUDGE: Jacquelyn A. McClinton

HEARING DECISION

Following Petitioner's request for a hearing, this matter is before the undersigned Administrative Law Judge pursuant to MCL 400.9 and 400.37; 42 CFR 431.200 to 431.250; and 45 CFR 205.10. After due notice, a telephone hearing was held on October 13, 2014, from Detroit, Michigan. Petitioner appeared and testified on her own behalf. ██████████ also appeared on behalf of Petitioner. Participants on behalf of the Department of Human Services (Department) included ██████████, Lead Worker.

*During the hearing, Petitioner waived the time period for the issuance of this decision in order to allow for the submission of additional records. **The requested documents were NOT received.** The record closed on May 13, 2019, and the matter is now before the undersigned for a final determination based on the evidence presented.*

ISSUE

Did the Department properly determine that Petitioner was not disabled for purposes of the State Disability Assistance (SDA) benefit program?

FINDINGS OF FACT

The Administrative Law Judge, based on the competent, material, and substantial evidence on the whole record, finds as material fact:

1. On ██████████, 2018, Petitioner submitted an application seeking cash assistance on the basis of a disability.
2. On February 13, 2019, the Disability Determination Service (DDS)/Medical Review Team (MRT) found Petitioner not disabled for purposes of the SDA program (Exhibit A, pp. 20-25).

3. On February 22, 2019, the Department sent Petitioner a Notice of Case Action denying the application based on DDS/MRT's finding of no disability (Exhibit A, pp. 155-158).
4. On March 15, 2019, the Department received Petitioner's timely written request for hearing.
5. Petitioner alleged disabling impairment due to low back pain and hip pain.
6. On the date of the hearing, Petitioner was [REDACTED] old with a [REDACTED] birth date; she is [REDACTED] in height and weighs about [REDACTED]
7. Petitioner did not graduate from high school but did obtain her General Education Diploma (GED).
8. At the time of application, Petitioner was not employed.
9. Petitioner has an employment history of work as cashier and cook with [REDACTED]
10. Petitioner has a pending disability claim with the Social Security Administration.

CONCLUSIONS OF LAW

Department policies are contained in the Department of Health and Human Services Bridges Administrative Manual (BAM), Department of Health and Human Services Bridges Eligibility Manual (BEM), and Department of Human Services Reference Tables Manual (RFT).

The State Disability Assistance (SDA) program, which provides financial assistance for disabled persons, was established by 2004 PA 344. The Department administers the SDA program pursuant to 42 CFR 435, MCL 400.10 *et seq.* and Mich Admin Code, Rules 400.3151 – 400.3180.

Petitioner applied for cash assistance alleging a disability. A disabled person is eligible for SDA. BEM 261 (July 2015), p. 1. An individual automatically qualifies as disabled for purposes of the SDA program if the individual receives Supplemental Security Income (SSI) or Medical Assistance (MA-P) benefits based on disability or blindness. BEM 261, p. 2. Otherwise, to be considered disabled for SDA purposes, a person must have a physical or mental impairment for at least ninety days which meets federal SSI disability standards, meaning the person is unable to do any substantial gainful activity by reason of any medically determinable physical or mental impairment. BEM 261, pp. 1-2; 20 CFR 416.901; 20 CFR 416.905(a).

Determining whether an individual is disabled for SSI purposes requires the application of a five step evaluation of whether the individual (1) is engaged in substantial gainful activity (SGA); (2) has an impairment that is severe; (3) has an impairment and duration

that meet or equal a listed impairment in Appendix 1 Subpart P of 20 CFR 404; (4) has the residual functional capacity to perform past relevant work; and (5) has the residual functional capacity and vocational factors (based on age, education and work experience) to adjust to other work. 20 CFR 416.920(a)(1) and (4); 20 CFR 416.945. If an individual is found disabled, or not disabled, at any step in this process, a determination or decision is made with no need to evaluate subsequent steps. 20 CFR 416.920(a)(4). If a determination cannot be made that an individual is disabled, or not disabled, at a particular step, the next step is required. 20 CFR 416.920(a)(4).

In general, the individual has the responsibility to establish a disability through the use of competent medical evidence from qualified medical sources such as his or her medical history, clinical/laboratory findings, diagnosis/prescribed treatment, prognosis for recovery and/or medical assessment of ability to do work-related activities or, if a mental disability is alleged, to reason and make appropriate mental adjustments. 20 CFR 416.912(a); 20 CFR 416.913. An individual's subjective pain complaints are not, in and of themselves, sufficient to establish disability. 20 CFR 416.908; 20 CFR 416.929(a). Similarly, conclusory statements by a physician or mental health professional that an individual is disabled or blind, absent supporting medical evidence, are insufficient to establish disability. 20 CFR 416.927(d).

Step One

The first step in determining whether an individual is disabled requires consideration of the individual's current work activity. 20 CFR 416.920(a)(4)(i). If an individual is working and the work is SGA, then the individual must be considered not disabled, regardless of medical condition, age, education, or work experience. 20 CFR 416.920(b); 20 CFR 416.971. SGA means work that involves doing significant and productive physical or mental duties and that is done, or intended to be done, for pay or profit. 20 CFR 416.972.

In this case, Petitioner was not working during the period for which assistance might be available. Because Petitioner was not engaged in SGA, she is not ineligible under Step 1, and the analysis continues to Step 2.

Step Two

Under Step 2, the severity and duration of an individual's alleged impairment is considered. If the individual does not have a severe medically determinable physical or mental impairment (or a combination of impairments) that meets the duration requirement, the individual is not disabled. 20 CFR 416.920(a)(4)(ii). The duration requirement for SDA means that the impairment is expected to result in death or has lasted, or is expected to last, for a continuous period of at least 90 days. 20 CFR 416.922; BEM 261, p. 2.

An impairment, or combination of impairments, is severe if it significantly limits an individual's physical or mental ability to do basic work activities. 20 CFR 416.920(a)(4)(ii); 20 CFR 416.920(c). Basic work activities mean the abilities and aptitudes necessary to do most jobs, such as (i) physical functions such as walking,

standing, sitting, lifting, pushing, pulling, reaching, carrying, or handling; (ii) the capacity to see, hear, and speak; (iii) the ability to understand, carry out, and remember simple instructions; (iv) use of judgment; (v) responding appropriately to supervision, co-workers and usual work situations; and (vi) dealing with changes in a routine work setting. 20 CFR 416.921(b). A claim may be denied at Step 2 only if the evidence shows that the individual's impairments, when considered in combination, do not have more than a minimal effect on the person's physical or mental ability to perform basic work activities. Social Security Ruling (SSR) 85-28.

The individual bears the burden to present sufficient objective medical evidence to substantiate the alleged disabling impairments. While the Step 2 severity requirement may be employed as an administrative convenience to screen out claims that are totally groundless solely from a medical standpoint, under the de minimis standard applied at Step 2, an impairment is severe unless it is only a slight abnormality that minimally affects work ability regardless of age, education and experience. *Higgs v Bowen*, 880 F2d 860, 862-863 (CA 6, 1988), citing *Farris v Sec of Health and Human Services*, 773 F2d 85, 90 n.1 (CA 6, 1985). A claim may be denied at Step 2 only if the evidence shows that the individual's impairments, when considered in combination, are not medically severe, i.e., do not have more than a minimal effect on the person's physical or mental ability to perform basic work activities. Social Security Ruling (SSR) 85-28. If such a finding is not clearly established by medical evidence or if the effect of an impairment or combination of impairments on the individual's ability to do basic work activities cannot be clearly determined, adjudication must continue through the sequential evaluation process. *Id.*; SSR 96-3p.

The medical evidence presented at the hearing, *and in response to the interim order*, was reviewed and is summarized below.

On January 2, 2018, Petitioner was seen for an office visit. Petitioner indicated that she was experiencing pain which was traveling down her entire leg instead of stopping at her thigh. The diagnosis included primary generalized osteoarthritis; low back pain and obesity. Recommendation was to continue with physical therapy. (Exhibit A, pp. 60-61).

On January 30, 2018, Petitioner was seen for an office visit. Petitioner discussed being hard of hearing. Petitioner also indicated that she was experiencing low back pain which was waking her up at night. The diagnosis included primary generalized osteoarthritis and obesity. (Exhibit A, pp. 58-59).

On February 26, 2018, Petitioner was seen for an office visit. Petitioner complained of trouble sleeping and pain management. The diagnosis included low back pain and insomnia. Recommendation was to continue with physical therapy. (Exhibit A, pp. 56-57).

On March 26, 2018, Petitioner was seen for an office visit. Petitioner was concerned about family history of scoliosis and requested help with sleeping. The diagnosis

included primary generalized osteoarthritis; obesity; and insomnia. Recommendation was to continue with physical therapy. (Exhibit A, pp. 54-55).

On June 1, 2018, Petitioner was seen for an office visit. Petitioner was requesting that the cyst on her back be looked at; indicating it had been there for the past three weeks. The diagnosis included primary generalized osteoarthritis; low back pain and insomnia. (Exhibit A, pp. 50-51).

On June 12, 2018, Petitioner was seen at [REDACTED] Petitioner received physical therapy on 21 occasions. Treatment consisted of long axis traction on the left hip; bilateral manual lumbar traction; left lumbar facet closing mobilizations; recumbent bike; elliptical; balance activities; hip flexor; iliopsoas; stretches; balance activities; education and therapeutic exercises. Petitioner reported on her last visit that she had been doing better since she started therapy. Petitioner was content with being discharged. (Exhibit A, pp. 94-111).

On July 10, 2018, Petitioner was seen for an office visit. Petitioner complained of low back pain and indicated that she had a lump in the middle of her back. The diagnosis included low back pain and cyst on back. (Exhibit A, pp. 48-49).

On August 6, 2018, Petitioner was seen for an office visit. Petitioner reported that she was still experiencing hip pain and low back pain. Petitioner was provided with medication. The diagnosis indicated low back pain. (Exhibit A, pp. 47-48).

On September 4, 2018, Petitioner was seen for an office visit. Petitioner reported hip pain and lower back pain. The diagnosis indicated primary generalized osteoarthritis and low back pain secondary to a fall at work in January 2015. (Exhibit A, pp. 44-45).

On October 2, 2018, Petitioner was seen for an office visit. Petitioner reported pain in her left hip and indicated that it has been getting worse over the last couple days. Petitioner was provided with medications. The diagnosis included left hip pain. (Exhibit A, pp. 42-43).

On November 6, 2018, Petitioner was seen for an office visit. Petitioner reported low back and hip pain. Petitioner was given medication. The diagnosis included primary generalized osteoarthritis; low back pain and insomnia. (Exhibit A, pp. 40-41).

In consideration of the *de minimis* standard necessary to establish a severe impairment under Step 2, the foregoing medical evidence is sufficient to establish that Petitioner suffers from severe impairments that have lasted or are expected to last for a continuous period of not less than 90 days. Therefore, Petitioner has satisfied the requirements under Step 2, and the analysis will proceed to Step 3.

Step Three

Step 3 of the sequential analysis of a disability claim requires a determination if the individual's impairment, or combination of impairments, is listed in Appendix 1 of

Subpart P of 20 CFR, Part 404. 20 CFR 416.920(a)(4)(iii). If an individual's impairment, or combination of impairments, is of a severity to meet or medically equal the criteria of a listing and meets the duration requirement (20 CFR 416.909), the individual is disabled. If not, the analysis proceeds to the next step.

Based on the medical evidence presented in this case, listing 1.05 (major dysfunction of a joint) was considered. The medical evidence presented does **not** show that Petitioner's impairments meet or equal the required level of severity of any of the listings in Appendix 1 to be considered as disabling without further consideration. Therefore, Petitioner is not disabled under Step 3 and the analysis continues to Step 4.

Residual Functional Capacity

If an individual's impairment does not meet or equal a listed impairment under Step 3, before proceeding to Steps 4 and 5, the individual's residual functional capacity (RFC) is assessed. 20 CFR 416.920(a)(4); 20 CFR 416.945. RFC is the most an individual can do, based on all relevant evidence, despite the limitations from the impairment(s), including those that are not severe, and takes into consideration an individual's ability to meet the physical, mental, sensory and other requirements of work. 20 CFR 416.945(a)(1), (4); 20 CFR 416.945(e).

RFC is assessed based on all relevant medical and other evidence such as statements provided by medical sources, whether or not they are addressed on formal medical examinations, and descriptions and observations of the limitations from impairment(s) provided by the individual or other persons. 20 CFR 416.945(a)(3). This includes consideration of (1) the location/duration/frequency/intensity of an applicant's pain; (2) the type/dosage/effectiveness/side effects of any medication the applicant takes to relieve pain; (3) any treatment other than pain medication that the applicant has received to relieve pain; and (4) the effect of the applicant's pain on his or her ability to do basic work activities. 20 CFR 416.929(c)(3). The applicant's pain must be assessed to determine the extent of his or her functional limitation(s) in light of the objective medical evidence presented. 20 CFR 416.929(c)(2).

Limitations can be exertional, nonexertional, or a combination of both. 20 CFR 416.969a. If individual's impairments and related symptoms, such as pain, affect only the ability to meet the strength demands of jobs (i.e., sitting, standing, walking, lifting, carrying, pushing, and pulling), the individual is considered to have only exertional limitations. 20 CFR 416.969a(b).

The exertional requirements, or physical demands, of work in the national economy are classified as sedentary, light, medium, heavy, and very heavy. 20 CFR 416.967; 20 CFR 416.969a(a). Sedentary work involves lifting no more than 10 pounds at a time and occasionally lifting or carrying articles like docket files, ledgers, and small tools and occasionally walking and standing. 20 CFR 416.967(a). Light work involves lifting no more than 20 pounds at a time with frequent lifting or carrying of objects weighing up to 10 pounds; even though the weight lifted may be very little, a job is in the light category when it requires a good deal of walking or standing, or when it involves sitting most of

the time with some pushing and pulling of arm or leg controls. 20 CFR 416.967(b). Medium work involves lifting no more than 50 pounds at a time with frequent lifting or carrying of objects weighing up to 25 pounds. 20 CFR 416.967(c). Heavy work involves lifting no more than 100 pounds at a time with frequent lifting or carrying of objects weighing up to 50 pounds. 20 CFR 416.967(d). Very heavy work involves lifting objects weighing more than 100 pounds at a time with frequent lifting or carrying of objects weighing 50 pounds or more. 20 CFR 416.967(e).

If an individual has limitations or restrictions that affect the ability to meet demands of jobs **other than** strength, or exertional, demands, the individual is considered to have only nonexertional limitations or restrictions. 20 CFR 416.969a(a) and (c). Examples of non-exertional limitations or restrictions include difficulty functioning due to nervousness, anxiousness, or depression; difficulty maintaining attention or concentration; difficulty understanding or remembering detailed instructions; difficulty in seeing or hearing; difficulty tolerating some physical feature(s) of certain work settings (i.e., unable to tolerate dust or fumes); or difficulty performing the manipulative or postural functions of some work such as reaching, handling, stooping, climbing, crawling, or crouching. 20 CFR 416.969a(c)(1)(i) – (vi). For mental disorders, functional limitation(s) is assessed based upon the extent to which the impairment(s) interferes with an individual's ability to function independently, appropriately, effectively, and on a sustained basis. Id.; 20 CFR 416.920a(c)(2). Chronic mental disorders, structured settings, medication, and other treatment and the effect on the overall degree of functionality are considered. 20 CFR 416.920a(c)(1). Where the evidence establishes a medically determinable mental impairment, the degree of functional limitation must be rated, taking into consideration chronic mental disorders, structured settings, medication, and other treatment. The effect on the overall degree of functionality is evaluated under four broad functional areas: (i) understand, remember, or apply information; (ii) interact with others; (iii) concentrate, persist, or maintain pace; and (iv) adapt or manage oneself. 20 CFR 416.920a(c)(3). For the first three functional areas, a five-point scale is applied (none, mild, moderate, marked, and extreme). 20 CFR 416.920a(c)(4). The last point on each scale represents a degree of limitation that is incompatible with the ability to do any gainful activity. 20 CFR 416.920a(c)(4).

In this case, Petitioner alleges both exertional and nonexertional limitations due to her medical condition. Petitioner testified that she could dress/undress herself; bathe/shower herself; use the bathroom unassisted; eat unassisted; complete chores; prepare simple meals, climb stairs and use her hands. However, Petitioner indicated that she could not stand, walk or sit for more than 30 minutes without experiencing pain. Petitioner also indicated that she has some issues with her ability to concentrate and complete tasks.

Petitioner's testimony regarding her physical limitations were not consistent with the medical evidence presented. Petitioner was successfully discharged from physical therapy in June 2018 indicating that she was doing better. While it is true that after her discharge from physical therapy, Petitioner continued to complain of low back and hip

pain, the medical evidence presented did not provide any objective testing to support a finding that Petitioner is unable to sit, stand or walk for any sustained period of time.

A two-step process is applied in evaluating an individual's symptoms: (1) whether the individual has a medically determinable impairment that could reasonably be expected to produce the individual's alleged symptoms and (2) whether the individual's statement about the intensity, persistence and limiting effects of symptoms are consistent with the objective medical evidence and other evidence on the record from the individual, medical sources and nonmedical sources. SSR 16-3p.

With respect to Petitioner's exertional limitations, it is found based on a review of the entire record that Petitioner maintains the physical capacity to perform light work as defined by 20 CFR 416.967(b). Based on the medical record presented, as well as Petitioner's testimony, Petitioner has mild limitations on her mental ability to perform basic work activities. Petitioner's RFC is considered at both Steps 4 and 5. 20 CFR 416.920(a)(4), (f) and (g).

Step Four

Step 4 in analyzing a disability claim requires an assessment of Petitioner's RFC and past relevant employment. 20 CFR 416.920(a)(4)(iv). Past relevant work is work that has been performed by Petitioner (as actually performed by Petitioner or as generally performed in the national economy) within the past 15 years that was SGA and that lasted long enough for the individual to learn the position. 20 CFR 416.960(b)(1) and (2). An individual who has the RFC to meet the physical and mental demands of work done in the past is not disabled. *Id.*; 20 CFR 416.960(b)(3); 20 CFR 416.920. Vocational factors of age, education, and work experience, and whether the past relevant employment exists in significant numbers in the national economy are not considered. 20 CFR 416.960(b)(3).

Petitioner has not been employed during the past four years. However, Petitioner's prior work history in the 15 years prior to 2015 consists of work as a cashier and cook. Petitioner's work as a cashier and cook, which consisted of prolonged standing, required light physical exertion.

Based on the RFC analysis above, Petitioner's exertional RFC limits her to no more than light work activities. As such, Petitioner is able to perform past relevant work. Accordingly, Petitioner is not disabled at Step 4 and the assessment ends.

DECISION AND ORDER

The Administrative Law Judge, based on the above Findings of Fact and Conclusions of Law, and for the reasons stated on the record, if any, finds Petitioner not disabled for purposes of the SDA benefit program.

Accordingly, the Department's determination is **AFFIRMED**.
