

GRETCHEN WHITMER  
GOVERNOR

STATE OF MICHIGAN  
DEPARTMENT OF LICENSING AND REGULATORY AFFAIRS  
MICHIGAN OFFICE OF ADMINISTRATIVE HEARINGS AND RULES

ORLENE HAWKS  
DIRECTOR

Date Mailed: November 15, 2019  
MOAHR Docket No.: [REDACTED]  
Agency No.: 114474763  
Petitioner: [REDACTED]

**ADMINISTRATIVE LAW JUDGE: Carmen G. Fahie**

### **HEARING DECISION**

Following Petitioner's request for a hearing, this matter is before the undersigned Administrative Law Judge pursuant to MCL 400.9 and 400.37; 42 CFR 431.200 to 431.250. After due notice, a telephone hearing was held on October 16, 2019, from Lansing, Michigan. Petitioner was represented by himself. The Department of Health and Human Services (Department) was represented by Brad Reno, Hearing Facilitator.

### **ISSUE**

Whether the Department properly determined that Petitioner was not disabled for purposes of the State Disability Assistance (SDA) benefit programs?

### **FINDINGS OF FACT**

The Administrative Law Judge, based on the competent, material, and substantial evidence on the whole record, finds as material fact:

1. On [REDACTED], 2019, Petitioner applied for SDA.
2. On August 27, 2019, the Medical Review Team (MRT) denied Petitioner's application for SDA per BEM 261 because the nature and severity of Petitioner's impairments would not preclude work activity at the above stated level for 90 days and is capable of performing his past relevant work per 20 CFR 416.920(e).
3. On September 9, 2019, the Department Caseworker sent Petitioner a notice that his application was denied.
4. On September 11, 2019, the Department received a hearing request from Petitioner, contesting the Department's negative action.

5. Petitioner is a 60-year-old man whose date of birth is [REDACTED], 1960. Petitioner is 5' 10" tall and weighs 220/225 pounds. Petitioner completed High School. Petitioner can read and write and do basic math. Petitioner was last employed as a cashier at the light level in March 2019, which is his pertinent work history.
6. Petitioner's alleged impairments are surgery for left hip on August 22, 2019 where right hip surgery is still needed, degenerative joint disease in joint, diabetes type II, arthritis all over.
7. Petitioner was seen by his treating physician on March 27, 2019. He was seen because of a fall where he slipped and fell at work. It took Petitioner 20 minutes to get up. He has since been having lower back pain. He is currently taking Norco, but it is not helping. He has a long-standing history of chronic low back pain. Petitioner was recently admitted to the hospital for worsening pain and increased lower extremity weakness. He was evaluated by a neurosurgeon who recommended conservative treatment. Petitioner was ultimately discharged with medication. Three days ago, Petitioner had a mechanical fall to concrete. He fell backwards and landed directly on his "tailbone". He stated that he is having the same pain that he has always had, but that it is more intense. His pain worsens with movement. He ambulates with a slow gait. Petitioner presents with acute exacerbation of his back pain. His physical examination was normal except for the notable mild tenderness to palpitation along the lumbar spine and paraspinal muscles. His neuro was intact. He is able to ambulate albeit slowly and somewhat painfully. Overall, there were no acute findings on exam with no requirement for imaging today. He was given additional medication and short burst of steroids for anti-inflammatory properties. Department Exhibit 1, pgs. 614-615.
8. On August 11, 2019, Petitioner was seen by his treating physician for a one-month follow-up for his medication refills. He was requesting his surgery clearance form, script for a new walker, and a printout of his medication list. He's complaining of low back pain and bilateral hip pain for which he'd like a Toradol injection. Department Exhibit 1, pgs. 1017-1021.
9. On August 22, 2019, Petitioner had his left hip replaced. The procedure went well. He was admitted to the joint floor for routine post-op care with antibiotics and DVT prophylaxis. Petitioner Exhibit 1, pgs. B-D.

### **CONCLUSIONS OF LAW**

Department policies are contained in the Department of Human Services Bridges Administrative Manual (BAM), Department of Human Services Bridges Eligibility Manual (BEM), and Department of Human Services Reference Tables Manual (RFT).

The State Disability Assistance (SDA) program, which provides financial assistance for disabled persons, was established by 2004 PA 344. The Department administers the SDA program pursuant to 42 CFR 435, MCL 400.10 *et seq.* and Mich Admin Code,

Rules 400.3151 – 400.3180. A person is considered disabled for SDA purposes if the person has a physical or mental impairment which meets federal Supplemental Security Income (SSI) disability standards for at least ninety days. Receipt of SSI benefits based on disability or blindness, or the receipt of MA benefits based on disability or blindness, automatically qualifies an individual as disabled for purposes of the SDA program.

The Department conforms to State statute in administering the SDA program.

2000 PA 294, Sec. 604, of the statute states:

Sec. 604. (1) The department shall operate a state disability assistance program. Except as provided in subsection (3), persons eligible for this program shall include needy citizens of the United States or aliens exempted from the supplemental security income citizenship requirement who are at least 18 years of age or emancipated minors meeting 1 or more of the following requirements:

- (a) A recipient of supplemental security income, social security, or medical assistance due to disability or 65 years of age or older.
- (b) A person with a physical or mental impairment which meets federal supplemental security income disability standards, except that the minimum duration of the disability shall be 90 days. Substance abuse alone is not defined as a basis for eligibility.

Pursuant to Federal Rule 42 CFR 435.540, the Department uses the Federal Supplemental Security Income (SSI) policy in determining eligibility for disability. Under SSI, disability is defined as:

...the inability to do any substantial gainful activity by reason of any medically determinable physical or mental impairment which can be expected to result in death or which has lasted or can be expected to last for a continuous period of not less than 12 months.... 20 CFR 416.905.

A set order is used to determine disability. Current work activity, severity of impairments, residual functional capacity, past work, age, or education and work experience are reviewed. If there is a finding that an individual is disabled or not disabled at any point in the review, there will be no further evaluation. 20 CFR 416.920.

Medical evidence may contain medical opinions. Medical opinions are statements from physicians and psychologists or other acceptable medical sources that reflect judgments about the nature and severity of the impairment(s), including symptoms,

diagnosis and prognosis, what an individual can do despite impairment(s), and the physical or mental restrictions. 20 CFR 416.927(a)(2).

The Administrative Law Judge is responsible for making the determination or decision about whether the statutory definition of disability is met. The Administrative Law Judge reviews all medical findings and other evidence that support a medical source's statement of disability. 20 CFR 416.927(e).

For mental disorders, severity is assessed in terms of the functional limitations imposed by the impairment. Functional limitations are assessed using the criteria in paragraph (B) of the listings for mental disorders (descriptions of restrictions of activities of daily living, social functioning; concentration, persistence or pace; and ability to tolerate increased mental demands associated with competitive work). 20 CFR, Part 404, Subpart P, Appendix 1, 12.00(C).

The residual functional capacity is what an individual can do despite limitations. All impairments will be considered in addition to ability to meet certain demands of jobs in the national economy. Physical demands, mental demands, sensory requirements and other functions will be evaluated. 20 CFR 416.945(a).

To determine the physical demands (exertional requirements) of work in the national economy, we classify jobs as sedentary, light, medium and heavy. These terms have the same meaning as they have in the Dictionary of Occupational Titles, published by the Department of Labor. 20 CFR 416.967.

Pursuant to 20 CFR 416.920, a five-step sequential evaluation process is used to determine disability. An individual's current work activity, the severity of the impairment, the residual functional capacity, past work, age, education and work experience are evaluated. If an individual is found disabled or not disabled at any point, no further review is made.

The first step is to determine if an individual is working and if that work is "substantial gainful activity" (SGA). If the work is SGA, an individual is not considered disabled regardless of medical condition, age or other vocational factors. 20 CFR 416.920(b).

Secondly, the individual must have a medically determinable impairment that is "severe" or a combination of impairments that is "severe." 20 CFR 404.1520(c). An impairment or combination of impairments is "severe" within the meaning of regulations if it significantly limits an individual's ability to perform basic work activities. An impairment or combination of impairments is "not severe" when medical and other evidence establish only a slight abnormality or a combination of slight abnormalities that would have no more than a minimal effect on an individual's ability to work. 20 CFR 404.1521; Social Security Rulings (SSRs) 85-28, 96-3p, and 96-4p. If the Petitioner does not have a severe medically determinable impairment or combination of impairments, the Petitioner is not disabled. If the Petitioner has a severe impairment or combination of impairments, the analysis proceeds to the third step.

The third step in the process is to assess whether the impairment or combination of impairments meets a Social Security listing. If the impairment or combination of impairments meets or is the medically equivalent of a listed impairment as set forth in Appendix 1 and meets the durational requirements of 20 CFR 404.1509, the individual is considered disabled. If it does not, the analysis proceeds to the next step.

Before considering step four of the sequential evaluation process, the trier must determine the Petitioner's residual functional capacity. 20 CFR 404.1520(e). An individual's residual functional capacity is his ability to do physical and mental work activities on a sustained basis despite limitations from his impairments. In making this finding, the trier must consider all of the Petitioner's impairments, including impairments that are not severe. 20 CFR 404.1520(e) and 404.1545; SSR 96-8p.

The fourth step of the process is whether the Petitioner has the residual functional capacity to perform the requirements of his past relevant work. 20 CFR 404.1520(f). The term past relevant work means work performed (either as the Petitioner actually performed it or as is it generally performed in the national economy) within the last 15 years or 15 years prior to the date that disability must be established. If the Petitioner has the residual functional capacity to do past relevant work, then the Petitioner is not disabled. If the Petitioner is unable to do any past relevant work or does not have any past relevant work, the analysis proceeds to the fifth step.

In the fifth step, an individual's residual functional capacity is considered in determining whether disability exists. An individual's age, education, work experience and skills are used to evaluate whether an individual has the residual functional capacity to perform work despite limitations. 20 CFR 416.920(e).

Here, Petitioner has satisfied requirements as set forth in steps one and two of the sequential evaluation. However, Petitioner's impairments do not meet a listing as set forth in Appendix 1, 20 CFR 416.926 for step 3. Therefore, vocational factors will be considered to determine Petitioner's residual functional capacity to do relevant work and past relevant work.

In the present case, Petitioner was seen by his treating physician on March 27, 2019. He was seen because of a fall where he slipped and fell at work. It took Petitioner 20 minutes to get up. He has since been having lower back pain. He is currently taking Norco, but it is not helping. He has a long-standing history of chronic low back pain. Petitioner was recently admitted to the hospital for worsening pain and increased lower extremity weakness. He was evaluated by a neurosurgeon who recommended conservative treatment. Petitioner was ultimately discharged with medication. Three days ago, Petitioner had a mechanical fall to concrete. He fell backwards and landed directly on his "tailbone". He stated that he is having the same pain that he has always had, but that it is more intense. His pain worsens with movement. He ambulates with a slow gait. Petitioner presents with acute exacerbation of his back pain. His physical examination was normal except for the notable mild tenderness to palpitation along the lumbar spine and paraspinal muscles. His neuro was intact. He is able to ambulate

albeit slowly and somewhat painfully. Overall, there were no acute findings on exam with no requirement for imaging today. He was given additional medication and short burst of steroids for anti-inflammatory properties. Department Exhibit 1, pgs. 614-615.

On August 11, 2019, Petitioner was seen by his treating physician for a one-month follow-up for his medication refills. He was requesting his surgery clearance form, script for a new walker, and a printout of his medication list. He's complaining of low back pain and bilateral hip pain for which he'd like a Toradol injection. Department Exhibit 1, pgs. 1017-1021.

On August 22, 2019, Petitioner had his left hip replaced. The procedure went well. He was admitted to the joint floor for routine post-op care with antibiotics and DVT prophylaxis. Petitioner Exhibit 1, pgs. B-D.

The Administrative Law Judge finds that Petitioner is unable to perform work. He had his left hip replaced on August 22, 2019. He still has to have his right hip replaced after he has recovered from his left hip replacement. Two months after his surgery, he is still using a walker with a chair according to his testimony at the hearing. He is still in physical therapy for his left hip. As a result, he meets duration for SDA.

It is the finding of this Administrative Law Judge, based upon the medical evidence and objective, physical and psychological findings that Petitioner testified that he does perform most of his daily living activities. Petitioner does feel that his condition has worsened because he is walking slow and uses a walker with a chair. Petitioner stated that he does not have any mental impairments. Petitioner has not smoked cigarettes since his early 20s when he smoked for two to three months. He drank alcohol once when he was 21 years of age. He stopped using illegal and illicit drugs of marijuana in 2017. Petitioner did not feel there was any work he could do.

At Step 4, this Administrative Law Judge finds that Petitioner has established that he cannot perform any of his prior work. He was previously employed as a cashier at the light level in March 2019, which is his pertinent work history. He has issues with arthritis and degenerative joint disease in his back. He had a recent left hip replacement on August 22, 2019. He still needs a right hip replacement. Therefore, Petitioner is not disqualified from receiving disability at Step 4. Petitioner is not capable of performing his past work. However, the Administrative Law Judge will still proceed through the sequential evaluation process to determine whether or not Petitioner has the residual functional capacity to perform some other less strenuous tasks than in his prior jobs.

The objective medical evidence on the record is sufficient that Petitioner lacks the residual functional capacity to perform some other less strenuous tasks than in him previous employment or that he is physically unable to do any tasks demanded of him. Petitioner's testimony as to his limitation indicates his limitations are exertional.

In the final step of the analysis, the trier of fact must determine if the Petitioner's impairment(s) prevent the Petitioner from doing other work. 20 CFR 416.920(f). This determination is based upon the Petitioner's:

1. residual functional capacity defined simply as "what can you still do despite your limitations?" 20 CFR 416.945;
2. age, education, and work experience, 20 CFR 416.963-965; and
3. the kinds of work which exist in significant numbers in the national economy which the Petitioner could perform despite her limitations. 20 CFR 416.966.

The residual functional capacity is what an individual can do despite limitations. All impairments will be considered in addition to ability to meet certain demands of jobs in the national economy. Physical demands, mental demands, sensory requirements and other functions will be evaluated. 20 CFR 416.945(a).

To determine the physical demands (exertional requirements) of work in the national economy, we classify jobs as sedentary, light, medium and heavy. These terms have the same meaning as they have in the Dictionary of Occupational Titles, published by the Department of Labor. 20 CFR 416.967.

**Sedentary work.** Sedentary work involves lifting no more than 10 pounds at a time and occasionally lifting or carrying articles like docket files, ledgers, and small tools. Although a sedentary job is defined as one which involves sitting, a certain amount of walking and standing is often necessary in carrying out job duties. Jobs are sedentary if walking and standing are required occasionally and other sedentary criteria are met. 20 CFR 416.967(a).

**Light work.** Light work involves lifting no more than 20 pounds at a time with frequent lifting or carrying of objects weighing up to 10 pounds. Even though the weight lifted may be very little; a job is in this category when it requires a good deal of walking or standing, or when it involves sitting most of the time with some pushing and pulling of arm or leg controls. 20 CFR 416.967(b).

**Medium work.** Medium work involves lifting no more than 50 pounds at a time with frequent lifting or carrying of objects weighing up to 25 pounds. If someone can do medium work, we determine that he or she can also do sedentary and light work. 20 CFR 416.967(c).

**Heavy work.** Heavy work involves lifting no more than 100 pounds at a time with frequent lifting or carrying of objects

weighing up to 50 pounds. If someone can do heavy work, we determine that he or she can also do medium, light, and sedentary work. 20 CFR 416.967(d).

At Step 5, Petitioner cannot meet the physical requirements of light work, based upon Petitioner's physical abilities. Under the Medical-Vocational guidelines, an advanced age individual with a high school education, and an unskilled work history, who is limited to light work, is considered disabled. 20 CFR 404, Subpart P, Appendix 2, Rule 202.04. Using the Medical-Vocational guidelines as a framework for making this decision and after giving full consideration to the Petitioner's physical impairments, the Administrative Law Judge finds that Petitioner could not perform light work and that Petitioner does meet the definition of disabled under the SDA program.

### **DECISION AND ORDER**

The Administrative Law Judge, based on the above Findings of Fact and Conclusions of Law, and for the reasons stated on the record, if any, finds Petitioner disabled for purposes of the SDA benefit program. Petitioner could not perform light work and Petitioner does meet the definition of disabled under the SDA program. Petitioner had his left hip replaced on August 22, 2019, and still needs to have his right hip replaced, which meets the duration for SDA.

Accordingly, the Department's determination is **REVERSED**.

THE DEPARTMENT IS ORDERED TO BEGIN DOING THE FOLLOWING, IN ACCORDANCE WITH DEPARTMENT POLICY AND CONSISTENT WITH THIS HEARING DECISION, WITHIN 10 DAYS OF THE DATE OF MAILING OF THIS DECISION AND ORDER:

1. Initiate a redetermination of Petitioner's eligibility for SDA retroactive to his application dated April 10, 2019, with a medical review in December 2020.
2. Based on policy, the Department should provide Petitioner with written notification of the Department's revised eligibility determination and issue Petitioner any retroactive benefits he may be eligible to receive, if any.
